DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st-August, through Sunday, 28th-August there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP8, VP9, VR, VU, XE, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

7Q, MALAWI. QSL Manager Allan, G0IAS, informs OPDX that he dropped Harry, 7Q7HB (G0JMU), at the airport on August 23rd, for another trip to 7Q-land this past week. Length of stay will be about 3 months at Club Makokola. Activity will probably be on 20/17/15 meters using the Digital modes and CW. QSL as usual is "ONLY DIRECT" to G0IAS with sufficient funds for return

cards. NO BUREAU cards. NO eQSLs. Just old fashioned paper cards DIRECT! Allan states, "SORRY NO RETURN POSTAGE = NO CARD." G0IAS also handles the cards for Malcolm, 7Q7MH (Allan states, "ALL that I have received have now been returned."). Allan also mentions that 1 USD is no longer enough postage for return, even into EUROPE. NOR are envelopes with local currency on them, he has half a dozen with Spanish and German stamps... the ROYAL MAIL will NOT accept them.

9H, MALTA. Raul, IC8ATA, will be active as 9H3AT from Malta (EU-023) between August 29th and September 5th. Activity will be holiday style on the HF bands, SSB only and a focus on 17/12 meters. Suggested frequencies are: 7060, 14160, 18140, 21160, 24940 and 28460. He will use a FT-450D into a Multi-Band Fishing Rod antenna. QSL via his home callsign, direct or by the Bureau. For more details, see: http://www.mdxc.org/9h3at

9M6, EAST MALAYSIA. Hideto, JF2QNM, will be active as 9M6/JF2QNM during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via JF2QNM.

CJ3, CANADA (Special Event). Look for CJ3A to be active during the entire month of October 2011. Activity is to celebrate the Centennial of Parks in Canada (1911-2011). Operations will be on all HF bands. QSL via VE3LA. For more details about the celebration, visit the "Parks Canada" Web page at: http://www.pc.gc.ca/PROGS/CELEBRATIONS/INDEX.ASPX

DR16, GERMANY (Special Event). Station event station DR16BENE has been active since July 1st, and will continue through October 31st. Activity is to celebrate the visit of Pope Benedict XVI to Freiburg at the end of September. Operations have been from the club station DK0FR on 80/40/30/20/15/12/10 meters using SSB and PSK31. QSL via DL7BC.

EX20, KYRGYZSTAN (Special Event). Special event station, EX20ID, is now active until September 4th. Activity is to celebrate the 20th anniversary of the Independent Republic of Kyrgyzstan. Members of the "Amateur Radio Union of Kyrgyzstan" have established a "Kyrgyzstan Award" which can be obtained by any licensed ham or SWL around the World. Complete details are available at: http://www.qrz.com/db/EX20ID

H40, TEMOTU PROVINCE. Jacek, SP5DRH, will once again try to activate Pigeon Island (OC-065), Reef Islands, in the Temotu Province between October 8-21st. Operation last year had to be cancelled due to "dramatic plane delay" that destroyed Jacek/SP5DRH and Jerzy/SP3BQ plans. Jacek's main target will be Europe on 160m, some 80m is planned to. Operations will be mainly CW, and RTTY on 15/17 meters. QSL via SP7DQR ONLY. For more details and updates, watch: http://www.sp5drh.com/h40

IOTA NEWS.....
AS-066. Gennady, R3BY, is expected to be active as R3BY/0 from Antipenko Island between August 28th and September 4th. Activity will be on 80-17 meters using mostly CW. QSL via his home callsign.

EU-110. Italian operators Ampelio/IK3JBP, Calogero/IW3ILP, Silverio/IK3IUL and Giacomo/IZ3DBA will be active as 9A/homecall from

Porer Island between October 14-16th. Activity will be on
80-10 meters using CW and SSB. QSL via the operator's home
callsign.

NA-041. Rick, K6VVA, will be active as K6VVA/KL7 from Revillagigedo
Island (not the Mexican XF4) between September 6-8th. This is
his third trip to NA-041. Activity will be mainly CW on the
30/20/17 meter bands and a focus on the EU and JA stations.
QSL via N6AWD, direct or by the Bureau. DO NOT send QSLs to
K6VVA. For more details and updates, watch the following Web
pages: http://www.k6vva.com/iota/na041
http://twitter.com/#!/k6vva

NA-137. Wayne, K9YNF, will be active as K9YNF/1 from Peaks Island in
the Maine State West IOTA Group between September 25-30th. This
will be Wayne's 4th IOTA DXpedition. Activity will be on 14260
and 18128 kHz SSB (+/- QRM) and 14070.15 kHz PSK31. He plans
to use a Elecraft K3/100 and a TransWorld vertical dipole. QSL
via K9YNF. Skeds can be made via <wayne@longshortstories.com>.

OC-185. Craig, VK4LDX/VK8PDX, will be on another IOTA DXpedition next
year this time from Bremer Islets as VK8PDX/p between April
18-23rd (2012). He will use his Spiderbeam tri-bander (for
20/15/10m) on a 10m Spiderbeam mast. Modes will probably be
on SSB, PSK31 and RTTY (he doesn't do CW). QSL via his home
callsign, direct or by the Bureau. He does not use eQSL or
LoTW. For updates, watch his Blog Web page at:
http://oc185.blogspot.com

JW, SVALBARD (Update). Morten, LA9DFA, will be active as JW9DFA from
Spitsbergen (EU-026) between September 14-19th. This is his third trip
to the Arctic islands (1993, 2006). Activity will be on the HF bands and
possibly 6 meters using mainly CW with some SSB and RTTY. He also plans
to be active during the Scandinavian Activity CW Contest (September
17-18th) as JW3C. QSL both callsigns via LA9DFA, direct, by the Bureau
or LoTW.

KH6BZF PROPAGATION FORECAST/REPORT (August 29-September 4th)....
Aug 29 AN SOLAR REFERENCE KEYS
Aug 30 AN --------------------
Aug 31 AN BN - Below Normal
Sep 01 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 02 AN-HN LN - Low Normal
Sep 03 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 04 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between

7-16 and "K" index will be 3 or less

N1, UNITED STATED (Special Event). Members of the Symbol Technologies ARC will be honoring the lives lost during the horrific events of September 11th, 2001, with activating special event station N1Y between 1400z (10:00 am local time) Saturday, September 10th, and 0400z (11:00 am local time) Sunday, September 11th. Suggested frequencies are: 3911, 7240, 14070 and 50135 kHz, as well as D-Star REF10C. QSL direct to: STARC, One Motorola Plaza, B-13, Holtsville, NY 11742 (with a #10 SASE). PLEASE NOTE: There will be a reading of one name of the fallen with every QSO.

OJ, MARKET REEF (Op cancelled!). Operators Hans/PA0VHA, Steef/PA2A, Jack/PA3BAG, Will/PA3ALK and Wim/PA2AM, who were expected to be active as OJ0CC from Market Reef (EU-053) between August 27th and September 2nd, had to cancel their activity due to accident. Reports indicate that Will, PA3ALK, has broken his leg (something about a sheep attacked him).

OX, GREENLAND. Operators Jiri/OK1IEC, Jan/OK1JK, Jiri/OK1JST and Vaclav/OK1VVT plan to be active as OX4OK and possibly OX/homecall from the OX2A club station at the Kangelussuaq Airport between September 16-26th. Activity will be on all bands, 80-10 meters, depending on propagation, and 2m EME (JT65b). QSL via their home callsigns or via OK1JST.

P4, ARUBA. John, KK9A, will once again be active as P40A starting October 25th, through the CQWW DX SSB Contest (October 29-30th). In the contest, he will be a Single-Op/All-Band entry. Outside of the contest, activity will be on all bands using CW and SSB. QSL via WD9DZV.

JX5O NOW ON LOTW! Stan, SQ8X, announced this past week that the JX5O DXpedition to Jan Mayen Island has been successfully validated at the ARRL DXCC Desk and has received a DXCC credit. He also mentioned that the JX5O log has been uploaded to LoTW. Stan also mentions on the JX5O Web page: "Another update regards a major log check-in/corrections. I have received a couple of dozen inquires and went through all of them and accepted some of them. Please check our latest log update at to see the changes provided at <http://www.clublog.org/charts/?c=JX5O#r>. All changes include corrections to ALL ACCEPTED check-in requests received by August 27, 2011. Some news regarding the JX5O QSL status: The cards are about to be printed in the beginning of September. Once we receive them from the printing shop, shipping starts immediately. Be patient, please."

9M0M QSLS. Paul, W8AEF, informs OPDX that due to John, NA7DB's, poor health, he has assumed QSL Manager duties for the 2001 9M0M DXpedition. All QSL requests received by NA7DB, both direct and via the bureau to this date have been responded to, and the 9M0M log has been uploaded to LoTW.

QSL NH7YJ via JK1HIY direct. Operator was Taka Tumura, JK1HIY, Oahu Island (OC-19). The special suffix in the callsign NH7YJ stands for "Young Japanese".

QSL RECEIVED VIA LoTW: 5X1VJ, A92IO, CR6K, EA3GHZ, EA3IN, F5TTI, FK8CP, FM5CD, HH2/PYSB, JI2ZJS, JX5O, S50A, TY1KS, YN2PR and ZS3Z

QSLS RECEIVED VIA MAIL: 5N7M, 5W0IR, 9L5MS, 9Y4VU, CO8LY, EH8BPX, FP/K9OT, IW5DHN, JD1BMH, JY5HX, LU1ZI, PJ4/N5WR, PP0T, RI1ANC, V85SS, VU2PAI and ZB2FK

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SOUTH PACIFIC TOUR (Update/Change). Operators Pista/HA5AO and George/HA5UK, who planned to activate Fiji, Tuvalu, Western Kiribati and possibly Banaba, between October 1st and November 15th (OPDX.1010), have now reschedule their DXpedition to January/February 2012. This due to difficulties in organizing and making arrangement for the transportation to Banaba. Excerpts from their Web page states they plan to operate from Tuvalu on January 12th, as T2HA. They will fly back to Fiji on January 26th, and do 3 days of operations as 3D2HA, before leaving for Tarawa, on January 31st. Operations from West Kiribati will last until February 23rd. They will attempt to go over to Banaba Island for 7-10 days within this period. The Web page states (edited), "We will do our best to get over to Banaba, but the exact time of T33HA Banaba operation can be announced from Tarawa only. Two stations will be on the air from 160-10 meters bands on CW, SSB, RTTY and some PSK and SSTV modes. The landing permit to Banaba, licenses and flight tickets to Fiji, Tuvalu and Tarawa are in hand. The radios, antennas, PAs and other technical stuff have already

been put together and packed. The weight of these packages exceeds the 100 kg (200 pounds). We will bring everything with us, as excess baggages. This DXpedition is not an expedition with dozens of operators, neither family holiday. It will be a 'simple two men show'. However, our 8 weeks long operating plan, working from 3 different rare countries, makes it very expensive. We will cover the flight tickets, accommodations and other personal expenses. The excess baggage fees and the transfer to Banaba are extremely expensive. Thus we are seeking support from DX Foundations and Organization to help us to cover the extremely high transfer expenses to Banaba and the excess baggage fees. Personal contributions are also welcome." For more details and updates, visit: http://ha5ao.novolab.hu

T8, PALAU. Atsu, JA8FAA, will be active as T88GO from Palau (OC-009) between September 16-19th. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign.

T8, PALAU. Ulf, DL5AXX, will be active as T88UE from the Palau Rental Shack (See http://palau.rental-shack.com/english) between September 18-27th. He will also be active as T8XX for CQWW RTTY Contest (September 24-25th). QSL both callsigns via DL5AXX.

TU, IVORY COAST. An Italian team consisting of Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT will be active as TU2T from the Ivory Coast sometime between October and November (dates to be confirmed). Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1823, 3505, 7005, 10106, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945 and 28495 kHz
RTTY - 10140, 14080, 18104, 21080, 24902 and 2808 kHz
6m - 50105 kHz - CW, SSB and Beacon
Pilot station will be Art, IK7JWY. QSL via I2YSB, direct (2 USDs Europe, 3 USDs outside Europe and SAE [NO IRCs and stamps) or via the OQRS. For more details, visit the TU2T Web page at: http://www.i2ysb.com/joomla5
Also, join the TU2T forum at:
http://www.hamradioweb.org/forums/forumdisplay.php?f=62

TX8, NEW CALEDONIA (Special Event). Look for Alain, FK8GN, to be active as TX8GN during the 16th South Pacific Games between now and September 10th. There may be other stations on the air switching their prefix from FK to TX to commemorate this event.

VK9L, LORD HOWE ISLAND. Merv, N6NO, will be celebrating his 75th birthday and 60th year in ham radio by activating Lord Howe Island (OC-004) as VK9OL between September 10-18th. Activity will be on 40-10 meters with a focus on CW and openings to Europe. QSL via N6NO. His log will be put on LoTW after his return and validation.

VP9, BERMUDA. Les, N1SV, will once again be active as VP9/N1SV from Bermuda (NA-005) between October 28-31st. QSL via his home callsign. With lessons learned from last year, this year during the CQWW DX SSB Contest (October 29-30th) he will sign VP9I. QSL via N1HRA.

XU, CAMBODIA. A JA team consisting of Masumi/JA3AVO, Kunio/JA1CJA, Lida/JA3BZO, Nishimura/JA3HJI, Nakasako/JA3UJR and Tatsuo/JA3ARJ will be active from the XU7AAA rental shack between January 12-22nd (2012). More details will be forthcoming.

YJ, VANUATU (Update). A team of 8 amateur radio operators from Australia and the USA will be activating YJ0VK from Port Vila on Efate Island between September 30th and October 12th. Earlier updates indicate that the team will operate with 3 stations on bands from 160-10m, using CW, SSB and RTTY/PSK31. They do not have plans to activate 6m. The YJ0VK team has obtained authorization to operate on 60m. QSL via VK2CA, direct or by the Bureau. LoTW log upload will be available on completion of operation. For updates, visit the YJ0VK Web page at:
http://yj0vk.odxg.org/yj0vk2011/default.html

SARL NEWS - SUNDAY 28 AUGUST 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with regret that we have to announce that the key of Johan Fritz, ZS6NF, went silent on Wednesday 24 August in the age of 89 years. Our sincerest condolences to his children, grand children and many friends, especially those of the morning chat group on 3 and all the sixes.

(PAUSE)

In the news today:

NEW BREAKTHROUGH IN SUNSPOT PREDICTION

ICASA STILL PROCRASTINATING ON AMATEUR REGULATIONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEW BREAKTHROUGH IN SUNSPOT PREDICTION

A PhD student at Stanford University, Stathis Ilonidis, has found a way to detect sunspots before they are visible to the human eye. His findings could lead to significant advances in space weather forecasting.

Sunspots are the "butterfly's wings" of solar storms. Visible to the human eye as dark blemishes on the solar disk, sunspots are the starting points of explosive flares and coronal mass ejections (CMEs) that sometimes hit our planet 150 million kilometers away.

Astronomers have been studying sunspots for more than 400 years, and they have pieced together their basic characteristics: Sunspots are planet-sized islands of magnetism that float in solar plasma. Although

the details are still debated, researchers generally agree that sunspots are born deep inside the sun via the action of the sun's inner magnetic dynamo. From there they bob to the top, carried upward by magnetic buoyancy; a sunspot emerging at the stellar surface is a bit like a submarine emerging from the ocean depths.

The analysis technique is called "time-distance helioseismology" It is similar to an approach widely used in earthquake studies. Just as seismic waves traveling through the body of Earth reveal what is inside the planet, acoustic waves traveling through the body of the sun can reveal what is inside the star.

Submerged sunspots have a detectable effect on the sun's inner acoustics—namely, sound waves travel faster through a sunspot than through the surrounding plasma. A big sunspot can leapfrog an acoustic wave by 12 to 16 seconds. By measuring these time differences, researchers can find the hidden sunspot.

There are limits to the technique, it is possible to forecast that a big sunspot is coming, but if a particular sunspot will produce an Earth-directed flare can not be predicted.

So far they have detected five emerging sunspots — four with SOHO and one with SDO. Of those five, two went on to produce X-class flares, the most powerful kind of solar explosion. This encourages the team to believe their technique can make a positive contribution to space weather forecasting.

ICASA STILL PROCRASTINATING ON AMATEUR REGULATIONS

ICASA has not yet finalised the corrections to the amateur radio regulations. A spokes person told the SARL this week that corrections to the regulations have been referred back to the Engineering Division. He also said that they are seeking an interim arrangement and approval from the Council to issue the outstanding ZU licenses.

The SARL earlier announced that students sitting the October RAE will be examined on the old regulations.

SARL WEB

The upgrading process is nearly complete. There is still some functionality that is not working as it should. This is being attended to and we expect to have resolved all issues by next weekend.

GAUTENG RTA ON SATURDAY 10 SEPTEMBER

The last SARL Radio Technology in Action Symposium will be held at the National Amateur Radio centre and the Sentech Conference centre on Saturday 10 September 2011. Put the date in your diary now. Get more details in next Sunday's SARLNEWS or on the web after mid week.

COMPETITION NEWS

YOUTH SPRINT NEXT SATURDAY

The ZS6JVT Youth Sprint will be held on Saturday 3 September from 10:00 - 12:00 on 7 130 - 7 200 kHz. Contacts on other frequencies are not valid. Not more than 5 contacts may be made on any one frequency at a time. Stations must move around the frequency range for the contest but may return to a previous frequency.

The rules are available on www.sarl.org.za <http://www.sarl.org.za/> or visit www.hamradio.org.za <http://www.hamradio.org.za/> for a copy of the rules and the lucky draw prizes.

Stations taking part should exchange a signals report and the operator's age. Scoring is in favour of radio amateurs under the age of 26 as follows: QSO between two stations that are under the age of 26 = 5 points. QSO between a station under 26 and a station over 26 - 3 points, QSO between two stations older than 26 = 1 point. QSO with ZS6JVT = 10 points.

Log should be sent to telesat@cybersmart.co.za or by snail mail to the JVT Youth Competition, Technical High School John Vorster, P O Box 31714, Totiusdal, 0134. Closing date for logs is 18 September 2011. Participants should include their email addresses.

Participants under 26 years of age who submit logs will take part in a lucky draw for two book prizes, the ARRL Basic Antenna Book, made available by the South African Amateur Radio Development Trust.

You are also invited to take part in a photographic competition. Send a high resolution picture of the participant operating during the ZS6JVT Youth Sprint to saardt@intekom.co.za before 15 September and you could also win the ARRL Basic Antenna book,

SARL HF CW CONTEST.

The HF CW Contest is on the air this afternoon from 15:00 to 18:00 CAT. Activity is on 20, 40 and 80 metres and the exchange is a RST report and a serial number starting at 001. There are four classes of participation - single operator single band, single operator all band, multi operator single band and multi operator all band. The rules can be found on page 62 of the SARL Contest Manual.

SARL YL SPRINT.

The committee received 14 logs (seven logs from ladies and seven logs from men) for the SARL YL Sprint held on 9 August.

1st Dawn Snyders, ZS5ME, 113 points 2nd Pam Momberg, ZS6APT, 111 points 3rd Collette Rundle, ZS2CR, 103 points 4th Heather Holland, ZS6YE, 102 points 5th Anette Jacobs, ZR6D, 89 points 6th Kempton Amateur Radio Technical Society, ZS6KTS, 60 points 7th Brinette Fourie, ZS6MZA, 32 points

CLUB NEWS

The Cape Town Amateur Radio Centre, ZS1CT, had a very successful operation during this year's International Lighthouse and Lightship weekend. Their lighthouse is the Green Point Cape Town lighthouse where they have active each year since 1999.

In all, 15 members came to operate and support the station and they worked well over 300 stations around the world, including many other lighthouses.

They had a visit from a local newspaper reporter who took many photos and interviews for an upcoming article on the public service and emergency preparation aspect of our hobby. Due to Green Point's ease of accessabiltity in central Cape Town, they had many people visiting them and who become exposed to our hobby.

PROPAGATION REPORT

Sorry, but we have not received our regular contribution this week. The best that can be done is to suggest that those of you who are really interested go to www.spaceweather.co.za for information.

DIARY OF EVENTS

Today 28 Aug. - SARL HF CW Competition. Aug. - Send ideas about 2012 Radio Technology in Action symposiums to rta@sarl.org.za. Aug. - Send ideas about proposed youth forum to artoday@sarl.org.za. 3 Sept - ZS6JVT Youth Spring Sprint Competition from 10:00 till 12:00. 15 September - Last day to send a high resolution picture of the participant operating during the ZS6JVT Youth Sprint to saardt@intekom.co.za. 18 September - Last day to submit logs for the ZS6JVT Youth Spring Sprint Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, Z6SBWN.

Thank you for listening, 73.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

7Q, MALAWI
Harry,7Q7HB, is back in the club Makokola in Malawi and stays there
until Nov 23. He will try to operate as much as possible because the
power supply is unstable and diesel for generators scarce.
QSL via G0IAS (only direct).

9A, CROATIA
The special event callsign 9A20V remembers the tragic events 20 years
ago. The station works in CW and SSB on 80m-10m until Nov 21.
All QSOs will be confirmed via bureau automatically.
The QSL manager for direct requests is 9A6DR.

9H, MALTA, EU-023
Jasper,PB2JJ, will sign 9H3JN fron Malta (EU-023) in CW/SSB on 40m-10m
from Sep 2-14. QSL via homecall.
Logsearch will be available at: http://members.casema.nl/pb2jj/9h3jn
---
Raul,IC8ATA, is working holiday style as 9H3AT from Malta (EU-023)
between Aug 29 and Sep 5. QSL via homecall. See: http://9h3at.jimdo.com

CN, MOROCCO
Marko,S55EI, will be QRV in SSB and PSK31 on 40m/6m/2m signing CN2EI
from Sep 3-20. QSL via homecall.

CT9, MADEIRA, AF-014
Matthias,CT9/DJ8OG, announced to be active from Madeira (AF-014) on
80m-10m from Sep 6-12. QSL via homecall.
He will sign CR3L during the WAE SSB Contest. QSLs for CR3L via DJ6QT.

Leonid,CT9/RW9JZ, is working mostly in CW on 40m-10m until Sep 5.
QSL via homecall.

ER, MOLDOVA
The special event station ER20MD is celebrating the 20th anniversary
of the independence of Moldova. QSL via ER1FF.

F, FRANCE
The special event station TM2GRF is working on all bands from the
Geishouse Rallye France from Aug 27 until Sep 10. QSL via F8BUO.

HB0, LIECHTENSTEIN
Jan,HB0/OK1XD, will be active in holiday style mainly in RTTY and PSK31
but also some SSB and CW from Sep 1-10. QSL via homecall.

HK, COLOMBIA
Lothar,DK8LRF, will be QRV as HK3JCL mainly in SSB on 20m/40m between
Sep 6 and Nov 16, PSK31/RTTY/Pactor only with a sked (dk8lrf@gmx.de).
You can contact him also via the Echolink station DM0ZHS-L near Munich,
Node # 249774, or direct at HK3JCL, Node # 255165.
QSL via homecall, bureau ok.

IS0, SARDINIA
Max,IZ4JMA, will sign IS0/IZ4JMA from Isuledda Island (EU-024) from
Sep 3-10. His next activity will be also in CW/SSB/digital on 10m-80m
signing IM0/IZ4JMA from La Maddalena (EU-041) from Sep 10-17.
QSLs via homecall.

OE, AUSTRIA
The special club stations OE2XXM and OE5XXM are working in SSB mainly
on 80m/40m and on 2m/70cm from the International HAM meeting in Gosau
using the special ADL 553 from Sep 1-30. QSLs via bureau.
See also: http://www.qrz.com/db/oe2xxm or http://www.qrz.com/db/oe5xxm

OH0, ALAND ISLANDS, EU-002
Nao,JA1HGY, will be QRV in CW/SSB/RTTY as OH0HG from Sep 2-4, including
the All Asian DX Contest. Log: http://www.clublog.org/charts/?c=oh0hg
Before and after his visit to Aland he will sign OH0HG/OH2 from Finland
(logsearch: http://www.clublog.org/logsearch/OH0HG/OH2).
Nao is celebrating the 50 years friendship with Martti,OH2BH, with
this visit.

ON, BELGIUM
The Radio Club de Binche will activate the special event station
ON4WAR to commemorate the Belgian resistance in World War II on
Sep 3 (1100-2000 UTC) and Sep 4 (1000-1800 UTC). QSL via ON7RY.

P4, ARUBA ISLAND, SA-036
Robert,W3BTX, is working holiday style signing P49T in SSB and CW on
10m-160m from Aug 31 until Sep 7. Other OPs are W3TEF and W3PN.
QSL via W3BTX.

PA, THE NETHERLANDS
Fred,PA0FAW, will use the special callsign PA11WSF mainly in CW and
PSK31 during the "World Statues Festival" from Sep 1-25. He will also
activate WFF FF-005. Fred is an ISWL member and thus can be counted
for ISWL Monitor Award as well. QSL via PA0FAW, SWL reports welcome.

PJ6, SABA ISLAND, NA-145
Fred,K9VV/NP2X, will be QRV as PJ6/NP2X from Sep 4-9. He will work in holiday style with 100 watts in CW and maybe also SSB but not digital modes on HF (no 6m). If the conditions are bad he will go diving.
QSL via K5WW.

SP, POLAND
A group from Poland and Germany (SP1EG, SP6TRX, SP9DTE, DF7MR, DL1HRG, DL9FR, DM2TO, DM3VA, DM7DX, DM7EA and DM7MA) will be QRV as SN1LH from the Niechorze lighthouse from Sep 2-6.
Follow the QSL route announced by the operator.

SV9, CRETE, EU-015
Ron,SV9/WB2GAI/p, is working from Chania on Crete (EU-015) between Aug 29 and Sep 30. This is his 4th IOTA DXpedition and as usual in CW on 80m-10m. Ron still has his logbooks of 2001, 2005 and 2009.
QSL for DX stations via bureau and for US stations direct.

SU, EGYPT
SU/HA3JB will be active on the HF bands from Sep 1 until Nov 30.
QSLs only direct via his homecall.

UA, RUSSIA
The 300th birthday of the Russian scientist Michail Lomonossow V. is celebrated by activating the special event station R300ML from different oblasti in the Archangelsk region between Sep 1 and Nov 30.
QSL via RN1ON.

UR, UKRAINE
Following special stations were active from Aug 22-28 to celebrate 20 years of Ukrainian independence: EM20C (via UX5PC), EM20L (US0LW), EM20LTD (UR3LTD), EM20UJ (UR5UJ), EM20UU (US7UU), EM20UKR (UR7UC), EM20V (UR2VA), EN20C (UX7CQ), EN20UO (UX5UO), EN20UP (UT4UP), EN20UZ (UR5UZ), EN20W (UR4WWE), EO20IO (UX3IO), EO20IZ (UX5IZ), EO20IGN (US7IGN), EO20K (UR4KWA), EO20M (UX7MA), EO20RR (UZ1RR), EO20UD (UR7UD), EO20UM (UT0UM), EO20UR (UT7UR), EO20UU (UT7UU), EO20ZZ (US0ZZ), EM0BSCC (UU0JM) and EM0UBC (via UR4UXD).

VE, CANADA
Canadian HAMs may use special prefixes to celebrate the centennial of Parks Canada between Sep 1 and Oct 31.
VA stations may use CF, VY stations may use CI, VO stations may use CH and VE stations may use CG instead.

XU, CAMBODIA
Wim,ON7PP, is QRV again as XU7TZG since Aug 22. QSL via homecall.
More information is available at: http://www.xu7tzg.be

CASHOTA UK and Ireland Heritage
CASHOTA together with Ireland Heritage will be QRV from several places during the European Heritage month.

CY9 QSLs Wanted for Museum
Duane,WV2B/VA1ZZ, is looking for QSL cards of DXpeditions to St. Paul

Island (Nova Scotia/Canada, CY9) as a donation for the St. Paul Island
Museum in Dingwall, NS.

DXCC Card Check
The DXCC QSL checker Scott Lehmen,N9AG, has died. He held many awards
and was a member of the DXCC Honor Roll. Our thoughts are with his
family.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 3: LZ Open SES Contest
Sep 3/4: JARL AA DX Contest
Sep 3/4: IARU Region1 Fieldday
Sep 4: DARC 10m Digital Contest Corona

A short note addressed to all stations joining the All Asia DX Contest:
It is not forbidden to give a short report to a fieldday station
calling you. The short report is given much quicker than describing
that you are in a different contest working only Asian stations.
Such a quick report is more like Ham Spirit.

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-066, R0L, Sea of Japan Coast group: R3BY/0 working mostly in CW on 80-17m
from Antipenko Island until Sep 4. QSL via homecall (bureau/direct).

EU-028, I*5, Toscana (Tuscany) Region group: IA5/IZ0KRC is spending his
holidays on Elba until Sep 9. QSL via IZ0KRC.

EU-030, OZ, Bornholm Island: OZ/DF6FL, OZ/DL9ZE and OZ/DL5FF are working
from Bornholm in SSB, CW and RTTY on 40m-10m until Sep 10.
QSLs via their homecalls (bureau/direct).

EU-054, I*9, Egadi Islands: IF9/IK2ANI will be QRV in SSB, CW and RTTY on
30m-6m from Sep 1-6. QSL via homecall (bureau/direct).

NA-029, VY2, Prince Edward Island (incl. Satellite Islands): K3GV/VY2 will
be active mostly on 15m and 20m from Prince Edward Island (PEI) for
one month starting on Sep 1. QSL via K3GV (bureau/direct).

NA-041, KL7, Alexander Archipelago: K6VVA/KL7 is going to hit the airwaves
from Revillagigedo from Sep 6-8. This is not the Mexican archipelago
with separate DXCC status but an island group with the same name off
the coast of Alaska. Rick will focus on working Europe and Japan on
30m, 20m and 17m.
See also: http://www.k6vva.com/iota/na041 or http://twitter.com/k6vva

QSLs only via N6AWD (bureau/direct).

Rockall announcement (IOTA EU-189): EA2TA, EA3NT, IZ7ATN and MM0NDX have
the ambitious goal of bringing the lonely and inaccessible cliffs of
Rockall in the North Atlantic on the air for 24 to 48 hours in 2012.
After evaluation of past weather data the group sees a chance to start
a try during late May or early June next year. This time they will have
the support of an experienced mountain climber (Nick Hancock). The team
says that they are aware that near-perfect landing conditions are
necessary to make this enterprise a success.
They are looking for sponsors now (via Paypal rockall.eu189@gmail.com).
In view of some unsuccessful attempts to activate Rockall in recent
years this seems to be not very easy either.

EMCOMM: Calgary ARES Meeting postponed.
2011-08-29

At the moment the ARES Calgary meeting to be held on September 7th has
to be cancelled. There is an outstanding issue that requires RAC to
resolve.

811. Weekly Highlights of Solar and Geomagnetic Activity, 22 - 28 August 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-08-30 21:30:06 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20110830213001.E286433C8C@panix2.panix.com>
Source record: 4001

```
:Product: Weekly Highlights and Forecasts
:Issued: 2011 Aug 30 1656 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
22 - 28 August 2011

Solar activity was at very low to low levels. Region 1271 (N16,
L=059, class/area Ehc/290 on 18 August) produced four low-level
C-class flares during the period. All other regions on the disk were
relatively stable and quiet. There were no Earth-directed CMEs
observed during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during the entire period.

Geomagnetic field activity was at quiet to unsettled levels on 22 -
25 August due to a weak coronal hole high speed stream (CH HSS).
Activity decreased to mostly quiet levels for the remainder of the
period.

Forecast of Solar and Geomagnetic Activity
31 August - 26 September 2011

Solar activity is expected to be very low to low throughout the
forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal to moderate levels from 31 August - 03
September. The flux is expected to increase to moderate to high
levels during 04 - 09 September due to CH HSS effects. Normal to
moderate flux levels are expected during 10 - 11 September. A return
to moderate to high flux levels is expected on 13 - 14 September
following a second CH HSS. Normal to moderate levels are expected
from 15 - 25 September. Moderate to high flux levels are expected on
26 September due to effects of another CH HSS.
```

Geomagnetic field activity is expected to be at mostly quiet levels during 31 August - 02 September. Activity is expected to increase to quiet to unsettled levels, with isolated active periods, during 03 - 05 September as a CH HSS disturbs the field. Quiet levels are forecast for 06 - 10 September. An increase to quiet to unsettled levels is expected during 11 - 12 September due to another CH HSS. Predominately quiet levels are expected for the remainder of the period with the exception of 18 - 19 September and 24 - 25 September, when quiet to unsettled levels are expected due to recurrent CH HSS effects.

812. Question not related to amateur radio

Newsgroup: rec.radio.amateur.misc
Date: 2011-08-31 00:22:00 UTC
From: Kickin' Ass and Takin' Names <PopUlist349@hotmail.com>
Message-ID: <vcvq57tnk6253sa94ehmvvh4f75dlask7e@4ax.com>
Source record: 4002

We were hit by Hurricane Irene last weekend -- not too exciting
because Sweet Thing and I went through Katrina on the Gulf Coast six
years ago, still . . .

Power is out and my whole-house generator has been humming along since
Saturday afternoon. Problem is, the generator obviously is putting
out less than 60 Hz current. I noticed that my electric clocks are
losing over two hours per day and finally realized the time loss is
caused by AC current being less than 60 Hz.

I checked the manual for my generator and there are instructions for
setting the AC frequency -- run generator under no load, connect freq
meter to AC output, adjust this for XXX Hz, adjust that for XXX Hz,
and that does it.

Question is, where do I get a freq meter that reads as low as 60 Hz?
And do I connect it directly to the AC lines, or, should I connect
through a capacitor?

RF I can handle but this AC stuff is a mystery.

Thanks.

Hmmm. Answered my own question.

My Fluke Model 117 digital multimeter measures AC voltage or current
freq. Set the range, plug the probes into the AC socket and there it
is.

122 VAC, 57-58 Hz.

I wouldn't use a capacitor. Safer to use a transformer... any
low-voltage supply transformer (think "6.3 VAC wall wart" such as
you'd find powering many old modems) will give you good isolation from
the power line.

Almost any halfway-decent frequency counter can be set to a 1-second
(or longer) capture interval, and can thus give you readings to 1 Hz
or better of resolution. If you can find one which will capture for
up to 99 seconds, that gives you even better resolution... I think my
good HP will do that, and that even the old B&K I picked up for a song
can do a pretty long capture interval.

To get down to significantly better than 1 Hz of resolution in a
reasonable amount of time, you can phase-match against a known-good
frequency source. Most oscilloscopes will let you lock their
horizontal trigger to the incoming line voltage. If you have some
sort of calibrated frequency standard (say, a 10 MHz standard which
can be divided down to 1 or 10 pulses per second), use this standard
to drive the vertical, set the scope trigger to "LINE", and then
adjust the generator frequency so that the reference signal you're
looking at doesn't "drift" across the scope.

** Rytis Zumbakis, LY4U (ex UP2BIL, LY2BIL etc) as well SK **

I am sorry to report the sad news about next SK Rytis LY4U (ex-
LY2BIL) passed away this Tuesday, 30th August 2011. Rytis was
well known as perfect HF and VHF operator and contester.
Considered himself an earnest advocate of fair play principles
in Ham Radio Contesting. Likely pioneer of real time computer
logging and CW keying in LY in 1991 using early version of CT.
Likely pioneer of SO2R in LY in 1999. He was active member of
LY2WR, LY2W & IU9T multi teams. Rytis was manager of LYAC/NAC
contest in Lithuania since early 2000s. He was a Teacher for
many LY's, who now are active on VHF. Many VHF records belongs
to Him. More about Rytis: http://qrz.com/db/ly4u and
www.printqsl.com/lyac/category/ly2wr/ Rest in peace, dear OM.
SOURCE: Oleg, LY3UE and Remi LY8O, direct to MMMonVHF

Matej, OK1TEH, did place more info www.ok2kkw.com/ly4u_sk2011.htm

As well all of our MMMonVHF Team was shocked to hear that vy sad
News. We all do know Rytis since the first days of our VHF work,
have had hundreds of TROPO, ES, AURORA and MS QSOs and as well
will loose all his patience, friendly and helpfull words in any
way for us and the big VHF community at all! The Team of MMMonVHF
will pass our deep sympathy and condolences to his family.
Rest in peace, dear OM and FRIEND Rytis! SOURCE: The MMMonVHF Team

---

** September MS Predictions MMMonVHF **

Even if no big meteor showers hit the Earth in September, this
month deserves lot of interest by MS enthusiasts. Sporadic Meteors
flux is at its annual maximum in this period, thus providing
relatively good rates especially during morning hours. Some minor
to medium showers (Alpha-Aurigids, September Epsilon-Perseids,
Sextantids and others) will also add significant meteor rates.
Have a look to shower predictions for September 2011 at our MMM
MS-Propagationpage: http://www.MMMonVHF.de/ms.php

** IARU R1 VHF Contest 2011 - 3/4 September **

As well as in past years, Matej, OK1TEH, did setup a list of
stations participating at IARU R1 VHF Contest 2011 - 3/4 September
For details please do refer the following PAGE:
http://www.darkside.cz/qrv.php
SOURCE: Matej, OK1TEH at OK2KKW webpage

** N8OFS/p qrv 50 MHz between 2011-09-10 till 2011-09-12 - EN91OR **

N8OFS/P will be back in the Caboose (Jefferson Ohio EN91or Ashtabula
County) for the ARRL September VHF 2011 Contest (September 10-11)...

Same reliable setup; Kenwood TS-60 @ 50W to 29.4ft of LMR-400 to
the "DOMINATOR" 5/8 wave vertical @ 29.5ft above the ground using a
Shakesepare heavy duty 8ft mast bolted to the roofwalk of the
Caboose, parked and locked on 52.525FM... I will have Internet this
time, and will be hanging out on the ON4KST Region 2 50MHZ Chat...
I will be on the air for the Contest the entire time; since
Passenger Train season will be on temporary hiatus during this time,
I won't hafta "get out of the way" and shut down early...
Just a reminder that I will also be on the air the Sunday following
the ARRL Sept VHF for the Classic Exchange Contest...
SOURCE: tnx to Andy, N8OFS, direct to MMMonVHF

** IA5/IZ0KRC from Elba Island (EU-028) **

Claudio, IZ0KRC will be active as IA5/IZ0KRC from Elba Island
(EU-028) from 28 August to 8 September. He will operate holiday
style on 40-2 metres SSB, CW and RTTY. QSL via home call, bureau
preferred. SOURCE: rgsbiota.org via 425 DX News

** IF9/IK2ANI from Favignana Island **

Aldo, IK2ANI will be active as IF9/IK2ANI from Favignana Island
(EU-054) on 1-6 September. He plans to operate SSB, CW and RTTY
on 30-6 metres. SOURCE: IK2ANI via 425 DX News

** Special club stations OE2XXM and OE5XXM **

The special club stations OE2XXM and OE5XXM are working in SSB
mainly on 80m/40m and on 2m/70cm from the International HAM meeting
in Gosau using the special ADL 553 from Sep 1-30. QSLs via bureau.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

August 31, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- End Summer Sporadically - ARRL VHF QSO Party
- Faster, Faster - North American CW Sprint
- Webinars Return - PVRC & NCCC
- SMC Grand Prix Competition
- A New Way to Climb Down
- Rookie RTTY Roundup Results
- Measuring Unknown Ferrite Cores
- Common-Mode Choke Testing by K0TO
- Would You Know?

NEW HF OPERATORS - THINGS TO DO

Why not give some of the short holiday CW sprints a try this weekend?
The Adventure Radio Sprint has the "heavy-light" theme, the NS sprint
begins with a slow-speed period, and there is the Labor Day Sprint, as
well. The high-speed North American Sprint is on the following weekend
- if you dare!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Your editor got a good log checking report last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Sep 3-4

- SNS and NS Weekly Sprints--CW (Sep 2)
- All-Asian DX Contest--Phone
- Russian Radio RTTY WW
- DARC 10-Meter Digital "Corona"
```

- Colorado QSO Party
- IARU Region I Field Day--Phone
- AGCW Straight Key Party
- QCWA Fall QSO Party
- Tennessee QSO Party
- Labor Day Sprint--CW (Sep 5)
- ARS Spartan Sprint--CW (Sep 6)

Sep 10-11

- ARRL September VHF QSO Party
- North American Sprint--CW
- 070 Club KA3X Memorial Sprint--Digital (Sep 9)
- Worked All Europe DX Contest--Phone
- Arkansas QSO Party
- Ohio State Parks On the Air
- QRP ARCI VHF Contest
- SKCC Straight Key Weekend Sprint
- Classic Exchange--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The contest season begins anew - get rolling this coming Thursday evening with a joint PVRC <http://pvrc.org/>/NCCC <http://nccc.cc/> Webinar on the basics of Sprint contests with Hank Garretson W6SX. This presentation will be particularly helpful for newcomers to Sprinting. The webinar begins at 0100 UTC, Sep 2, and registration <https://www2.gotomeeting.com/register/331266970> is free. The first webinar will conclude no later than 10 :00 PM EDT (0200 UTC) so that attendees can take a short break and roll right into the 30 minute NS (NCCC Sprint), which begins at 10:30 PM EDT (02:30 UTC). (Thanks, Ken K4ZW)

WRTC2014 <http://wrtc2014.org/> is pleased to announce that it has received a Letter of Determination from the U.S. Internal Revenue Service granting 501(c)(3) status as a tax-exempt public charity. This means that contributions to WRTC2014, Inc. by U.S. taxpayers are deductible to the extent allowed by law. Contact info@wrtc2014.org or visit the web site for information on WRTC2014, and details on how to contribute. In addition, WRTC2014 has been recognized and endorsed by IARU at their recent meeting in South Africa!

Eric K9GY/T6MO reports receiving word that Industrial Communications Engineers (ICE) Radio Products has been restructured and is once again producing the entire ICE product line. The name of the new company is Morgan Manufacturing Sales <http://www.morganmfg.us/> and the new website has just been launched.

Mike Wetzel W9RE <mjwetzel@comcast.net> is looking for the contact information for contest coordinators from the US and Canadian contest clubs. If your club has not been contacted, get in touch with Mike.

The all-important Country (CTY) Files <http://www.country-files.com/cty/> were updated on 27 August 2011. Used by your logging software to keep prefixes and DXCC entities and CQ zones straight, it's important to have the latest version. To install the file, follow the link to your software at the top of the page. (Thanks, Jim AD1C)

Thanks to K6TD, the Cabrillo Statistics program originally developed by K5KA (SK) and now maintained by Bob N6TV, has just been ported to the Mac OS X environment. This program generates hour-by-hour rate sheets and valuable SO2R statistics from a Cabrillo-formatted file. It creates a simple text file that can easily be pasted into a reflector post. You may now download <http://bit.ly/cabstat> CBS version 10e for Windows, Mac OS X, and Linux. CBS Version 10e adds new support for NAQP-RTTY and CQ-WW-RTTY logs, as well as a number of bug fixes and minor improvements. This is a simple command line utility written entirely in C and is small enough to download from a slow dial-up connection (<100 kbytes). Please contact N6TV <n6tv@arrl.net> directly with a copy of your Cabrillo file if you run into any problems using the program.

Jim K5ND notes that one good way to publicize ham radio is through Scouting's Jamboree on the Air <http://www.scouting.org/jota> held this year on October 15 and 16. It is the world's largest Scouting event with 2010 results coming in at over 700,000 participants from nearly 6,000 stations around the world. Please engage your local Boy Scout council to help them with a planned operation or to start one. This year JOTA stations have an opportunity to pre-register <http://www.scouting.org/jota/registered_stations> their events. Several are doing fox hunts as well. You can find lots of information online and on the ARRL site <http://www.arrl.org/jamboree-on-the-air-jota>. This is a great way to not only reach the public but to expose youth to Amateur Radio.

>From AMSAT <http://www.amsat.org/> bulletin ANS-240, we learn that Kentucky Space <http://www.kentuckyspace.com/>, a consortium of Kentucky-based colleges and universities and Make Magazine <http://makezine.com/> announced the First annual hackerSPACE Workshop focused on CubeSat class satellites to take place in Lexington, Kentucky, November 11-12.

If you do a lot of tower climbing or are otherwise interested in being trained in tower safety by professionals, check out this class <http://www.comtrainusa.com/basic-tower-safety-and-rescue-tsr.php>. (Thanks, Bob N6TV)

Dress for success takes on a whole new meaning when talking about wearable antennas <http://www.gizmag.com/antennas-built-into-clothing/19616/> as reported in Gizmag. Developed at Ohio State University <http://researchnews.osu.edu/archive/antcloth.htm>, this is just the latest in "smart fabrics". There is even a bikini with integrated solar cells!

The Society of Midwest Contesters occasionally annual general meeting, known to some as the 5th ZO Fest, was held at the QTH of K9ZO in Bloomington, Illinois on Saturday, August 13. Many folks travelled over three hours just to be near the center of the Black Hole. It was satisfying to renew old friendships and welcome new folks. What a great way to have an annual meeting!

Peter Dahl, K0BIT <http://www.legacy.com/obituaries/elpasotimes/obituary.aspx?n=peter-dahl&pid=153171917>, legendary for his transformers <http://radioworld.com/article/peter-dahl--dies/24169> that powered big signals around the world, died recently at the age of 71. He opened his own business in 1986, designing and manufacturing transformers for the military, TV and radio stations and hams. Many of those transformer designs are still available from Harbach Electronics <http://www.harbachelectronics.com/main/page_xfmr_catalogs.html>.

Web Site of the Week - On the Society of Midwest Contesters <http://www.w9smc.com/> website you will find a link to their new club award/activity, the Grand Prix. The competition between club members encourages activity throughout the year. There are two VHF+ contests, three possible RTTY, two DX, domestic and two 160 meter contests. Up to nine contests can be counted for any one Grand Prix entrant. Maybe this could give your club some ideas to stimulate activity!

WORD TO THE WISE

Interlock - a software or hardware device that prevents transmitting more than one signal at any one time. This is an important new rule for multioperator stations in this year's CQ World-Wide <http://cqww.com/> contest. The old YSW method (Yelling, Swearing, and Waving) just doesn't cut it. Note that alternating CQs on two frequencies in the same band has been banned, as well.

==> SIGHTS AND SOUNDS

You know the old saw about towers and antennas, "If it stayed up last winter, it wasn't big enough!" Well, what if not only did it stay up but someone can parachute from the top of it <http://www.youtube.com/watch?v=AS3fQtSKCTw>...successfully? Radio Arcala just added another notch to their belts!

This hardware is even bigger! Space.com has published a photo album of 50 great photos <http://www.space.com/12671-50-russian-rocket-launch-photos.html> of Russian rocket launches. Even after last week's failure of a supply vessel's third stage (the cause has been identified as described on the Space.com site) this is the route to space for American astronauts for the foreseeable future.

You just might be a serious sci-fi hamster if you understand this photo <http://i.imgur.com/JNlvV.jpg>. (Thanks, Joe KJ8O)

==> RESULTS AND RECORDS

The ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> results for the first-ever RTTY version are now available. Joanna, K6YL repeated her April 2011 win as she led all challengers to the checkered flag with a score of 6437 points at the Stanford Radio Club station, W6YX, in the hills above Silicon Valley. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The 2011 Minnesota QSO Party Results are now available <http://www.w0aa.org/media/documents/mnqp/MNQP_2011_RESULTS.pdf>. (Thanks, Al K0AD)

The Oceania DX Contest <http://www.oceaniadxcontest.com/rules.pdf> Committee is pleased to report that the results <http://www.oceaniadxcontest.com/2010_Results.htm> of the 2010 Oceania DX Contest are now available. A total of 1092 logs were processed with 21% more QSOs than last year, both of which are new records! As well as the more common VK, ZL, YB and KH6 stations there were a number of rarer Oceania entities active including V85, 9M6, AH0, DU, and FO8. In particular, the 15 meter band really came to life. Plenty of records were also broken. This year's contest is only a few weeks away! (Thanks, Brian ZL1AZE)

Russian DX Contest results <http://rdxc.org/results/2011/results.asp> for 2011 are now available, including SDR audio files in support of several disqualification <http://rdxc.org/asp/pages/dq.asp?YEAR=18> decisions. (Thanks, Igor UA9CDC)

The Arizona Outlaws Contest Club <http://www.arizonaoutlaws.net/> website features a neat "ladder" for the club's yearly competition for plaques. Click on "AOCC Ladder" on the left pane to see a spreadsheet with each Ladder Category. Click on the column's heading and after a second or two, you'll see the latest standings! Created by Dave AB7E and Sandy N7RQ, this might give other contest clubs some ideas about how to stimulate come healthy competition. (Thanks, Bob K8IA)

The IOTA Contest <http://www.iotacontest.com/> sponsors have received over 2,000 logs. Many also sent in photographs along with soapbox comments that appear on the website. You can see the list of activated logs <http://www.iotacontest.com/contest/iota/2011/listOfLogs.php> and check that your entry is correct in terms of category, etc. The photo gallery has LOTS of great photos for your enjoyment. (Thanks, Don G3XTT)

JARTS <http://jarts.jp/> has announced the results of the 2010 WW RTTY contest the new rules for 2011. 925 logs were received for 2010. (Thanks, Hisami 7L4IOU)

OPERATING TIP

"The best way to communicate with someone is to use THEIR preferred method, not YOURS." - Mark N5OT. In a contest, that means you should be continually aware of the need to shift gears up or down when needed.

==> TECHNICAL TOPICS AND INFORMATION

How can you measure the relative permeability of an unknown ferrite core? Place several turns on it and measure the inductance with a handheld LCR meter. Then use the formula AL (mH/1000 turns) = 1000000 x L / N2 with N being the number of turns. (For powdered iron cores, AL is in mH/100 turns.) This measurement only provides permeability information at the frequency of the measurement - typically quite low for LCR meters. A better method for HF and VHF testing would be to connect a capacitor across the toroid winding and use a dip meter to determine the resonant frequency. Calculate L from L = 25330 / f2 C, where f is in MHz, C is in pF, and L is in mH. Then calculate AL at the frequency of interest. The latest Fair-Rite Products <http://www.fair-rite.com/> catalog is an excellent source of material on ferrites. Another very good resource for identifying toroid cores (and many other useful functions) is DL5SWB's Mini Ring Core Calculator <http://www.dl5swb.de/html/mini_ring_core_calculator.htm>. This program has data on toroid cores from all identifiable makers, including dimensions and color coding which are usually the best parameters to check first. (Thanks, Carl KM1H, Jim K9YC, and Ian GM3SEK)

Julius N2WN ran across this Epcos document <http://www.epcos.com/web/generator/Web/Sections/Publications/PDF/_C3_9Cberspannungsableiter_20und_20Schaltfunkenstrecken,property=Data__en.pdf;/%C3%9Cberspannungsableiter_und_Schaltfunkenstrecken.pdf> that has a detailed explanation of gas-discharge tubes and how to choose them for lightning protection. The information is in German and English and is quite detailed.

Brian K1BRF relays the link to a Technology Review <http://www.technologyreview.com/blog/arxiv/26965/?ref=rss> article that reports an improved Lithium-Sulfur (LI-S) battery chemistry that increases energy storage capacity by nearly an order of magnitude. That this would have far-reaching consequences is a bit of an understatement and certainly portable operating would benefit greatly.

Gary K9AY provides advice for soldering radials: "For many years, dating from my first career in broadcasting, I have used silver-bearing plumbing solder commonly available in hardware stores and home centers. This is typically tin (Sn) with 0.25% or 0.5% silver (Ag). I tried the cheaper 100% tin, but the silver dramatically improves the solder flow and bond to the copper. Clean copper and the right flux is essential. Scotchbrite or similar pads are good; sandpaper may be needed to cut through deeper oxidation. The liquid acid flux works best, but is messy and corrosive -- wear gloves and wash things off when done. Paste flux works fine if the copper is clean, and is a lot easier to work with. I can't say enough about cleaning the copper -- everything is easier that way. A good physical connection helps too, since it will require less solder and flux. Finally, if you're concerned about protecting a soldered joint, a coating of black silicone or "liquid electrical tape" works well."

The latest operating instructions for HFTA <http://www.arrl.org/files/file/Product%20Notes/Antenna%20Book/HFTA.pdf>

by author Dean N6BV, dated Aug 3, 2009, includes links for obtaining DEM, NED and SRTM geographical data and he confirms they all work. Dean's webinar "Hinks and Kinks for Using HFTA" and can be found in the PVRC webinar archive <http://www.pvrc.org/webinar/webinars.htm>.

Along with the observation about knowing when your antennas and towers are big enough, how can you tell that your slingshot is big enough? How about when it has a mount for a laser sight! Tom N4TL wrote in with news about the Big Shot® slingshot <http://www.sherrilltree.com/Professional-Gear/BIGshot> that looks like it would be a lot of fun in many, many ways! Dave N2NL/KH2L can probably relate as described in his recent blog entry about coconut trees <http://www.n2nl.net/?p=445>.

While EZNEC is the gold standard for ham antenna modeling under Windows, Linux users needn't despair. The xnec2c program also provides a lot of functionality as described in this video series <http://illruminations.com/2011/07/22/antenna-modeling-using-nec2c-on-ubuntu-linux/> by Steve AI4QR. (Thanks, Art AB4RL/6)

A couple of issues ago, an item described methods for installing masts on tower. Eric K9ES contributes his method of using two thrust bearings, one on the top plate and one 5 feet below the top plate. You have to build the tower with mast already inside it at the bottom. When complete and guyed and with the rotator not yet installed, lift the mast inside the tower. Use a muffler clamp around mast to secure the rope from the gin pole. Attach the rope 60% of the way up the mast, above the center of gravity. When the mast extends a few feet beyond the top plate, lock the mast in place with thrust bearings. Install the top antennas on the mast and reposition the gin pole rope to the bottom of the mast. Continue to pull the mast through the thrust bearings after loosening the nuts, and tensioning the rope. Continue this procedure until the mast is high enough to allow the rotator to be installed, and lower the mast into the rotor clamps.

John KK9A contributes this handy formula for estimating tower work duration: Actual time = Estimate * Pi. Your editor can also speak from personal experience that this formula works for developing software, car repairs, the prep time for any recipe, weeding the garden, putting a child to sleep, and numerous other endeavors.

It's difficult to identify SMD devices, but this on-line resource <http://chip.tomsk.ru/chip/chipdoc.nsf/vc1%21readform&view=smd&cat=B&start=501&count=500> is quite complete, including links to data sheets for many of the items. English speakers will be able to skip over the Cyrillic text. If a pop-up claiming no data has been found - ignore it. (Thanks, Bob Dehoney)

Technical Web Site of the Week - Tod K0TO built and measured 18 of high-impedance common-mode chokes with a complete write-up <http://www.k0to.us/HAM/ham.htm> on his website ("Measurement of Chokes made using type 31 material cores" in the Experiments & Measurements

section) showing how they were fabricated, how they were measured and the measurement results. He used Fair-Rite 2.4-inch diameter type 31 toroidal cores and small diameter, RG-59 size coax. The information should provide guidance to those fabricating their own common-mode chokes.

==> CONVERSATION

Would You Know?

Hurricane Irene just missed the US mainland but you might never know it from the damage totals and news videos. Even downgraded to a tropical storm by the time of landfall over Long Island, NY, there was still plenty of punch. Before the roads are even cleared, however, tropical storm Katia has formed and is expected to reach Category 3 status in a few days. It promises to be a stressful hurricane season for the Caribbean, the Gulf of Mexico, and the entire eastern seaboard.

So why wait until the sound of plywood being nailed up is on the evening news? Would you know the frequencies of the Hurricane Watch Net <http://hwn.org/> and your state and local emergency nets? Do you know how to check in to such a net and submit or accept "traffic"? What would you do if you heard a distress call on the bands from a station in an affected area? If a person asked you to get a message into an affected area, how would you do it? That is not the time to start thinking about what to do!

Competitive radiosport exists not because the FCC thinks we should have fun on the air but because our Basis and Purpose (Part 97.1) states that we are expected to provide emergency communications, among other things. By building competition-grade stations and training competition-grade operators, so the theory goes, Amateur Radio will be a resource to the nation in time of need. It doesn't matter much that you can "run rate", though, if you don't know how to use those skills.

Certainly, your local ARES team could use your skills. If you're not sure about the ham emergency organizations in your area, contact your ARRL Section Manager and ask for his or her help in finding the appropriate sources of information and groups. They'll be glad you called and you will, too.

You can also prepare yourself by studying the material on the ARRL's Public Service <http://www.arrl.org/public-service> website. Along with describing the operation of ARES and NTS, there are plenty of resources <http://www.arrl.org/public-service-resources> for you, too, all at no charge. You can also prepare by being informed about the areas likely to be affected. After all, a hurricane doesn't exactly sneak up on us - there is plenty of time for everyone to collect their wits and the necessary resources to be effective if called on.

If a pinch of prevention is worth a pound of cure, then an evening of reading, printing, and study will certainly pay off, too. With the U.S. Labor Day holiday coming up, perhaps an hour or two could be set aside.

You'll be better prepared all year long, too, so that your answer when needed is "Yes!" instead of "I don't know..."

73, Ward N0AX

==> CONTESTS

31 Aug to 13 Sep 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

SNS and NS Weekly Sprints--CW, from Sep 2, 0200Z to Sep 2, 0300Z. Bands (MHz): 1.8-14. Every Thursday evening (local). Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

All-Asian DX Contest--Phone, from Sep 3, 0000Z to Sep 4, 2400Z. Bands (MHz): 3.5-28. Exchange: RS and age ("00" for YL). Logs due: Oct 31. Rules <http://www.jarl.or.jp/English>

Russian Radio RTTY WW--Digital, from Sep 3, 0000Z to Sep 3, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and oblast or WAZ zone. Logs due: Oct 1. Rules <http://www.radio.ru/cq/contest/rule-results/index2.shtml>

DARC 10-Meter Digital "Corona"--Digital, from Sep 3, 1100Z to Sep 3, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Logs due: 2 weeks. Rules <http://www.darc.de/referate/ukw-funksport>

Colorado QSO Party--Phone,CW,Digital, from Sep 3, 1200Z to Sep 4, 0400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.850, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.850, 7.250, 14.250, 21.350, 28.450. Exchange: Call sign, name, and county or S/P/C. Logs due: Oct 5. Rules <http://www.ppraa.org/coqp>

IARU Region I Field Day--Phone, from Sep 3, 1300Z to Sep 4, 1300Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: 16 days. Rules - see IARU Society Web pages

AGCW Straight Key Party--CW, from Sep 3, 1300Z to Sep 3, 1600Z. Bands (MHz): 7. Exchange: RST, serial, category, name, age. Logs due: Sep 30. Rules <http://www.agcw.org/>

QCWA Fall QSO Party--Phone,CW,Digital, from Sep 3, 1800Z to Sep 4, 1800Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, year lic'd, name, chapter or S/P/C. Logs due: 30 days. Rules <http://www.qcwa.org/qso-party.htm>

Tennessee QSO Party--Phone,CW,Digital, from Sep 4, 1800Z to Sep 5, 0300Z. Bands (MHz): 1.8-28, 50+, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 6. Rules

<http://www.tnqp.org/>

Labor Day Sprint--CW, from Sep 5, 2300Z to Sep 6, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP nr or power. Logs due: Oct 7. Rules <http://miqrp.org/>

ARS Spartan Sprint--CW, from Sep 6, 0200Z to Sep 6, 0400Z. Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

070 Club KA3X Memorial Sprint--Digital, from Sep 9, 8 PM to Sep 10, 2 AM. Bands (MHz): 3.5. Frequencies: 3.580. Exchange: Call sign, RST and S/P/C. Logs due: Oct 9. Rules <http://www.podxs070.com/>

Worked All Europe DX Contest--Phone, from Sep 10, 0000Z to Sep 11, 2400Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: Sep 28. Rules <http://waedc.de/>

Arkansas QSO Party--Phone,CW,Digital, from Sep 10, 1500Z to Sep 11, 0300Z. Bands (MHz): 3.5-28, 144, Frequencies: CW--3.550, 7.050, 14.050, 21.050, 28.050; Phone--3.980, 7.260, 14.260, 21.360, 28.360, 145-147. Exchange: RS(T), county or S/P or "DX". Logs due: Nov 1. Rules <http://www.arkanhams.org/>

Ohio State Parks On the Air--Phone,CW,Digital, from Sep 10, 1600Z to Sep 10, 2400Z. Bands (MHz): 3.5-28, 50,144. Exchange: "Ohio" or S/P/DX and Park ID. Logs due: 30 days. Rules <http://parks.portcars.org/>

QRP ARCI VHF Contest--Phone,CW,Digital, from Sep 10, 1800Z to Sep 12, 0259Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 12. Rules <http://www.qrparci.org/>

North American Sprint--CW, from Sep 11, 0000Z to Sep 11, 0400Z. Bands (MHz): 3.5-14. Exchange: Call signs, serial, name, and state. Logs due: 7 days. Rules <http://www.ncjweb.com/>

SKCC Straight Key Weekend Sprint--CW, from Sep 11, 0000Z to Sep 11, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/>

Classic Exchange--CW, from Sep 11, 1300Z to Sep 12, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: 1.820, 3.545, 7.045, 14.045, 21.135, 28.05, 50.1, 144.1. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

VHF+ CONTESTS

ARRL September VHF QSO Party--Phone,CW,Digital, from Sep 10, 1800Z to Sep 12, 0259Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 12. Rules <http://www.arrl.org/contests>

Colorado QSO Party--Phone,CW,Digital, from Sep 3, 1200Z to Sep 4, 0400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.850, 3.550, 7.050,

14.050, 21.050, 28.050; Phone--1.870, 3.850, 7.250, 14.250, 21.350, 28.450. Exchange: Call sign, name, and county or S/P/C. Logs due: Oct 5. Rules <http://www.ppraa.org/coqp>

QCWA Fall QSO Party--Phone,CW,Digital, from Sep 3, 1800Z to Sep 4, 1800Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, year lic'd, name, chapter or S/P/C. Logs due: 30 days. Rules <http://www.qcwa.org/qso-party.htm>

Tennessee QSO Party--Phone,CW,Digital, from Sep 4, 1800Z to Sep 5, 0300Z. Bands (MHz): 1.8-28, 50+, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 6. Rules <http://www.tnqp.org/>

Labor Day Sprint--CW, from Sep 5, 2300Z to Sep 6, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP nr or power. Logs due: Oct 7. Rules <http://miqrp.org/>

Arkansas QSO Party--Phone,CW,Digital, from Sep 10, 1500Z to Sep 11, 0300Z. Bands (MHz): 3.5-28, 144, Frequencies: CW--3.550, 7.050, 14.050, 21.050, 28.050; Phone--3.980, 7.260, 14.260, 21.360, 28.360, 145-147. Exchange: RS(T), county or S/P or "DX". Logs due: Nov 1. Rules <http://www.arkanhams.org/>

Ohio State Parks On the Air--Phone,CW,Digital, from Sep 10, 1600Z to Sep 10, 2400Z. Bands (MHz): 3.5-28, 50,144. Exchange: "Ohio" or S/P/DX and Park ID. Logs due: 30 days. Rules <http://parks.portcars.org/>

SKCC Straight Key Weekend Sprint--CW, from Sep 11, 0000Z to Sep 11, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/>

Classic Exchange--CW, from Sep 11, 1300Z to Sep 12, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: 1.820, 3.545, 7.045, 14.045, 21.135, 28.05, 50.1, 144.1. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

==> LOG DUE DATES

31 Aug to 13 Sep 2011

- August 31 - US Counties QSO Party <http://marac.org/cwrules.htm>
- August 31 - Venezuelan Ind. Day Contest <http://www.radioclubvenezolano.org/rules.htm>
- September 1 - Feld Hell Sprint <http://sites.google.com/site/feldhellclub/Home/contests>
- September 1 - Portugal Day Contest <http://www.rep.pt/portugal_day_contest/rules.html>

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Text edition:

SEPTEMBER 4 2011. VK and WW STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 04 2011.

Project Horus.

The VK5 team advises they are planning a day of several amateur high altitude balloon launches, looking towards October the 16th (a Sunday).

Also they are hoping to launch a talk through repeater to be used by the amateur community as part of JOTA, as well as several experiments and other in-house payloads with at least one APRS equipped payload.

The repeater is likely to be launched early in the day, airborne for as long as possible.

At this point they have not decided on exact input/output frequencies, but will publish this information soon.

As usual, launches are very weather dependant.

Please direct any queries regarding plans to the contact form on the website: http://projecthorus.org/?page_id=162

(Adrian VK5ZSN & Terry VK5VZI)

SOMEDAYS ARE DIAMONDS!

And it would seem so are planets! Well at least one recently discovered by CSIRO Astronomers using 'The Dish' - CSIRO's radio telescope near Parkes, VK2.

Yes they believe they've found a small planet made of diamond, orbiting an unusual star.

The discovery was made by an international research team, headed by Professor Matthew Bailes of Swinburne University of Technology in Melbourne.

The journal, "Science," say ""Although bizarre, this planet is evidence that we've got the right understanding of how these binary systems evolve."

VISION AUSTRALIA

An ISS linkup which came "out of the blue", occurred in Australia last Monday night according to the UK Southgate Amateur Radio Club and was deemed

a great success.
Twelve students got to ask one question each before the ISS passed below the horizon.

Again I ask clubs and hams that are associated with any of these "talks to spacemen", please let the WIA know in advance, we do not get advised by Ariss be it here in Australia or overseas, maybe they are concerned someone might 'fire up' on the spacecrafts input frequency?

HAMS ACROSS AUSTRALIA.

VK1

This is Alan Victor Kilo One Whiskey X-ray, Education officer of the, Canberra Region Amateur Radio Club and WIA assessor.

Because of the amount of recent interest in obtaining an Amateur Radio Licence CRARC have run foundation licence course weekends in July and August. CRARC's next Scheduled foundation course is next weekend 10/11th of September which is fully booked.

Where possible upgrade assessments are run as part of the foundation course weekend, however we can run upgrades at other times by arrangement.

For each course weekend CRARC has have been at or near capacity of six to eight candidates. The number of candidates is limited by the number of WIA assessors and learning Facilitators available for the courses.

Now for the plug if you are at all interested in becoming a course presenter and or WIA Assessor or Learning facilitator in the ACT Region please contact the Canberra Region Amateur Radio Club education officer Alan VK1WX on education@crarc.ampr.org

CRARC have already taken and are taking bookings for the 12/13th November course Foundation courses generally run every two months if the number of WIA assessors/Learning Facilitators increased, CRARC could increase the number of candidates for each course, thereby increase the number of participants in our great hobby of Amateur Radio

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Way back when Model T Fords and Austin 8 motor cars were sought after prizes of the new industrial age, the radio experimenter was adapting available paraphernalia to the hobby. By the time Australia could claim its own motor car, the surplus of war time electronics were being used to grow many a ham station.

By the time the first 8-bit computers were appearing, surplus boards from obsolete mainframe computers were supplying active and passive components to the hobbyist. A few projects featured in "Amateur Radio" magazine. The commercial land mobile industry has bequeathed many rigs to the amateur cause with varying amounts of success.

The one thing that marks these practices has been the personal desire to learn. learn by doing. When we look over recent times there has been an exponential growth in the semiconductor industry to feed the communication/IT markets. The upshot of this is that mass produced components with performance that would have classed them as laboratory grade standard in years gone-by are now being used by the home constructor.

The major demand for home brewing is stronger eyes as surface mount components get smaller.

I'm Geoff Emery and that's what I think....how about you?

NTARC meets informally for coffee each Monday and Friday at Friends Cafe, in Jimmy's shopping complex off Charles Street, Launceston between 11.00am and noon.

A reminder too that on the last Monday of each month, the coffee venue switches to Lilydale, with David VK7YUM and Norma VK7FOOD at their cafe in the main street between 11.00am and noon.

(73, Yvonne, NTARC Inc. Secretary)

DISCUSSION POINT

What use is an f-call? (#3)

I have previously discussed the idea that having an f-call is like having a key to the front-door, or like the first step towards gaining a pilot license.

You may think while you're listening to me talk that I've been in Amateur Radio for years and that I have all the HAM experience in the world. The opposite is true.

While I have a long history in broadcast radio, that is, I'm not afraid to open my mouth in front of a microphone and I'm not afraid to participate in public fora, I am as fresh as a newborn in the Amateur Radio field.

You might think that your skills, the ones you have as prior experience before you got your license are not sufficient to be able to actually contribute to this hobby. You may have the belief that there are others more qualified than you who may scoff at your technique or knowledge.

As I have said, learning to fly, going solo, is something that every pilot from Cessna to Space Shuttle needs to do. Every Amateur you hear on the radio has been through those steps, some last week, some 50 years ago. There is no way to learn to swim, other than getting wet.

If you're listening to this online, perhaps next week, you'll turn on your radio, or find a friend who has a radio to listen to this broadcast over the air.

If you're listening to this over the air, then I encourage you to stick around at the end of the broadcast call in. You might be worried about "doing it right". Perhaps some background will help. A call-back is structured so that everyone can hear everyone else. Call backs can be as simple as keying the microphone and saying your call-sign. Wait until you have some silence, key the mike and talk. We don't bite! Also, if you end up keying the microphone at the same time as someone else, the person running the call-back might ask you to try again, or they might not say your call-sign, so they may not have heard

you at all. So call again!

As a final encouragement, I've been broadcasting on radio for nearly 20 years. I've conducted some 1500 radio interviews and spoken to many people. Every time I key the microphone, my stomach flutters and clenches. The trick is to carry on regardless!

I'm Onno Benschop, Victor Kilo Six Foxtrot Lima Alpha Bravo.

Be brave, you can do it!

HOME OF THE GOOD GUYS

As part of the Lincoln Short Wave Club's 90th birthday activities, the club has donated a brand new FT450AT to the radio station at the University of Addis Ababa in Ethiopia.

The shack is housed in the Department of Electrical Engineering and is the HQ of the Ethiopian Amateur Radio Society.

Listen for E T 3 A A often around 14.180 and 21.180.

(sourced to southgate)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Public Consultation on Allocation of the Digital Dividend in New Zealand.

The NZ Ministry of Economic Development has released for public consultation a discussion document on the allocation of "digital dividend" radio spectrum, specifically the 700 MHz band.

The digital dividend is the radio spectrum freed up by the switchover to digital television. The discussion document canvasses technical and policy considerations for the allocation of the 700 MHz band.

A workshop will be held on Thursday 8 September in Auckland, to provide an opportunity for interested parties to clarify any of the analysis or proposals presented in the document.

FCC dispatches four "roll call" teams to look for silent signals.

Roll-Call teams", use specially equipped SUVs, to "take a snapshot" of police, fire, government, radio/TV and other users of spectrum.

In about two hours, the two-person team can perform a "fast scan" of the entire spectrum. Scan an area about to be hit by the likes of Hurricane Irene they then return to those areas once the storm passes, to detect changes.

One thing the FCC is especially watching for:
Broadcasters or wireless sites that may be running on emergency battery power, and which might need assistance.

The FCC has opened its emergency 24 hour operations centre, "to protect peoples' ability to communicate" and to support licensees such as radio and TV.

Harris Corporation has been awarded a $16 million follow-on contract by Lockheed Martin to supply more than 100 Harris High band Networking Radio systems for the U.S. Army's Warfighter Information Network • Tactical (WIN-T) Increment 2 program.

The contract represents the largest-quantity radio order to date, and brings the total value of WIN-T contracts to Harris to more than $200M since 2002.

High band Networking Radio (HNR) features the first-ever use of directive beam technology to achieve higher throughput over longer distances. A directive beam also permits simultaneous use of the same frequency between nodes not in each other's RF path

(Satnews Daily)

After a Russian supply ship recently exploded, there are worries that there will be no way to get new astronauts to the station. By late November, the station may have to operate without a crew.

The Russian supply ship was destroyed during lift-off and is a similar ship to what's used to launch astronauts.

Three of the six space station astronauts, meanwhile, will remain in orbit for at least an extra week.

Currently there are two Soyuz spacecrafts docked at the ISS. One is scheduled to bring back three astronauts in September and another is scheduled to bring the other three back in November.

==========

NEWS FROM ARNEWSLINE USA

A big day in the life of 11 year olf Kaitlyn Cole KS3P.

At the 2011 Huntsville Hamfest, Kaitlyn was presented with this years Amateur Radio Newsline Young Ham of the Year Award.

Reading from a prepared statement, Kaitlyn had quite a story to tell about her involvement in the tornadoes that ravaged her home state and her decision to try to help those in need:

KS3P: "When the tornado struck on April 27th, I was very scared. We had no power and the phone was dead. I did not know how lucky we were until my parents took us out driving around our community.

"Some of my neighbours had lost everything or had their lives cut short by the tornadoes that struck. It was not some far off event on the news. This was personal to me.

"I didn't think a young ham like myself could do much, especially an 11 year old elementary student. My dad took me down to a command post in a Huntsville church. We signed some release forms and were given wrist bands. We then met up with Charlie, W1CST. Charlie gave me a chance to operate and provided guidance. It was really overwhelming at first because I was completely new to doing net control in a real emergency.

"At the time, I knew I was helping out but didn't think much about it because there were so many hams working. For me it was a way to cope with the devastation and to give something back to my community."

All in all it was a great afternoon to honour a very giving young woman who even though she is only age 11 has proven that hams of any age are ready and willing to serve their community in times of need. As such, we join with our corporate underwriters and with the Huntsville Hamfest in congratulating Kaitlyn S. Cole, KS3P, for her dedication to the hobby, to the community and really to all of mankind.

A LOOK BACK AT THE SHUTTLE AMATEUR RADIO EXPERIMENT

Amateur radio has been an active participant on Space Shuttle flights since STS-9 Now that the shuttle program is at an end, Newsline Producer Bill Pasternak, WA6ITF, takes a quick look back at how the shuttle took manned ham radio into space:

Audio of W5LFL first CQ approaching the US Pacific coast.

That's what it sounded like on my Icom IC-2AT in the courtyard of the old Metromedia Square building in Hollywood, California that winter evening in 1983 as Astronaut and Mission Specialist Owen Garriott, W5LFL, streaked across the night-time sky at close to 135 nautical miles above me in the space ship Columbia.

Dr. Garriott was fulfilling a dream that he'd had since before his first trip to orbit aboard Spacelab several years earlier. That was to take a ham radio station with him into space. Now, thanks to some assistance from the late NBC Newsman Roy Neal, K6DUE, the blessings of then NASA Administrator Jess Moore, and an amazing flying machine called the Space Shuttle, it had come to pass.

His first CQ from orbit brought thousands of responses, but the one that he heard best and who became the first United States ham to contact W5LFL was Lance Collister, then WA1JXN, now W7GJ, of Frenchtown Montana. The QSO between the two hams lasted only a few seconds during which ham radio history was made:

First QSO between W5LFL/space mobile and WA1JXN in Montana.

To get on the air from Columbia Dr. Garriott used a commercial handy talkie that had been modified and programmed for operation on several ham radio frequencies. To get signals out of and back into the orbiting spaceship W5LFL used a specially-designed cavity antenna engineered to fit a specific shuttle window and was held in place with Velcro binders. The antenna, designed by members of the Johnson Space Centre Amateur Radio Club was roughly 24 inches in diameter and looked somewhat like a large aluminium cake pan with a piece of coaxial cable running from it to connect it to the hand-held transceiver.

Knowing the number of QSO's would be fast and furious a small cassette recorder was attached to the system to log anyone he heard and anyone he talked to.

Random QSO space to ground audio.

In addition to the random QSO's , Garriott also had some interesting pre-arranged contacts. Among others W5LFL was able to speak with the amateur radio club in his hometown of Enid, Oklahoma and with the Johnson Space Centre Amateur Radio Club in Houston Texas whose members had helped develop his flight ham station hardware. He also held QSO's with the late Senator Barry M. Goldwater Goldwater and with Jordan's late King Hussein, JY1.

Contact between W5LFL and JY1:

Dr. Garriott's ham radio adventure on STS-9 ushered in a host of outstanding outreach activities that in following years that put ham radio onto almost every shuttle mission. It also lead to the creation of the Shuttle Amateur Radio Experiment or SAREX program. This was the ground breaking alliance between the ARRL, AMSAT and NASA that over the years enabled astronauts on-orbit to make contact with thousands of school kids as well as to their own families back on Earth. And not only using FM voice. Soon both slow scan Amateur television and packet messaging were a part of SAREX as well.

Eventually SAREX went from the Shuttle Amateur Radio Experiment to be renamed the Space Amateur Radio Experiment and then to ARISS - Amateur Radio on the International Space Station. Today, Earth to space station contacts are almost routine. More modern equipment and external antennas in the International Space Station make signals both ways a lot stronger than they were back in 1983 when Dr. Owen Garriott, W5LFL, called that first CQ from the space ship Columbia and ushered in the era of manned ham radio in space.

Looking back over the years of ham radio operations from the United States Space Shuttle, I'm Bill Pasternak, WA6ITF, in the Newsroom in the City of Angels.

In all there were five videos made chronicling ham radio on board the United States space shuttles. They live on as a lasting reminder of manned amateur radios first steps into space.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Oct 22 WIA Jack Files Contest

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

RD CONTEST

Please make a note that there is only ONE email address to send your completed RD log to and that is the one shown on the WIA contest page.

rdlogs@wia.org.au

If you send it to ANY other email address it WILL end up in cyber-space!

rdlogs@wia.org.au

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

WB 6 OJB will be on the air as 7P8JK from Lesotho between September
15th to the 22nd. While other information was given, during his
last Lesotho operation he was on the High Frequency bands from
40 to 10 meters using mostly SSB with some CW.
QSL direct to his home callsign WB 6 OJB.

4 W 6 A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East Timor),
from 16 to 26 September 2011. 10 to 160 metres CW, SSB and RTTY.
QSL manager is M 0 URX, direct via the bureau, or LoTW.

PB 2 JJ will be active as 9H3JN from Malta between September 2nd and the 14th.
Operations will be on 80 through 10 meters mostly CW but with the possibility
of some SSB. QSL this operation via his home callsign PB 2 JJ.

For rugby enthusiasts, look out for ZL4RUGBY operated by ZL4PW until 31st
October. This is to celebrate the 2011 Rugby World Cup being played in
New Zealand.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

I'm Col-. VK3LED

It's a parent's worst nightmare.

A Child dying after being left in a hot car!

But it's a tragedy that can always be prevented.

A USA Man, Russ Rusakov says he has the solution. That's why he invented
"The Safety Seat Alarm System", with his company, Suddenly Safe 'N' Secure
Systems.

A weight-sensitive pad slips under the car seat, and is connected by a tiny
transmitter. If you walk just 2 meters away from the car, an alarm that's
connected to a key chain starts to go off.

Rusakov described, "It immediately alerts with an 80 decibel sound, and it
vibrates," He says it's very much like a smoke alarm in your house.

You hope it never goes off, but can be a life-saver, if it does.

Since it went on the market in March, they've sold literally hundreds!

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

FO-29 reaches 15th birthday

Japan's FO-29 amateur radio satellite passed its 15th birthday on August 17th.

Thanks to the careful power system management by the operating team the
analogue repeater continues to function well.

Recent telemetry received from FO-29 operational continuous analogue bus voltage
as 15 - 16.5V and Transmit Power: 500 - 900mW.

The linear transponder can be accessed on these frequencies:

Uplink: 146.000 - 145.900 MHz
Downlink: 435.800 - 435.900 MHz
Beacon: 435.795 MHz

The FO-29 Blog is on-line at http://blog.goo.ne.jp/fo-29
A google english translation of the blog can be found at http://tinyurl.com/FO29Blog

Moon Mission Final Preparations.

NASA's Gravity Recovery And Interior Laboratory (GRAIL) mission to study the
moon is in final launch preparations for a scheduled Thursday Sept. 8 launch
from Cape Canaveral Air Force Station in Florida.

GRAIL's twin spacecraft are tasked for a nine-month mission to explore Earth's
nearest neighbour in unprecedented detail.

They will determine the structure of the lunar interior from crust to core and
advance our understanding of the thermal evolution of the moon.

Astronomers Find Largest, Most Distant Reservoir of Water

Two teams of astronomers have discovered the largest and farthest reservoir
of water ever detected in the universe. The water, equivalent to
140 trillion times all the water in the world's ocean, surrounds a huge,
feeding black hole, called a quasar, more than 12 billion light-years away.

Calling Frequencies for PSK31
14.070

SCOUTMASTER ARTHUR ANDERSON, W9WPH, STABBED TO DEATH ON HIKING TRIP

W9WPH, of Kokomo, Indiana, 76, bled to death after being stabbed in what authorities are calling "a senseless act."

W9WPH together with another man was leading two Boy Scouts, ages 11 and 12, on a required five mile nature hike on Bunker Hill, 60 miles north of Indianapolis.

He was a scouting volunteer of some 50 years and was an Assistant Scoutmaster of a troop based at Redeemer Lutheran Church in Kokomo.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Southern Peninsular ARC are conducting an interesting exercise with the Peninsula Group of Fire Brigades on October 23 this year, attempting to link all stations back to the Rosebud Fire Station Divisional Command Centre by purely portable/self-contained means and outside of normal emergency service communications channels.

This will be a chance for SPARC members not involved in formal teams such as WICEN etc to test their skills as a "last resort" option by emergency services.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

==> PUBLIC SERVICE: HAMS FROM NORTH CAROLINA TO MAINE PROVIDE
COMMUNICATION SUPPORT BEFORE, DURING AND AFTER HURRICANE IRENE

Hurricane Irene -- the first major hurricane of the 2011 hurricane
season -- left extensive flood and wind damage along its path through
the Caribbean, the East Coast of the United States and as far north as
Atlantic Canada. Beginning on August 20 as then-Tropical Storm Irene
headed toward Puerto Rico, radio amateurs were already on alert.

Irene first made landfall in the US as a Category 1 storm on the
morning of Saturday, August 27 on North Carolina's Outer Banks. In
preparation, ARRL Emergency Preparedness Manager Mike Corey, W5MPC,
activated the ARRL HQ Emergency Response Team (HQERT). On Tuesday,
August 23, this team of ARRL HQ staffers began monitoring various nets
and providing support to the affected Field Organizations from W1AW,
the Hiram Percy Maxim Memorial Station. Two days later, the HQERT went
into active mode. Read more here
<http://www.arrl.org/news/hams-from-north-carolina-to-maine-provide-communica

tion-support-before-during-and-after-hurricane-ir>.

==> PUBLIC SERVICE: PUERTO RICO FEELS EARLY BRUNT OF HURRICANE IRENE

When Tropical Storm Irene formed on the evening of Saturday, August 20, the Puerto Rico Emergency Management Agency began to activate in preparation for the storm's approach. According to ARRL Public Information Officer Angel Santana, WP3GW, amateurs affiliated with the Cuerpo Voluntarios Radioaficionados (CVR) began to move throughout the island. In San Juan, CVR activated KP4CVR on the KP4CAR repeater. Hams also monitored 7.195 MHz for traffic and used 146.520 MHz for local contacts. Read more here <http://www.arrl.org/news/puerto-rico-feels-early-brunt-of-hurricane-irene>.

==> KALAUPAPA, HAWAII IS SITE OF SECOND ARRL REMOTE VE TESTING

From the sunny shores of Hawaii's Kalaupapa Peninsula, -- located on the Island of Molokai -- ARRL Volunteer Examiners gave a remote ARRL VE session on the morning of July 25. Well, at least it was morning in Hawaii, but it was late in the afternoon at ARRL Headquarters. What made this VE session so special that it was only the second VE session to be administered via Internet video feed. The first video VE session -- and the first-ever VE session in Antarctica -- took place in October 2010.

Not only was this VE session special due to its location, only one VE was at Kalaupapa for the exam. "This is where the Internet video feed came into play," explained ARRL VEC Manager Maria Somma, AB1FM. "Joe Speroni, AH0A -- who lives in Honolulu but went to the site at his own expense -- was at Kalaupapa, but Bev Yuen, AH6NF, and Ray Moody, AH6LT, were in Honolulu and watching on video. We also had three VEs here at ARRL Headquarters watching via video feed: Penny Harts, N1NAG, Steve Ewald, NV1X, and Rose Anne Lawrence, KB1DMW. These three administer many VE sessions each year here at ARRL HQ." Read more here <http://www.arrl.org/news/kalaupapa-hawaii-is-site-of-second-arrl-remote-ve-testing>.

==> ON THE AIR: HAVE SOME FUN IN THE ARRL SEPTEMBER VHF QSO PARTY

September is here, and that means the VHF bands have been getting a workout. "If you've never experienced the fun of VHF+ operating, the ARRL September VHF QSO Party, the weekend of September 10 is a great place to start," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "With many HF radios now offering at least 6 meter SSB/CW capabilities -- and some offering 2 meters and 70 cm as well -- any amateur with a Technician class license or higher can experience long-haul communication on the VHF bands."

Kutzko explained that September is known for having good tropospheric propagation, as opposed to June, which is known for sporadic-E, or E-skip. "As the summer winds down, the sporadic-E season comes to an end and good tropo conditions flourish," he said. "A modest station -- say a 50 to 100 W SSB/CW transceiver and a small Yagi on 2 meters --

can, with favorable conditions, make QSOs several hundred miles away. If conditions are excellent, QSOs of more than 1000 miles are possible." Read more here <http://www.arrl.org/news/have-some-fun-in-the-arrl-september-vhf-qso-party>.

==> ON THE AIR: SPECIAL EVENT STATIONS MARK TENTH ANNIVERSARY OF 9/11

In remembrance of those who died in the terrorist attacks that occurred on September 11, 2001, several Amateur Radio Special Event Stations are being planned. Click here <http://www.arrl.org/news/special-event-stations-mark-tenth-anniversary-of-9-11> for a list of those stations that have notified the ARRL that they will be on the air. The dates, times and frequencies of these Special Event Stations are listed as they were reported to the ARRL, and as such, are subject to change. This list will be updated as more Special Event Stations notify ARRL HQ of their plans. We recommend that you bookmark the web page and check back periodically for any additions.

==> SOLAR UPDATE

Tad "September Sun, blowing golden hair <http://www.youtube.com/watch?v=kJhUs9PQvHs>" Cook, K7RA, reports: Sunspot activity rose again this week, with the average daily sunspot number up nearly 18 points to 83.6, but the geomagnetic indices were down slightly. The high sunspot number for the week -- 121 -- was recorded on Wednesday, August 31. The last time the sunspot number was higher was on July 31 at 128 and August 1 at 130. The predicted solar flux is 110 on September 1-2, 105 on September 3, 100 on September 4-5, 95, 90, 90, 85, 90, 92 and 95 on September 6-12, 100 on September 13-15, and finally peaking at 105 on September 18-22. The predicted planetary A index is 5 on September 1-2, 8 on September 3-4, 5 on September 5-10, and then 8, 12, 8 and 5 on September 11-14. Look for more information on the ARRL website on Friday, September 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Type O Negative's September Sun <http://en.wikipedia.org/wiki/Type_O_Negative>.

==> HQ NEWS: ARRL HQ TO CLOSE IN OBSERVANCE OF LABOR DAY

ARRL Headquarters will be closed in observance of Labor Day on Monday, September 5. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, September 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK ON THE RADIO

This week:

- September 2 -- NCCC Sprint Ladder
- September 3 -- Wake-Up! QRP Sprint; GCW Straight Key Party; Russian Radio WW RTTY Contest
- September 3-4 -- Colorado QSO Party; QCWA Fall QSO Party; All Asian DX Contest (Phone); CWops Mini-CWT Test
- September 4 -- DARC 10 Meter Digital Contest
- September 4-5 -- Tennessee QSO Party
- September 5-6 -- Michigan QRP Labor Day CW Sprint
- September 6 -- ARS Spartan Sprint

Next week:

- September 9 -- NCCC Sprint Ladder
- September 9-10 -- PODXS 070 Club Jay Hudak Memorial 80 Meter Sprint (local time)
- September 10 -- Ohio State Parks on the Air; Kulikovo Polye Contest
- September 10-11 -- Arkansas QSO Party; WAE DX Contest (Phone)
- September 10-12 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>; ARCI VHF Contest
- September 11 -- SKCC Weekend Sprint
- September 14-15 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Amateur Radio Newsline(tm) Report 1777 - September 2 2011

Amateur Radio Newsline report number 1777 with a release date of
Friday, September 2, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amsat Oscar 51 appers to be failing as its
batteries die. Also, the ARRL says that it opposes a rules waiver
request filed by the Anchorage V-E-C, ham radio responds to Hurricane
Irene, international cooperation removes CODAR from the 24 MHz band and
a Dancing With The Stars judge teams with the BBC to produce a new
documentary on the sinking of the Titanic with an emphasis on Morse
code. All that and more on Amateur Radio Newsline(tm) report number
1777 coming your way right now. (Billboard Cart Here)

**

HAM RADIO IN SPACE: AO-51 MAY SOON BE LOST

The ageing Amsat Oscar AO-51 may appears to be a dying bird. This,
according to Control Station, Mark Hammond, N8MH reporting via the
Amsat News Service weekly newsletter. Amateur radio Newsline's Don
Carlson, KQ6FM, has the details:

--

In an update on AO-51's health, Mark Hammond, N8MH, noted that since
the failure of the first cell on the six-cell battery, ground
controllers have been limited to simple commands for basic
configurations. Hammond said that ground control stations have evolved
basic control and management techniques for AO-51. These allow them to
set power levels manually, change uplinks and downlinks and the like.
However, features such as telemetry collection and the Bulletin Board
are not functional at this time. If the satellite resets during eclipse
these basic functions must be restored manually by a ground station.

And now ground stations have discovered there is a second cell in the
battery showing problems. Hammond says that the control team thinks
that battery will be the next cell to go. If that happens the probable
result that their limited manual mode of operation probably will no
longer be an option, and the mission might be considered over.

By way of historic background, AO-51 is the on-orbit name designation
of a Low Earth Orbiting microsat previously known as Echo. It was
launched on June 29, 2004 from Baikonur Cosmodrome, in Kazakhstan into
a sun synchronous low Earth orbit.

The AO-51 bird contains an FM repeater with both a 144 MHz and 1.2 GHz uplinks along with 435 MHz and 2.4 GHz downlinks. It also carries a digital subsystem that transmits telemetry on 70 cm and provides a complete PACSAT Bulliten Board System. It also features a 10 meter P-S-K uplink.

As an FM satellite, AO-51 has always been easily workable with gear as simple as an VHF/UHF dual band hand-held radio, as long as a station knows when the satellites footprint is within reach. Transatlantic contacts have been made without much effort, as long as the satellite is approximately mid-Atlantic so that the edge of the satellites footprint is within reach on either continent.

But since this past May, AO-51 has been experiencing problems with its batteries whiuch in turn as made the onboard repeater unavailable at times. While controllers are now back in basic control of the ageing bird, if one more of its batteries fail, Hammond seems to be saying that AO-51 could go perminantly Q-R-T

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno, Nevada.

--

AO-51 is currently operating FM with an uplink at 145.88 MHz on 2 meters and a 70 centimeter downlink at 435.15 MHz that uses left-hand circular polarization. Output power of the 70 centimeter transmitter is just under one watt. How long it will stay operational depends on how much longer its on boards batteries continue to function in orbital space. (ANS)

**

RADIO RULES: ARRL OPPOSES ANCHORAGE LICENSE CREDIT INTERIM WAIVER REQUEST.

The American Radio Relay League has said no to a waiver request filed by the Anchorage Alaska VEC. One that asks that the FCC to grant a blanket waiver of Section 97.505 of the Commission's Rules and to grant exam credit for test elements previously passed to those radio amateurs whose licenses have expired and are beyond the two-year grace period for renewal.

The story really goes back to this past April when the Anchorage group filed a Petition for Rule Making designated RM-11629. As previously reported, that request asks the FCC to give permanent credit to radio amateurs for examination elements they have successfully passed. This would in effect create a license exam credit that would be valid throughout an amateurs' lifetime and in essence create a United States lifetime amateur license.

Then on July 6th, the Anchorage VEC followed up with its waiver request even though RM-11629 is still pending. After consideration, on August 11, the ARRL filed comments on the waiver request with the FCC, urging

the Commission to dismiss or deny it. The League says that its decision to oppose is based on the fact that if the FCC grants such a waiver request, it would quite obviously prejudge the outcome of RM-11629. And if for any reason RM-11629 is denied or dismissed, those who re-obtained licenses during the term of any temporary waiver would either have been given a privilege not afforded others or else they would have their reinstated or renewed licenses revoked at some later date. In other words, the ARRL filing says that should the Commission grant the temporary waiver, it is equivalent to granting of the underlying petition.

At this time, the ARRL says that it is not taking a position with respect to the merits of the original Anchorage VEC request in RM-11629. Rather, the League only opposes the waiver request because the Anchorage VEC has failed to justify the need for the interim relief that the waiver request seeks. (ARRL)

**

RESCUE RADIO: HAM RADIO AND HURRICANE IRENE

Hurricane Irene is now a storm of the past and provided a good training and response exercise for hams from North Carolina through Canada. Bill Pasternak, WA6ITF, is in the newsroom with what we know so far:

--

Ham radio is always ready to respond in time of disaster. Its star really shines when all other means of communications fail. There were any hams involved in emergency communications who were well trained and fully equipped to respond when it was announced that hurricane Irene was headed to the United States eastern shores.

Initial forecasts said that Irene could make landfall as a Category 2 or even 3 storm with the potential of raving a good part of Florida and other South-East coastal states before working her way northbound. Already the narrow Cat Island in the southeastern Bahamas taken the full force of Irene, and by this time, ARES and other groups from Florida's northward through the Canadian Maritime Provinces were on stand-by alert for the devastation that many news outlets were predicting.

But with the exception of some localized problems, most of what weathercasters were predicting never happened. This was mainly because Irene did not follow initial storm track predictions. Instead of heading directly toward Florida the massive hurricane veered a few degrees to the East, sparing Florida, Georgia and South Carolina. Instead it made landfall in the outer barrier islands of North Carolina as a Category 1 hurricane having lost a lot of energy in the cooler mid-northern latitude waters of the Atlantic.

That said, the work of the Amateur Radio operators began many days before Hurricane Irene hit U.S. shores. That's when several support

networks were activated that relayed storm information to the National Hurricane Center in Miami.

--

".W6LMJ for the Hurricane Watch Net listening for stations in the path of hurricane Irene; specifically interested in stations at this time who can report on wind conditions above 70 mph. Any station experiencing wind conditions above 70 mph please call now."

--

As Irene's winds began hitting the East Coast, more hams came on the air to provide weather spotting information to the National Weather Service's Skywarn Program. The real time, ground level reporting allowed the weather forecasters to make more accurate predictions and issue warnings. This is because the Weather Service's Doppler radar cannot see what is actually happening at ground level and the reports from the ham radio observers were especially essential when tornadoes are possibly mixed into a hurricane's winds.

Several states including New Jersey and Vermont suffered significant damage, most from flooding. According to the ARRL, ham radio volunteers from surrounding regions were brought in at the request of Greene County, New York authorities. Greene County was one of the areas devastated by flooding following Irene. And as we go to air, radio amateurs are still aiding the American Red Cross relief efforts by providing technical expertise and working with the organizations communications staff.

One area where Irene did not impact in way hurricanes usually do was to emergency and personal communications. A report in the New York Times said that wireless phone networks held up well despite widespread losses of power. Many people who lost electric mains power and wired telephone service were able to continue to communicate using e-mail and social networks using battery-powered mobile devices.

Also, according to the FCC which activated its Disaster Information Reporting System, no 911 Emergency Response Center was out of service and that it had received no reports of public safety communications disruptions.

In this case one could say that most dodged the bullet, but only because Mother Nurture chose to downgrade Irene before she made landfall. If she had hit as a Category 3 hurricane with sustained winds between 111 to 130 mph, much of the communications infrastructure that survived Irene would more than likely have been blown away. That would have been the proverbial "when all else fails" scenario and ham radio communications personnel would be out there right now helping in relief operations and damage assessment as has been the case almost since the day that the service first began.

>From the newsroom in Los Angeles, I'm Bill Pasternak , WA6ITF,
reporting for the Amateur Radio Newsline.

COMMEMORATING 911: TWO MORE CLUBS ANNOUNCE COMMEMORATIVE OPERATIONS

Two more amateur radio groups have announced 911 commemorative
operations. The Pentagon Amateur Radio Club whose call is K4AF says
that it will be operational on Saturday, September 10th and Sunday
September 11th to honor all those lost on September 11, 200. This,
with a special remembrance of the 184 people who lost their lives at
the Pentagon and on board American Airlines Flight 77. Further
information including QSL routing will be posted at www.k4af.org during
the event.

And the Northeast Wireless Radio Club will take to the airwaves on
Sunday, September 1700 to 2300 UTC using the call N2WC. This
commemorative operation will be in the High Frequency General class
bands on CW, SSB phone and several digital modes. No specific list of
operating times or precise frequencies is known as we go to air.

Already announced are groups in Pennsylvania, Nebraska and New York
City that are planning on-the-air commemorative operations. These are
listed on our website at www.arnewsline.org. (Via e-mail)

ENFORCEMENT: HAMS AND TWO NATIONS PTT SUCCESSFUL IN REMOVING CODAR
FROM 24 MHz BAND

The Codar High Frequency Radar operating on on 24920 to 25080 kHz from
Northern Italy has gone off the air. This, thanks to a concerted
effort by individual hams and members of various European Intruder
Watch operations.

A release by IARU Region 1 Intruder Watch Coordinator DK2OM
specifically singles out DJ9KR, G4BOH and 9A5W for their assistance. It
also thanks the British telecommunications regulator Ofcom and the
German P-T-T for their direction finding assistance and other help.

DK2OM says that he and his group will keep an ear on this spectrum in the hope that the CODAR signal will not return. He calls the entire operation to rid the band of CODAR to be a further example for an effective cooperation. (IARU R-1)

ENFORCEMENT: SOCAL UNLICENSED BROADCASTER ISSUED NOTICE OF UNLICENSED OPERATION IN THE AM BROADCAST BAND

The Los Angeles FCC Office has issued a Notice of Unlicensed Operation to Willie Walton, of Santa Clarita, California. This for his alleged operation of an unlicensed transmitter in the A.M. broadcast band. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

According to a release from the FCC, it received information that an unlicensed broadcast radio station on 1610 kHz was allegedly operating in the Los Angeles suburban community of Santa Clarita, California. On August 11th, agents from the Los Angeles office confirmed by direction finding techniques that radio signals were emanating from one Willie Walton's residence.

The Notice of Unlicensed Operation stated that Commission's records show that no license was issued for operation of a broadcast station on 1610 kHz at Willie Walton's location. The notice then went on to warn Walton that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws and could subject the operator to severe penalties. This includes confiscation of the transmission equipment, substantial monetary forfeitures, and even criminal sanctions including imprisonment.

Walton was told that he must cease the alleged unlicensed operations immediately. He was also given ten days from the release of the Notice of Unlicensed Operation to respond to it and instructed that he must also supplement his response to the on-scene notice issued to him on August 11th with any evidence that that shows he has the authority to operate granted by the FCC. Lastly the Notice of Unlicensed Operation stated that the Commission's staff will use all relevant material information before it, including that provided by Walton to determine what, if any, enforcement action is required to ensure his compliance with FCC's rules.

You can read the full FCC action in this matter on-line at tinyurl.com/scv-unlicensed.

For the Amateur Radio Newsline, I', Bruce Tennant, K6PZW, in Los Angeles.

--

And before you ask: Yes, Santa Clarita is the home of Amateur Radio Newsline but until now we never knew an unlicensed broadcast station was operating less than 5 miles from our studio location. Obviously,

one never knows where these unlicensed broadcasters will show up. (FCC)

RADIO LAW: 700 MHZ "4G" USE IN THE U.S./MEXICAN BORDER ZONE

The U.S. Department of State has posted a news item entitled, "Amendment to the U.S-Mexico Bilateral Agreement for the 700 MHz Band to Allow for the Timely Deployment of Fourth Generation Wireless Broadband Service."

The news release says that on July 28th, 2011, the FCC and the Mexican Ministry of Communications and Transportation concluded an exchange of letters to amend the 2006 Protocol for the 698 to 806 MHz band This, to increase the power limitations and facilitate increases in parameters when counterpart operators across the border from each other do not exist.

The release says that the changes were necessary to accommodate the advanced technologies employed for 4th Generation wireless broadband service. The amendment became effective this past July 28th. It applies to both sides of the entire common border area with more on the agreement posted in the at www.state.gov/e/eeb/cip/ (CGC)

PUBLIC SERVICE: HAMS NEEDED AT BOSTON'S JIMMY FUND WALK

Steve Schwarm, W3EVE, in Boston says that hams are needed for the Sunday, September 18th for that city's Jimmy Fund Walk. Amateur radio operators who volunteer will be assigned duties on transport busses and at first aid stations. Deployment times run from 5 AM to 7 PM Eastern time and Steve notes that there are still some half day assignments for the morning.

All communications will take place 2 meter FM. An HT with a good antenna and extra batteries is what is needed for those assigned to the First Aid Stations. A mobile antenna is needed for the buses.

Drop an e-mail to w3eve at arrl dot net if you can help. Please be sure to put the words Jimmy Fund in the subject. (W3EVE)

NAMES IN THE NEWS: MR. AUDIO TO SPEAK AT THE UK NATIONAL HAMFEST

Some names in the news. The Radio Society of Great Britain says that ham radio's legendary Mr. Audio, Bob Heil, K9EID, will be attending the U-K's National Hamfest. There, he will be demonstrating his new Genesis and Elite microphones and providing one of his always well received lecture presentations.

The press release says that not only does K9EID make communications headsets but he was the person who brought proper sound reinforcement to many rock bands for stadium concerts as far back as the 1960's. It notes that K9EID is also the inventor of the famed 'Heil Talk Box' used by performer Peter Frampton on the song "Show Me The Way." (National Hamfest PRO)

NAMES IN THE NEWS: ZL3TY RECEIVES 2 METER DXCC NUMBER 69

Bob McQuarrie, ZL3TY, of Greymouth, New Zealand reports over the Zed-L VHF Contest Reflector that he is now the proud recipient of 2 meter DXCC certificate number 69.

ZL3TY notes that all but one of the QSOs was made by moonbounce. The lone exception was a meteor scatter QSO with VK0MT. Also that all but a few were made using WSJT digital mode. He says that WSJT has revolutionized VHF DXing and made EME possible for small stations such as his.

The certificate Bob received from the ARRL was dated June 22nd. What makes this rather special is that it's believed to be a first for New Zealand, for Oceania and possibly the entire Southern Hemisphere. (NZART)

**

NAMES IN THE NEWS: 2011 YHOTY WINNER KS3P ON THIS WEEKS RAIN REPORT

And Hap Holly, KC9RP, tells us that this week's Rain Report features a rather in-depth interview with 2011 Amateur Radio Newsline Young Ham of the Year, Kaitlyn Cole, KS3P. You can hear it right now on-line by

taking your web browser to www.therainreport.com. (KC9RP)

THE CHANGING OF THE GUARD: NOTED BROADCAST ENGINEER EARL ARBUCKLE, K6EFA - S.K.

We have said this before and sadly we must say it once again. The changing of the guard in ham radio continues with word of the sudden passing of noted broadcast engineer Earl F. Arbuckle III, K6EFA, of Secaucus, New Jersey. According to a note from Kent Peterson, KC0DGY, in the early morning hours of Monday, August 29th, K6EFA was taking the trash out but failed to return. Shortly thereafter his wife found him face down on their driveway. While there is no medical confirmation yet, a heart attack is believed to be a possibility.

At the time of his passing, Earl Arbuckle was the Vice President of Engineering for Fox Television Stations group. This is the owned-and-operated stations division of Fox Entertainment Group, which is a part of the News Corporation. His responsibilities included strategic planning and execution of new technologies for the stations in the group. Under his direction, all Fox owned stations were converted to digital transmission and most also upgraded to high-definition studio news production. Just prior to his passing, Earl Arbuckle had worked through the weekend of August 27th and 28th on hurricane Irene contingencies for the Fox owned stations in New York City, Washington DC, Philadelphia, Pennsylvania and Boston, Massachusetts.

Prior to 1996, K6EFA had been employed for 18 years by Tribune Broadcasting. 16 of these were spent at New York City's WPIX and 2 years as corporate engineering manager. He joined News Corporation in 1996 as Vice President of Engineering for American Sky Broadcasting where he was part of the core team that designed and built the huge Arizona digital broadcast center, later sold to EchoStar. In late 1997 he moved to the Fox Television Station Group where he began the digital transition. There he launched the first three Fox Television digital stations in 1998, and completed the remaining stations ahead of FCC deadlines.

Earl Arbuckle was a veteran of the US Navy, reaching the rank of Lieutenant. He was a registered Professional Engineer in the State of

New Jersey, an adjunct professor at Ramapo College of New Jersey as well as Chairman of the Mahwah Township Planning Board. He was also a Senior Member of the Institute of Electrical and Electronics Engineers and a member of the Society of Broadcast Engineers.

A native of southern California, Earl Arbuckle, K6EFA, held a Bachelor of Science degree in Engineering from the University of California at Irvine. He is survived by his wife Pat, his daughter Jennifer and his parents. At airtime memorial services were pending. (KC0DGY, others)

HAM RADIO NEAR SPACE: EOSS TO LAUNCH 3 BALLOON CLUSTER ON SEPTEMBER 10

Edge of Space Sciences will be flying a rare three balloon cluster for NOAA on Saturday September 10th. The launch will take place at 6:50 a.m. Mountain Time from Windsor Colorado. These will be heavyweight payloads of up to twenty pounds flying NOAA Aircore gear. More information including technical data and frequencies is on-line at tinyurl.com/colorado-balloon

**

HAM RADIO IN SPACE: 2ND CALL FOR PAPERS FOR AMSAT SPACE SYMPOSIUM

A second call for papers for papers to be presented at the 2011 AMSAT Space Symposium has been issued by the events planners. Proposals for formal papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community. A final copy must be submitted by October 1st for inclusion in the printed proceedings. The symposium is slated for Friday, November 4th through Sunday, November 6th at the Wyndham San Jose Hotel, in San Jose, California. Abstracts and completed papers should be sent by e-mail to n8fgv (at) amsat (dot) org. (N8FGV)

**

HAM RADIO IN SPACE: NEXT CREW LAUNCH TO ISS MAY BE DELAYED

News reports on Friday, August 26th say that Russia may delay the next manned launch for the International Space Station. This, after an unmanned space vessel crashed into Siberia instead of reaching orbit to rendezvous with the ISS.

Interfax-AVN, the specialist military arm of the Interfax news agency, quoted a source in the rocket and space industry as saying that the planned September 22nd launch could be delayed. Hiis, to give engineering teams time to work out the precise cause of the crash of the Progress cargo vehicle. The Soyuz-FG booster that is due to take the astronauts into space uses the same third stage motor in the Soyuz-U rocket which failed to put the Progress spacecraft into orbit.

The planned return to Earth from the ISS of two Russians and an American astronaut on September 8th may also be delayed. One

possibility is to delay the landing from September 8th to September 22nd and the blast-off the Soyuz-FG from September 22nd to October 6th.

Current ISS residents Russians Andrei Borisenko, RW7LFG, Alexander Samokutyaev and American Ron Garan, KF5GPO had been due to return to Earth on a Soyuz TMA-21 capsule on September 8. Russians Anton Shkaplerov and Anatoly Ivanishin and American Dan Burbank were then due to fly to the ISS on a Soyuz TMA-22 capsule on September 22. (Published news reports)

**

ON THE AIR: COLORADO 6 METER BEACON BACK ON THE AIR

Dave Clingerman, W6OAL, reports over the VHF reflector that the KA0CDN slash B Colorado 6 Meter Beacon was brought back on the air on Monday, August 29th. The new beacon hardware runs 50 watts output on 50.065 MHz to an older model HyGain 6 Meter omni antenna. The physical location of the beacon is just east of Denver near the intersection of Interstate 70 and I-225 in Maidenhead grid square DM-79OS. More information on the history of the Colorado Beacon can be found at www.rmvhf.org (VHF Reflector)

**

DX

In DX, IC8ATA, will be active as 9H3AT from Malta through September 5th. His operation will be holiday style on the High Frequency bands, SSB only and a focus on 17 and 12 meters. QSL via his home callsign, direct or via the bureau. For more details is at www.mdxc.org/9h3at

JF2QNM will be active portable 9M6 from East Malaysia during the CQWW DX CW Contest November 26th and 27th. QSL via JF2QNM.

SQ8X has announced that the JX5O DXpedition to Jan Mayen Island has been successfully validated at the ARRL DXCC Desk and has received a DXCC credit. He also says that the JX5O log has been uploaded to Logbook of the World.

Germany's special event station D-R-16-B-E-N-E has been on the air since July 1st, and will continue through October 31st. This to celebrate the visit of Pope Benedict XVI to Freiburg at the end of September. Operations are from the club station D-K-Zero-F-R on 80 through 10 meters using SSB and PSK31. QSL via DL7BC.

Lastly, SP5DRH will once again try to activate Pigeon Island between October 8th to the 21st. His main target will be Europe on 160 meters plus 80, 15 and 17 meters. QSL via SP7DQR only. For more details and updates, watch www.sp5drh.com/h40

**

THAT FINAL ITEM: DANCING WITH THE STARS JUDGE VISITS HAM RADIO CLUB IN IRELAND TO LEARN ABOUT THE MORSE CODE

Dancing With the Stars judge Len Goodman has paid a visit to Lisburn in Northern Ireland to learn about Morse Code. This for a new BBC documentary to be released in the spring of 2012. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

Len Goodman is well known for his appearances on the hit United States television competition series Dancing With the Stars and it's British counterpart known as Strictly Come Dancing. Now comes word that Goodman is in the midst of filming the three part video documentary for the British Broadcasting Corporation titled "Titanic and Me." The purpose of the new serirs is to commemorate the 100th anniversary of the sinking of the then newly minted luxury ocean liner.

For the sake of accuracy, Goodman wanted to learn about the Morse Code and how the radio operators on the Titanic may have use of it to summon help. So he turned to the Lagan Valley Amateur Radio Society, which is based just outside the town of Lisburn, Ireland and club member Jim Henry, GI0DVU. This, to teach him about the Morse code and how the radio operators on board the Titanic might have used it as the disaster unfolded.

At the time it went down, the Titanic was the worlds largest passenger liner. It sank on April 15th, 1912 while on its maiden voyage from Southampton, England, to New York City, after hitting an iceberg in the North Sea. 1,517 of its passengers and crew were lost.

The documentary that Goodman is a part of is expected to reach television screens in the United Kingdom in April of 2012. After that there's a likely chance for it to show up on an educational or adventure television network here in the United States.

For the Amateur Radio Newsline, I'm Norm Seeley, in hot and dry Scottsdale, Arizona.

--

The complete story on ham radios involvement in the three part BBC documentary series is on-line at tinyurl.com/titanic-tv. (Ulster Star, KL2A via Facebook)

GB2RS NEWS

Sunday 4th September 2011

The news headlines:

* Slovakia expands 60m band privileges

* PIC-a-STAR get-together at Milton Keynes

* RSGB Convention getting closer

Slovak radio amateurs are now allowed to use the entire 60m band, that's 5.2585 to 5.410MHz, instead of the previous allocation of a single channel on 5.260MHz. There are some caveats. Operations are allowed for experimental purposes with a maximum of 100 watts effective radiated power. Licenses for this are valid for only 1 year.

The RSGB Convention is just five weeks away and bookings are up on last year. There is a full programme of lectures for both day visitors and those spending the weekend at Horwood House near Milton Keynes. A programme of activities has also been arranged for partners not involved in the radio lecture. This year there are three top prizes in the DXpedition Fund raffle, an Icom IC-7410 HF/6m transceiver, a Kenwood TS-590S HF/6m transceivers and a Yaesu FT-450D transceiver. UK and US amateur radio exams will also be available at the RSGB Convention. The Foundation and Intermediate exams will be held on Saturday 8 October. The UK Advanced exam and US exams will be held on Sunday 9th. Those wishing to take the UK exams must book via the Exams Department at RSGB HQ on 01234 832700. Foundation or Intermediate examination candidates must contact Brian Reay, G8OSN via g8osn.rsgb@gmail.com or 01634 376516 so that their progress on practical assessments can be verified. US exams are held as walk-in sessions. The ARRL website gives you access to the question pool and Part 97 to download or read online at www.arrl.org. For details on the RSGB Convention and to book the remaining rooms go to www.rsgb.org/rsgbconvention.

The PIC-a-STAR is an SDR radio designed by Peter Rhodes, G3XJP, which was serialised in RadCom. It also appears in the RSGB Radio Communication Handbook. Milton Keynes ARS, in conjunction with the Milton Keynes Museum, invite all constructors of PIC-a-STARs to a one-day get-together. It takes place on Sunday 11 September from 11am to 4pm at the Milton Keynes Museum. Constructors of the PIC-a-STAR project are encouraged to bring their radios to the gathering and exchange ideas. Entry will be free, but it would be nice to leave a

small donation to the Museum. Constructors of other equipment designed by Peter are also welcome but the emphasis will be on the PIC-a-STAR project. There will be test equipment and an antenna available on the day. Further details and directions are available on www.radio-kits.co.uk/pic_a_star/event.htm.

The RSGB has learned with sadness of the death of Tony Sale, the man behind the Bletchley Park Colossus computer rebuild project. A remarkable and skilled man, he had a long history in engineering that encompassed robotics, radar and computing. He was MI5's principal scientific officer and later worked at the Science Museum. He helped create the Computer Conservation Society and, more recently, the National Museum of Computing at Bletchley Park, where his Colossus remains today. In January 2008 Tony Sale and Colossus were featured on the cover of RadCom. Castles And Stately Homes On The Air will be holding a UK & IRE Heritage event during the month of September to coincide with the European Heritage Month. This is an opportunity to access locations that may previously have been inaccessible or closed to the public. Details on activations appear on the CASHOTA website, www.cashota.co.uk. The group has also set the dates for CASHOTA's annual Castles weekend in 2012. The event will be held over two weekends on 18 and 19 May and 25 and 26 May. New and previous participants are encouraged to take part. More details can be found at www.cashota.co.uk.

The G5RP Trophy is an annual award to encourage newcomers to HF DXing. However, the award is not limited to youngsters or the newly-licensed: the HF DX bug can bite at any age, or after many years of experience on other bands. If you are an established HF DXer and want to recommend someone to be awarded the G5RP Trophy for 2011, now is the time to send in your nomination. Your nominee should be an up-and-coming HF DXer who has made rapid progress in the last year and has some real achievements to show, for example, a good total of new countries worked or some serious HF DXpedition activity. This prestigious award will be presented this year at the RSGB Convention on 7th - 9th October. Please send your nominations to Ian Greenshields, G4FSU, QTHR, or by e-mail to ian.greenshields@gmail.com, to arrive no later than Friday 23 September.

GB2RS recently learned that RSGB Life Vice President Pat Hawker MBE, G3VA, has been taken ill and is in hospital. He is expected to make a good recovery but may have to move to a nursing home. He says he is thinking of us all, but may not be able to return to the radio. Messages of support can be sent to him QTHR, from where they will be relayed.

And now for the details of rallies and events for the coming week

Today, 4 September, the Telford Hamfest is taking place at the Enginuity Museum, Coalbrookdale, Telford, TF8 7DU. Doors open at 10.30am and the usual traders will be present, This year there are a large number of radio valves for sale. The Bring & Buy will be

operating as usual. The lecturer will be Roger, G4ROJ, with his fascinating talk and demonstration of kites and balloons used as antenna supports. There are two sessions, 11am & 1pm. There is limited seating so be early. The organisers recommend that if you come to the Hamfest from the North, East or West, you should use the M54 and leave it at Junction 6. Enginuity is just 5 minutes from there. From the South, via Much Wenlock, take the Telford road. Turn off right for Ironbridge and then left up the hill to Coalbrookdale.

Next weekend, on Saturday 10 September, the Warrington Communications Market will be held in Warrington Indoor Market, Bank Street, Academy Way, WA1 2EN. Doors open at 10am and there is a multi- storey car park nearby. There is free entry to the event and there are cafes in market for refreshments. Trade stands are available from £10 per table with free parking below the venue for traders. Details from Patrick on 07581 545 671.

On Sunday 11 September, Torbay Annual Communications Fair takes place at Newton Abbot Racecourse, Newton Abbot, Devon TQ12 3AF. There will be trade stands, a Bring & Buy and an RSGB bookstall. Doors open at 10am and admission is £2. Details by e-mail to rally@tars.org.uk. Now for the news of special events

Several special event stations are being run to commemorate the 10th anniversary of the 9/11 attacks in the USA. ARRL reports that these include the Pentagon Amateur Radio Club, K4AF, from 1100UTC on Saturday 10 September until 0100UTC on Sunday 11 September.

Churches & Chapels On the Air takes place next weekend, 10 and 11 September, from 10am to 4pm. There will be several stations on the air, mainly 40 and 80m SSB with special event callsigns. The organisers particularly ask all amateurs to give the stations a call.

GB4CFV will be put on the air by members of the Friskney & East Linconshire Communications Club. Visitors are welcome to come and join them or call them on the air on 10 and 11 September at Church Farm Museum in Skegness. They plan be active on 2m FM and will be using PSK, SSB and CW on the HF bands.

Preston ARS will put GB1AVR on the air for Ackworth Vintage Rally on 10 and 11 September from Lanes Farm, Ackworth.

Throughout September, special event station 3Z176DORR will be on the air to commemorate German scientist Robert Dorr. The station will be QRV from Polish Flora & Fauna parks SPFF-025, 151, 200, 222, 261, 335, 336 and 337. Information can be found on qrz.com.

The Lithuanian amateur radio society, LRMD, is organising a number of special event stations to mark the 37th European Men's Basketball Championships. There are around 23 special calls, all LY37 plus one letter, active until 18 September. Full details, including Awards that can be achieved for working the stations, are in English at

www.LRMD.LT/basketball-2011-en.htm.

And now the HF DX news compiled from 425 DX News and other sources

ZS6AYU will be active as ZS6AYU/A25 from Botswana between 9 and 11 September. Operations will probably be on 10 through to 40m including 17 and 12m using CW only. QSL via ZS6AYU.

Members of the Wessex Contest Group will be active from the island of St Martin's, Isles of Scilly, using the club callsign MX0WCB, between 11 and 17 September. Activity will be mainly QRP on the 40, 20, 17, 15 and 10m bands. The team will use three FT-817 transceivers, a Clansman PR320 and an FT-897 as the main shack radio. QSL direct, by the Bureau, eQSL or via M0WAY.

K3GV/VY2 will be active mostly on 15m and 20m from Prince Edward Island, which is IOTA reference NA- 029, for one month starting on 1 September. QSL via K3GV either via the bureau or direct.

OZ/DF6FL, OZ/DL9ZE and OZ/DL5FF are working from Bornholm in SSB, CW and RTTY on 40-10m until 10 September. QSLs via their home calls either via the bureau or direct. Now the contest news

There are several contests active today, 4 September. The RSGB SSB Field Day finishes at 1300UTC on all bands from 3.5 to 28MHz; the exchange is signal report and serial number. The 144MHz trophy also runs until 1400UTC. The fifth and final 144MHz Backpackers' Contest takes place between 1100 and 1500UTC. For those unfamiliar with backpacker contesting, there are antenna and height restrictions in both sections.

The International Amateur Radio Union Region 1 Amateur Television International Contest takes place from 1800UTC on Saturday 10 September until 1200UTC on Sunday 11 September. Stations are encouraged to participate, or just look for increased amateur TV activity on the 70, 23, 13 and 3cm bands. Talkback is most likely to be found around 144.750MHz FM or 144.525MHz SSB. More information can be found on the British Amateur Television Club website www.batc.org.uk.

On 6 September from 1900 to 2130UTC the 144MHz UK Activity Contest takes place. Using all modes the exchange is signal report, serial number and locator.

The 2nd 70MHz contest takes place on 11 September from 0900 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 22nd to the 28th of August, compiled by Neil Clarke, G0CAS on the 29th of August.

This week saw the return of the active regions from almost a month ago. The groups have decayed during their transit of the far side of the sun. Since their return, solar activity increased to low levels on the 22nd, 24th and the 26th, when only small strength C class solar flares

took place. Solar flux levels varied little day to day and averaged 104 units. The 90 day solar flux average on the 28th was 97 units, that's one up on the previous week. X-ray flux units also varied little day to day and averaged B2.5 units. Geomagnetic activity was quiet every day; saying that, a weak coronal hole disturbance arrived on the 23rd but the Ap index only increased to an Ap index of 9 units. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase to 470 kilometres per second on the 23rd and then gradually decline to 370 kilometres per second by the 28th. Particle densities remained low every day. Bz varied between minus 7 and plus 8 nanoTeslas on the 23rd, which was the most disturbed day, and significantly less on the quieter days.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Therefore, solar activity is expected to be very low most days but the occasional C class solar flare could take place and lift solar activity to low levels. Solar flux levels should be around the mid 80's for most of the week. Today could be slightly unsettled but otherwise geomagnetic activity is expected to be at quiet levels for the rest of the week. MUFs during daylight hours at equal latitudes are expected to be around 23MHz for the south and the 20MHz for the north. Darkness hour lows should be 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. The best time to try this path will be between 1200 and 1600 hours UTC.

And that's all for this week from the propagation team.

2 Metres Counties Contest

The IRTS Autumn 2 metres counties contest was held on Sunday last, 28th August. The contest was reasonably well supported, although once again there were relatively few Dublin stations on the air - perhaps they were all in Croke Park?

Given that a good QTH can make a big difference on two metres, there are real advantages in heading for the hills for this contest. We heard Seamus GI4SZW on Slieve Gullion, Co. Armagh, David EI7GEB was on Mohercrom in Cavan, Joe EI7GY returned to his favourite spot on the Slieve Blooms in Laois, Jamie 2I0MFB operated from the Carnmore Viewpoint in Co. Fermanagh, the Shannon Basin Club were on Leitrim's Slieve Anierin, while Anthony EI2KC operated portable from Bellewstown Hill in Meath.

Band conditions were quite variable, which was most noticeable on FM. This encouraged some of the contestants to focus on SSB, especially in the later part of the contest.

As usual, the contest manager looks forward to receiving the logs from all the participants as soon as possible. The deadline for submission of logs is 27th September.

Mayo Radio Experimenters Network

The Mayo Radio Experimenters, using the call sign EI7MRE/P, activated the Blacksod lighthouse, IE0008, which is sited on the north west coast of Mayo, on Sunday August 21st for the International Lighthouse/Lightships On The Air event. This was the first time that this lighthouse was activated for the occasion and the first lighthouse the club has activated. Approximately 250 contacts were made into 22 countries and 6 UK and Dutch lighthouses were worked. Best DX was Japan, Indonesia and Phillipeens. North America was prominent too with limited openings to South America. The bulk of the contacts were with stations in Germany and Italy.

Plans are well underway for the 2011 Mayo Rally will be held on Sunday Nov 20th in The Welcome Inn Hotel, Castlebar. The Rally Director is

Padraic Baynes, EI9JA. More details about the club and its events can be found on the web at ei7mre.org

---

Licence Examination

The next theory examination for the Harmonised Amateur Radio Examination Certificate (HAREC) will be held on Friday, 14th October next at 2.00 p.m. in the ComReg offices in Dublin. Full details, including entry procedure and examination fee, are available at www.irts.ie/exam

---

Cashota

As part of the European Heritage Open days that are held throughout September, Cashota - Castles and Stately Homes On The Air will be holding a month long award event - UK & Ireland Heritage Month. Any individuals, clubs or groups can activate locations, throughout September, by registering at www.cashota.co.uk for the UK and www.cashota-ireland.org for Ireland, with all details of the event to be found there as well. Participants may register up until the end of September to participate.

AREN Activities

Last Sunday, August 28th, saw approximately 4300 cyclists take to the roadways around Waterford County covering three different routes. This year AREN was asked to assist in tracking the "Tail" of the 90k and 160k routes for the purposes of assisting with the logistics of deploying ambulances. There was approximately 4300 cyclists on Sunday and 1000 on Saturday. On the Sunday there were 4 Casualties transported by Irish Red Cross ambulances to hospital, 4 dealt with in the Dungarvan First Aid post, and 28 medical assistances performed. Once our primary task was complete, as a secondary task we were asked to 'fill-in' any communications black-spots that arose. AREN was also able to provide a radio communications link to SEMRA was a bonus as far as the served agency was concerned. VHF communications were operational at 09:05 and HF (80m) operational at 10:25. Many thanks to Francis, EI5GOB and John, EI7IG for their assistance on the day.

North Cork Radio Group

The North Cork Radio Group is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT

Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel: +353 21 4384477.www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 086-3357100 Email:ei7gtb/ at /gmail/ dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

DX News

Marko S55EI will be in Morocco until 20 September and will be active as CN2EI. He will be on 40, 6 and 2m. QSL to his home call.

Gab HA3JB has renewed his Egyptian licence and plans to be active as SU/HA3JB from now until the end of November. He will be active all bands 160-10m using CW, SSB, RTTY and PSK and possibly some SSTV.

Ron WB2GAI is returning to the island of Crete for the fourth time and will be QRV as SV9/WB2GAI/P until the end of September. He will operate CW only on 80-10m. QSL info is via the home call.

Harry 7Q7HB is on the air again from Malawi until 23 November. He will be as active as possible but is subject to power cuts. QSLs are available via G0IAS (only direct).

Jan OK1XD will be in Liechtenstein on holidays until 10 September. Look for him operating as HB0/OK1XD mainly RTTY and PSK31. There will also be some SSB and CW activity. QSL via the bureau to his home call.

Vanuatu DXpedition

A team of 8 amateur radio operators from Australia and the USA will be activating YJ0VK from Port Vila on Efate Island between September 30th and October 12th. Earlier updates indicate that the team will operate with 3 stations on bands from 160-10m, using CW, SSB and RTTY / PSK31. They do not have plans to activate 6m. The YJ0VK team has obtained authorization to operate on 60m.

Special Event Stations mark tenth anniversary of 9/11 The ARRL reports that in remembrance of those who died in the terrorist attacks that occurred on September 11, 2001, several Amateur Radio Special Event Stations are being planned. The Pentagon Amateur Radio Club, K4AF, will be on the air 7 AM-9 PM Saturday, September 10 (1100-0100 UTC, Saturday, September 10 through Sunday, September 11).

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th-August, through Sunday, 4th-September there were 200 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP5, VP8, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO. Lucky, IZ7EVZ, will be active as 3A/IZ7EVZ from September 7-10th. Activity will be 160 and 80 meter SSB. QSL via his home callsign.

9H, MALTA. There have been reports that Martti, OH2BH, will be active as 9H3BH from Santa Venera, Malta (EU-023, MIA MM-001, WLOTA 1113) during

the CQWW DX CW Contest (November 26-27th). QSL via OH2BH. Check out Martti's QRZ.com page at: http://www.qrz.com/db/9H3BH

9M0, SPRATLY ISLANDS. Members of the Malaysian Amateur Radio Transmitter Society (MARTS) are planning a "2012 Project" to activate Pulau Layang Layang (AS-051). The DXpedition is expected to be during the first two weeks of April 2012. The team leader is Neoh/9M2CLN, with support by Tack/JE1CKA and the 9M4SDX Team <http://island.geocities.jp/layang9m4sdx/sub1.html>.
The coordinator is Tex, 9M2TO. More details should be forthcoming.

A5, BHUTAN. Operators Andy/UA3AB (A52AB), Ralph/K0IR (A52IR), Paul/W8AEF (A52PP), Pat/W0BM (A52PC) and Glenn/W0GJ (A51B), along with their wives, will be in Bhutan between October 25th and November 1st. In the CQWW DX SSB Contest (October 29-30th), look for A52IR on 75m, A52PC on 40m, A52PP on 20m, A52AB on 15m and A51B on 10m. They will be on other bands/modes outside of the contest. QSL via their home callsigns.

DX0, SPRATLY ISLANDS. The DX0DX DXpedition to Thitu Island (AS-051) planned for 2012, is now "PERMANENTLY CANCELED". For DX0DX refunds, including refunds to DX Foundations etc. -- Please E-mail chris@vk3fy.com

EA8, CANARY ISLANDS. Luis, EA8AY, from the Island of Tenerife (DIE S-012, WLOTA 1276), announced that he will be in the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL via LoTW. Visit his Web site at: http://www.ea8ay.com/ed8a

EF8, CANARY ISLANDS. Look for EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), to be on the air during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. Operators will be Valery, RD3A. QSL via UA3DX.

HK, COLOMIA. Members of the DXColombia Amateur Radio Club (DXARC) will activate the "Jumanji Contest Station" as HK1NA during the 2011 CQWW RTTY Contest (September 24-25th) as a Multi-Multi entry. Operators mentioned are Sal/HK1T, Luis/HK1W, Roberto/HK1AA, Camilo/HK3TU, Jaime/HK1N and Jorge/HK1R. QSL via K6IPM. Visit the DXARC Web page at: http://dxarc.org

IOTA NEWS.....
AS-024. Kan, JE1SCF, a member of the "Tokyo Dental College ARC" will be active as JE1SCF/JR6 from Yaeyama Island between October 6-8th. The main purpose of his visit is to establish and provide medical/dental care to the islands, so activity will be limited to his spare time. QSL via his home callsign.

AS-100. Members of the "Holyland DX Group" will be active as 4X5A from Akhziv Island (WFF 4XFF-001) between 0700z Friday, October 21st, and 1200z Saturday, October 22nd. Operators mentioned are Jan/4X1VF, Art/4X4DZ, Yulik/4X6HP, Mark/4Z4KX, Reuven/4Z5FI and Ros/4Z5LA. Activity will be on 40-10 meters usng CW and SSB.
They will have two stations on the air using vertical antennas.
QSL via 4Z5LA.

EU-172. Operators Heiko/DG0OGM, Dieter/DK1AW, Lutz/DL3ARK, Peter/
DL4AMK and Mar/DL5ASE will be active as OZ/homecall from
Helnaes Island, Denmark, between September 24th and October
1st. Their activity will also include activating a new light-
house (WLOTA 3159). Activity will be on 160-10 meters using
CW, SSB, RTTY and BPSK. QSL via their home callsigns, direct
or by the Bureau. For more information, visit:
http://www.dxclub.net

EU-189. Once again a Belgian expedition team will be sailing to Rockall
Island at the end of September. Operators mentioned as of
press time are: Patrick/ON4HIL, Theo/ON4ATW, Henk/ON4AHF,
Karel/ON5TN and Rudi/ON7YT. Three of these operators have
been at, not on, Rockall Island in May 2009. The team will
set sail aboard the "Commandant Fourcault" on September 23rd,
for a 4 day voyage to Rockall. If all goes as planned, they
will be on the air as MM0RAI around September 27th or 28th.
Please keep in mind that heavy seas or bad weather can delay
the operation! QSL via ON4ATW (LoTW, by the Bureau or direct.
Please visit their Web site for details and updates at:
http://www.rockall.be

EU-189. (Update) A team of four highly experienced IOTA activators
are planning to operate from the extremely rare and dangerous
Isle of Rockall possibly between the end of May or the beginning
of June 2012. A new Web page is now online with operator bios,
QSL info, picture gallery and history about Rockall, at:
http://www.eu189.com
The team is looking for funds to help offset some of this
expense. Significant contributors will be added to their
QSL card. To donate, you can use paypal at the above Web
page.

SA-026. Members of the Araucaria DX Group will be active from the PT5T
contest station PT5T on Santa Catarina Island during the 2011
WAE SSB Contest (September 9-10th). Operators mentioned are
Atilano/PP5EG, Evan/PP5NZ, Peter/PP5XX, Rodrigo/PY2KC and
Luciano/PY5KD. QSL via K3IRV.

J2, DJIBOUTI. Freddy, F5IRO, who has been active as J28RO since July 2010,
is planning to be active in the CQWW DX RTTY Contest (September 24-25th)
as a Single-Op entry. He is expected to stay here until July 2012. His
normal activity will be on the HF bands using CW, SSB and the Digital
modes. His QSL Manager is F8DFP. QSL direct (w/SAE + valid IRC • PLEASE
NO MONEY AT ALL), or by the French REF-Union Bureau. The direct cards
without the above mentioned will be answered by the Bureau. For updates
and more info, visit his Blog at: http://j28ro.blogspot.com

J6, ST. LUCIA. Bill, K9HZ, will once again be active as J68HZ from
Labrelotte Bay, Castries, St. Lucia (NA-108, WLOTA L-1336) between
November 19th and December 3rd. Activity is usually on 80/40/20 meters
using CW and SSB. Suggested frequencies are:
CW - 3550, 7050 and 14050 kHz

SSB - 3770, 7155 and 14155 kHz
He also suggests to watch 40 or 20 meters between 1600-2400z daily.
QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (September 5-11th)....
Sep 05 HN SOLAR REFERENCE KEYS
Sep 06 HN --------------------
Sep 07 HN BN - Below Normal
Sep 08 HN AN - Above Normal/Geomagnetic Level is QUIET
Sep 09 HN LN - Low Normal
Sep 10 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 11 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LY37, LITHUANIA (Special Event). The following special event stations have been activated since August 31st, by the members of the Lithuanian Amateur Radio Society (Lietuvos Radijo Megeju Draugija - LRMD) and will continue to be on the air until September 18th. Activity is to celebrate the 37th European Men's Basketball Championship in Lithuania. It is a big event in Lithuania where basketball is its most popular game. For details on the event, see: http://en.wikipedia.org/wiki/EuroBasket_2011
Special event stations and their operators are:
LY37A - LY2MM LY37M - LY2KM LY37V - LY3V
LY37B - LY2GW LY37N - LY1N LY37W - LY5W
LY37C - LY2CV LY37O - LY5O LY37X - LY3X
LY37E - LY3NX LY37P - LY2BH LY37Y - LY5Y
LY37F - LY1FW LY37Q - LY4Q LY37Z - LY2KZ
LY37G - LY1G LY37R - LY3P
LY37J - LY2J LY37S - LY2QT
LY37K - LY1K LY37T - LY1CT
LY37L - LY2BOK LY37U - LY3UE

For updated information about the special event stations' operations on the air, see: http://www.lrmd.lt
Also, rules to earn a special award and a special silver commemorate medal are available at: http://www.lrmd.lt/basketball-2011-en.htm

PACIFIC DXPEDITION TOUR (3D2 and C2). Bill, VK4FW, co-leader of the upcoming DXpedition to Fiji (3D2) and Nauru (C2), informs OPDX that Eric, VK4NEF, has now committed to join the DXpedition. The operators now are Jay/K4ZLE, Art/NJ7N, Tim/NL8F, Eddie/VK4AN, Eric/VK4NEF, Bill/VK4FW and Julian/W5SL. Bill states (edited), "All is on track for the operation to begin late on October 25th, from Fiji until November 8th, followed by Nauru from November 10th through to December 6th. The 'Online QSL Service' is set up at <www.vk4fw.com/oqrs-php>. However, it is

important that people do not use it before we get back so as not to
overload the system causing mailbox failure. We would like to thank
those who have already supported us and remind all that donations no
matter how big or small can be sent via paypal to dxpedition@westnet.com.au
"

PJ7, SINT MAARTEN. Masa, K1GI, will be active as PJ7I from Sint Maarten
(NA-105) between November 24-28th. Activity will be on 80-10 meters
using a FT-450 w/500w amplifier into a Hexagonal beam (20-10m) and a
Quarter Lambda vertical (80/40m) antenna. QSL via JG2BRI. The PJ7I Web
page is available at: http://www.qsl.net/pj7i
A Blog page is available at: http://pj7i.blog.fc2.com

NEW QSL MANAGER. Ed, PY4WAS, President of the CWJF, reports that the
CWJF GROUP (PY4KL - <www.cwjf.com.br>) is the new QSL Manager for
PP8ZAC station, and now has the logs for 2009/2010/2011. This station
is the only CW operation in the state of Amazonas (PP8), one of the
most difficult states of Brazil to contact, located in the northern
part of the country, and operating near the border with Colombia (HK).

K6VVA/KL7 QSL STATUS. Fred, N6AWD, has reportedly received the QSL cards from the printer and has started sending out the K6VVA/KL7 QSL cards for the July 22-25th, NA-242 IOTA DXpedition.

ST0R QSL CARD. For those who may not have seen the ST0R QSL card, go to: http://www.dxfriends.com/SouthernSudan2011/qsl.php

QSL RECEIVED VIA LoTW: CE0Y/I2DMI, F6HKA, G3VMW, HA1ZH, IS0GQX, JX5O, LZ1670SWS, MD0CCE, OK1CF, ON4AEK, PJ2X, R7DX, RI1ANC, S58T, TK/F8DZY, V31UB, VU4PB, XE2X and YS3CW

QSLS RECEIVED VIA MAIL: FO/OH1RX, FP/VA2WA, N4SF/VP9, TJ3IC and YS3CW

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SI9, SWEDEN (Special Event). Special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active between September 8-13th. Operators will be Axel/DL7ULF and Peter/DL7VMM. They plan to be an entry in the WAE DX Contest (September 10-11th). Outside of the contest, activity will be on 160-10 meters. Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau. For more information, visit the SI9AM Web page at: http://www.si9am.se

SV9, CRETE. Luc, ON6DSL, will be active as SV9/ON6DSL/P from Crete (EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA 1400) between now and September 9th. Activity will be holiday style, QRP with a FT817 into a Inverted V, on 40/20/17/15 meters SSB. Also, look for him to activate some summits for the SOTA award while in the area. QSL via his home callsign, direct or by the Bureau (preferred).

T6, AFGHANISTAN. Eric, K9GY, was active as T6MO from Bagram Airfield in Afghanistan this past week. He describes Bagram as "The O'Hare (Chicago airport) of Afghanistan!" He says being there is like living next to the runway of a busy airport. He is expected to leave here and be active as T6LB from FOB (Forward Operation Base) Shank, Loghar Province, Afghanistan. He hopes to find a used ICOM 7000 and will be purchasing a sloper antenna from AES. Also, look for him to be in contests. QSL via K9GY (USA: SASE [no return postage, no return QSL]--- Outside USA: SAE + 1 USD or SAE + 1 IRC [if you don't have both then no return QSL]). He will upload to the ARRL LoTW and ClubLog periodically.

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Kei/JA7GYP (V63T) will be active from Pohnpei Island (OC-010) between October 3-8th. Activity will be on 40-6 meters using CW, SSB and RTTY. QSL via their home calls-igns.

VP8ORK PICTURE BOOK AVAILABLE. Nodir, EY8MM, has put together a picture book of photos from the 2011 VP8ORK South Orkney Island DXpedition. Book is around 200 pages. To preview, go to:
http://www.blurb.com/bookstore/detail/2447641

YASME FOUNDATION PRESS RELEASE (From Yasme Secretary Kip Edwards, W6SZN).
FOR IMMEDIATE RELEASE -- August 29, 2011, Jackson Hole, Wyoming): "Ethiopia
came back on the air May 30, 2011, with the re-opening of the Ethiopian
Amateur Radio Society station ET3AA. Professor Heiko Schroeder, head of
the technical faculty of the University of Addis Ababa and PB2T, Hans
Blondeel Timmerman, President of IARU Region 1, cut the ribbon in a
reopening ceremony. The Board of Directors of The Yasme Foundation became
aware that 25 club members were scheduled to take the amateur radio license
examination in late July and that the fee for taking the exam was about
one month's salary in Ethiopia. Accordingly, the Board voted unanimously
in favor of a grant to cover one-half of the examination fees for all 25
applicants, the remaining one-half having been previously committed from
the Radio Society of Great Britain. Yasme Vice-President and Director
Fred Laun, K3ZO, was instrumental in making possible this grant.
The Yasme Foundation is a not-for-profit corporation organized to conduct
scientific and educational projects related to Amateur Radio, including
DXing (long distance communication) and the introduction and promotion of
Amateur Radio in underdeveloped countries. For additional information about
The Yasme Foundation, visit our website at <www.yasme.org>.
Wayne A. Mills, N7NG, President
The Yasme Foundation"

YT16/YU16, SERBIA (Special Event). The Amateur Radio Union of Serbia
(SRS) is hosting the 16th IARU WORLD ARDF Championships 2012. ARDF is
the abbreviation for "Amateur Radio Direction Finding". In celebration
of the Championship, look for the following special event stations to
be on the air through now and September 30th 2012:
YU16ARDF - QSL via YU1FJK YU16IARU - QSL via YU0U
YT16ARDF - Qsl via YU1FJK YT16IARU - QSL via YU1EA
For more details about the "16th IARU WORLD ARDF Championships 2012",
visit the Web pages at: http://www.ardf2012.org
http://www.facebook.com/pages/16th-ARDF-World-Championships-2012/19416454726
8652

ZA, ALBANIA. Tevfik, TA1HZ, will be active as ZA1TC from Durres between
September 7-14th. Activity will be on 80-10 meters using a Kenwood TS570D,
FD-4 Multi-Band Windom antenna and 80m dipole. Operations also include
an entry in 2011 WAE DX SSB Contest. Please be patient, as this will be
his first solo trip. QSL via the instructions on QRZ.com.

ZL4/ZL6/ZM, NEW ZEALAND (Special Event). Look for some New Zealand
amateurs to replace their ZL prefix with a ZM prefix throughout September
and October, in celebration of the Rugby World Cup (September 9th-October
23rd). Additional special event stations will and are already on air. Look
for ZL4RUGBY (QSL Manager/Operator Paul/ZL4PW) to be on the air through
October 31st. Also, look for ZL6RWC, which is operated by various members
and friends of the Papakura Radio Club, to be on the through October 31st.

QSL ZL6RWC via ZL1VK, direct, by the Bureau or LoTW. Check QRZ.com for
more details about both stations.

Infos im Internet gibt es auf http://www.lrmd.lt/basketball-2011-en.htm

OZ, DENMARK, EU-125
Martin,DC8MH, and Michael,DL4ABO, plan to attract the prefix and IOTA
hunters from Fanoe (EU-125) signing 5P7T and 5P7N from Sep 9-11.
This island counts for the Danish islands award (NS-002) and also for
the WFF (OZFF-004). QSLs via homecall (bureau/direct).

SM, SWEDEN
The special event station SI9AM at the King Chulalongkorn Memorial in
Ragunda/Sweden (the largest Thai pavilion outside Thailand) will be
activated on 160m-10m by Axel,DL7ULF, and Peter,DL7VMM from Sep 8-13.
They also plan to take part in the WAE DX Contest. Listen for them on:

CW: 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897, 28017 kHz
SSB: 1840, 3760, 7060, 14210, 18160, 21310, 24960, 28510 kHz.
FM will be QRV on 145.550 MHz and 145.612 MHz (channel RV49).
QSL via SM3CVM.
For more information visit the website: http://www.si9am.se

SP, POLAND
The special event station 3Z176DORR will honour the famous scientist
Robert Dorr until the end of September. QSL via SP2FAP, eQSL.

SV9, CRETE, EU-015
Luc,SV9/ON6DSL/p, is working holiday style from Crete (EU-015) in SSB
on 15m/17m/20m/40m using a FT817 and an Inverted V until Sep 9.

TK, CORSICA, EU-014
Patrice,TK/F5RBB, and his XYL Mireille,TK/F4FRL, will be QRV in SSB and
digital modes on 40m-10m from Sep 10-24. QSL via homecall.

TK/IW5ELA and TK/I5NOC are also working from Corsica (EU-014) in SSB
and CW on 40m, 20m and 15m until September 11. QSL via homecalls.

VK9/L, LORD HOWE ISLAND, OC-004
Merv,N6NO, will show up as VK9OL from Lord Howe Island (OC-004) from
Sep 10-18. Merv is celebrating his 75th birthday and 60 years amateur
radio. He plans to work mainly in CW on 40m-10m listening especially
for Europe. QSLs via bureau or direct to N6NO or LoTW.

W, UNITED STATES
The special event station N3U/Flt93 (N3U/United Flight 93) will be
activated on Sep 8-15 to commemorate the attacks of 9/11 ten years ago.
QSL via W3PN, see also QRZ.com.

Members of the Kings County Repeater Association (KCRA) remember the
tragedy of 9/11 and will be QRV as KC2RA on Sep 10, 1300 UTC-2100 UTC
on following frequencies: 14295 kHz, 7250 kHz, 146430 kHz (Echo Link:
KC2RA-R Echolink-Node # 132967 (KC2LEB-R).

The Symbol Technologies ARC members will use the special callsign N1Y
to remember the victims of 9/11 between Sep 10, 1400 UTC, and Sep 11,
0400 UTC. Listen for them on 3911, 7240, 14070 and 50135 kHz and via
D-Star REF10C. They will read the name of a victim after every QSO.
QSL direct to STARC, One Motorola Plaza, B-13, Holtsville, NY 11742,USA
(with large SASE no. 10).

The Northeast Wireless Radio Club will operate a special event station
as well. Listen for NW2C in SSB, CW and RTTY on Sep 11, 1700-2300 UTC.
More information is available at: http://www.nw2c.org

YB, INDONESIA, OC-022
John,9M6XRO, and Steve,9M6DXX, are going to hit the airwaves in holiday
style as YB9/GM3OOK and YB9/G4JVG from Bali (OC-022) from Sep 12-15.
This is only a short stop on their way to join the 4W6A DXpedition in

Timor-Leste. They are QRV in CW/RTTY (YB9/GM3OOK) and SSB (YB9/G4JVG)
on 6m-80m using 100 watts and a yagi.
Both QSLs for YB9/GM3OOK and YB9/G4JVG via bureau or direct to M0URX,
via LoTW or OQRS (see http://www.m0urx.com).

ZA, ALBANIA
Tevfik,TA1HZ, will travel to Durres from Sep 7-14 for the upcoming
WAE DX SSB Contest. His callsign will be ZA1TC and his station includes
a Kenwood TS570D, a Windom FD-4 and a dipole for 80m.
The QSL route can be found on QRZ.com.

ZK2, NIUE; OC-040
Steven,ZL4CZ, plans to show up as ZK2AB from Namukulu village working
holiday style from September 9-16. He will use a YAESU FT840 (FT857 for
backup) on a 10m high multiband vertical or a Buddipole.
QSL via ZL4CZ (direct with SAE and IRC or 2 USDS).

ZL, NEW ZEALAND
HAMs in New Zealand are allowed to change their prefix to ZM during
the Rugby World Cup between September and October.
The special event stations ZL4RUGBY (QSL via ZL4PW) and
ZL6RWC (Papakura Radio Club, QSL via ZL1VK) will be activated as well.

QSL COLLECTION
A large QSL collection can be found on the Les Nouvelles DX website at:
http://LesNouvellesDX.fr

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 10: Kulikovo Polye Contest
Sep 10-11: WAE DX Contest
Sep 11: North American Sprint
Sep 11: Swiss HTC-QRP-Sprint

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-011, GM, Isles of Scilly: M0SFT, M0TTE and M0TGN are going activate to
St. Martin's as MX0WCB from Sep 11-17. They are working mainly in QRP.
QSL via M0WAY (bureau/direct). See also: http://mx0wcb.blogspot.com

EU-028, I*5, Toscana (Tuscany) Region group: IA5/DL3NBI is active mainly
in PSK, RTTY and SSB on 20m from his QTH auf Giglio from Sep 14-22.
QSL via DL3NBI (bureau/direct).

EU-041, I*0, Maddalena Archipelago: Max,IZ4JMA, will sign IM0/IZ4JMA from
La Maddalena (EU-041) in CW/SSB/digital on 10m-80m from Sep 10-17.

He was also active as IS0/IZ4JMA from Isuledda Island (EU-024) before.
QSLs via bureau to his homecall.

EU-088, OZ, Kattegat group: DL8AAV is QRV in SSB as OZ0AV from Sep 12-24.
QSL via DL8AAV (bureau/direct).

EU-156, F, Basse-Normandie (Manche West) Region group: Tombelaine is one of
the less often activated island groups. F4BKV, EA3NT and IZ7ATN will
show up on the bands as TM0INT on Sep 10/11. QSL via EA5KA.

EU-174, SV, Makedonia/Thraki Region group: SV8/PA1FJ/p will be QRV from
Thassos working in SSB and CW on 40m-6m from Sep 13-19. QSL via PA1FJ.

NA-029, VY2, Prince Edward Island (incl. Satellite Islands): VY/WW4GA plans
to hit the airwaves from Prince Edward from Sep 12-20.
He may also show up from Cape Breton (NA-010). QSL direct via QRZ.com.

SA-026, PP5, Santa Catarina State Centre group: The contest station PT5T
will join the WAE SSB Contest from Santa Catarina. QSL via K3IRV.

Highlights of Solar and Geomagnetic Activity
29 August - 04 September 2011

Solar activity began the week at low levels with 27 C-class flares
between 09 August - 03 September and ended at moderate levels with
an M3 flare at 04/1145 UTC from Region 1286 (N20, L=304, class/area
Dso/080 on 03 September). The M3 event was associated with a
partial-halo coronal mass ejection which was directed away from the
west limb. Although Region 1282 (N25, L=300, class/area Eso/170) did
not produce any significant activity during the period, it did
develop a delta magnetic configuration on 03 September. Region 1283
(N14, L=223, class/area Dsi/220) developed into the largest spot
group during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

Geomagnetic field activity began the week at generally quiet to
unsettled levels with isolated active and minor storm periods at
high latitudes due to a negative polarity coronal hole high speed
stream (CH HSS). Activity decreased to mostly quiet levels for 30
August - 02 September. Activity increased to quiet to unsettled
levels with isolated active periods at high latitudes for 03 - 04
September. An isolated major storm period occurred at high latitudes
during 03/0900 - 1200 UTC. Solar wind data indicated a solar sector
boundary crossing on 02 September at about 1000 UTC, and a
co-rotating interaction region on 03 September at about 0100 UTC
followed by a negative polarity CH HSS.

Forecast of Solar and Geomagnetic Activity
07 September - 03 October 2011

Solar activity is expected to be low with M-class activity likely
and a slight chance for X-class activity through 11 September when
```

Region 1283 rotates off the disk. A decrease to very low to low levels is expected from 12 - 17 September. An increase to low to moderate levels is expected as old Regions 1286 and 1283 return and transit the disk from 18 September through the remainder of the forecast period.

A slight chance for proton events is expected at geosynchronous orbit until 12 September.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels 07 - 08 September, followed by normal to moderate levels for 09 - 12 September. High levels are expected 13 - 14 September, followed by another decrease to normal to moderate levels for 15 - 28 September. High levels resume 29 - 30 September. Normal to moderate levels are expected 01 - 03 October.

Geomagnetic field activity is expected to be at mostly quiet levels through 09 September. Activity is expected to increase to unsettled to active levels 10 - 13 September with the arrival of a coronal mass ejection coupled with a CH HSS. Mostly quiet levels will prevail from 14 - 29 September. An increase to unsettled is expected 30 September - 01 October due to another recurrent CH HSS. Quiet levels will predominate for 02 - 03 October.

829. [RAC-Bulletin] [EMCOM}: Information - Katia - 2011-09-06 17:08:30 UTC

WOCN31 CWHX 061745
Tropical cyclone information statement issued by the Canadian
Hurricane Centre of Environment Canada at 2:06 PM ADT Tuesday
6 September 2011.
---------------------------------------------------------------------
Tropical cyclone information statement for:
=new= Newfoundland
=new= Nova Scotia.

For hurricane katia.

The next statement will be issued by 9:00 AM ADT.

The Canadian Hurricane Centre is monitoring hurricane katia
This week. Another statement is planned for Wednesday morning.

---------------------------------------------------------------------
==discussion==
Hurricane katia has been tracking toward the northwest for several
days and is a major hurricane (category 3). Based on a suite of
computer models and expected evolution of weather systems over
Eastern Canada, katia is forecast to make a sharp eastward turn on
Friday. That would result in impacts limited to the offshore
district but with at least large waves reaching the southern
coastlines of Nova Scotia and Newfoundland.

The current plan at the Canadian Hurricane Centre is to issue another
general statement like this Wednesday morning, once we are able to
re-assess data and computer models overnight. We could begin issuing
regular (6-hourly) bulletins Wednesday afternoon. The current
long-range forecasts for the southernmost Canadian marine territory
is for gale-force winds on Friday and/or Saturday.

It will be important to stay tuned to our updates on katia this week
as the timing of the eastward turn will be critical to the forecast.
Predicting the timing of sharp turns like this can be particularly
challenging.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the
latest hurricane track information map.

Please also refer to the public and marine forecasts and warnings
issued by Environment Canada for your area.

END/FOGARTY
```

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Ohio/Penn DX Special Bulletin No. 1026.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1026.1
BID: $OPDX.1026.1
September 8, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and 9M6DXX for the following DX information.

4W6A TIMOR-LESTE (EAST TIMOR) DXPEDITION SEPTEMBER 16 • 26, 2011

PRESS RELEASE NUMBER 6: September 9, 2011

This is the sixth and final press release before the 4W6A DXpedition. The bulk of the equipment, including the linear amplifiers, the Titanex V160E vertical, Hexbeam and other antennas, left Darwin, Australia, on 6 September. It has all arrived safely in Dili, Timor-Leste, and is now awaiting the arrival of the team next week.

9M6DXX and 9M6XRO leave Malaysia on 12 September for a transit stop in Bali, from where they plan to be active 'holiday style' as YB9/G4JVG and YB9/GM3OOK respectively. Unfortunately, due to a late change of airline timetable, they will not now arrive in Dili before the afternoon of Friday 16 September. The chartered boat taking the team and the equipment to Atauro Island has therefore been rescheduled to later that afternoon.

It is likely that only one or two stations will be on the air that day as the team will run out of daylight before all the antennas can be erected. The remainder of the antenna work will commence at first light the following morning (approximately 2115UTC on 16 September) and 4W6A should be fully operational by the morning (UTC) of 17 September.

4W6A will be QRV on all bands 10 to 160 metres, using CW, SSB and RTTY with up to four stations simultaneously. It is hoped that log search will be available, thanks to the Clublog facility (go to www.4w6a.com/qsl-information/log-search), but this is dependent on a reliable Internet connection being available on the island. Col, MM0NDX, is the pilot for 4W6A and is responsible for providing feedback to the team. He may be contacted at dxer59@gmail.com

The QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Direct or bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS) at http://m0urx.com/oqrs (there is also a link from the 4W6A website at www.4w6a.com/qsl-information).

We look forward to having fun in the pile-ups and we hope you have fun chasing 4W6A. 73, The 4W6A Team.

==> + PUBLIC SERVICE: GET SET FOR THE ARRL SIMULATED EMERGENCY TEST

Simulated ARRL's Simulated Emergency Test (SET) is October 1 and 2,
2011. This nationwide exercise is the chance to test your emergency
operating skills and the readiness of your communications equipment and
accessories in an emergency-like deployment. ARRL Field Organization
Leaders at the Section and local levels -- along with many other
volunteers who are active in public service and emergency
communications -- are developing emergency-like scenarios in
consultation with a variety of agencies for whom radio amateurs are
known to provide service during emergencies.
```

To find out how you can step up and be a part of the local or Section-level activities, contact your Section Manager. You can find contact information for all 71 ARRL Section Managers on page 16 of any issue of QST. Additional contact information may also be found on the ARRL website. The Amateur Radio Emergency Service® (ARES®), the

National Traffic System (NTS), the Radio Amateur Civil Emergency Service (RACES) and members of the ARRL Field Organization will participate and practice emergency operation plans, nets and procedures. Read more here <http://www.arrl.org/news/get-set-for-the-2011-arrl-simulated-emergency-test> .

==> + PROPAGATION NEWS: STANFORD UNIVERSITY RESEARCHERS ANNOUNCE SUNSPOT BREAKTHROUGH

Imagine forecasting a hurricane in Miami weeks before the storm was even a swirl of clouds off the coast of Africa -- or predicting a tornado in Kansas from the flutter of a butterfly's wing in Texas. These are the kind of forecasts meteorologists can only dream about. Could the dream come true? A new study by Stanford University researchers suggests that such forecasts may one day be possible -- not on Earth, but on the Sun. In the August 19 issue of Science, Stathis Ilonidis, together with co-workers Junwei Zhao and Alexander Kosovichev, announced that they can see some sunspots while they are still submerged, before they are visible to the naked eye. "This could lead to significant advances in space weather forecasting," Ilondis said.

Most Amateur Radio operators are aware of sunspots, those dark blemishes on the surface of the Sun. This is because sunspots influence propagation. They can be a boon to hams interested in HF propagation, as sunspots are the sites of ultraviolet or extreme ultraviolet radiation that creates our ionosphere. But sunspots can also be destructive. They are the source for disturbances, such as flares and the roots of coronal mass ejections (CMEs) that can hinder propagation. When a CME hits the Earth's atmosphere, the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF <http://www.hfradio.org/muf_basics.html>) -- the highest frequency by which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible. Read more here <http://www.arrl.org/news/stanford-university-researchers-announce-sunspot-breakthrough>.

==> + CHECK OUT THE OCTOBER ISSUE OF QST

The October issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. In this issue -- our annual DX issue -- you'll discover both technical and feature articles to get you in the mood for hunting down that rare DX. And just like every issue of QST, you will find something to pique your Amateur Radio interests.

A receive antenna can improve the signal-to-noise ratio of those weak, distant stations. Some transceivers don't include the capability to use separate antennas for both receiving and transmitting. In his article

"A Receive-Only Antenna Adapter," Gerald Fasse, W8GF, offers a simple schematic for an adapter you can build that will add functionality to your shack. Joe Ostrowski, KI5FJ, shows how you can reduce transmission line loss by matching your antenna at the antenna feed point. In his article "A Remote Impedance Matching Network," he presents a simple to use -- and easy to build -- network that doesn't have to use microprocessors or relays to switch RF components.

In the October 2010 issue of QST, Cezar Trifu, VE3LYC, told his nail-biting account of being stranded on an uninhabited island in the Canadian arctic. Now for October 2011, Trifu describes his memorable DXpedition to the islands of the southern tip of South America in his article "CE9 DXpedition to the Tip of South America." Sean Patrick Doran, W8OKN, now knows that the ARRL's Logbook of The World is the best way to track his progress toward the DXCC and WAS awards. Read about his Eureka! moment in his article "LoTW: Like Taking Your QSLs to the Bank."

Have you ever gone to a movie and saw ham radio gear up on the big screen and wondered just how it got there? ARRL News Editor S. Khrystyne Keane, K1SFA, did when she went to see Mr Popper's Penguins over the summer. She tracked down the owner of the ham gear featured in the movie and tells of its journey from shack to screen in "Ham Radio 'Pops' on the Big Screen." Keane also presents all the details from the ARRL Board of Directors 2011 Second Meeting in "ARRL Board of Directors Looks to 2014 -- and Beyond."

NCJ Managing Editor Rick Lindquist, WW3DE, takes a look at the ICOM IC-7410 HF and 6 meter transceiver in this month's Product Review. He says that this rig "replaces the IC-746PRO and adds an improved receiver, much faster DSP performance and new features to the mix, but drops 2 meter coverage. Although the new radio does a lot, the 7410 user interface will be familiar to users of current ICOM radios." QST Technical Editor Joel Hallas, W1ZR, checks out the Coaxial Dynamics Model 81041 USB wattmeter: "This is a very nice wattmeter with some extra features that you are likely to appreciate. It does not offer the absolute accuracy of more recent instruments, but will be familiar and handy to many. The provided PC software is useful, but we hope that more will come."

Of course, there are the usual columns you know and expect in the October QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your October issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please visit the ARRL web page <https://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which

covers the month of August -- takes a look at how the ARRL HQ Emergency Response Team helped monitor various nets and provide support to the affected Field Organizations from W1AW, the upcoming Director elections in the Atlantic, Delta and Midwest Divisions, helping to solve interference problems on 60 meters, filing comments with the FCC, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-37>.

==> + REPORT CALLS ON NASA TO HIRE MORE ASTRONAUTS

Even as the space shuttle era has come to a close, a NASA-commissioned report says the space agency needs to hire more astronauts to maintain its presence on the International Space Station and prepare for the next generation of spaceflight. The report warns that "the Astronaut Corps appears to be sized below the minimum required" and that the current corps size "poses a risk to the US investment in human spaceflight capabilities." NASA commissioned the report from the National Research Council, part of the National Academy of Sciences, to examine the agency's astronaut and astronaut training needs in the post-shuttle era. NASA Spokesman Michael Curie said that the report "offers helpful advice about the appropriate size of our astronaut corps as we enter this exciting new era of space exploration and crew transport operations." Beginning in November 1983 with Owen Garriott, W5LFL, on board STS-9, Amateur Radio has been an integral part of NASA missions in space. More than 100 NASA astronauts have received their Amateur Radio license. Read more here <http://www.arrl.org/news/report-calls-on-nasa-to-hire-more-astronauts>.

==> + ON THE AIR: DX0DX SPRATLY DXPEDITION "PERMANENTLY CANCELLED"

After numerous setbacks, Chris Dimitrijevic, VK3FY, announced on the DX0DX website <http://www.dx0dx.com/> that the planned 2012 DX0DX DXpedition to the Spratly Islands has been "permanently cancelled." No explanation was given for the cancellation and Dimitrijevic did not respond to e-mails from the ARRL. Spratly currently sits at #32 on DX Magazine <http://www.dxpub.com/dx_news.html>'s "Most Wanted" List.

The DX0DX Spratly DXpedition had been postponed at least twice. It was first supposed to happen in January 2011, and then it was delayed until April. According to Dimitrijevic, the postponement to April 2011 was "due to circumstances beyond the control of the DX0DX Team and in the best interests of the Team of Operators." On April 10, 2011, Dimitrijevic sent out a notice that said that 10 of the original 37 operators of the planned 2011 DX0DX DXpedition indicated that they will return in April 2012, but that will not be happening.

In April 2012, however, another group is planning a DXpedition to the Spratly Islands. According to the September 4 edition of the Ohio/Penn DX Association's bulletin, members of the Malaysian Amateur Radio Transmitter Society (MARTS <http://www.marts.org.my/>) are planning a "2012 Project" to activate Pulau Layang Layang (AS-051) in the Spratlys during the first two weeks of the month. The team leader is C.L. Neoh,

9M2CLN, with support by Tack Kumagai, JE1CKA, and the 9M4SDX Team <http://island.geocities.jp/layang9m4sdx/sub1.html>. The DXpedition coordinator is Tex Izumo, 9M2TO. MARTS is Malaysia's IARU Member-Society. Read more here <http://www.arrl.org/news/dx0dx-spratly-dxpedition-permanently-cancelled>.

==> SOLAR UPDATE

Tad "September Sun, you made me see" Cook, K7RA, reports: Solar indicators rose again this week, with the average daily sunspot numbers increasing nearly 21 points to 104.3, while the average daily solar flux was up nearly 12 points to 115.5. The geomagnetic numbers were up as well, with the most active geomagnetic day occurring on September 3. The latest prediction from NOAA/USAF has solar flux at 110, 105 and 100 for September 8-10, 95 on September 11-13, 100 on September 14-15, 103 on September 16-17, and 105 on September 18-22. The planetary A index is predicted at 5 on September 8-9, 18, 15, 10 and 8 on September 10-13, 5 on September 14-17, 7 on September 18-19, and 5 on September 20-23. Geophysical Institute Prague predicts minor storm for September 9-10, active conditions September 11, unsettled September 12, quiet to unsettled September 13 and quiet on September 14-15. Both the NOAA and Prague predictions for September 9-10 are probably based on a recent X2 class solar flare on September 6. Look for more information on the ARRL website on Friday, September 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Human Nature's September Girl.

==> + ARRL RECOGNIZES: DOUG HALL, K4DSP, WINS AUGUST QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for August is Doug Hall, K4DSP, for his article "The FSKit -- A Simple Sound Card Interface for Generating Radioteletype Frequency Shift Keying." Congratulations Doug! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the September issue today.

==> THIS WEEK ON THE RADIO

This week:

- September 9 -- NCCC Sprint Ladder
- September 9-10 -- PODXS 070 Club Jay Hudak Memorial 80 Meter Sprint (local time)
- September 10 -- Ohio State Parks on the Air; Kulikovo Polye Contest
- September 10-11 -- Arkansas QSO Party; WAE DX Contest (Phone)
- September 10-12 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>; ARCI VHF Contest
- September 11 -- SKCC Weekend Sprint

- September 14-15 -- CWops Mini-CWT Test

Next week:

- September 16 -- NCCC Sprint Ladder; AGB NEMIGA Contest
- September 17 -- Connecticut QSO Party; Feld Hell Sprint
- September 17-18 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>;
South Carolina QSO Party; Washington State Salmon Run; CIS DX QPSK63
Contest; Scandinavian Activity Contest (CW); SRT HF Contest (SSB); QRP
Afield
- September 18 -- North American Sprint (SSB); WAB 144 MHz QRP Phone
Contest; BARTG Sprint 75
- September 19 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint
(local time)
- September 22 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out

Ohio/Penn DX Special Bulletin No. 1026.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1026.2
BID: $OPDX.1026.2
September 9, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and N6PSE for the following DX information.

Press Release: DXpedition to Rotuma as 3D2R

After many months of careful planning, we are pleased to announce that our preparations for a large multi-national DXpedition to Rotuma are going according to plan.

Rotuma is located in the South Pacific Ocean and is #32 on Club Log's most wanted DXCC list.

The Team is meeting in Lami Bay, Suva on September 22nd and departing by ship to Rotuma on September 25th. The Team expects to arrive in Rotuma and become active on Tuesday, September 27th. We will complete our DX-pedition on October 7th, 2011.

The main goals of this DXpedition are to work every amateur radio operator who needs Rotuma for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5MHz and 50 MHz bands.

In addition to CW, SSB and RTTY we will be active on PSK, SSTV and EME. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.

We plan to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.

We wish everyone good propagation and we hope that you enjoy working the 3D2R Team.

At this time, we are seeking additional Club and Individual Sponsors
to help us defray the costs of carrying out this DXpedition. Our official
website is http://www.yt1ad.info/3d2r/index.html

3D2R Team

Amateur Radio Newsline(tm) Report 1778 - September 9 2011

Amateur Radio Newsline report number 1778 with a release date of
Friday, September 9th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISSAT One celebrates its first month in
space, IARU Region 1 adds two new repeater pairs on 2 meters, Canadian
hams on alert for hurricane Katia, an unlicensed broadcaster in
Brooklyn New York is hit with a $10,000 fine and on ham remembers 911
with an on line tribute to the New York City Fire Department. Find out
the details are on Amateur Radio Newsline(tm) report number 1778 coming
your way right now.

(Billboard Cart Here)

HAM RADIO IN SPACE: ARISSAT-1 CELEBRATES ITS FIRST MONTH ONORBIT

ARISSat One has celebrated its first month on-

orbit and it still p[utting out a mighty good

signal. Take a listen:

--

Actual ARISsat 1 here.

--

ARISSat One was deployed from the from the International Space station
on August 3rd by two space walking cosmonauts . Now, a month later
strong signal reports continue to be reported even though its internal
battery is almost depleted and the bird is totally dependant on power
from power from the sun.

In addition to hearing the bird live on 145.950 MHz, you can receive
ASISSat One data in near real time on your smart phone or mobile
device. Information on how to do this is online at
tinyurl.com/arissat-data-now (WA4SXM)

**

HAM RADIO IN SPACE: ISS COULD BE VACATED IF RUSSIAN LAUNCH VEHICLE
PROBLEM NOT RESOLVED QUICKLY

According to Space.com, the International Space Station may have to start operating without a crew in November. This, if Russian engineers cannot quickly figure out what caused a recent launch booster failure. And this would indirectly impact on ham radio as well. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--

As widely reported, an unmanned Russian Progress cargo ship crashed just after launch on August 24th. That flight was to deliver three tons of supplies to the orbiting space station. The failure was caused by a problem with the Progress' Soyuz rocket. One very similar to the one Russia uses to launch its crew-carrying vehicle.

In an August 29th statement, NASA says that three members of the current crew on the ISS are due to return to Earth this month, and the rest are scheduled to come back in midNovember.

At the moment, Russia's Soyuz is the only way to get astronauts to and from the station. So if the booster glitch isn't identified and fixed quickly, a fresh crew won't be able to reach the orbiting lab before the last three current crew members head for home.

One of the reasons for this is that the two Soyuz spacecraft that are currently docked to the ISS are only rated to spend about 200 days in space so they will have to depart before their time on-orbit ends. Also, the lighting conditions at the Soyuz's landing site in Kazakhstan is also an issue. Both NASA and the Russian space agency require that landings occur between one hour after dawn or one hour before dusk. This, to facilitate better search and rescue operations should any be required.

The lighting window closes for about five weeks on September 19th for the first crew and around November 19th for the second. Waiting for a new window to open would stretch the Soyuz spacecraft beyond their 200 day on-orbit ratings in both cases.

The bottom line: NASA says that it will not put any crews on a Soyuz until the rocket has had several successful unmanned launches. Russian engineers are working to give Soyuz the best chance to meet that 200 day deadline. The next one is technically slated to blast off on September 21st, but most experts seem to think that's almost certainly not going to happen. So if Russia cannot find the failure cause of the Soyuz and get it proofed for carrying human passengers, it could mean that the ISS could be unmanned for the first time since 2001.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

If the International Space Station were to be temporarily evacuated it would mean at least a temporary hold with scheduled on-orbit astronaut to classroom ham radio contacts. Obviously, random contacts by the ISS

ham radio crews with amateurs world-wide would cease as well. (SPACE.com, Houston News, other published news reports)

**

RESTRUCTURING: IARU REGION 1 ADDS NEW 2 METER REPEATER PAIRS

IARU Region 1 has voted in favor of creating a pair of new 2 meter repeater channels to relieve some of the on-the-air congestion in that region of the world. The new frequency pairs are 144.9750 MHz and 144.9875 MHz as inputs with 145.5750 MHz and 145.5875 MHz as their complimentary outputs.

And if those of you outside of I-A-R-U Region One are wondering about the strange channel allocations, heres some background. In I-A-R-U Region One, the 2 meter band is only two Megahertz wide running from 144 to 146 MHz. Only a small portion is allocated for FM repeater and simplex operations. According to the bandplan posted on the Internet, back in 1996 it was decided to change from 25 Khz inter system spacing to 12.5 kHz with very narrow deviation to accommodate as many repeaters in a given area as is possible.

The latest newly added frequencies were proposed by the South African Radio League and approved by a vote of twenty seven in favor, fourteen opposed and seven abstentions. No implementation of this modification to the Region One bandplan was announced. (IARU Region 1)

**

RESCUE RADIO: CANADIAN HAMS ALERT FOR HURRICANE KATIA

Hams in Eastern Canada's Maritime Provinces went on alert on September 6th. This as Hurricane Katia had been tracking toward the northwest for several days as a major category 3 storm.

Based on a suite of computer models and the expected evolution of weather systems over Eastern Canada, Katia was forecast to make a sharp eastward turn on Friday, September 9th. That would result in its impact being limited to the offshore areas but also creating large waves that would reach the southern coastlines of Nova Scotia and Newfoundland.

According to the United States National Hurricane Center in Miami and the Canadian Hurricane Center, Hurricane Katia is not expected to make landfall anywhere in North America. However its projected path is across the entire North Atlantic and map projections say it actually may hit northern England early on Monday, September 12th, before completely falling apart.

But before it makes its Atlantic crossing, Hurricane Katia does pose a threat to Canada's eastern most area and Radio Amateurs of Canada suggests that hams as well as the public stay tuned to updates regarding the storms path. The Canadian Hurricane Center notes that predicting the timing of sharp turns for a hurricane like Katria can be particularly challenging. You can track Katia's progress yourself by

going to the National Hurricane Center web page at www dot nhc dot noaa dot gov. (RAC, NOAA, Canadian Hurricane Center)

**

RESCUE RADIO: WASHINGTON HAMS AID HIKER

According to a report posted on QRZ dot com by Glen Ahlborn, KF7QLH, several Washington State hams were responsible for the rescue of a camper who had slid off a ledge near Emerald Lake. It went down on Saturday, August 27th when John Myers, KD7AAT, of Spokane received an emergency call over a local repeater from Todd Cady, K7PKT. Cady informed Myers that a camper had fallen over the side of a ledge and had suffered a major compound fracture of his femur.

Using a hand held GPS unit, Cady provided Myers with the exact coordinates. Cady also told Myers that there was absolutely no way of getting a stretcher in the area. Myers relayed this information to emergency response personnel which dispatched an ambulance to the scene.

As it turned out, Cady's assessment was correct. There was no way to perform a ground rescue due to the terrain. The first responders could only make sure the patient was stabilized, and also find an area for a helicopter landing. Meantime, a rescue helicopter was launched from Spokane. It picked up the injured man and transported him to a medical facility where he is reported to be recovering from his injuries. (KF7QLH)

**

RESCUE RADIO: SIMULATED EMERGENCY TEST OCTOBER 1 and 2

This years national Simulated Emergency Test takes place on October 1st and 2nd. Sponsored by the ARRL, the Simulated Emergency Test is a nationwide exercise to assess ham emergency operating skills and the readiness in an emergency like operation.

According to the ARRL, its Field Organization in association with a variety of served emergency response agencies is busy developing emergency like scenarios for this years S-E-T. To find out how you can be a part of these activities, please get in touch with your ARRL Section Manager. Contact information can be found on page 16 of any issue of the Leagues monthly QST magazine. (ARRL)

**

RESCUE RADIO: FEMA TO TEST NATIONAL EAS SYSTEM IN NEVADA

Nevada will conduct a state-wide test of the national Emergency Activation or EAS system later this month. Radio World reports that at the recent annual meeting of the Nevada State Emergency Communications Committee broadcasters learned that the Federal Emergency Management Agency's Integrated Public Alert and Warning System office plans a mini-national EAS test for the state before months end.

The test would be launched from FEMA to KKOH AM in Reno and KDWN AM in Las Vegas and propagate from there to other stations in the Nevada EAS Operational Area. Nevada State Emergency Communications Committee Chair Adrienne Abbott told the meeting she would track results through a conference call with station engineers and report results to the Nevada Broadcasters Association.

Radio World says that similar tests are expected in at least some other states. The Michigan Association of Broadcasters has already announced that it is planning a statewide "soft test" of the monthly local test on September 22nd. (RW)

RESCUE RADIO: ALERTFM TO BE INTRODUCED TO EUROPEAN MARKEWT

AlertFM which is the provider of an FM-based emergency alert system, has announced that broadcast equipment manufacturer WorldCast Systems is offering the Alert FM system in Europe.

The Alert FM system sends text-based messages over FM frequencies to end users. Those end users can be anyone with an Alert FM receiver, including radio stations, first responders, schools, municipalities or citizens. More on this story is on-line at tinyurl.com/alert-fm-europe (AlertFM)

ENFORCEMENT: UNLICENSED BROOKLYN NY BROADCASTERS DINGED $10000

The FCC has affirmed Forfeiture Order in the amount of ten thousand dollars issued jointly to Andre Alleyne and Jessie White. This, for operating an unlicensed radio station on the frequency 96.5 MHz in Brooklyn, New York. Amateur Radio Newslines Jeff Clark, K8JAC, is here with the story:

--

This story goes back to July 23 and 24, 2008. That's when acting in response to a complaint of interference from a licensed FM broadcast station; agents from the FCC Enforcement Bureau's New York Office monitored 96.5 MHz in Brooklyn, New York. On each of those days, the agent observed a radio signal on that frequency and used directionfinding techniques to locate the source of the transmissions

to an apartment building on Flatbush Avenue in the borough of the city.

On July 24, 2008, after completing the field strength measurements, agents from the New York Office conducted an investigation on the roof of building where they observed an FM broadcast antenna with a coaxial cable leading from the antenna into an apartment window in the building. The agents learned from the building superintendent that the coaxial cable went into the apartment jointly leased by Mr. Alleyne and Ms. White.

When the agents attempted to inspect the station, the two women who answered the door refused to allow the agents to enter the apartment. However, one of the women, who was later identified as Ms. White, stated that she resides in the apartment with her boyfriend. The agents advised her that the radio station in the apartment was operating without a license and requested that she turn off the station. After returning to their vehicle, the agents monitored 96.5 MHz and noted that the station was off the air.

On July 30, 2008, the New York Office issued a Notice of Unlicensed Operation to Mr. Alleyne and Ms. White. The notice warned the pair that operation of the unlicensed radio station violated section 301 of the Communications Act and outlined the potential penalties for such a violation. The Notice directed Mr. Alleyne and Ms. White to terminate operation of the unlicensed station immediately and provided them ten days to reply. The New York Office says that it did not receive a response to the Notice.

On December 10, 2008, the New York Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Mr. Alleyne and Ms. White for operating an unlicensed radio station. In their response, Mr. Alleyne and Ms. White did not dispute the findings in the Notice of Apparent Liability, but requested that the FCC cancel the proposed forfeiture for several reasons. This because of their claim that they allowed a friend to operate the station from their apartment. Also, that they believed the radio station complied with all FCC regulations; that they ceased operating the station as soon as they became aware that it was illegal and that they do not have the financial resources to pay the forfeiture.

In denying all of these requests the FCC noted that Mr. Alleyne and Ms. White did not dispute the circumstances of the stations operation and that on examining all of the evidence that the Commission finds that Alleyne and White are jointly liable for operating the unlicensed radio station on 96.5 MHz. The FCC also turned down the request to cancel or reduce the proposed forfeiture based on their inability to pay. This is because neither Mr. Alleyne nor Ms. White submitted any supporting documentation providing proof that they could not pay the fine. As such the FCC concluded that the $10,000 forfeiture is warranted and gave them the customary 30 days to pay or take the matter to appeal.

I'm Jeff Clark, K8JAC.

--

If Alleyne and White they fail to do either, the entire matter will likely be handed over to the Department of Justice for collection. (FCC)

ENFORCEMENT: CANADIAN TEEN UNLICENSED BROADCASTER GETS 15 MONTHS PROBATION

A Canadian youngster described in news reports as an illtempered teenaged unlicensed broadcaster has been put on 15 months probation. This after threatening a pair of Ottawa radio personalities and an Industry Canada radio inspector.

According to news reports, the now 15 year old had set up a radio station out of his home using transmitting equipment he purchased with money from an inheritance and began broadcasting without a license. After repeated warnings Telecommunications regulator Industry Canada shut him down and seized his equipment in January 201. At that time he reportedly threatened and harassed one of the agency's investigators.

At trial, the unnamed young offender was convicted of violating the Radiocommunications Act. He was also found guilty of threatening to kill Hot 89.9 radio personality Ryan Lindsay. The court says that he went as far showing up at the radio station with his father, and threatening to harm another employee identified as John Mielke.

And heres the kicker. While news reports say that the teen's crimes were serious, Justice Donald Ebbs sentenced him only to conditional discharge and probation. The only conditions placed on the teen was that he stay away from the people he threatened and not possess any radio transmitters or other equipment that could allow him to broadcast on federally regulated airwaves. The teen was also ordered to perform 60 hours of community service. More about this case is on-line at tinyurl.com/canada-teen. (Adapted from the Ottawa Citizen)

NAMES IN THE NEWS: PAUL ROBINSON 2E1EUB AWARDED LOUIS VARNEY CUP

The 2011 Louis Varney G5RV Cup for Space Communications has been awarded to Paul Robinson 2E1EUB of Stoke on Trebt, England. This in recognition of his work in promoting and encouraging the use of amateur radio satellites and perfecting the art of a portable ground station. This years presentation was hosted by RSGB president Dave Wilson M00BW and took place at the Telford Hamfest on Sunday, September 4. (GB2RS)

**

NAMES IN THE NEWS: ARNEWSLINET TO BE GUEST ON HAM NATION SEPTEMBER 13

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, along news anchor Don Wilbanks, AE5DW, will be the guests of Bob Heil, K9EID, and

Gordon West, WB6NOA on the Tuesday, September 13th edition of Bob's Ham Nation. This is the streaming video podcast seen live on Leo LaPorte's TWIT.TV Internet Television Network.

Bill and Don plan to discuss a bit of the history of the news service and talk about some of its ancillary projects including the Young Ham of the Year Award. They also may have a surprise announcement as well.

Ham Nation airs live every Tuesday Night at live.twit.tv. If you miss the show you can download the audio only or audio with video podcasts about 24 hours later at www.twit.tv/HN, from iTunes, and many other normal podcast sources. (ARNewsline(tm))

CHANGING OF THE GUARD: UK COLOSSUS COMPUTER DESIGNER TONY SALE - SK

The Radio Society of Great Britain has announced the passing of Tony Sale, the man behind the Bletchley Park Colossus computer rebuild project.

During his rather illustrious career, Sale was the British intelligence agency's principal scientific officer and later worked at the Science Museum. He helped create the Computer Conservation Society and, more recently, the National Museum of Computing at Bletchley Park, where his Colossus remains today.

Considered to be a remarkable and skilled individual, Sale had a long history in engineering that encompassed robotics, radar and computing. In January 2008 Tony Sale and Colossus were featured on the cover of the RSGB's RadCom magazine. (GB2RS)

**

EMERGING TECHNOLOGY: NEW HIGH EFFICIENCY SOLAR CELL

A photovoltaic cell that reaches record-breaking efficiency could make solar energy competitive with fossil fuels according to the company that created the cell.

Alta Devices of Santa Clara, California presented research at the 37th IEEE Photovoltaic Specialist Conference that claims its thin-film gallium-arsenide cell can convert 27.6 percent of the sunlight striking the cell into electricity, under standardized conditions.

Since the paper was submitted, the company says it has upped the efficiency to 28.2 percent. That beats the previous record of 26.4 percent for a solar cell with a single p-n junction, which was the first improvement in years over 26.1 percent. Both numbers, according to Alta, were independently confirmed by the National Renewable Energy Laboratory. (Photo Voltaics)

**

RADIO FROM SPACE: PROSPERO MAY LIVE AGAIN

United Kingdom researchers say that they are planning to try to revive a 1970's satellite on 137.560 MHz.

The Prospero spacecraft was the United Kingdoms first first satellite, launched on a UK-built 40 years ago on a Black Arrow rocket. It was put into orbit on October 28, 1971 carrying a series of experiments to investigate the effects of the space environment.

The satellite operated successfully until 1973 and was contacted annually until 1996. Its beacon on 137.560 MHz was last heard by radio amateurs in 2006.

Now a team from the Mullard Space Science Laboratory in Surrey are attempting to revive it. Audio recordings of the 0.3 watt phase modulated signal at 2048 bit/s from Prospero on 137.560 MHz can be heard on the Sounds from Space website of Matthias Bopp, DD1US. To listen in, take your web browser to tinyurl.com/prospero-sound and then scroll down the page to Prospero One. (Southgate)

**

HAM RADIO IN SPACE: STUDENTS GET NZART GRANT TO DEVELOP KIWISAT SOFTWARE

A group of fourth-year Honors Students and a Masters student from New Zealand's Massey University School of Engineering and Advanced Technology have been awarded a $7,500 grant from the New Zealand Association of Radio Transmitters' Radio Science Education Trust. This, to develop the software for the new KiwiSAT amateur radio satellite.

KiwiSAT is being designed and built by a team of New Zealand radio amateur volunteers supported by Massey and various corporate sponsors. In addition to the usual repeater in space operations, KiwiSAT will carry out experimental work in small satellite Attitude Determination and Control. This is a low cost control system that works through interaction with the Earth's magnetic field to position the satellite at a specific attitude.

KiwiSAT is micro satellite is the size of a basketball. It will be launched on a Russian orbital booster when the project is completed. You can read the entire story on-line at tinyurl.com/kiwisat-software. (NZART)

**

HAM RADIO IN SPACE: HAM RADIO SPACE HISTORY TALK ON THE WWW

A video dealing with the history of ham radio space communications is now available on the World-Wide-Web. The program features a talk given in English by Mario Lorenz, DL5MLO, from AMSAT Germany was recorded this past summer as a part of the Hacker Space Program track at the Chaos Communication Camp 2011.

Held near Berlin, Chaos Communication Camp attracted hackers and makers from across Europe. Lorenz notes that building amateur radio satellites involves using technology in creative ways and as such has great appeal to the hacker community.

Lorenz talk is titled, "From OSCAR 1 to Mars and beyond Amateur Space Exploration - The last 50 years, Now, and the Future." It runs just about an hour and might make a good club meeting presentation. You can find it on-line at tinyurl.com/amsat-sat-talk (Southgate)

**

HAM HAPPENINGS: CASTLES AND STATELY HOMES ON THE AIR

An interesting ham radio event out of the United Kingdom. The Castles and Stately Homes On The Air organization will be holding a UK Heritage Event during this month to coincide with the European Heritage Month. For ham radio, this is a great opportunity to access locations that may previously have been inaccessible or closed to the public. Details on activations appear on line at www.cashota.co.uk. (GB2RS)

**

ON THE AIR: SPECIAL RUGBY WORLD CUP CALLSIGNS DOWN UNDER

On the air, keep your ears open for some New Zealand amateur radio operators to replace their ZL prefix with a ZM prefix throughout September and October. This, in celebration of the Rugby World Cup which runs from September 9th through October 23rd.

Also listen out for two special event stations in celebration of the Rugby event. The first has the unique call of ZL4RUGBY. It will be on the air through October 31st. QSL via ZL4PW.

The other is ZL6RWC. It will be operated by various members of the Papakura Radio Club, which will also be operational through October 31st. Please QSL ZL6RWC via ZL1VK, direct, via the bureau or electronically using Logbook of the World. (NZART)

**

DX

In DX, listen out for Canadian special event station CJ3A to be active during the entire month of October 2011 to celebrate the Centennial of Parks in Canada. Operations will be on all High Frequency bands. QSL via VE3LA.

The Wessex Contest Group will be active from the island of St Martin's, Isles of Scilly, using the club callsign MX0WCB, between September 11th to the 17th. Operation will be mainly QRP on the 40, 20, 17, 15 and 10m bands. QSL direct, by the Bureau, eQSL or via M0WAY.

K3GV stroke VY2 is on 15m and 20m from Prince Edward Island for one month that began on September 1st. QSL via K3GV either via the bureau or direct.

WB6OJB will be on the air as 7P8JK from Lesotho between September 15th to the 22nd. While no other information was given, during his last Lesotho operation he was on the High Frequency bands from 40 to 10 meters using mostly SSB with some CW. QSL direct to his home callsign WB6OJB.

Lastly, N6NO will show up as VK9OL from Lord Howe Island from September 10th to the 18th. He is reportedly celebrating his 75th birthday and 60 years iun amateur radio. He plans to work mainly in CW on 40 through 10 meters listening especially for Europe. QSLs via bureau or direct to N6NO or electronically using Logbook of the World.

(Above from DX news sources)

THAT FINAL ITEM: REMEMBERING 911 AND THE FIREFIGHTERS OF NYC

And finally this week, Mark Lacy, W5TXR, tells Newsline that he has added the New York Fire Department logging tapes of 911 to his website. The audio file contain transmissions of first responders as they realized what was happening and began the work of trying to save lives while not realizing that the buildings they were working in would soon crumble around them:

--

Mobile: "Marine 6 to Manhattan, urgent." Dispatch: "Hazmat 1 stand-by. Marine 6 go." Mobile: "You have a second plane into the other tower pof the Trade Center. (unintelligible) your fire." Dispatch: ".Marine 6 advising a second plane into the World Trade Center. Kay. Mobile: "Marine 6. That's the other tower." Dispatch: "That's the second tower of the World Trade Center. Kay"

--

What you will hear is very graphic and Mark warns on the website that as you listen to history unfold that it will send chills through your body.

To hear these sad moments in United States history please take your web browser to wwwW5TXR.net and click on the words "Historical Audio Archives." The page also explains some of the radio codes and terminology used by the firefighters in New York.

W5TXR adds that for him, as a volunteer firefighter of over 30 years this really hits home. He says that the files will remain on line only through September 15th. (W5TXR)

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Time to time it will be necessary to remember about regular updates
to the VHF-DATABASE at MMMonVHF. At mid of october we plan to
spread a new issue of our VHF-DATABASE to all DX-Cluster (and USER
which what it). So please be so kind and UPDATE IT NOW SOON! LOGIN
at MMMonVHF and follow the link to your Account > than click on
"VHF-DATABASE Update" and click on the INFO Button left side of
the Call (mostly only YOUR CALL or YOUR Expeditions calls) you
wants to change... Click on the EDIT Button (lower end of the page)
if something to change and edit the datasentence. After you have
finished your changes PLEASE do not forget to click on SAVE! Your
data will be reviewed by the Team and released to the VHF-DATABASE
as soon as possible! You will receive a confirmation E-mail when
your data is online available at MMMonVHF! The DX-Cluster will get
those updated Files only one time a year! Info or changes of OTHER
than your own Call or your Expedition Calls as well welcome. In
such a case please do use the Contact Form
http://www.mmmonvhf.de/kontact.php and pass us the
CALL you want to edit as well... Files like CALL3.txt will be
availble for free to everybody from your account and daily fresh!
To get into CALL3.txt you need to have one of the keywords (WSJT
MS or EME) at your datasentence activated!

** Activating IO72 **

Looking into activating IO72 and wanted to test the water on this.
Initially on 2M MS fsk I will use a single 9ele and power from 100
to QRO levels. Not sure of timing yet but hope to coincide with
some showers and be on at several times per yer (QTH is my in-laws
cottage). Possibly also 4/6m in the future if enough interest.

EU-189. Once again a Belgian expedition team will be sailing to
Rockall Island at the end of September.Operators mentioned as of
press time are: Patrick/ON4HIL, Theo/ON4ATW, Henk/ON4AHF,
Karel/ON5TN and Rudi/ON7YT. Three of these operators have been at
not on, Rockall Island in May 2009. The team will set sail aboard
the "Commandant Fourcault" on September 23rd, for a 4 day voyage
to Rockall. If all goes as planned, they will be on the air as
MM0RAI around September 27th or 28th. Please keep in mind that
heavy seas or bad weather can delay the operation! QSL via ON4ATW
(LoTW, by the Bureau or direct. Please visit their Web site for
details and updates at: WWW.ROCKALL.BE NOTE FOR VHF: There is a
chance ON4AHF or some of the other crewmembers will be active on
the way to rockall "maritime mobile" activating sea squares. As
they leave 23sept at antwerp harbour, they will follow the english
coast via scotland to rockall. People who want to work JO12, JO13,
JO04, JO05... this is a nice chance to get them all!!!
Keep informed at MMMonVHF or ON4KST chat

** Working K5QE on EME in our Sept contest... **

Hello to everyone in the EME community. This year, the ARRL
September VHF Contest will be held Sept 10th, 11th, and 12th
(only 3 hours). We want to work as many EME stations on 2M AND
432 as possible to increase our grid count. I know that the
EU VHF contests do not allow EME contacts, but the ARRL contests
do....and EME is a big part of our efforts here at K5QE.
Please help us with this event by working us on JT65b or CW.
Thank you very much. Please read all info in detail:
http://www.mmmonvhf.de/latest.php?id=4008

Text edition:

WIANEWS FOR WEEK COMMENCING SEPTEMBER 11 2011.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 11 2011.

TAKE YOUR HAND-HELD TO WORK DAY

Friday 23 September is "take your hand-held to work and school day".

Although a South African incentive why not try it here?

Demonstrate amateur radio to your friends and colleagues at morning tea, lunch time or if you are at school, before school, and during breaks.

Take along a few brochures about amateur radio to hand out as you talk on the air.

If you are retired get on the air on local repeaters and talk to the radio amateurs who are demonstrating amateur radio at work or at school.

Amateur Radio Victoria Centenary

The 100th anniversary of what began in November 1911 as the Amateur Wireless Society of Victoria, quickly changing to the Wireless Institute of Victoria and today is known as Amateur Radio Victoria.

Its members hope all radio amateurs will join in the celebration.

Part of the activity includes an operating award.

During the celebratory period which began August 1 and rolls along until November 30, contact with members gains two points. A bonus ten points is available by working VK3WI during the Oceania DX Phone Contest October 1 / 2.

Bonus points are also available for contacts with the Nominated VK100ARV special callsign to be rostered by members throughout in November.

Also don't forget portable operations.

A total of five so far have enrolled for the special weekend of activation in November for the Keith Roget Memorial National Parks Award.

The weekend has been extended to cover the Friday, Saturday and Sunday, November the 18th until the 20th.

It's just ANOTHER part of the Amateur Radio Victoria Centenary celebration.

To enrol contact Tony Hambling VK3VTH

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

As WIA President Michael Owen, VK3KI, reported a while back, the Foundation Licence has stopped the previous trend of amateur numbers dropping. Times have moved on and our once favourite shops have rationalised their inventories to reflect purchasing trends.

In a population of 22 millions, a licensed amateur community of about 15,000 means we are spread very thinly when retailers come to swap our dollars for their products. Some retail spokes persons have been decrying the use of "on line" buying. Well for me being able to buy items that are no longer

available from local outlets let's me pursue some of my radio interests which would otherwise be denied.

I know from researching purchases that there can be equivalent items for sale locally but often at twice the price I can buy them in from overseas. I also know that the cost of freight from U.S.A. can be a large component of the total cost. With our dollar matching the greenback, it looks tempting to purchase from US book stores. Add in the postage and packing and then check with WIA Bookshop and you are more inclined to buy locally.

We are fortunate that as some of the store front retailers drop hobby products we have more enthusiasts building successful on-line businesses in VK. With on-line payment and ordering we are perhaps better served now than in past times. We just need internet access to still buy Australian.

I'm Geoff Emery and that's what I think.....how about you?

Hello, this is Doug Friend VK4OE from the Brisbane VHF Group and, on behalf of the group, I want to make sure that everyone knows about two days coming up that will be devoted to the absolutely fascinating and satisfying area of our great hobby - amateur microwaves!

In South-East Queensland there is growing interest in microwaves by quite a few radio amateurs. Here we're talking about those bands above 1 gigahertz - and there are many - starting at 1296 MHz. Several amateurs have equipment for a number of microwave bands up and working and they are ready to go out to high places to use what they have made. Some others have started to make gear and will value an opportunity to test what they have produce so far in the presence of encouraging friends.

So, on Sunday the 25th of this month, we'll be running a "test and tune" day for microwave gear. Anyone who has completed or half-completed projects that need testing can come along to Rob Bathgate, VK4ZDX's place at 53 Arrol Street, Camp Hill and we'll have power meters, spectrum analysers and other test gear available. There'll also be several experienced microwave amateurs there to meet and discuss things with. Even if you have only a budding interest in amateur microwave bands or technology, the day will also be an opportunity to become more enthused with the subject.

Then, on Sunday the 16th of October it'll be a real live, out in the field, test and demonstration day for microwave gear. Different stations will be located on different hills around the great South-East, and the aim will be to demonstrate how microwaves really can be a lot of fun.

So, mark the 25th of September and the 26th of October on your calendars - amateur microwave testing and demonstration days!

VK7

NWT-ATV Group's next meeting is 8th. October at the QTH of Jim VK7JH, Stowport.

This meeting promises to be a very interesting one, as the Guest speaker will be Peter VK7IY who currently is associated with shipping in Bass Strait and he intends to provide some interesting material including work with the

Bass Strait Oil Rigs.

(VK7AX President NWT-ATV Group)

DISCUSSION POINT

What use is an f-call? (use this #4 next-- it is in the wia upload area)
the HARG site at harg.org.au

What use is an f-call?

Firstly I should thank all those f-calls that contributed to the call-back last week. If you know of any f-calls that are not listening to the broadcast, tell them about it and who knows what might happen.

When I started this hobby I did what I am beginning to suspect many newcomers to the field did. I asked around what things to do and who to talk to, then I made my first purchases. I've now spent some of my hard-earned money and to-date I'm very happy about what I bought, but along the way I learnt a few things that I think might be helpful.

My biggest frustration in going out to get my kit was this phenomenon that seemed to plague me where-ever I went. "Why can I not just buy a standard kit with radio, power-supply and antenna?" All in one box, all from one supplier, all shipped to my door, point and click-style.

My limited experience to date tells me that you can in fact do that - it's called a hand-held all-in-one transceiver and it is all that. Of course there are trade-offs such as transmit power, battery life, band-availability, user-interface, etc.

I'm extremely familiar with the I.T. industry. The answer to any given question asked by any given person is always "it depends". I've learnt that Amateur Radio is exactly the same - and as an aside, I suspect it's true for many more fields.

Back to buying a kit. Why not all-in-one? Why is this so hard?

Well, you now know the answer, "it depends". It depends on many things, where you're going to install it, how you're going to use it, how much space you have, how much money, whom you can buy the gear from, etc. etc.

So, my observation today is that for every HAM there's a solution - and for every solution there's an alternative - or six. You can buy your gear brand new, like I did, or you can buy it second or third hand. Perhaps you were given a set. In the end, it doesn't matter what you have when you get started, just that you actually do that, get started.

I'm sure that as I learn more I'll know more and be able to reflect on the choices I've made to date, but in the end, it's up to you to get started.

Go forth and transmit! - I'm Onno, VK6FLAB

HOME OF THE GOOD GUYS

Good Guys this week are the members of the Yasme Foundation.

Ethiopia came back on the air May 30, 2011, with the re-opening of the Ethiopian Amateur Radio Society station ET 3 AA.

The Board of Directors of The Yasme Foundation became aware that 25 club members were scheduled to take the amateur radio license examination in late July and that the fee for taking the exam was about one month's salary in Ethiopia. Accordingly, the Board voted unanimously in favour of a grant to cover one-half of the examination fees for all 25 applicants, the remaining one-half having been previously committed from the Radio Society of Great Britain.

The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio.

(sarc)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

FCC ISSUES EXPERIMENTAL SPACE LICENSE FPOR 2 METER AND 70 CM OPERATIONS

The FCC has issued a new experimental license with the call letters WF2XSP to one James Cutler to operate in 144 to 146 MHz and 437 to 439 MHz spectrum.

This, for testing an image processing algorithm that will be used on a future space flight mobile, Low Earth Orbit operations ranging from 450 to 820 kilometres in altitude.

The FCC announcement made no other reference to the nature of Cutler's experimentation nor why he requested to do so in the amateur 2 meter and 70cm bands.

QRZ.com lists six radio amateurs by the name of James Cutler, but its unknown if any of them are the same James Cutler who has obtained the Experimental License from the FCC.

LED lighting can cause radio interference

Thilo, DL9KCE, writes on the IARU Region 1 site of the problems LED lighting can cause.

More and more LED lights are entering the market and are being used by radio amateur and their neighbours. There is a limit to maximum disturbance voltage on the mains port defined in EN55015, which is equivalent to the protection of EN55022, however it is not fully implemented within the EU due to a transition period of the standard.

As consequence, European Hams can observe some LED lights causing only little trouble, others however cause a great amount of harmful interference due to mains line radiation. As worst case, some LED lights which could be as far as 40 - 60 dB over the limit on some frequencies.

We suggest VK hams monitor the development and make own measurements, if feasible and report to WIA.

Bondi Beach one week, Outer Space the next.

KiwiSAT Taking New Zealand into Space!

Fourth-year honours students and a Masters student from the School of Engineering and Advanced Technology at the Albany campus have been awarded a $7,500 grant from the New Zealand Association of Radio Transmitters' Radio Science Education Trust to develop the software. The micro satellite is the size of a basketball and will be launched from a Russian rocket in the northern hemisphere when the project is finished.

KiwiSAT is being designed and built by a team of volunteers from New Zealand Radio Amateurs supported by Massey and various corporate sponsors. It will connect with amateur radio stations globally and will carry out experimental work in small satellite Attitude Determination and Control (ADAC) - a low cost control system that works through interaction with the Earth's magnetic field to position the satellite at a specific attitude.

Still no word however on completion and launch dates.

A separate frequency allocation for BPL?

The IARU Region 1 EMC working group discussed BPL (PLT) at its meeting in Sun City August 13 and say there are plans to use and may be even allocate the frequency range of 30 - 80 MHz to BPL, for several reasons.

One is that the frequency range is not used as intensive and the amount of possible interference is expected to be less.

Recommendation: To support a separate frequency allocation for BPL equipment.

In further Broadband by Powerline (BPL) networking technology (aka PLT), we know it has a reputation for causing widespread interference to radio reception.

Now there are plans to install them at sea.

London-based company Gentay Ltd has announced BPL networking technology devices for use on vessels plying the seven seas!

ILLW in VK7

While it may be a bit late, the International Lighthouse and Lightship weekend concluded with successful operations at Devonport, with Winston VK7EM, and Scott VK7NWT, who activated Mersey Bluff lighthouse.

Eric VK7NFI, Dick, VK7DIK and Wayne VK7NET, did the usual at Wynyard with the Table Cape lighthouse. The Wynyard Municipal council allowed access to the lighthouse building to allow the tying off of antennas to the top handrails of the lighthouse.

Dion VK7DB did a first time activation of the Sandy Cape lighthouse on the rugged west coast. Getting to this location prove relatively easy despite the poor weather prior to the event. The only access is via about 20km of beach tracks and a few river crossings.

Propagation conditions were good for all and it proved to be a successful event, with all looking forward to next year's event.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The 22nd Commonwealth Heads of Government Meeting (CHOGM) will be held in Perth, VK6, October 28 29 30 and to mark the occasion VI6CHOGM will on air from the Peter Hughes Scout Communications Centre in East Cannington, across as many modes and bands as possible

A number of special event stations will be on air to mark the anniversary of the terrorist attack on the twin towers of the World Trade Centre in New York.

In remembrance of those who died from the attacks that occurred on September 11, 2001, several stations are planned.

These include:-

Pentagon Amateur Radio Club K4AF
Blair Amateur Radio Society W3PN
Northeast Wireless Radio Club N2WC

Kings County Repeater Association KC2RA
Symbol Technologies Amateur Radio Club W2SBL

Many will cover various aspects of the disaster and will have QSL cards available.

(arvictoria)

WIRELESS WEATHER

(this story in audio by felix 4fuq is in wia upload area for you)

Stanford physicists probing the sun's deep interior have successfully predicted the emergence of sunspots on the surface a full two days before they appear, providing the first early warning of the violent solar storms that can endanger astronauts in space, disrupt electric power grids on Earth, and plunge cities into darkness.

SFGate.com say solar physicist David Hathaway at NASA's Marshall Space Centre called the development "an important result."

"It's long been our hope to see the storms of sunspots before they show up," Hathaway said. The experiments that led to the announcement in the Journal Science were conducted by Stathis Ilonidis, a graduate student in physics at Stanford and his colleagues.

Analysing signals from a satellite peering at the sun, they detected the acoustic signs of four electromagnetic storms that were being generated as turbulence 40,000 miles deep in what Ilonidis calls "the roaring ocean" of the sun 's interior.

The system will have to be refined and proven, the scientists cautioned.

BROADCAST MONITORING SWL AND SCANNER NEWS

In the UK Isle of Wight "oldies" station "Angel FM" had their transmitter go of air due to bad weather.

To the rescue? Non other than Rolling Stones guitarist Keith Richards who sent Angel Radio a check for approximately $4,800 to get the "Angel" flying again!

Angel Radio only broadcasts music made before 1969 and promises "snap, crackle but no pop." It's slogan is "Radio by older people ... for older people."

It's believed that Richards, 67, tunes in regularly.

(published reports)

INTRUDER WATCH - ENFORCEMENT ZONE

HAMS AND TWO NATIONS PTT SUCCESSFUL IN REMOVING CODAR FROM 24 MHz BAND

The Codar High Frequency Radar operating on 24920 to 25080 kHz from Northern Italy has gone off the air. This, thanks to a concerted effort by individual hams and members of various European Intruder Watch operations.

A release by IARU Region 1 Intruder Watch specifically singles out DJ9KR, G4BOH and 9A5W for their assistance. It also thanks the British telecommunications regulator Ofcom and the German P-T-T for their direction finding assistance and other help.

Italy revisited.

Italian repeaters in Amateur Satellite segment

Edition 58 of the IARU Region 1 VHF-UHF-UW Newsletter publishes the notes from the IARU-R1 Sun City conference and we see there are a number of Italian repeaters operating in the Amateur Satellite Service segment.

These are causing interference to the uplinks and downlinks of Amateur Radio satellites and D-Star repeaters are the prevalent offenders.

IARU Region One stresses the importance of satellite service and band plans also in case of the introduction of new modes. It is recommended to disconnect repeaters/nodes from international D-Star network if these are operated in contradiction to IARU-R1 band plans.

Dutch authorities get tough with radio pirates.

Radiocommunications Agency Netherlands will soon launch a new tougher policy to deal with pirate radio stations. The illegal broadcasters may soon have a fine of 2,500 euros imposed on them as soon as half an hour after they receive a warning letter.

This the agency's latest move in a cat and mouse game with the pirates.

There have already been 1600 warnings this year, and 60 people have been fined.

The radio pirates have responded by adapting their methods. They are now increasingly using mobile stations, so after receiving a warning letter they simply move to a different place to broadcast. The collapsible masts used for the broadcasts are sometimes more than forty metres high.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

A new repeater network is operational from Brisbane's "Mount Coot-tha."

VK4RBQ, 146.950 MHz (91.5 Hz tone needed) is working well and is now rebroadcasting both WIA National News and the local QNEWS, (assembled this week by Peter VK4OD).

The newscasts are on relay from VK4RGC Springbrook, the 146.950 repeater is linked to the Gold Coast 146.700 repeater on a full time basis and Pete VK4BT is sitting ready for your call-backs!

Andrew Chapman VK4JV says there is also a 70CM repeater on site, this is 438.400 MHz, again 91.5 Hz tone needed for access, which is stand-alone and is dual mode analogue / APCO P25 (the P25 NAC is 293 for digital use).

3rd issue of 'CQ EGYPT' Amateur Radio Magazine is available free on the web.

One of the foremost goals of the Egyptian Radio Amateurs Society (ERASD) is providing educational programs and materials to promote amateur radio and develop the scientific and technical skills of the Egyptian and Arab youth.

In this context, ERASD is currently issued an online magazine focused on simplifying science and technology to youth in general, and more particularly in areas related to amateur radio and satellite.

The Magazine articles are a mix of English and Arabic.

Happy Feet has an ICE day !

The emperor penguin affectionately known as "Happy Feet", has been released into the Southern Ocean some 700 kilometres south of New Zealand to begin the long swim home to Antarctica.

The penguin's 2,000 kilometre trip began Fathers Day as he slid down a specially designed ramp from a research ship.

He has been fitted with a transmitter that will allow zoologists and the general public to track his whereabouts.

Happy Feet has been fitted with a Sirtrack KiwiSat 202 Satellite Transmitter which will transmit signals to satellites twice a day for three hours. Transmissions from the KiwiSat 202 will allow monitoring Happy Feet's position as he travels. Each new position will be plotted on the map so we can all follow his progress.

It is not known which direction Happy Feet will travel, hopefully back to his home in the Antarctic, which makes this all the more fascinating and such a rare opportunity to learn about the movements of an amazing animal.

Happy Feet spent six months at Wellington Zoo, after washing up on a New Zealand beach suffering from stomach ailments that had left him near death.

After surgery, the zoo nursed him back to health with fish milkshakes.

The three and half year old bird who has become an international celebrity will spawn a book and documentary about his ordeal.

AO-51 MAY SOON BE LOST

The ageing Amsat Oscar AO-51 may appears to be a dying bird. This, according to Control Station, Mark Hammond, N8MH reporting via the Amsat News Service weekly newsletter.

Amateur radio Newsline's Don Carlson, KQ6FM, tells us that since the failure of the first cell on the six-cell battery, ground controllers have been limited to simple commands for basic configurations.

However, features such as telemetry collection and the Bulletin Board are not functional at this time.

And now ground stations have discovered there is a second cell in the battery showing problems. The control team thinks that battery will be the next cell to go If that happens the probable result that their limited manual mode of operation probably will no longer be an option, and the mission might be considered over.

Near-earth asteroid fly-by receiving opportunity

The 400 meter diameter near-Earth asteroid 2005 YU55 will be making a
0.85 lunar distance flyby of Earth on November 8.

Michael Busch at the UCLA Department of Earth and Space Sciences notes this may
an opportunity for amateur satellite operators to observe the fly-by.

Because YU55 will be so close to Earth, its radar echo will be detectable with
even small antennas (~1 m^2). YU55's echo will be a slowly drifting signal with
a bandwidth of ~1 Hz within a few kHz of 2380 MHz or 8560 MHz.

This will present amateur radio operators an opportunity to receive the radar
reflections off of the asteroid because of the big dish, big signals
originating from Arecibo and Goldstone.

Nov 8 19:15 - 19:30 UTC, Arecibo will be transmitting a continuous wave tuned
to put the asteroid's echo at a constant
2380.000000 MHz at the Green Bank Telescope.
Observers elsewhere on Earth will see the echo within
2 kHz of 2380 MHz, Doppler-shifted by the Earth's
rotation. It will be slowly drifting in frequency and
have a bandwidth of ~0.6 Hz.

Nov 9, 01:30 - 02:00 UTC, Goldstone Deep Space Network facility will be
transmitting a continuous wave tuned to put the
asteroid's echo a constant 8560.000000 MHz at a
second antenna at the Goldstone site. Other
observers may see the echo shifted by as much as
6 kHz, and it will have a bandwidth of ~2 Hz.

Initial information can be found on-line at:
http://echo.jpl.nasa.gov/asteroids/2005YU55/2005YU55_planning.html

GB2RS NEWS

Sunday 11th September 2011

The news headlines:

* Special event stations to mark 9/11

* IARU Region 1 Conference recommends Band Plan changes

* SatNav GPS tests in East Anglia

The ARRL reports that several amateur radio special event stations are being planned in remembrance of those who died in the attacks of 11 September 2001. The Pentagon Amateur Radio Club, K4AF, Blair Amateur Radio Society, W3PN, Northeast Wireless Radio Club, N2WC, Kings County Repeater Association, KC2RA and Symbol Technologies Amateur Radio Club, W2SBL are among those who will be on the air. See www.arrl.org for full details of all the stations involved.

The official minutes of the Final Plenary of the IARU Region 1 General Conference, which contain its Recommendations, is now available on the Region 1 website, www.iaru-r1.org. The 78 Recommendations cover a wide range of subjects that will strengthen efforts to protect amateur allocations, develop new amateurs and accommodate growing activity and innovation. Some of those that affect our Band Plans will need to be carefully reviewed to see how the Recommendations might apply within the UK. This will be led by our Spectrum Managers and Emerging Technologies Committee, ETCC, and discussed within the Spectrum Forum during the autumn, with the aim of publishing the changes in the February 2012 RadCom. Your views and thoughts on the Band Planning Recommendations should be channelled to either the relevant Spectrum Manager, ETCC or special interest groups represented on the Spectrum Forum. Contact details can be found on the web by following the Spectrum Forum Members' link at www.rsgb.org/committees/spectrumforum/spectrum-forum-members.php.

Ofcom has announced an exercise to test the GPS SatNav system. It will take place around the Stanford area in East Anglia between 19 and 23 September and 3 to 7 October. Authorised jammers will be operating between 9am and 5.30pm. Safety of Life operations will at all times take precedence over exercise activities. For further information contact InfoGPS.Notices@ofcom.org.uk.

AMSAT-UK has awarded The Louis Varney G5RV Cup for Space Communications to Paul Robinson, 2E1EUB. The cup is awarded for advances in space

communication. The presentation, by RSGB President Dave Wilson, M00BW, took place at the Telford Hamfest on Sunday, September 4. Paul was nominated by AMSAT-UK for his work promoting and encouraging the use of amateur radio satellites and perfecting the art of a portable ground station.

Due to unforeseen circumstances, the AGM of UKFMGW Western originally planned for 5 September was postponed. It will now be held on Monday 10 October, starting at 8pm, at Grappenhall Community Centre, Bellhouse Lane, Grappenhall, Warrington. The committee asks that any items for AOB be with Paul, G1DVA by e-mail to paul@g1dva.net by midday Monday 12 September. The committee apologises for any inconvenience caused by this change of date, however they look forward to seeing you all on this new, revised date. As part of the European Heritage Open days that are held throughout September, Castles and Stately Homes On The Air will be holding a month long award event called UK & Ireland Heritage Month. Any individuals, clubs or groups can activate locations, throughout September, by registering at www.cashota.co.uk for the UK and www.cashota-ireland.org for Ireland, with all details of the event to be found there as well. Participants may register up until the end of September to participate.

And now for the details of rallies and events for the coming week

Today, Sunday 11 September, the Torbay Annual Communications Fair takes place at Newton Abbot Racecourse, Newton Abbot, Devon TQ12 3AF. There will be trade stands, a Bring & Buy and an RSGB bookstall. Doors open at 10am and admission is £2. Details by e-mail to rally@tars.org.uk.

Mold & DRC North Wales Swap & Sell will take place on 14 September at Mold Rugby Club, Mold, Flintshire, North Wales. It's a silent key, shack surplus, bring and buy, junk swap and sell evening. Doors open at 8pm. Details from Steve, GW7AAV on 01244 819 618.

On 17 September the Fog On The Tyne Rally will be held at Whitehall Road Methodist Church Hall, Bensham, Gateshead NE8 4LH. Organised by Angel of the North ARC & South Tyneside ARS, the doors open at 10.30am and admission is £2. Details from Nancy Bone, G7UUR on 01914 770 036 during the evening.

The 21st Great Northern Hamfest takes place in the Metrodome Leisure Complex, Barnsley S71 1AN on 18 September. Doors open at 11am and there will be trade stands and special interest groups. More information from Ernie, G4LUE on 01226 716 339.

On 18 September the Belgium Amateur Radio & Computer Rally takes place at Hall 'Lotto Mons Expo', Mons, which is 50km south of Brussels. Doors open at 9am and Talk in is available via repeaters on 145.600MHz & 430.325MHz. Plenty of international traders will be present. Details at www.on6ll.be.

Midland Amateur Radio Society will be holding an open day, at the club QTH, from 10am to 4pm on 24 September. Plans are underway for refreshments, meet the training staff and there will be displays of photographs QSL cards, the original 1931 minute books and their cups and awards stalls and operating using GB8OTH. More information from the club website www.midamradio.net

Now for the news of special events

Churches & Chapels On the Air takes place this weekend, 10 and 11 September, from 10am to 4pm. There will be several stations on the air, mainly 40 and 80m SSB with special event callsigns. The organisers say, please give the stations a call.

GB4CFV will be put on the air by members of the Friskney & East Linconshire Communications Club. Visitors are welcome to come and join them or call them on the air on 11 September at Church Farm Museum in Skegness. They plan be active on 2m FM and will be using PSK, SSB and CW on the HF bands. Preston ARS will put GB1AVR for Ackworth Vintage Rally on the air on 11 September from Lanes Farm, Ackworth.

Throughout September, special event station GB2JB will be on the air to commemorate the life and birth place of Jack Binns, radio operator of the Passenger Ship Republic in 1909. Operation will be from Coney Court, Brigg and is run by Brigg & District Amateur Radio Club.

GB0SMA will be on the air from Stow Maries Aerodrome on 11 September for the Vintage Fly In. Stow Maries Aerodrome in Essex is probably the best preserved World War 1 airfield in the UK with over 20 of the original buildings still standing. It was home to 37 Home Defence Squadron, Royal Flying Corps and then 37 Squadron, Royal Air Force. The site owners have invited Dengie Hundred Amateur Radio Society to establish a permanent amateur radio station at the site under the call sign GB0SMA and to operate that station during the various open days and events held throughout the year.

Northumbria Amateur Radio Club & The Border Amateur Radio Society will be operating GB2BCL from Barmoor Castle near Lowick in Northumberland on Sunday 18 September, commemorating the battle of Flodden Hill. GB2BCL will be operational on most HF frequencies. The event manger Roy, G0AXJ welcomes visitors to the station that will be active from 10am through to 7pm. GB2BCL will be situated at Barmoor Castle's west entrance gate. Talk-in will be available on 145.500MHz. For more information please visit www.g4aax.org.uk or telephone Roy on 07421 659 150.

And now the HF DX news compiled from 425 DX News and other sources

ZA1TC will be on the air until 14 September from Durres in Albania. The station will consist of a Kenwood TS-570D, FD-4 Windom antenna plus 80m dipole. This is his first solo trip. QSL to TCSWAT at PO Box 73, Karakoy, 34421 Istanbul, Turkey or via the TA QSL Bureau. More details on QRZ.com.

Marko, S55EI will be in Morocco until 20 September and will be active as CN2EI. He will be on 40, 6 and 2m. QSL to his home callsign.

Gab, HA3JB has renewed his Egyptian licence and plans to be active as SU/HA3JB from now until the end of November. He will be active on all bands from 160 to 10m using CW, SSB, RTTY and PSK, plus possibly some SSTV.

Harry, 7Q7HB is on the air again from Malawi until 23 November. He will be as active as possible but is subject to power cuts. Only direct QSLs are available via G0IAS.

Now the contest news

The 2nd 70MHz contest takes place today, 11 September, from 0900 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

Tuesday 13 September is the 432MHz UK Activity Contest from 1900 to 2130UTC. Using all modes on the band the exchange is signal report, serial number and locator. The following day, 14 September, is the 80m Club Sprint. Using SSB from 1900 to 2030UTC, the exchange is both callsigns, serial number and locator.

The Worked All Britain 144MHz Low Power Phone Contest takes place next Sunday, 18 September, from 1000 to 1400UTC. Low power means a maximum power of 10 watts. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager G3XKT by e-mail to aebbooks@ntlworld.com.

Also next Sunday, 18 September, the BARTG Sprint 75 takes place from 1700 to 2100UTC. All activity is on 75 bauds. Exchange a serial number only. Entries are single-op only and all-bands only, with a special sections for `experts', defined as anyone who has had a top 10 placing in any BARTG contest from 2008 onwards.

And now the solar factual data for the period from the 29th of August to the 4th of September, compiled by Neil Clarke, G0CAS on the 5th of September.

Numerous sunspot groups were visible every day, in fact nine were visible on the 31st. These groups produced a small number of small C class solar flares every day. However, on the 3rd and the 4th a small complex region emerged close to the west limb and produced numerous C class and one M class solar flare before it rotated out of view a couple of days later. Several large coronal mass ejections took place, many from the back side of the Sun, but none seems to be heading directly our way. Solar flux levels responded well to the number of sunspot groups and increased from 101 units on the 29th and the 30th to 119 by the 3rd and the 4th. The average was 111 units. The 90 day solar flux average on the 4th was 98, that's one unit up on last week. X-ray flux levels increased from B2.4 units on the 30th to B6.3 by the 4th, the average was B3.6 units. Geomagnetic activity was quiet every day

except for the 3rd when a weak coronal hole disturbance arrived, the Ap index that day was 13 units compared to the quietest day with an Ap of 2 units on the 31st. The average was Ap 6 units. Initially solar wind speeds slowed from 500 kilometres per second on the 29th to 270 by the 2nd but then increased to 450 in response with the disturbance. Particle densities remained low every day. Bz varied between minus 12 and plus 8 nanoTeslas on the 3rd and between minus 2 and plus 3 nanoTeslas on the quiet days.

And now the solar forecast. This week the quiet side of the Sun is expected to be rotating out of view. Solar activity should be low but could increase on the occasional day. Solar flux levels should be above the 100 mark for most of the week. Geomagnetic activity is expected to be at quiet levels every day. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. The daytime highs are now starting to take place earlier in the day, usually around midday, as is expected during the winter months. Darkness hour lows should be about 10MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. the best time to try this path will be late morning around 1100 hours UTC.

And that's all for this week from the propagation team.

845. Youth in the Second Century Committee Needs Your Input

Newsgroup: rec.radio.amateur.misc
Date: 2011-09-09 17:49:35 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110909171650.DD52A20AC5@bmail.arrl.org>
Source record: 4035
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

At its July 2011 meeting, the ARRL Board approved a motion authorizing the appointment of a Youth in the Second Century Committee. ARRL President Kay Craigie N3KN has appointed the committee, which is chaired by Rocky Mountain Division Director Brian Mileshosky N5ZGT.

The purpose and goals of this committee are to enhance the League's outreach to potential Amateurs among America's youth. The League's centennial in 2014 will highlight not only the accomplishments of the past but also point towards Amateur Radio's future. Meaningful plans to excite young Americans about Amateur Radio today and in the future must take into account the ideas, lifestyles, and experiences of youthful Amateur Radio operators.

The Committee on Youth in the Second Century will seek input from youth and also from adult Amateurs working with young people, and will make recommendations to the Staff and the Board of Directors. The Committee will report to the Board of Directors beginning in January 2012.

We are all very aware of the importance of getting more young people involved in Amateur Radio. Many of you are making a difference in young people's lives and doing exciting things to interest youth in our hobby. ARRL needs your input on how we can improve our outreach to young Americans. A system for providing input to the committee will be announced soon. I would appreciate it if you would also share your thoughts and comments with me, so that working together, we can all help with this vital effort for the future of Amateur Radio. Thanks.

73, Cliff K0CA

ARRL Midwest Division
Director: Cliff Ahrens, K0CA

SARL NEWS - SUNDAY 11 SEPTEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that it must be reported that the keys of two radio amateurs went silent recently. They are:

Charlie Stevens, ZS1AWG, member of the South Cape Amateur Radio Club on Thursday 18th August 2011 in George in the age of 81 years.

Dennis Hugo, ZS1UV (ex ZS6US), member of the Garden Route Radio Club, in the age of 87 years. Dennis was ininterruptedly an SARL member since 1948.

Our sincere condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

SARL ICASA MEETING

EMAIL NEWSLETTER

SPECIAL RUGBY WORLD CUP CALLSIGNS DOWN UNDER

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL ICASA MEETING

A SARL delegation met with ICASA Spectrum Management staff on Thursday and discussed various regulatory issues. Representing the SARL were Colin de Villiers, Francois Botha and Hans van de Groenendaal.

ICASA shared some of their proposed corrections to the regulations with the SARL including the correction in the class B age issue and the table of amateur frequencies. The question of receivers with continuous tuning was discussed at length and agreement was reached that ICASA will relook at the specific regulation. Various proposals were put on the table. The SARL will engage ICASA again this week in an effort to finalise the matter. The SARL also requested that it be minuted that ICASA will not enforce the current rule and will not take any action against radio amateurs until the matter has been resolved. ICASA agreed.

It was agreed that the SARL will host a two-day workshop for Spectrum Management Staff and members of various other departments of ICASA. The objective is to develop a better understanding about amateur radio and its contribution to engineering and technology in South Africa. During the workshop the concept of an advanced licence with additional privileges will be discussed and a way forward developed. Mid to end February is indicated as a possible time frame of when the workshop will be held.

The question of licensing between the SADC countries was discussed. A discussion document for tabling at the next meeting of CRASA, the Communications Regulators Association of Southern Africa, will be prepared by ICASA. The SARL suggested that as an interim measure ICASA should allow visitors from SADC countries who are licensed in their country to operate in South Africa.

The question of a new allocation in the 5 MHz band was discussed and ICASA agreed to formulate a Government Gazette to invite public comment on the proposal.

The WRC12 agenda item 1.23 seeking allocations around 500 kHz were discussed. As Hans van de Groenendaal, ZS6AKV, is the SARL representative on the DOC WRC12 Industry committee and rapporteur for agenda item 1.23, he will update the South African position on as agreed at a recent DOC/Industry meeting and share it with ICASA for consideration to achieve an interim ad hoc South African allocation.

Colin de Villiers discussed the correction of the ICASA database. A progress report will be shared with the SARL during October.

Discussions took place regarding changes to the financial systems to ensure more accurate accounting of licence payments.

The next meeting will be held on 8 December.

SARL MEMBERSHIP BREAKS THE 1 200 MARK

The membership of the SARL broke the 1 200 mark this week and on Friday stood at 1 210. If you have not yet renewed you will still have a few more days before your membership benefits will end. Pay by cheque, by bank deposit or electronics transfer. Details are on the invoice you received or call Mariska on 011 675 2393,

EMAIL NEWSLETTER

To keep members more informed a regular newsletter will be emailed to members. Please ensure that your email address is recorded in the SARL member data base. If you do not receive the first edition of SARL UPDATE by Monday, please send an email to admin@sarl.org.za with your email address. SARL UPDATE will only be available to members by email and on the web.

SPECIAL RUGBY WORLD CUP CALLSIGNS DOWN UNDER

On the air, keep your ears open for some New Zealand radio amateurs to replace their ZL prefix with a ZM prefix throughout September and October. This, in celebration of the Rugby World Cup which runs from September 9th through October 23rd.

Also listen out for two special event stations in celebration of the Rugby event. The first has the unique call of ZL4RUGBY. It will be on the air through October 31st. QSL via ZL4PW.

The other is ZL6RWC. It will be operated by various members of the Papakura Radio Club, which will also be operational through October 31st. Please QSL ZL6RWC via ZL1VK, direct, via the bureau or electronically using Logbook of the World.

ANNUAL JAMBOREE-ON-THE-AIR 15th and 16th October 2011

Dave Gemmell, ZS6AAW, the SA National JOTA coordinator invites all interested radio amateurs and Clubs to "help" with this year's Jamboree-on-the-Air, to be held on 15th and 16th October 2011.

Do not wait for the young people to ask you !

Any amateur may make contact with JOTA/JOTI stations, but it will be better if Girl Guides and/or Boy Scouts are also invited to the station but the best will be if a station is erected at a Guide or Scout hall and involve the Guides and Scouts with the erection of antennas for instance. Also demonstrate the different modes for instance CW, SSB and possibly digital modes. The effort will probably be not more than that during club meetings en the young people will appreciate it and will have a beter understanding of amateur radio.

Please ensure that your station is registered as aan educational station with the SARL office as the unlicensed youngsters may then also operate the equipment on the amateur bands.

The following are web addresses where more information regarding the JOTA or JOTI events maybe obtained:

a) www.scout.org - Scout website for international scouting info. b) www.jota.sub.cc - JOTA information only. c) www.joti.org - JOTI information only.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that Sunspot 1283 is producing flares so intense they are visible through solar telescopes in backyards 93 million miles away. Sunspot 1283 has a "beta-gamma-delta" magnetic field that harbors energy for X-class solar flares. Sunspot 1289 is expanding in size but is not as magnetically complex as 1283. This could however change and the week ahead is going to be very interesting!

For the people doing their own frequency predictions the expected effective sunspot number for the week will be less than 50.

20 to 15 m will provide the best DX opportunities with even some 10 m openings also possible due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS From today onwards - Make a financial contribution towards the 7P8EME DXpedition which takes place from 14 to 26 September. 15 September - Last day to send a high resolution picture of the participant operating during the ZS6JVT Youth Sprint to saardt@intekom.co.za. 18 September - Last day to submit logs for the ZS6JVT Youth Spring Sprint Competition. So far few logs have been received, thus submit yours without delay. 23 September - Take your hand-held to work today. 24 September - RTA in Gauteng. 25 September - Intecnet at 19:30. 15/16 October - Jamboree on the air. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 11th September 2011

HF Band Plan

A revised IARU Region 1 HF Band Plan has been published. The changes are minor, and affect 40 metres and 10 metres only.

On 40 metres, the CW contest-preferred segment of 7000 to 7025 kHz has been withdrawn; this means in practice that CW contests on 40 metres are no longer confined to the first 25 kHz segment. There have also been changes to the FM part of 10 metres, with adjustments to the simplex channels and the addition of four new repeater channels.

See www.irts.ie/downloads for a copy of the new Band Plan, which includes notes detailing the changes.

IRTS AGM 2012

Preliminary notice that IRTS AGM will be held weekend of 21st/22nd April 2012. Dundalk Amateur Radio Society will host the event at the Fairways Hotel,Dundalk.

Licence Examination

The next theory examination for the Harmonised Amateur Radio Examination Certificate (HAREC) will be held on Friday, 14th October next at 2.00 p.m. in the ComReg offices in Dublin. Full details, including entry procedure and examination fee, are available at www.irts.ie/exam '

Limerick Radio Club

Limerick Radio Club would like to thank their members who took part in the following Summer activities. Visit to the Shannon Air Traffic Control Centre, Annual Lighthouse weekend with over 600 QSO's, Special event station at Atlantic Airventure Shannon with over 100 QSO's. The club also carried the installation of a new security door at their 2M repeater site. Club meetings will resume in October.

CASHOTA UK

Due to the rising awareness of ROC (Royal Observation Corp) Bunkers and facilities with amateurs, CASHOTA (castles and stately homes on the air) have compiled a UK ROC Location List within its website. It was thanks to the efforts of Phil G0ABY and Roger G0TRB that this came about, and consequently they have agreed to continue their excellent work and become CASHOTA's ROC Representatives. All contact details and the list, if you wish to activate a site can be found at www. CASHOTA.co.uk. If you require further information, please contact Bobby MI0RYL on 048 3885 2712.

Mayo Radio Experimenters Network

The annual Mayo Radio Experimenters Network club radio rally will take place on Sunday 20th November 2011. Doors open at 11.00 am.

The venue will be the Welcome Inn Hotel in Castlebar.

If you would like further details please contact: Rally Organiser - Padraic Baynes EI9JA on 087 - 695 7154 (email pbaynes1 at eircom /dot /net), or email club PRO. David Hatfield EI3ECB on ei3ecb at gmail /dot /com or text or phone the club mobile phone number 086 20 89 777.

DX News

A multi-national team will activate Timor Leste (also known as East Timor) from 16-26 September. The callsign will be 4W6A and they plan to on all bands 160-10m on CW, SSB and RTTY. As well as being quite a rare DXCC entity this expedition will count for OC-232 in the IOTA programme as the QTH will be on the island of Atauro. QSL manager is M0URX and logs will also be uploaded to Logbook of the World.

You may remember that a Belgian team attempted a landing on Rockall in May 2009. This was unsuccessful due to the weather conditions at the time. They are now planning to try again with the projected date being around 27/28 September. Rockall is the rarest of the European IOTA islands with only one activation a few years ago when just over 200 QSOs were made. The IOTA reference is EU-189.

Eric K9GY has been active as T6MO from Bagram Air Base in Afghanistan. He expects to move soon to Loghar Province where his callsign will be T6LM. QSLs go via his home call.

A group of operators from the Czech Republic will be in Greenland from 16-26 September. They will sign OX4OK and also OX/homecalls. Look for them on 80-10m and also on 2m EME.

Radio hams tune in to space airwaves

John Heath G7HIA has written an article about amateur radio space communications for the October edition of the British Interplanetary Society magazine Spaceflight. The Spaceflight description says: "Radio amateurs have always been keen to exploit new means of communication and John Heath [G7HIA] provides a fascinating insight into how satellite technology has transformed the world of the radio ham soon after the launch of Sputnik right up to the present day." The article covers the FUNcube satellite, ARISSat, GB4FUN and the FUNcube Dongle SDR.

Louis Varney G5RV Cup

The Louis Varney G5RV Cup for Space Communications has been awarded to Paul Robinson 2E1EUB by RSGB president Dave Wilson M00BW. The cup is awarded for advances in space communication and the presentation took place at the Telford Hamfest on Sunday, September 4.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

September 12, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1SNB, NJ1Q & ARRL DX, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, KM6HB, K8YSE, W8GEX (60m News), AT International, DH9SB, DL1SBF, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, EA8CNR, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I1RBJ, IN3VZE, ON5TN, OZ6OM & 50 MHz DX News, PA7DA, Pete's-DX-Newsdesk, RSGB IOTA Web Site, S52DG, SP5UAF, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-September, through Sunday, 11th-September there were 221 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP8, VP9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4W6, TIMOR-LESTE. The 4W6A team should be fully operational by the morning (UTC) of September 17th. Operators Steve/9M6DXX/4W6AA, John/9M6XRO, Tim/M0URZX, Anthony/MW0JZE, Bernd/VK2IA/4W3M, Oliver/MW0JRX/4W6A and Stuie/VK8NSB/4W6SB will be active as 4W6A from Atauro Island (OC-232) on all

bands, 160-10 meters, using CW, SSB and RTTY with up to four stations simultaneously. Col, MM0NDX, will be their Pilot station for the 4W6A operation and may be contacted at: dxer59@gmail.com
The team hopes that the log search will be available from the Clublog facility, but this is dependent on a reliable Internet connection being available on the island. The QSL Manager is M0URX, direct (SAE plus 1 IRC or 2 USDs), by the Bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation, or if possible, also during the DXpedition. Direct or Bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS). There is also a link from the 4W6A Web site at: http://www.4w6a.com

6V, SENEGAL. Jeff, N1SNB, will be active as 6V7V from La Somone during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. Jeff is expected to be there between November 23-29th. Outside the contest Jeff informs OPDX that activity will be on 160/80 meters on CW and SSB. QSL via N1SNB.

7P, LESOTHO. Operators Arnold/WB6OJB and Frosty/K5LBU will once again be active as 7P8JK and 7P8CF, respectively, between September 14-22nd. Last time Arnold was on the HF bands, 40-10 meters using mostly SSB with some CW. Frosty will probably be mainly on PSK31 and as well as some RTTY. QSL via their home callsigns.

7Q, MALAWI. Ely, IN3VZE, will once again be active as 7Q7CE from the southwest shore of Lake Malawi in Resort Club Makokola <www.clubmak.com> and from the shack of his friend Harry, 7Q7HB, between September 16th and October 3rd. Activity will be holiday style on 80-10 meters using SSB and RTTY. QSL via his home callsign, by the Bureau or direct.

8Q, MALDIVES. Oku, JK1KSB, will once again be active as 8Q7SO from Mirihi Island (AS-013) between October 28th and November 4th. Activity will be holiday style on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via his home callsign.

ADIF SEARCH WIDGET AVAILABLE. Marek, DH9SB, states, "because more and more DXpeditions use Wordpress, I've written a widget for Word Press that can do a search for callsigns in the log/s. It supports more than one callsign and references. And of course, the log can be uploaded as ADIF to different logbooks." More information is available at: http://dh9sb.dx-info.de/2011/wordpress-adif-search-widget

BV100, TAIWAN. Members of the Republic of China (Taiwan) Centenary Foundation continue to activate special event station BV100 between now and December 31st, 2011. Activity is to celebrate the 100th anniversary of the Republic of China (Taiwan). Operations will be on all bands and modes. Complete details on a operating schedule and how to earn a BV100 award is available at: http://www.bv100.tw/EN
QSL via BV2KI at: Bruce Yih, P.O.Box 84-609 Taipei, Taiwan 100
ADDED NOTES (Contest Activities):
* Operators Tang/BM2AAV, Eddie/BV2DD, Bruce/BV2KI, Evan/BV2KS, Lee/BV2NT, Kenichi/BW/JP1RIW and Lee/BX2AB will be active as BV100 during the

CQWW DX RTTY Contest (September 24-25th) as a Multi-? entry. QSL via BV2KI.
* Operators Tang/BM2AAV, Eddie/BV2DD, Bruce/BV2KI, Evan/BV2KS, Lee/BV2NT, Lee/BX2AB, Tall/BX9AAA, Chung/BX4AF and Pro/BX4AN will be active as BV100 during the CQWW DX SSB Contest (October 29-30th) as a Multi-? entry. QSL via BV2KI.
* Operators Tang/BM2AAV, Eddie/BV2DD, Bruce/BV2KI, Evan/BV2KS, Lee/BV2NT, Lee/BX2AB, Chung/BX4AF and Pro/BX4AN will be active as BV100 during the CQWW DX CW Contest (November 26-27th) as a Multi-? entry. QSL via BV2KI.

CIS DX QPSK63 CONTEST. The European PSK Club has the honor to invite radio amateurs from all over the world to participate in the 2011 CIS DX QPSK63 Contest. The objective of the contest is to establish as many contacts as possible between radio amateurs around the world and radio amateurs in the "Commonwealth of Independent States" by using the QPSK63 mode. The Commonwealth of Independent States (CIS) is a regional organization whose participating countries are former Soviet Republics, formed during the breakup of the Soviet Union. Everybody can work everybody for a QSO and multiplier credit. The CIS DX PSK Contest is held every year on the third weekend of September. This year it starts at 12:00 UTC on Saturday, September 17th, and ends at 12:00 UTC on Sunday, September 18th. The rules and other information can be found at the contest Web site: http://www.cisdx.srars.org
This second year it is strictly a QPSK63 contest, no other modes are allowed. Every participant should send a correct RSQ report and his/her four-digit DXDA number. An example of an exchange for W6EPC from the State of California is 599 2053. Maritime and aircraft mobile stations should send an RSQ report and four zeros, such as 599 0000. You can find your correct DXDA number at the corresponding list:
http://www.eupsk.com/documents/dxda-list.xls
The maximum output power is 100 watts. Recommended frequencies are:
160 meters (1838 1840 kHz), 80 meters (3582 3590 kHz), 40 meters (7040
7050 kHz), 20 meters (14072 14080 kHz), 15 meters (21072 21080 kHz), and 10 meters (28072 28080 kHz).

EG8, CANARY ISLANDS (Special Event). Jose, EA8CNR, informs OPDX readers to look for EG8LM to be on the air between September 16-18th. Activity is to celebrate the 200th anniversary of the Fiestas de Las Mar as in the city of Santa Maria de Guia on the Island of Gran Canaria (AF-004, DIE S-005, WLOTA L 0969). Operations will be on 40/20/15/12/10 meters SSB only. QSL Via EA8CNR, by the Bureau or direct.

HP36, POLAND (Special Event). Look for special event station HF36POL to be on air to celebrate the departure of the "36th Polish Antarctic Expedition to the ARCTOWSKI Station in the Antarctica. QSL via SP9YI, by the Bureau or direct. The Expedition leaves from Gdynia onboard the "MS Polar Pioneer" and is expected to reach Admiralty Bay on King George Island around the November 6th. Details about the base can be found at:
http://www.arctowski.pl/index.php?p A special "ARCTOWSKI Antarctic Award" is available thanks to the Polish Academy of Sciences, Department of Antarctic Biology in Warsaw, and the

Polish Amateur Radio Union.

IOTA NEWS.............
AS-049. Ken, JS3OMH, will be active as JS3OMH/6 from Toshima, Kuchino-
shima, Kodakara and Akuseki Islands, all part of the Tokara
Island group, between now and September 14th. Activity will
be on 40/30/20/17 meters using CW, SSB, RTTY and PSK31. As
this was being typed, Ken was active from Kuchinoshima Island
(in the Kagoshima Prefecture). He originally was going to be
active from the very rare Island of Taira, but due to a typhoon,
high winds and heavy rain, Ken had to abort his trip to the
island. QSL via the Bureau or see QRZ.com.

EU-136. Dusan, S52DG, will be active as 9A/S52DG/P from Krk Island
(CI-046), Croatia, September 22-25th. Activity will be on
160-10 meters using CW and SSB. QSL via his home callsign.

EU-189. (Update OPDX.1026) The same Belgian team that made an attempt
to land and operate from Rockall Island in May 2009 is about
to set sail again for their second try. Only this time they
have a much larger vessel with a variety of tools that should
warrant a safe landing in almost all sea or weather conditions
including a helicopter! They expect to be on the air around
September 27th or 28th, depending on how long it takes to get
to the rock. Operation from the ship will use ON4ATW/MM.
Estimated travel time is about 4 days from the harbor in
Antwerp. Callsign to be used when on Rockall is MM0RAI/p.
QSL via ON4ATW (LoTW, by the Bureau or direct). Keep an eye
on their Web site for last minute updates and news at:
http://www.rockall.be

OC-233. Laurie, VK7ZE, along with a few friends on holiday, plan to
activate King Island, as VK7ZX between November 3-7th, weather
permitting. He mentions that this is not a DXpedition, but an
operation in participating in the 150th anniversary celebration
of the King Island Lighthouse (LOTA AUS-050, ILLW AU-0082 and
VK Shire KI7), the tallest lighthouse in the Southern Hemi-
sphere. They will be on air as much as possible, mainly on 20
and 40 meters. Laurie requests, "Please do not ask for other
bands etc, we are travelling in a very small two seater plane
and as it is, have to make many trips to the Island just to
get ourselves and equipment there. There are no trees to attach
antennas to, and we are not allowed to use the lighthouse for
attaching antennas." If possible, they will upload logs to eQSL
and LoTW while there, if not it will be done when they return
home. For details on the lighthouse, see:
http://www.kingislandlight150.com

J45, DODECANESE. Martin, ON4PO, will once again be active as J45PO
between October 23rd and November 3rd. Activity will be mostly SSB
and some PSK31. QSL via ON4PO.

K6, UNITED STATES (Special Event). Mark, KM6HB, for the 7th straight year will operate as special event station, K6P, between September 16-18th. Activity is to commemorate "National POW-MIA Recognition Day" and "Honor and remember those that have served". Mark states, "Please work us as we take time to say thanks to those men and women who endured hardship as POW's and those that are MIA and still waiting to come home." Suggested SSB frequencies are: 7250, 14253 and 18150 kHz (+/- QRM). QSL for a picture QSL card via KM6HB: Mark McMullen, P.O. Box 27271, Santa Ana, California 92799, USA. Logs will be uploaded to EQSL and LOTW.

KH6BZF PROPAGATION FORECAST/REPORT (September 12-18th)....
Sep 12 AN SOLAR REFERENCE KEYS
Sep 13 AN --------------------
Sep 14 AN BN - Below Normal
Sep 15 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 16 AN LN - Low Normal
Sep 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 18 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. A group of German and Luxembourg operators will be active as LX8M between September 22-25th. Activity will be on 80-10 meters using CW, SSB and various Digital modes. They will be active during the CQWW RTTY Contest (September 24-25th). QSL via operator's instructions.

MOST WANTED DX SURVEY (2011) NOW AVAILABLE. Carl, N4AA, editor of "QRZ DX/The DX Magazine", has announced that the "2011 Most Wanted DX Survey" is now available in the September/October issue of DX Magazine and also on-line at: http://www.dxpub.com/dx_survey2011.html
He states, "Although you can use the form from the magazine, it is preferable that you use the on-line method to respond. It makes things so much easier when we tally the results after October 15th. Remember the overall results will be published in the Jan/Feb 2012 issue of "The DX Magazine" and the world-wide results will be posted to the Web site around January 15th, 2012, as well. The breakdown by mode/Low Bands will be published in the Mar/Apr 2012 issue of the magazine." PLEASE NOTE: Carl adds, "South Sudan is not on the form this time. Although there was an operation from there this year (ST0R), it is not expected that the confirmations will be available before the October 15th deadline for it to be included in this survey. At this point in time, South Sudan will be considered to be 'WANTED' by everyone. Obviously it will be included on the survey next year."

PG540, THE NETHERLANDS (Special Event). Look for special event stations PG540BUFFALO or PG540BUFFALO/J to be active between October 10th and November 3rd. Activity is to celebrate the friendship between the ham

group "Project Groep .540" (in Kennemerland), and "The Buffalo's" (the scouting in Zandvoort). The bands/modes of activity were not provided. QSL contacts with PG540BUFFALO via the QSL Manager PA2REH, direct or by the Dutch QSL Bureau (region R50). QSL the JOTA contacts with PG540BUFFALO/J via the QSL Manager PA0SNY, direct or by the Dutch QSL Bureau (region R20). See QRZ.com for more details.

PJ4, BONAIRE (Update). Excerpts from a bulletin (No. 2) put out by some members of the Provins ARC F6KOP team announce that the team will activate Bonaire (SA-006, WLOTA L1279) as PJ4C between January 12-23rd, 2012. The team originally was going to activate something possibly in Africa, Asia and Pacific, but after a few month of hard work, they had to cancel many of them for different reasons (mostly security related to the last events in the world). Also, some were just too expensive for their team. Finally, they chose to go to Bonaire (PJ4) because they found a place to accept all their equipment and operators. Thanks to the help of Peter, PJ4NX, everything has been organized very fast. Their goal will be 80,000 QSOs in 11 days, and maybe get the RTTY world record back. Operations will be on CW, SSB and RTTY, with as least 6 stations, 24 operators, and on the air 24 hours a day. The team members are experienced operators and include: Franck/F4AJQ (team leader), Peter/PJ4NX, Dave/K4SV, Gabriele/ I2VGW, Bill/N2WB, Nobert/DJ7JC, Heye/DJ9RR, Guenther/OE3GCU, Karl/ OE3JAG, Eric/ON7RN, Henri/F1HRE, Yann/F1NGP, Jimmy/F4DLM, Michel/F5EOT, John/F5VHQ, Jean-Luc/F6BIV, Alain/F6ENO, Joel/F6JMT, Jean-Paul/F8BJI, Bernard/F9IE, Rein/PA0R, Kenneth/OZ1IKY, Gerard/F2VX, Francis/F5QF and Tony/F8ATS. More details and updates can be found at: http://www.pj4c.com

PJ5, SABA AND ST. EUSTATIUS (Update). Operators Wlodek/SP6EQZ and Janusz/ SP6IXF will once again be active as PJ5/SP6EQZ and PJ5/SP6IXF from St. Eustatius (NA-145) between October 19th and November 4th. They will be active exactly from the same QTH (Grid Loc. FK87ML) as last time. Activity will be on all HF bands, 160-10 meters using CW, SSB and RTTY, running two high power stations using wire antennas, verticals and a Spiderbeam. QSL via their home callsigns, direct or by the Bureau. Logs will be uploaded to <http://www.clublog.org/> during the DXpedition. The DX-pedition's Web site is under construction and will be ready before the activity.

QSL MW/I1RBJ via F/I1RBJ (listed under I1RBJ on QRZ.com). Last weekend's MW/I1RBJ operation was a joint effort with some G hams and was from St. Tudwal's Island (EU-106). ADDED NOTE: Paul I1RBJ, states, "All M/I1RBJ and EJ/I1RBJ August QSLs shall be cleared (processed) in the next 15 days."

QSL PG6N via PA7DA, by the Bureau or direct. Activity was this past weekend from the Noordwijk Lighthouse (ARLHS NET-019, Admiralty B0760), located on the Vuurtorenplein in Noordwijk aan Zee, The Netherlands.

QSL RECEIVED VIA LoTW: 9M4SDX, 9U0A, 9X0SP, A25VB, D20VB, FS/W6IZT, J48O, JD1BMH, PJ2/DJ8NK, T2XG, V51VV and VU2NXM

QSLS RECEIVED VIA MAIL: 3D2IR, 5N7M, 9M6XRO/P, C21YY, CY0/K8LEE, CY0/N1SNB, EH8BPX, FG5DH, HI3TEJ, HK7AAG, HR9/WQ7R, K6VVA/KL7, MD2C, MD0CCE, OA4TT, OY/PA2A, PP0T, RA1QQ, TO2FH, YS1AG, YT1AR and ZC4MIS

QSLS RECEIVED VIA THE BUREAU: 3B9WR, 6V7W, 9Q50ON, B7P, BD7LMT, CE0Y/LA9SN, J38XX, JW6VJA, OD5/ON4JM, PJ4B, PJ5/SP6EQZ, T2G, T2UF, T30SM, TX3D, TY6A, VK9N/G3MXJ and ZP6CW

T5, SOMALIA. Murat, TA1AMC, is now active as T5/TA1AMC from Mogadishu for the next three months. Activity will be limited to his spare time because he is a member of the "Turkish Ministry of Health's National Medical Rescue Team" (UMKE). Activity has been mainly on 15 meters SSB (watch 21260 kHz). QSL via the TRAC Bureau (Digital QSOs ONLY eQSL.CC).

T6, AFGHANISTAN ACTIVITIES (Updates/Correction).....
* Eric, K9GY, continues to be active as T6MO from Bagram Airfield in Afghanistan. He did not leave to go to FOB as mentioned in last week's bulletin (It was an error/mix-up... See next item). T6MO was active all last week on 40/17/15/12 meters CW. QSL via K9GY (USA: SASE [no return postage, no return QSL]--- Outside USA: SAE + 1 USD or SAE + 1 IRC [if you don't have both then no return QSL]). He will upload to the ARRL LoTW and ClubLog periodically.

* Les, WB8LES, Defense Contractor pilot who is stationed in FOB (Forward Operation Base) Shank, Loghar Province, Afghanistan. He is expected to be active as T6LB in October. He will be using an ICOM 7000 and

will be purchasing a sloper antenna from AES. Les will be posting the times and frequencies (for 40/20 meters) on QRZ.com for those who need a T6 confirmation.

* Branko, 9A3PM, is now active as T6BP from Kabul Airport until April 2012. Activity will be limited as Branko is a member of the Croatian Army and operations will only take place during his spare time. Look for him to be on the HF bands using CW and the Digital modes. QSL via 9A6AA.

TL, CENTRAL AFRICAN REPUBLIC. Rudi, DK7PE, will be active as TL0CW from Bangui, CAR, on a "one-man DXpedition" between October 26th and November 3rd. He states that CAR is not a real tourist place and the accommodations are very expensive (see details on QRZ.com). Activity will have an emphasis on 160/80 meters CW. QSL via DK7PE. For more details and updates, visit Rudi's Web page at: http://www.rooody.de

TM33, FRANCE (Special Event). Look for special event station TM33LDX to be active between now and September 24th. Activity is to celebrate the 33rd meeting of the Clipperton DX Club which is being held at Noirmoutier (dep 85) this year between September 23-24th. QSL via F5CWU. Log will be uploaded to LoTW. For more details about the Clipperton DX Club, see: http://www.cdxc.org

VP8ORK SOUTH ORKNEY ISLAND DVD NOW AVAILABLE. It has been announced that the 2011 VP8ORK MicroLite Penguins DXpedition's to South Orkney Islands DVD by well known DXpedition video photographer James Brooks, 9V1YC, is now available for 25.00 USDs and shipping will begin on September 21st. To order yours today, go to: http://www.dxvideos.com/vp8orkvideo.htm

Highlights of Solar and Geomagnetic Activity
05 - 11 September 2011

During the period, solar activity ranged from low to high levels due
to a total of 7 M-class and 2 X-class events. The sharp increase in
activity from the previous period originated from two regions;
Region 1286 (N20, L=304, class/area Dso/080 on 03 September) and
Region 1283 (N14, L=226, class/area Dai/230 on 07 September).

The period began at moderate levels due to two M1 x-ray events
observed originating from Region 1286 at 05/0428 UTC and 05/0758 UTC
respectively.

Solar activity increased to high levels on 06 September. Region 1283
produced an M5/1b flare at 06/0150 UTC and an X2/2b at 06/2220 UTC.
The M5 flare had associated Types II and IV radio sweeps and an
Earth-directed full-halo CME. The CME had an estimated speed of
approximately 450 km/s, based upon STEREO-A COR2 data, with the bulk
of the ejecta directed north of the ecliptic plane. The X2 flare was
associated with Types II and IV radio sweeps, a 740 sfu Tenflare and
an Earth-directed halo CME. The CME had an estimated speed of around
800 km/s, based on STEREO-A COR2 images, with the bulk of mass
directed north of the ecliptic plane. 07 September saw high levels
again as Region 1283 produced more major activity. Another major
event was observed near the end of the 7th when Region 1283 produced
an X1/3b at 07/2238 UTC with associated weak Types II and IV radio
sweeps, a 1300 sfu Tenflare, and a non-Earth-directed CME. High
activity levels persisted on 08 September when Region 1283 produced
an M6/1n at 08/1546 UTC associated with a weak Type IV radio sweep.

Solar activity decayed to moderate levels on 09 September when
Region 1283 produced two M-class flares. The first was an M2/1n at
09/0609 UTC with an associated Type II radio sweep (estimated
velocity 717 km/sec) and a non-geoeffective CME. The second was an
M1/1f at 09/1249 UTC. On 10 September, a significant filament
eruption centered near N10W48 occurred around 10/0300 UTC.
```

Associated with this eruption was a partial-halo CME (plane-of-sky speed of 620 km/s). As it neared the west limb, Region 1283 produced an M1/Sn at 10/0740 UTC with an associated limb-event CME. On 11 September, solar activity further decreased to low levels. A long duration C6/Sf flare was observed at 11/0851 UTC from Region 1283 as it rotated around the west limb.

There were no proton events observed at geosynchronous orbit. However, two separate enhancements, both in the 10 MeV and 100 MeV energy levels, were observed in the wake of the M5 event early on 06 September and the X2 event late on the 6th. The first enhancement saw a peak of 2.4 pfu at 06/1410 UTC at 10 MeVs and 0.15 pfu at 06/0850 UTC at 100 MeVs. The second enhancement saw a peak of 8.8 pfu at 07/0715 UTC at 10 MeVs and 0.4 pfu at 07/0410 UTC at 100 MeVs. Protons at all energy levels declined to background levels by 08/1800 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at moderate levels on 05 - 06 September, reached high levels on 07 - 09 September and declined to normal levels on the 10th. Moderate levels were observed again on 11 September.

The geomagnetic field ranged from quiet to severe storm levels. The period began with mostly quiet conditions from 05 September through midday on 09 September. Brief periods of active to minor storm conditions were observed at high latitudes on 06 September due to extended periods of southward Bz. Midday on 09 September, two sudden impulses (SI) were observed at 09/1243 UTC and 09/1250 UTC (16nT and 28nT respectively, as measured by the Boulder USGS magnetometer). At 09/1150 UTC, ACE data indicated an interplanetary shock arrival preceding the Boulder SIs. Bt reached up to 24nT, Bz dropped to -23nT, density spiked up to 35p/cc, wind speeds peaked at 602km/s, and temperature increased. As a result, geomagnetic activity levels increased to active to isolated high latitude severe storm levels. Activity was due to combined CME effects associated with 06 - 07 September major flare activity. The storm conditions persisted through 10 September. Late on 10 September, solar wind speed increased to around 620 km/s while the total IMF field (Bt) dropped to around 4nT indicating a likely transition into a negative polarity coronal hole high speed stream (CH HSS). Mostly quiet to unsettled levels were seen on 11 September with an isolated minor storm period at high latitudes.

Forecast of Solar and Geomagnetic Activity
14 September - 10 October 2011

Solar activity is expected to be at low to moderate levels through 10 October. A slight chance for an X-class event is possible on 18 September through 07 October as old Regions 1286 (N20, L=304) and 1283 (N14, L=226) rotate back on to the visible disk. Chances for major activity will further increase on 24 September through 01 October when both regions are on the visible disk. Activity is

expected to decrease to low to moderate levels from 08 October through the remainder of the period.

No proton events are expected at geosynchronous orbit through 17 September and again from 08 - 10 October. There is a slight chance for a proton enhancement from 18 September through 07 October due to potential flare activity from Regions 1283 and 1286.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 14 - 17 September and normal to moderate levels 18 - 25 September. High levels are expected on 26 - 27 September due to effects from a geoeffective CH HSS. Normal to moderate levels are expected from 28 September - 01 October. High levels are expected again on 02 - 03 October due to another CH HSS. Normal to moderate levels are expected from 04 - 09 October followed by another period of high levels on 10 October due to a third CH HSS.

The geomagnetic field is expected to be mostly quiet through the period. Unsettled conditions are possible on 18 - 19 and 24 - 25 September due to recurrent CH HSS rotating into a geoeffective position. Unsettled conditions with isolated active periods possible are expected on 30 September as a positive polarity CH HSS becomes geoeffective. Unsettled conditions will continue into 01 October. Mostly quiet condtions are expected from 02 through 07 October until another recurrent CH HSS becomes geoeffective. Mostly unsettled conditions are then expected from 08 - 10 October with isolated active periods possible on 09 October.

853. [DXNL] DXNL 1745 (Sep 14, 2011)

Newsgroup: rec.radio.amateur.misc

DXNL 1745 - Sep 14, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

4W, EAST TIMOR, OC-232
The team of 9M6DXX, 9M6XRO, M0URX, MW0JZE, VK2IA, VK8DX and VK8NSB
will be QRV as 4W6A from Atauro Island (OC-232) from Sep 16-26. They
will work in CW, SSB and RTTY on 10m-160m with three stations incl.
two amplifiers, several verticals and vertical dipoles.
QSL via M0URX, LoTW, online QSL request service (OQRS) for bureau QSLs.
http://m0urx.com/oqrs
http://www.4w6a.com/qsl-information
http://www.4w6a.com

7P, LESOTHO
Arnold,WB6OJB, will be QRV again as 7P8JK from Sep 15-22. The last time
he was working mostly in SSB and some CW on 40m-10m.
Frosty,K5LBU (7P8CF), is travelling with Arnold.
QSLs via homecalls (direct).

Pine,ZS6OB (7P8EME), Wynand,ZS6ARF (7P8QRO), Dick,ZS6BUN (7P8BUN),
Pieter,ZS6PA (7P8PA), Dan,HB9CRQ (7P8RQ), and Hermann,DL2NUD (7P8HP),
are going to visit Lesotho from Sep 14-26. The group will sign 7P8EME
mainly in CW on HF up to 50 MHz, on UHF up to 1,296 MHz (no 4m) and on
2m/6m Tropo, Meteorscatter and EME. This operation is supported by the
South African Radio League.

7Q, MALAWI
Eli,IN3VZE, is going to hit the airwaves as 7Q7CE from Club Makokola
at the coast of Lake Malawi in the southwest of the country between
Sep 16 and Oct 3. He will work holiday style in SSB/RTTY on 80m-10m.
QSL via homecall.

9H, MALTA, EU-023
Gabor,HA3JB, is active as 9H3IP von Malta (EU-023) in CW/RTTY/PSK31/
SSTV/SSB on 80m-10m from Sep 6-27. He plans to take part also in the

CQWW RTTY Contest. QSOs with him are also good for the HA IPARC award.
QSL via HA3JB (direct with SAE).
If you are an IPA member you can send him an e-mail to ha3jb@t-email.hu
See also: http://www.ha3jb.com/mailing_address.html

EA8, CANARY ISLANDS, AF-004
The special event call EG8LM will be activated during the bicentennial
"Fiestas de Las Marias" from Sep 16-18 only in SSB on 40m/20m/15m/12m/
10m from AF-004 (DIES-005, WLOTA L 0969). QSL via EA8CNR.

F, FRANCE
The Clipperton Contest Club is operating the special event station
TM33LDX during the 33rd meeting of the club until Sep 24.
QSL via F5CWU. The log will be uploaded to the LoTW as well.

HI, DOMINICAN REPUBLIC, NA-096
After extending the license Yukon John,KL7JR, and his XYL Claire,WL7MY,
will be active from the northern coast of Hispaniola (NA-096) signing
HI3/KL7JR in SSB on HF (focus on 12m/17m/40m/80m/6m) until 2013.
They also plan some experiments with mobile antennas and Wilson FGT-2
CB mini yagis from their balcony on the 3rd floor. Their equipment
includes also a Kenwood TS-570D, Ten Tec 599, a vertical loop (10-20m),
TAK antenna 80 (40m/80m) and others. Skeds are possible via e-mail to
KL7JR@yahoo.com
The QSL route can be found on QRZ.com.

I, ITALY
Guenter,IA5/DL3NBI, will show up in PSK, RTTY and SSB mostly on 20m
from Isola del Giglio (EU-028/IIA GR-002) from Sep 14-22.
QSL via homecall.

IP1/IQ1SP (SSB/CW on HF) and IP1/IK1WVR (SSB on 6m/2m) will be QRV from
Tino Island (EU-083/IIA SP-002) from Sep 16-18. They have a special
permission from the Italian navy which allows operation only from
0800 until 1400 UTC.

JW, SVALBARD, EU-026
Morten,LA9DFA, will sign JW9DFA from Spitsbergen (EU-026) mainly in CW
and only little RTTY/SSB on HF and maybe also 6m from Sep 14-19.
He plans to take part in the Scandinavian Activity Contest (Sep 17/18)
in CW as JW3C. QSLs for both calls via LA9DFA.

KH0, MARIANA ISLANDS, OC-086
Al,W6HGF/KH0, will be active from Saipan (OC-086/USI NI002S/WLOTA 1333)
from Sep 20-30. He will focus on RTTY and joins the CQWW RTTY Contest
also. Other modes will be used as well, if time permits.
QSL via LoTW preferred, direct is ok as well.
Check his website at: http://www.qsl.net/w6hgf/SAIPAN-W6HGF_KH0.html
Al also plans a trip to Ascension Island (ZD8) in November 2011 and
another visit to Miquelon Island (FP) in March 2012.
We'll keep our fingers crossed!

LX, LUXEMBURG
A few HAMs will be QRV as LX8M in CW, SSB and digital modes on 80m-10m
from Sep 22-25. They plan to take part in the CQWW RTTY Contest.
QSL routes will be announced by the operators or via LoTW, eQSL or
direct via DJ1ER (see QRZ.com).

OJ0, MARKET REEF, EU-053
OJ0J will be activated from Sep 19-27 including the WWDX RTTY Contest.
If you are interested to join the team on short notice please contact
Carsten,DL6LAU, via e-mail to: carsten.esch@appello.de

OX, GREENLAND, NA-018
Jiri,OK1IEC, Jan,OK1JK, Jiri,OK1JST, and Vaclav,OK1VVT, plan to show up
as OX4OK or OX/homecalls from the clubstation OX2A at the Kangelussuaq
airport from Sep 16-26. They will work on 80m-10m and on 2m EME (JT65b)
QSLs via homecalls or via OK1JST.

OZ, DENMARK, EU-088
Bernd,DL8AAV, is signing OZ0JAV from Laeso Island (EU-088) till Sep 24.
QSL via homecall.

S5, SLOVENIA
The special event station S550ACP celebrates 50 years of HAM radio in
Brezice from Sep 1 until Nov 30. QSL via S59ACP, eQSL, LoTW.
For more information check: http://s59acp.org

SP, POLAND
The club of Krotkofalowcow (SP6ZJP) is celebrating its 25th anniversary
by activating the special callsign 3Z25ZJP. QSL via SP6ZJP.
More information can be found at: http://www.skpo.glubczyce.info/newses

ST, SUDAN
Robert,S53R, is QRV again from Khartoum signing ST2AR on 160-6m.
He plans to join the WAE SSB Contest also. QSL via homecall (direct).

SV, GREECE, EU-174
Fred,SV8/PA1FJ/p, is active working in SSB and CW on 40m-6m from
Thassos Island (EU-174) until Sep 19. QSL via PA1FJ.

SV9, CRETE, EU-015
SV9/LZ3FN will be on the air in CW and SSB on all bands from Sep 15-24.
QSL via LZ1PM.

T5, SOMALIA
Murat,TA1AMC, is on a humanitarian mission in Mogadischu and will be
QRV as T5/TA1AMC during his spare time for the next three months.
Listen for his QSL route announcement.

T8, PALAU, OC-009
Tatsuo,T88TO (JA8CMC), and Atsushi,T88GO (JA8FAA), are working from
Palau (OC-009) in CW/SSB on 80m-10m from Sep 6-19. QSLs via homecalls.

Ulf,DL5AXX, will be QRV from the Palau rental shack signing T8UE mostly
in CW from Sep 18-28. He will join the CQWW RTTY Contest as T8XX.

QSL requests are preferred via his homepage http://www.dl5axx.de/dxlog
or via bureau to his homecall.

W, USA
The Pearl River DX Association is activating the special event station
W2WTC (World Trade Center) in SSB on 17m/20m/40m from Sep 8-30.
QSL via K2HJB.

The special event station K6P will be active during the
National POW/MIA Recognition Day from Sep 16-18. QSL via KM6HB.
The log will be uploaded to eQSL and LoTW.

YU, SERBIA
The four special event stations YT16ARDF, YU16ARDF, YT16IARU and
YU16IARU are activated until Sep 20 next year to support the 16th IARU
World Amateur Radio Direction Finding Championships (Sep 10-15, 2012).
More information can be found at: http://www.ardf2012.org

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 17/18: Scandinavian Activity Contest
Sep 17/18: CIS DX QPSK63 Contest
Sep 18: North American Sprint
Sep 18: BARTG Sprint 75

New editor of the DXNL IOTA column

After becoming the chairman of the DARC Committee for DX and HF Contesting
I had to shift my priorities to other tasks. I am very glad to introduce
the new editor for the IOTA column of the DX Newsletter: Klaus,DL7UXG, born
in 1957 and living in Berlin. Klaus is on the air since 1974 and also held
the callsigns DM4XIG, Y51SL and Y28XL. His main focus lies on award hunting,
IOTA, lighthouses and the WFF program. Klaus is working mostly in CW or
digital modes.

I wish Klaus all the best and success and want to thank everybody for
supporting me with your information.

73 de Ric, DL2VFR

Editor's Note:

Special thanks from the DXNL team are going to Ric,DL2VFR, for helping us
out temporarily with a lot of IOTA news!
Welcome to Klaus,DL7UXG, who takes over the work of Ric!

IOTA collected by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-014, TK, Corsica: Heinz,TK/DF6ZY, will be QRV in SSB/RTTY/PSK31 on
80m-10m from Sep 18-30. Listen for him on the phone IOTA frequencies
and also in the CQWW RTTY Contest. QSL via homecall or via bureau.

EU-024, IS0, Sardinia Island: IS0/DL8JJ/m is working from several places
on the island until Sep 19. QSL via homecall.

EU-189, GM/MM, Isle of Rockall: The same Belgian team which planned an
activity from Rockall in 2009 will give it another try on Sep 27/28.
However, this depends on the time they need to get to the island but
they will work as ON4ATW/mm from the ship. The estimated travel time
is four days from the port in Antwerpen. If they arrive on the island
they will use the callsign MM0RAI/p from Rockall.
QSLs via ON4ATW (via bureau, direct or LoTW).
More updates can be found on their website: http://www.rockall.be

NA-143, W5, Texas State East group: K5KUA/5 plans tot show up from
Galveston Island on Sep 17/18. QSL via homecall (bureau/direct).

OC-022, YB9, Bali Island: On their way to Timor-Leste GM3OOK and G4JVG will
be QRV from Sanur (Bali Island) signing YB9/homecall from Sep 12-16.
QSLs for both calls only via M0URC (bureau/direct).

WOCN31 CWHX 132345
Tropical cyclone information statement updated by the Canadian
Hurricane Centre of Environment Canada at 6:26 PM ADT Tuesday
13 September 2011.

Tropical cyclone information statement for:
Newfoundland
Nova Scotia.

For tropical storm Maria.

The next statement will be issued by 9:00 AM ADT Wednesday.

The Canadian Hurricane Centre is monitoring tropical storm
Maria for possible impact in Atlantic Canada late this week.

==discussion==
Tropical storm Maria was situated about 1100 kilometres
south-southwest of Bermuda 6 PM Tuesday evening. Deep convective
clouds have begun to grow over the storm centre, therefore it is
likely that Maria will gain some intensity overnight and early
Wednesday. Maria is being forecast by the computer models to move
northward and merge with a sharp front over Eastern Canada late
Thursday and into Friday. The current forecast challenge is
determining how that merger will take place. At the least, we can
expect the front to acquire extra moisture from the tropical storm
and associated rainfall to affect Nova Scotia and/or Newfoundland on
Friday. We will have a better understanding of potential wind
speeds/impacts with Maria over the next day or so.

The Canadian Hurricane Centre will begin regular 6-hourly forecasts
at 9:00 AM ADT Wednesday.

Visit <http://weatheroffice.gc.ca/hurricane> for the latest hurricane
track map.

Please also refer to the public and marine forecasts and warnings
issued by Environment Canada for your area.

END/FOGARTY

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

September 14, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Shake, Diddle, and Roll - CQ WW RTTY
- Fall VHF Sprints - 144, 222 MHz
- New ARRL Sweepstakes Manager
- Maker Faire - New York City
- Giant 40 Meter Antennas Going Up
- CQ WW Logs - Analysed!
- Tips for Trouble-Free Tuning
- You Can Dig It
- Another Good Idea

NEW HF OPERATORS - THINGS TO DO

If you want to try working "over the pole", the Scandinavian Activity
Contest is just what you need! The North American Phone Sprint is
hectic, especially with the special QSY rule, but a lot of fun and a
good workout.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

The Guam call sign of Dave N2NL is NH2T, not KH2L as reported in the
previous issue. You were going to copy that off the air and not use my
busted spot, weren't you? Of course! (Thanks, Dan K1TO)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Sep 17-18

- CWops Monthly Mini-CWT Test-- CW (Sep 14)
- ARRL 10 GHz Cumulative Contest
- Connecticut QSO Party
```

- CIS DX PSK Contest--Digital
- Scandinavian Activity Contest--CW
- South Carolina QSO Party
- Feld-Hell Hell on Wheels Sprint
- Washington State Salmon Run
- North American Sprint--Phone
- Classic Exchange--Phone
- BARTG Sprint 75--Digital
- Fall VHF Sprint--144 MHz (Sep 19)
- Run For the Bacon--CW (Sep 19)

Sep 24-25

- NAQCC Monthly QRP Sprint--CW (Sep 22)
- ARRL EME Contest
- CQ WW RTTY Contest
- Texas QSO Party
- Fall VHF Sprint--222 MHz (Sep 27)
- Fall QRP Homebrewer Sprint--CW (Sep 27)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The ARRL Sweepstakes <http://www.arrl.org/sweepstakes> has a new manager, Larry Hammel K5OT! After discovering the Novice Roundup and Sweepstakes in QST, Larry also noticed the exploits of Vic Clark W4KFC. "I wanted to know more, so I wrote him a letter filled with a list of crazy questions about contesting and operating techniques. What followed was magical. Vic actually wrote me back and we traded letters and then contest QSOs during the next few years. I never met this contesting/SS legend in person, but his simple efforts to mentor a young contest enthusiast made an indelible impression on me." An officer of the Central Texas DX and Contest Club, Larry has operated from home and from many contest stations, "...but there is nothing like SS each fall! Sweepstakes has an amazing history and tradition to uphold, and Ken K5KA (SK) and Dan K1TO have each made incomparable contributions to increased SS activity and enjoyment. These are huge shoes to fill, but I welcome the chance." Expect to see more from Larry in this newsletter's upcoming issues.

Fans of the "American Pickers" TV show may also be interested in the Antique Technology <http://antiquearchaeology.com> website and stores in LeClaire, Iowa and Nashville, Tennessee. I got to visit the Nashville store with Kirk K4RO on a recent vacation and found it full of fascinating stuff...but no old radios! My steam-powered radio aficionado readers will surely want to help them include antique wireless in their displays!

Oops! PileUp! <http://www.helsinki.fi/%7Ekorpela/PU/PU.html> magazine did it again with a 52-page issue focused on the upcoming Scandinavian Activity Contest <http://www.sactest.net/> and articles like "The Perfect Amplifier". Look for another issue in November. You'll be able to find out who prevailed in the annual "Polar Battle"! (Thanks from

the editors, OH1WZ, OH6KZP & OH7WV)

Sad news from the HG6N team - "...at the broadcast site the HG6N crew got from Antenna Hungaria Broadcasting Company...thieves cut off about 1 km of open bronze feed line. The USA/CA branch is fully destroyed." You can see some feed line pieces left behind in the photo. (Thanks, Zoli HA1AG)

The April issue of the IEEE Antennas and Propagation Magazine (Vol. 53, No. 2) includes an interesting look at very early wireless technology. The Historical Corner article by S&#65533;ndor Jeszensky - "From Electric Oscillations to Marconi's Wireless Telegraph" - spans the six decades between Faraday's experiments and Marconi's radio. There are some eye-catching photographs and reproductions of old drawings. How we got from there to here is a fascinating story. The article may be available through professional societies or via your local library's help desk.

You've built the amplifier...now what? How about Electric Drag Racing <http://www.designnews.com/document.asp?doc_id=228440> as described in this Design News story?

Contest veterans will well remember the call sign of Doc K8RR, originally WA8ZDF then KN8Z, who became a Silent Key today. As Tom K8AZ recounts, "Doc was a true larger-than-life legend out here in flyover country (the U.S. Midwest - Ed.), and did much to show that contest success from west of the Allegheny mountains COULD be achieved."

Web Site of the Week - Maker Faire <http://makerfaire.com/newyork/2011/press/> returns to New York this weekend on September 17 and 18. It will be held at the New York Hall of Science in Queens. The Hall of Science Radio Club will be on hand to demonstrate ham radio (look for the Science Maker entry titled "Build Antennas to Talk Around the World".) There are a number of "mini" Maker Faires coming up in cities around the country - perhaps your radio club could help present ham radio to these motivated makers?

WORD TO THE WISE

Read the rules BEFORE the contest, runic though they may be! How much off-time and how long are the breaks? Where are the power limits set? Can single-ops use the spotting networks? Don't embarrass yourself by having to back-track after the contest, submitting in a category you didn't know you had entered!

==> SIGHTS AND SOUNDS

Live vicariously through YouTube as Craig K9CT shows us W2GD and K4ZA managing the process of putting his big 40 meter Yagi stack <http://www.youtube.com/watch?v=OKG8gKnATV4> on a 190-foot tower! The RD3A team takes a slightly different approach to putting up their 5-element cannon <http://www.youtube.com/watch?v=7kfK7H-sNs4>. We can dream, can't we? (Thanks, Tim K3LR and Randy K5ZD)

Here's one way to stay fit while you're contesting - pedal your way to that special QTH! Take a look as K6BBQ shows us his mobile tricycle station <http://www.youtube.com/watch?v=jPJ9RAbC4iE&feature=youtu.be> in the recent North American QSO Party. (Thanks, Randy K5ZD)

The Orca DX Club's <http://orcadxcc.org/> web page is certainly packed full of information for DXers and contesters alike, such as the "Orca Pod" propagation package - nicely packaged and very useful! (Thanks, Bud VA7ST)

==> RESULTS AND RECORDS

CQ WW 2010 logs have been processed by Stan EI6DX's Analyser <http://www.ei6dx.com/cqww-contest-analysis> and the results are now available for analysis and preparation for CWWW 2011. Comparing 2010 to 2009: SSB logs were on the rise (6182 vs 5706 in 2009) but CW submissions were down - 5342 vs 5522 in 2009 or 3.25% lower. Despite lower number of logs submitted 2010 CW broke the 70,000 QSOs per hour threshold for the very first time. This is the highest rate observed since logs became public in 2007. The winning hour was 15:00 on the first day when 70.449 QSOs were made. Learn more at the Analyser website!

Brian K9QQ has now updated the Society of Midwest Contesters list of Sprint records <http://www.w9smc.com/sprints.htm> following last weekend's CW event. This might give your club some ideas about tracking and listing record-holding members to spur interest and recognize good work!

OPERATING TIP

Arrgh <http://www.talklikeapirate.com/> - be prepared for those Maritime Mobile stations on September 19th, me hearties! (Thanks, Gail KB6EZB)

==> TECHNICAL TOPICS AND INFORMATION

Tom W8JI cautions us against tuning up an amplifier <http://www.w8ji.com/Vacuum_tube_amps.htm> at reduced power because the output matching network controls (TUNE and LOAD) won't be set properly when operating at full power. The low-power tuning increases loaded Q in the tank circuit, leading to high voltage and heating. "Even with a 3-kilovolt supply, you can create over 10,000 volts in the tank by peaking (output) power at low drive and then increasing drive. That can put you off the air with capacitor or bandswitch failures." This is illustrated by a low-voltage demonstration <http://www.w8ji.com/demonstation.htm> on Tom's website. For best performance and the least distortion (splatter) Tom recommends, "adjust at full power and then reduce drive to the legal power. This way the bandwidth before readjustment is required as wide as possible and changes in SWR as antennas are changed does not have a negative impact. It is almost always much easier on the amplifier and other people to over-couple (load at higher power) and then back off." You can read more on Tom's website.

The September issue of "The Black Hole <http://www.w9smc.com/blackhole/news%2009%2011.pdf>" newsletter of the Society of Midwest Contesters features some photos by Mike W9RE of his big homemade 20 meter Yagis showing building and lifting technique. Learn from a master!

Tower climbing pro, Dan K1TO, points out that thrust bearing bolts are not designed to support a heavy mast as described in the previous issue. The way to do this properly is to have at least one muffler clamp with a saddle (or better yet, two saddles with through bolts) tightened securely to prevent any downward slippage of the mast while moving the rope attachment point.

When installing antennas on a mast, don't forget to leave a "rotator loop" in the feed lines to allow the antennas to turn without pulling on the cables! As Steve K7LXC points out, "There are two rotator loop methods. One has the cable(s) coming off the mast with 5-6 extra feet to just hang off the tower and follows the mast around as it turns. The other way is to loop the cable(s) 2-3 times around the bottom of the mast at the flat top of the tower 2-3 times. The cables sit on the tower top and allow lots of rotation. Either way works Fine Business."

New digital scopes have some excellent features previously too expensive for ham gear, such as the Fast Fourier Transform (FFT). If you would like to learn more about how this feature works, EE Times magazine sponsored a webinar on "FFT and frequency analysis using an oscilloscope <http://www.eetimes.com/EdTraining/Webinars>" presented by Rohde and Schwartz. Many other technical topics are represented in the list of available programs.

Hans, PA1HR has compiled a very nice table of measurements <http://www.remeeus.eu/hamradio/pa1hr/productreview.htm> showing a comprehensive view of many transceivers evaluated in ARRL Product Reviews. Maybe this will help you win a few arguments at the meeting-after-the-meeting when the talk turns to rig performance! (Thanks, Glenn K6NA)

I wonder if Gem Quad <http://www.gemquad.com/> knows about the new kind of wire
<http://idealab.talkingpointsmemo.com/2011/09/new-superconductor-wires-could-give-renewable-energy-more-charge.php>
that is spun from sapphire crystals? It is supposedly of much higher conductivity than plain, old copper but might be hard to solder!

Bob K4HJF has a great idea to save builders some significant scratch - he uses surplus test equipment chassis for his projects. These beautiful and sturdy cabinets are made with top-quality hardware and are easily "repurposed" for ham projects, such as his new 2 meter amplifier. You'll see many obsolete pieces of gear selling for "get it out of here" prices at hamfests, so take one home and salvage the many useful components, leaving yourself a nice looking enclosure.

Radioshack has announced "The Great Create <http://radioshack.com/diy>" - a contest to come up with the most interesting creations made using Radio Shack parts. I'm sure the readers of this newsletter can come up with some thought-provoking (good or bad) entries!

Popular Mechanics' <http://www.popularmechanics.com> "PM Saturday" column describes a one-afternoon project just right for non-contest weekends. The October 2011 issue's project is a T-shirt cannon made from PVC pipe and an irrigation valve. I don't know about you, but when I see "t-shirt cannon", I think "antenna in tree"...I'm just sayin'.

Technical Web Site of the Week - Admit it! When the contractor shows up to dig the hole for a tower base or whatever, don't you wish you were in the seat of that machine, working the levers and moving that dirt? Don't sigh so deeply! Next time you are in Las Vegas, stop by Dig This <http://www.digthis.info/> and spend a little time with their toys pushing the desert around to your heart's content!

==> CONVERSATION

Another Good Idea - Friendship Radiosport Games

Tree N6TR recently visited UA0C (Khabarovsk) as an official in the very-WRTC-like radiosport games he describes below. He graciously agreed to write a short article describing the events and I'm sure you will find it and the pictures interesting. At a time when meetings and hamfests are responding to challenges of attendance, it is good to read of an event doing well and attracting visitors from around the world!

73, Ward N0AX

The Tenth Friendship Radiosport Games <http://en.wikipedia.org/wiki/Friendship_Radiosport_Games> were held last month in Khabarovsk, Russia. These games started up in 1989 as a result of a sister city agreement between Khabarovsk and Portland, Oregon. Over the years, participation has grown to include other sister cities in the Pacific Rim including Victoria, British Columbia; Niigata, Japan; Harbin, China; Bucheon, South Korea; and Melbourne, Australia. The games themselves have been held in Russia, Japan, Canada, and the United States.

The "father" of the games is Yvegeny "Eugene" Stavitksy, UA0CA. It was his vision that enabled the first games to take plan in Russia during the Cold War in 1989. The events held during the games include Morse code copying and sending tests, a Morse code pileup test, foxhunt and on-air competition. In addition to these events, several excursions take place, enabling participants to get a flavor of the area they are visiting. Most of the people travelling from foreign countries are put up in the homes of the hosting hams.

The Morse code copying and sending tests use code groups so as not to give an advantage to native speakers of any language. The sending test uses a unique method to assure that skills are distributed amongst the use of a hand-key, bug and electronic keyer. There are five code groups

that must be sent with a hand-key, followed by ten code groups that can be sent with either a hand-key or a bug. Finally, there are ten more code groups that can be sent using any method including an electronic keyer. The final score is the total time that it takes to send the three groups with a penalty of ten seconds for each uncorrected error. The winner of this event, Alexander Savin UA0CDX, only used the hand-key to send all of the groups. He combined an error free performance with a steady rhythm to send his three segments in just 83 seconds.

The receiving test consists of seven code groups starting at 10 WPM and increments by 2 WPM up to 60 WPM. Participants must copy at least five of the seven groups correctly to qualify for a given speed. The typical winning score at these events has been around 34 WPM. Following the receiving test, a pile-up tape is played and the scores are how many correct call-signs were copied. The winner of the code copying contest this time was Oleg Danko, UA0CO. Alex Turkin, RW0CR won the pile-up contest with 70 calls.

A special "Iron Man" award is given to the person who has the highest combined score from the three events. Each event awards 100 points to the winner. The other people get a weighted number of points based upon how well they did compared to the winner. This year's Iron Man was Oleg Danko, UA0CO.

The HF Contest was an all-day event. There were six teams competing and each operated from the same six stations for about 45 minutes each. The logistics to get the teams shuttled around to different locations were complicated - but pulled off without a hitch. Special call signs were used - with the prefix RG20. This helped generate some nice pileups on the bands with one competitor even working "up 1". A multiplier of X2 was given to CW QSOs, and the USA team stuck to CW to generate the number one score and take the Gold Medal in this event.

This event was a great way to make some new friends and better understand the culture of a faraway place. It once again shows how ham radio can help bring the world together and create a better place for us to live.

73, Tree N6TR

==> CONTESTS

14 September through 27 September

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Monthly Mini-CWT Test--CW, from Sep 14, 1300Z to Sep 15, 0400Z, see website, multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 3.5-14. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Connecticut QSO Party--Phone, CW, Digital, from Sep 17, 0000Z to Sep 17, 2359Z. Bands (MHz): 3.5-28. Frequencies: See website. Exchange: RS(T) and CT county or S/P/C. Logs due: 30 days. Rules <http://www.ctqp.org/2011.html>

CIS DX PSK Contest--Digital, from Sep 17, 1200Z to Sep 18, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and DXDA code. Logs due: 15 days. Rules <http://www.eupsk.com/>

Scandinavian Activity Contest--CW, from Sep 17, 1200Z to Sep 18, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Oct 2. Rules <http://www.sactest.net/>

South Carolina QSO Party--Phone, CW, Digital, from Sep 17, 1300Z to Sep 18, 2100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW--1.805, 50 kHz above band edge; Phone--1.845, 3.86, 7.261, 14.27, 21.37, 28.37. Exchange: RS(T) and county or S/P/C. Logs due: Oct 20. Rules <http://w4cae.org/scqp/scqsoweb.html>

Feld-Hell Hell on Wheels Sprint--Digital, from Sep 17, 1600Z to Sep 17, 1800Z. Bands (MHz): 1.8-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

Washington State Salmon Run--Phone, CW, Digital, from Sep 17, 1600Z to Sep 18, 2400Z. Bands (MHz): 1.8-28, 50, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 18. Rules <http://www.wwdxc.org/>

North American Sprint--Phone, from Sep 18, 0000Z to Sep 18, 0400Z. Bands (MHz): 3.5-14. Exchange: Call signs, serial, name, and state. Logs due: 7 days. Rules <http://www.ncjweb.com/>

Classic Exchange-- Phone, from Sep 18, 1300Z to Sep 19, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

BARTG Sprint 75--Digital, from Sep 18, 1700Z to Sep 18, 2100Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Nov 1. Rules <http://www.bartg.org.uk/>

Run For the Bacon--CW, from Sep 19, 0100Z to Sep 19, 0300Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

NAQCC Monthly QRP Sprint--CW, from Sep 22, 0030Z to Sep 22, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time

(alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CQ WW RTTY Contest--Digital, from Sep 24, 0000Z to Sep 25, 2400Z. Bands (MHz): 3.5-28. Exchange: RST, CQ zone and State/VE area (US/VE). Logs due: Nov 1. Rules <http://www.cqwwrtty.com/>

Texas QSO Party--Phone, CW, Digital, from Sep 24, 1400Z, multiple operating periods, see website. Bands (MHz): 1.8-28, 50,144, Frequencies: CW--20 to 50 kHz above band edge; Phone--25 kHz above edge of General segment. Exchange: RS(T), county or S/P/C. Logs due: Oct 31. Rules <http://www.txqp.net/>

Fall QRP Homebrewer Sprint--CW, from Sep 27, 0000Z to Sep 27, 0400Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 30 days. Rules <http://www.njqrp.org/>

VHF+ CONTESTS

ARRL 10 GHz Cumulative Contest--Phone, CW, Digital, from Sep 17, 6 AM to Sep 18, 12 Midnight. Bands (MHz): 10G+. Exchange: 6-character grid locator. Logs due: Oct 19. Rules <http://www.arrl.org/contests>

ARRL EME Contest--Phone, CW, Digital, from Sep 24, 0000Z to Sep 25, 2400Z. Bands (MHz): 2.3G+. Exchange: Call signs, sig rpt, acknowledgement. Logs due: Dec 20. Rules <http://www.arrl.org/contests>

South Carolina QSO Party--Phone, CW, Digital, from Sep 17, 1300Z to Sep 18, 2100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW--1.805, 50 kHz above band edge; Phone--1.845, 3.86, 7.261, 14.27, 21.37, 28.37. Exchange: RS(T) and county or S/P/C. Logs due: Oct 20. Rules <http://w4cae.org/scqp/scqsoweb.html>

Washington State Salmon Run--Phone, CW, Digital, from Sep 17, 1600Z to Sep 18, 2400Z. Bands (MHz): 1.8-28, 50, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 18. Rules <http://www.wwdxc.org/>

Classic Exchange-- Phone, from Sep 18, 1300Z to Sep 19, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

Fall VHF Sprint--Phone, CW, Digital, from Sep 19, 7 PM to Sep 19, 11 PM. Bands (MHz): 144. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

Texas QSO Party--Phone, CW, Digital, from Sep 24, 1400Z, multiple operating periods, see website. Bands (MHz): 1.8-28, 50,144, Frequencies: CW--20 to 50 kHz above band edge; Phone--25 kHz above edge of General segment. Exchange: RS(T), county or S/P/C. Logs due: Oct 31. Rules <http://www.txqp.net/>

Fall VHF Sprint--Phone, CW, Digital, from Sep 27, 7 PM to Sep 27, 11 PM. Bands (MHz): 222. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

==> LOG DUE DATES

14 September through 27 September

September 15 - MMMonVHF/DUBUS 144 MHz Meteorscatter Sprint Contest <http://www.mmmonvhf.de/ctest.php>

September 15 - Brazil Independence Day BPSK31 CDX Contest <http://brcontest.com/resultado/indday/2011/cdx_us-en.pdf>

September 15 - NAQCC-EU Monthly Sprint <http://naqcc-eu.org/SprintHelp/SprintRules.pdf>

September 16 - SKCC Weekend Sprint <http://www.skccgroup.com/sprint/wes/index-wes.html>

September 17 - North American Sprint, CW <http://www.ncjweb.com/sprintrules.php>

September 19 - DARC 10-Meter Digital Contest <http://www.darc.de/referate/ukw-funksport/bild-und-schrift-wettbewerbe/corona-maerz/teilnahmebedingungen/>

September 20 - RSGB SSB Field Day <http://www.rsgbcc.org/hf/rules/2011/rssbfd.shtml>

September 21 - Keyman's Club of Japan Contest <http://www.kcj-cw.com/contest/11_kcj_contest_rule_e.pdf>

September 25 - Kulikovo Polye Contest <http://www.tularadio.ru/?pg=content/kpc-rule-en>

September 26 - Ohio QSO Party <http://www.ohqp.org/adminRules.htm>

September 27 - YO DX HF Contest <http://www.yodx.ro/en/hf-contest/rules>

RAC Bulletin 2011-027E - Ontario South director re-elected.
2011-09-13

Congratulations are extended to Mr. Jeffrey Stewart, VA3WXM who was recently re-elected as the RAC Director for Ontario South. This nomination was unopposed, eliminating the need for a balloted election. Mr. Stewart was initially voted in as the Director in May 2011 and has been a certified amateur operator since March 1999 and involved in many aspects of the hobby. Mr. Stewart's term will be extended to cover January 1, 2012 to December 31, 2013.

Paul Burggraaf VO1PRB
RAC Corporate Secretary

RAC Bulletin 2011-028E - Tropical Storm Maria
2011-09-14

Good morning,

I'm forwarding this on behalf of NL Section Manager VO1VZ who is on vacation.

It is now evident that Tropical Storm Maria will have a direct impact on Newfoundland, particularly the Avalon Peninsula. Due to a low pressure system that will likely merge, exact track is difficult to predict although in the effected area storm surge, pounding surf, high winds and 50 - 75 mm of rain can be expected.

As a result, full activation of a NL Hurricane/CANWARN Net will commence at 1430Z Friday and will continue for the duration of the event. We will be using 3.740 Mhz for the HF Net and the NL Linked VHF repeater system. Those of you who are able, please monitor in case short distance propagation is poor (as it likely will be) and you might assist with relays. Access to the NL Linked repeater system can be obtained through Echo Link - VO1ARG repeater in Argentia, NL. NL Hams are reminded that today would be a good time to tie things down and fill your generators as well as stock up some food. Lets hope all the above won't be neccessary and Maria will pass far east of us.

Thanks for your usual cooperation in keeping these frequencies clear.

73

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-09-15
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Time to time it will be necessary to remember about regular updates
to the VHF-DATABASE at MMMonVHF. At mid of october we plan to
spread a new issue of our VHF-DATABASE to all DX-Cluster (and USER
which what it). So please be so kind and UPDATE IT NOW SOON! LOGIN
at MMMonVHF and follow the link to your Account > than click on
"VHF-DATABASE Update" and click on the INFO Button left side of
the Call (mostly only YOUR CALL or YOUR Expeditions calls) you
wants to change... Click on the EDIT Button (lower end of the page)
if something to change and edit the datasentence. After you have
finished your changes PLEASE do not forget to click on SAVE! Your
data will be reviewed by the Team and released to the VHF-DATABASE
as soon as possible! You will receive a confirmation E-mail when
your data is online available at MMMonVHF! The DX-Cluster will get
those updated Files only one time a year! Info or changes of OTHER
than your own Call or your Expedition Calls as well welcome. In
such a case please do use the Contact Form
http://www.mmmonvhf.de/kontact.php and pass us the
CALL you want to edit as well... Files like CALL3.txt will be
availble for free to everybody from your account and daily fresh!
To get into CALL3.txt you need to have one of the keywords (WSJT
MS or EME) at your datasentence activated!

** 3D2C, CONWAY REEF ACTIVITY 2011 on HF and 6m & 2m (EME) **

Preparations for the large multi-national 3D2R DXpedition to Rotuma
[425DXN 1049] are going according to plan. The team will meet in
Suva (Fiji) on 22 September and depart for Rotuma on the 25th.
They expect to be QRV on 27 September and to complete the DXpedition
on 7 October. 3D2R will be active on 160-10 metres CW, SSB, RTTY,
PSK and SSTV, plus 6 and 2m EME, with a focus on Europe and Africa
when propagation permits. QSL via YT1AD and LoTW (logs to be
uploaded some six months after the expedition). Further
information - including log search (to be updated on a daily
basis), suggested frequencies and details on how contribute to this
expensive project - can be found at www.yt1ad.info/3d2r/index.html

==> + PUBLIC SERVICE: MISSOURI HAMS HELP OUT WHEN 911 SERVICE GOES DOWN

It doesn't take a major disaster for Amateur Radio to step in and
save the day. Around 9 PM on September 5, a cable cut completely
isolated the Johnson County 911 Center in Warrensburg, Missouri,
impacting landline, Internet and cellular service. Johnson County --
home to Whiteman Air Force Base -- is located just east of the Kansas
City metro area.

Johnson County's emergency plan called for the telephone company to
transfer all 911 calls to the Henry County 911 facility in Clinton,
Missouri; Henry County is the next county south of Johnson County. But
an equipment problem at Henry County's center prevented the transfer
from completing successfully. Calls were then routed to the Benton
County 911 Center in Warsaw, Missouri; Benton County is the next county
west of Henry County. This transfer was successful and calls started
coming in to Warsaw. Unfortunately, Warsaw is more than 40 miles from
Warrensburg, and the two centers were unable to establish communication
using the county VHF radio facilities. It was then that radio amateurs
```

were brought in to provide communications support. Read more here <http://www.arrl.org/news/missouri-hams-help-out-when-911-service-goes-down>.

==> + ARRL TO WELCOME USTTI STUDENTS NEXT MONTH

Next month -- October 3-7 -- the ARRL will welcome international students who want to learn how to administer and regulate Amateur Radio programs in their home countries. This course, offered by the United States Telecommunications Training Institute (USTTI) for learners from developing countries, will help the participants create, administer and foster an Amateur Radio Service in their countries. This is the 27th year that the ARRL has participated in the USTTI program. Read more here <http://www.arrl.org/news/arrl-to-welcome-ustti-students-next-month>.

==> + ARRL SEEKS TREASURER

After more than 31 years of distinguished service to the ARRL as its volunteer Treasurer, Jim McCobb, K1LU, has decided to step down when his current term expires in January 2012. The ARRL is seeking qualified candidates from among its membership. The Board of Directors elects the Treasurer and other officers at its Annual Meeting in even-numbered years.

The Treasurer is a non-voting member of the Board of Directors and must be a licensed radio amateur and a Full member of the ARRL for four continuous years prior to nomination. The ARRL By-laws <http://www.arrl.org/arrl-by-laws> define the role of the Treasurer as follows:

- In consultation with and subject to the general supervision of the Administration and Finance Committee, provides for the investment and reinvestment of the surplus funds of the League in any bonds or stocks or other securities as would be selected by a trustee with the care of a prudent investor.
- Reports to and attends all regular meetings of the Board of Directors.
- Serves as a member of the Administration and Finance Committee.

The position is unpaid; however, necessary expenses including travel to meetings are reimbursable.

A Search Committee has been established to recommend one or more candidates for Treasurer to the Board. Additional information about the position is available here <http://www.arrl.org/files/media/News/ARRL_Treasurer-Position_Description.pdf>.
Interested and qualified members are invited to submit a Statement of Interest and qualifications by November 14, 2011 to the Secretary, preferably by e-mail <dsumner@arrl.org>.

==> + ARRL FACEBOOK PAGE: 20,000 FANS STRONG

With more than 20,000 fans on Facebook, the ARRL Facebook page is the number one spot for hams on the Internet's most popular social networking site. Not only is the ARRL page the most popular Amateur Radio page on Facebook, it is attracting many young -- and not-so-young -- hams to share their opinions and ham radio-related news with other hams. According to Facebook demographics, more than 460 people between the ages of 13-17 are fans of the ARRL's page, with 74 percent of users below the age of 55. Since September 2010, hundreds of users post their own comments on the page, make a comment on a post or "like" a comment each week. The ARRL has been active on Facebook since July 2010; since that time, the page has been viewed almost 14.5 million times by fans and non-fans alike. The ARRL also has a Logbook of the World Facebook page. Premiering in June 2011, this popular page has almost 1000 ham fans. Read more here <http://www.arrl.org/news/arrl-facebook-page-20-000-fans-strong>.

==> + HEATHKIT'S AMATEUR RADIO PLANS TAKING SHAPE

Heathkit Educational Systems hopes to reenter the Amateur Radio market by the end of 2011. Back in August, Heathkit announced <http://www.arrl.org/news/heathkit-returns-to-the-kit-business> its return to the kit business and actively solicited suggestions. The response from Amateur Radio operators convinced Heathkit to develop several Amateur Radio products.

"When we made the announcement on our web page about a month ago, we had no intention of entering the Amateur Radio kit market," Ernie Wake, Heathkit's Director of Sales and Marketing, told the ARRL. "The response was really overwhelming, exciting and scary. The scary part is that the brand name has so much loyalty that we don't want to disappoint the people who have such fond memories."

Wake said that Heathkit is presently working on developing a few Amateur Radio kits. "Initially, the kit line will include a few 'accessories,' like kits for a Dual Watt Meter, Antenna Tuners and the Cantenna," he explained. "Once we are a little more 'settled,' I think we will develop a QRP receiver. We won't rush to market just to get there. We want to develop a line of kits in the tradition of Heathkit. I'm hoping to have one or two kits by the end-of-the-year."

==> QEX -- THE SEPTEMBER/OCTOBER 2011 ISSUE

The September/October issue of QEX <http://www.arrl.org/qex> is already out, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/em-qex-em-the-september-october-2011-issue>.

==> SOLAR UPDATE

Tad "When the Sun is setting
<http://www.youtube.com/watch?v=znOOaKPTH2Y>" Cook, K7RA, reports:
Although the average daily sunspot numbers are lower -- down nearly 13
points to 91.7 -- the average daily solar flux is higher by 6.7 points,
rising to 122.2. Yes, solar activity is rising rapidly. You could see
it coming earlier this week by glancing at the STEREO mission
<http://stereo.gsfc.nasa.gov/> when you looked at the back side of the
Sun. There was lots of activity, and you can still see quite a bit more
(those white patches) just over the eastern horizon, which is on the
left side of the image beyond -90 degrees. The image of the daily Sun
<http://spaceweather.com/> shows a disc peppered with sunspots, a
welcome sight after watching the current solar cycle seem to stall.
Numerous CME events disturbed the Earth's magnetic field. The planetary
A index record shows September 9, 10 and 12 were the most active days,
with the index at 36, 33 and 27. The autumnal equinox in the northern
hemisphere is just a week away: September 23 at 0905 UTC, which is 5:05
AM EDT or 02:05 AM PDT. Luckily, the increased sunspot activity should
continue. The predicted solar flux is 145 on September 15-17, 150
September 18-22, 110 on September 23-24, and 115 on September 25-29.
The predicted planetary A index is 5 on September 15-18, 7 on September
19, 5 on September 20-23, 7 on September 24-25, 5 on September 26-29,
and 15 on September 30. Look for more information on the ARRL website
on Friday, September 16. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation
page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by The Go-Go's Beneath the Blue Sky
<http://www.youtube.com/watch?v=znOOaKPTH2Y>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page
<http://www.arrl.org/quickstats> on the ARRL website. Let your voice be
heard!

Questions in this month's QuickStats poll:

- What is the longest time you've ever spent at your radio (including
brief breaks)?
- Do you analyze your antenna designs with modeling software before
you build the antennas?
- Have you monitored signals from the new ARISSat-1 satellite?
- How far are you willing to drive for a hamfest?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure
to bookmark it in your browser. Results from this QuickStats poll will
be published in the December 2011 issue of QST on the QuickStats page,
located in the rear advertising section of the magazine. Along with
monthly poll results, QST QuickStats offers colorful charts and graphs
that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- September 16 -- NCCC Sprint Ladder; AGB NEMIGA Contest
- September 17 -- Connecticut QSO Party; Feld Hell Sprint
- September 17-18 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>;
South Carolina QSO Party; Washington State Salmon Run; CIS DX QPSK63
Contest; Scandinavian Activity Contest (CW); SRT HF Contest (SSB); QRP
Afield
- September 18 -- North American Sprint (SSB); WAB 144 MHz QRP Phone
Contest; BARTG Sprint 75
- September 19 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint
(local time)
- September 22 -- NAQCC Straight Key/Bug Sprint

Next week:

- September 23 -- NCCC Sprint Ladder
- September 24 -- AGCW VHF/UHF Contest
- September 24-25 -- ARRL EME Contest
<http://www.arrl.org/eme-contest>; Texas QSO Party; CQ Worldwide DX
Contest (RTTY)
- September 25 -- UBA ON 6 Meter Contest
- September 26 -- QRP Homebrewer Sprint
- September 27 -- 222 MHz Fall Sprint (local time)
- September 28 -- SKCC Sprint
- September 28-29 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 17 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamf
est>,
Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention
<http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>,
Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention
<http://www.arrl.org/hamfests/connecticut-state-convention-1>,
Wallingford, Connecticut
- October 14-16 -- ARRL Pacific Division Convention

<http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>,
Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>,
Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention
<http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-1>,
Palmetto, Florida

To find a convention or hamfest near you, click here

Text edition:

SEPTEMBER 18 2011. VK and WW STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 18 2011.

The 8th Region 3 ARDF Championships
http://www.ardf.org.au

The 8th Region 3 ARDF Championships are being held from the 23rd to the 28th September, 2011 at Maldon Victoria Australia.
These games are hosted by the Wireless Institute of Australia, and will be run by the Victorian ARDF Group Inc.About the Event

The event is being held at Maldon which is in the Bendigo district of Victoria, Australia. This is a historic gold mining area, just over two hours drive from Melbourne airport. Click the following Link for more information on the Maldon/Bendigo area.

Accommodation will be at the Victorian Blue Light Youth Camps in Maldon Click the following Link for more information.Program

The program for the 2011 Region 3 ARDF Championships is as follows:

Friday 23rd September: Arrival Day
Saturday 24th September: Equipment Check & Opening Ceremony
Sunday 25th September: 2m ARDF Competition
Monday 26th September: Tour Day
Tuesday 27th September: 80m ARDF Competition & Closing Banquet/Prizes
Wednesday 28th September: Departure DayFurther Information

For further information, please contact:

WIA National Field Day
Introduction
The WIA National Field Day has been run twice within the last 12 Months with an steady increase in the numbers taking part as indicated by the logs, photos & other responses received. Certificates of appreciation have been distributed to the participating clubs and individuals for both the 2010 and 2011 events. If you believe your certificate has not

been received, please contact the WIA office.
Objective
The objective of the WIA National Field Day is to positively place the hobby of amateur radio in front of the general public, to provide various clubs with a opportunity to promote their activities and increase the awareness of amateur radio training opportunities, either via the local clubs or the amateur radio fraternity as a whole.
Looking Forward
The proposed date of the next WIA National Field Day is the weekend of the 14th and 15th of April 2012. General consensus is that this time of the year is favourable in most areas of Australia. Setting the date(s) will enable clubs to start preparations and to ensure that the appropriate bookings at venues can be made.

You will note that two days have been nominated, this is to support clubs who have indicated that either the Saturday or Sunday may better suit their local community. This is not suggesting that the clubs would need to operate their displays over the two days unless they wanted to. Advertising material will require a little customising by local clubs to match the times and date of the local activity.

Some feedback has been received, requesting the need to clarify the recording of the contacts in the log, e.g. the exchange of numbers. Comment suggesting that this was not required as the event is not intended to be a traditional AR contest. This will be clarified in the 2012 event rules and guidelines. The rewarding or recognition of clubs who take pride in their preparation and presentation will still beencouraged.

Expressions of Interest
The event will continue to be co-ordinated and managed by a small committee. Nominations are now open for interested parties to express their interest in joining this committee. Please forward your expression of interest via your state WIA advisory committee members prior to the 28th of October 2011. Former committee members are welcome to nominate if they wished to continue in this role.
Philip - VK3JNI
Director

Now for a look at October's Amateur Radio magazine

It features the record setting International Lighthouse and Lightship Weekend with detailed and pictorial reports from around Australia. Bob Bristow VK6POP reminds us that the Jamboree On The Air is fast approaching.

The technical articles include How to make double sided PCBs the Murray Lang VK6LH way, An auto-coupler repair from Warren Stirling VK3XSW, and Part 2 on a Software Defined Radio by Peter Parker VK3YE.

The Spotlight on SWLing from Robin Harwood VK7RH notes the changes following Spring and the Gaddafi affair.

There's news from VK2, VK3, VK5, VK6 and VK7 plus an update on the Amateur Radio Victoria Centenary. All to be found with the regular columns of AMSAT, DX News, VHF/UHF interest, Contests and ALARA.

Amateur Radio magazine is a membership service and available at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

HAMS ACROSS AUSTRALIA.

VK1

CRARC Foundation Course, another success

CRARC Education Officer writes that last weekend's foundation course saw six successful Foundation Candidates, with one also passing his Standard level Theory and Regulations papers on the same day.
Alan wishes to thank the team of Glenn VK1NUT, Gil VK1GH, Steve VK2ZSZ, John VK1ET, Wayne VK1VNB and Stan VK1FSTJ, for their help in running the course, and continues to say that due to demand they've run Foundation weekends in July, August and September with another again in November. Keep an eye on the VK1 Email NEWS and VK1 reflector for the revised date and contact education/at/crarc.ampr.org.au for all first time and upgrade enquiries and bookings.

VK2

VK2 - News from the Oxley Region Amateur Radio Club Inc.

The Oxley Region Amateur Radio Club is celebrating its 40th birthday with an Anniversary Lunch at the Port Macquarie Golf Club at 12 noon on Sunday the 2nd of October 2011. Visitors and their families are welcome. All amateur radio operators who attend will receive an attractive commemorative certificate. For more details please visit the club's website http://www.orarc.org/ or contact the president, Henry Lundell VK2ZHE on mobile phone number 0427 947 921.

VK3

THE DIGITAL ATV EVENT OF THE YEAR

While perhaps not garnering the national media's attention like 'Scott & Charlene' on Neighbours decades ago, we congratulate Matt VK3EVL & Emily VK3FEGL who shared their special day with ATV viewers via VK3RTV and the BATC.tv website on Saturday September 17th. We wish them luck with exploring new Operating Modes and dealing with QRMan and QRwoMan is their ongoing QSO together with our hope they enjoy a few harmonics after the occasional pileup.
We're sure to catch up with the newlyweds in a coming WIA News bulletin and hear about their day, the ATV linkup and the feedback they've received by Amateurs worldwide.

THE BIG WEEKEND IN NOVEMBER

In support of the Amateur Radio Victoria Centenary so far five stations are going portable as part of the special activity extended weekend focused on the Keith Roget Memorial National Parks Award.

With a Victorian National Park or two nearby to most, it's expected more will register for the weekend of November 18th through to the 20th.

To register your interest first check out the Award section of the website www.amateurradio.com.au and then contact the Awards Manager, Tony Hambling VK3VTH email vk3vth@amateurradio.com.au

SPECIAL CALLSIGN ROSTERING

The roster has begun for the special callsign VK 100 ARV during November to mark the 100th birthday of Amateur Radio Victoria.

Work continues on its QSL card design and the Amateur Radio VictoriaCentenary Award.

Valid contacts with either VK3WI during next month's Oceania DX Phone Contest on the 1st and 2nd of October, or VKI00ARV when on air, are worth ten points towards the award.

Inquiries about the roster need to be made with Tony Hambling VK3VTH email vk3vth@amateurradio.com.au

BALLARAT AMATEUR RADIO GROUP. (BARG). <<AUDIO>>
Club activities are increasing at Ballarat now spring is in the air.
On the Education front we have 2 new Ham calls on the air, Darren VK3FAOE is very excited about being on the air and Phil a club life member who has regained his callsign after a period away from amateur radio. His call is VK3AQM. We all should wish them Well.
Also nearly upon us at BARG is the annual Hamvention to be held on Sunday October 23, doors open at 10am.
This year we are situated at the same location being The Greyhound Racing Track, Rubicon Street, Redan.
This is a wonderful spot with off street parking for hundreds of cars.
We have the usual Quality list of new and used sellers attending on theday.
Tables can be booked for $15.00.Door entry is $6.00.
Further details of this leading Victorian Hamvention can be found on the BARG Website. www.barg.org.au
Sure to be a great day, come along for a RagChew with your friends.
73's This has been Bob, VK3NBV for the Ballarat Amateur Radio Group.

VI6CHOGM SPECIAL EVENT STATION

The Commonwealth Heads Of Government meeting, usually referred to as CHOGM, happens in Perth in that last week of October. The Queen will attend the meeting. To mark this occasion, there are many community events planned for the week.

Amateur Radio in Western Australia will also mark this occasion in two ways. Firstly, with the support of the Wireless Institute of Australia, the ACMA has granted all Western Australian amateurs the right to use the VI prefix in their callsigns on 28-29-30 October. This should create interest in DX circles over those three days.

The Scout Member Amateur Radio Team in Perth has obtained the callsign VI6CHOGM,and will operate a station continuously for the three day period of CHOGM. There has already been considerable interest around the country and indeed the world in this callsign.

VI6CHOGM will operate from the Peter Hughes Scout Communication Centre in East Cannington, just 20 minutes from the Perth CBD. A special QSL card has been designed, Please note that all outbound QSL cards will be sent via the Bureau unless you mail directly with a SAE and IRC (or SSAE within Australia), and your card is received before November 14th.. We'll be encouraging Scouts to operate the station, however there is a general invitation to all Amateurs to participate either directly as operators, or as observers.

Our website is www.vi6chogm.com. I'm Bob VK6POP

THE WA VHF GROUP SPRING SCRAMBLE

The WA VHF Group Spring Scramble is happening on Sunday 16 October 2011 between 10.30am & 12.30pm local time. [0230 - 0430 Z]

The object is to contact as many different stations as possible, on as many bands, 50 MHz and above, as possible. All licensed modes may be used and extra points can be earned for working portable & countrystations.

Rules will be published shortly, but in the meantime, put the date in your diary and dust off your transceivers, transverters & antennas. Even consider going portable in the field.

HOME OF THE GOOD GUYS

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

==========

SOUTH SUDAN: 'GO ON AIR OR LOSE YOUR LICENCE'

Idle radio and television licensees that are not on air risk their licenses being withdrawn, Hon Dr Barnaba Marial Benjamin, South Sudan Minister for Information and Broadcasting has warned.

"The licences are issued for you to operate and if you are only carrying them in your briefcases to show that you have a broadcasting station, there is no reason why we should not withdraw them", said Dr Marial.

He explained that there are so many media houses knocking at the
ministry's doors for licences and they can't get some of the frequencies
because they have been taken by companies which are nonfunctional.

The minister issued this warning yesterday during a meeting at the
ministry headquarters while addressing operational issues with the topministry officers.

Dr Marial asked the Director of Public Information in the ministry, Paul
Jacob Kumbo, to write to the managers of all these "stations" to explainwhy they remain
idle.

July First full weekend NZART Memorial Contest

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

ODXGINC DXPEDITION TO VANUATU

As many of you will already know, ODXG is off to Vanuatu again.
The dates for the operation are 30 Sept through 12 October.
Of special note will be the focus on the WARC bands and RTTY.
Also, the DX-Pedition has authorisation to operate on 60m.
The team will also be participating in the Oceania DX Contest.

For more info pls visit the DX-pedition web sitehttp://yj0vk.odxg.org
As always, any small donation towards offsetting freight charges
will be gratefully appreciated.

WB 6 OJB will be on the air as 7P8JK from Lesotho between September
15th to the 22nd. While other information was given, during his
last Lesotho operation he was on the High Frequency bands from
40 to 10 meters using mostly SSB with some CW.
QSL direct to his home callsign WB 6 OJB.

4 W 6 A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (EastTimor),
from 16 to 26 September 2011. 10 to 160 metres CW, SSB and RTTY.
QSL manager is M 0 URX, direct via the bureau, or LoTW.

PB 2 JJ will be active as 9H3JN from Malta between September 2nd and the14th. Operations will be on 80 through 10 meters mostly CW but with thepossibility of some SSB. QSL this operation via his home callsign PB 2 JJ.

For rugby enthusiasts, look out for ZL4RUGBY operated by ZL4PW until31st October. This is to celebrate the 2011 Rugby World Cup being played in New Zealand.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cutOnce.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Stanford University Researchers Announce Sunspot Breakthrough:

Imagine forecasting a hurricane in Miami weeks before the storm was even a swirl of clouds off the coast of Africa -- or predicting a tornado in Kansas from the flutter of a butterfly's wing in Texas. These are the kind of forecasts meteorologists can only dream about. Could the dream come true? A new study by Stanford University researchers suggests that such forecasts may one day be possible -- not on Earth, but on the Sun. In the August 19 issue of Science, Stathis Ilonidis, together with co-workers Junwei Zhao and Alexander Kosovichev, announced that they can see some sunspots while they are still submerged, before they are visible to the naked eye. "This could lead to significant advances in space weather forecasting," Ilondis said.

Most Amateur Radio operators are aware of sunspots, those dark blemishes on the surface of the Sun. This is because sunspots influence propagation. They can be a boon to hams interested in HF propagation, as sunspots are the sites of ultraviolet or extreme ultraviolet radiation that creates our ionosphere. But sunspots can also be destructive. They are the source for disturbances, such as flares and the roots of coronal mass ejections (CMEs) that can hinder propagation. When a CME hits the Earth's atmosphere, the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF http://www.hfradio.org/muf_basics.html) -- the highest frequency by which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible.Read more here

AMATEUR BALLOONISTS HIT RECORD 40,575M

While participating in the UKube-1 satellite project with the University of Bath, Australian PhD student Mark Jessop hit the 40,575 metre mark with a helium-filled meteorological balloon. It's a UK record and pretty close to the all-time international amateur altitude maximum. Transmitting details back via his 'miniNut' telemetry system, the 142gram payload was sent up with the intention of testing the system's pressure sensor at high altitudes and the record height was anunexpected bonus. Mark is intending to be back in Australia in time for a Project Horus launch in conjunction with this year's Scouts' 'Jamboree of the Air',

raising a ham radio repeater to an altitude of 30km facilitating
contacts all around the country.
A video, map tracking the ballon's travel and additional photos of those
involved and the equipment are available online:
http://rfhead.net/
http://www.theregister.co.uk/2011/08/23/balloon_record/

WW SPECIAL INTEREST GROUPS --- INTERNET, THE HAMS DOMAIN

10 YEARS IS A LONG TIME ONLINE

In thinking about the decade since September 11, 2001, Technology
Journalist Harry McCraken writes how he "was struck by how much the
world of personal technology has changed. It all happened little by
little, but a remarkable percentage of the things we care about todaydidn't exist yet."

In October 2001 we first met 3G wireless, the iPod and Windows XP with
the first Xbox released a month later. Skype and the iTunes Music Store
appeared in 2003, Firefox and Gmail in 2004, Google Maps 2005, with the
practically unattainable Nintendo Wii made it to market for Christmas
2006 and the first iPhone a year later. Does anybody remember a time
before Angry Birds? Well, apparently that time was pre-2009!

You'll find the full article at
http://technologizer.com/2011/09/11/september-2001-was-a-long-time-ago-in-the-world-of-tec
hnology/
with a list of 'then-and-now' websites, web browser stats and consumer
electronics. But in the Ham Radio world, here are a few things to put
the last decade in perspective: 2001 saw the first trans-atlantic 136khz
transmission, WRC 2003 eliminated the Morse requirement, BPL seems to
have come and gone, Amateurs respond to Katrina, the Boxing Day Tsunami,
Echolink invented, the ever popular Icom 706mkIIG has come and gone.

WW SPECIAL INTEREST GROUPS --- MICROWAVE AND ABOVE

Here's a snippet of an audio submission for VK4's QNEWS broadcast this week:

"Hello again from Doug Friend VK4OE from the Brisbane VHF Group, here are
some more details of the "test and tune" day that's coming quite soon:
Services available are:
Power measurement (nW to +++Watts) to 50 GHz
Return loss measurements to 26 GHz
Signal generators to 18 GHz
Spectrum analysis to 50 GHz
Minimum discernable received signal level assessment to 18 GHz
Automatic noise figure and gain measurement to 1.9 GHz, and possiblyhigher(?)
And all this in the presence of interested and helpful amateurs willing
to try and solve 'challenges that may emerge'!"

Our VK4 brethren can hear the full clip on QNEWS this week, but we bring
it to the attention of the national audience as an example of what's going
with the Brisbane VHF Group and excellent preparation and event promotion.
The activity sounds like just the excuse to spend a weekend interstate

and get an early bit of sun after the winter hibernation.

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING
http://www.scouts.com.au
http://www.scout.org/jota
http://www.international.scouts.com.au

Jamboree On the Air - only one month to go. No time for panic yet,
but it is time to make sure you have everything right.

The key to a good JOTA weekend is to remember that it's not about
Amateur Radio & it's about Scouts communicating, and Amateur Radio, as
the original medium for this activity, needs to be presented in a way
that the young people will find interesting, relevant and fun.
Preparation
* It's time for the site inspection. Have a look around for high
points for stringing up antennas, determining which type of antenna willbest suit the site.
* Do you need a mast or tower? Suggest to the Scout or Guide
leaders that it would be really nice to have a mast 10 metres high for
an antenna. They could get the youth members to practice their scouting
skills by erecting a mast using poles and ropes.
* find out where the power points are & what are you sharing these
with, etc. Is there an opening for coaxial cable entries?
* What will the ambient noise be like? People need to be able to
hear what's happening on the radio
* Propagation & check conditions early to give you an idea of what
time of day/night to look for DX. One method is to set up a
computer/radio monitoring SSTV over a period of time to provide a record
of where the signals are coming from. Or just watch the DX clusters.
* Station setup & feed audio through a speaker for all to hear, or
use some sort of breakout box for a few sets of headphones?
* Remember that you need to take a break , so recruit helpers &
rope in some fellow Hams to give you a hand.
Equipment
* Scouts and Guides often don't have their own Amateur equipment &
you will need to bring everything that you want to use
Programme

We're trying to present AR as an interesting hobby & think about which
aspects of the hobby you can demonstrate to provide variety and
stimulate interest. We can do more than put kids on a microphone to say
"hello my name's Fred. Over." Remember also that an array of
complicated looking boxes with flashing LEDs, dials and knobs doesn't
float most people's boat. We need to be able to provide an activity
that engages young people and grabs their imagination.

* Voice communications & OK every kid needs to have a go at the
mike, so try to make it more interesting & a great help is to get them
to prepare a "cheat sheet" to prompt them. This task really belongs to
the Scout or Guide leader & perhaps we can encourage them to do thatpreparation.
* Slow Scan TV. Great for when propagation is quiet- arrange with
a group within radio earshot to send and receive SSTV pictures & set up

a webcam on The SSTV computer to provide the photos.
* PSK, RTTY & kids can relate to these as they are a bit like
online chat, and often work well when conditions aren't good for phone.

Information about Scout calling frequencies and other useful stuff can
be found on our website, WWW.international.scouts.com.au - look for
JOTA-JOTI on the menu on the left hand side.
I'm Bob VK6POP

JOTA / JOTI - 15th and 16th of October 2011 - Update
Activity planning is well underway for the 54th JOTA/JOTI on the 15th
and 16th of October 2011.

Radio Operators and Activity Leaders are busy planning interesting
activities to introduce and provide ongoing safe, responsible
participation in Amateur Radio and Internet related activities. An
excellent checklist has been created to assist operators and leaders
with the preparation, planning and to address a few or the common safety
and management issues.

The full list is available in the text edition of this news bulletin,
but here are a couple that caught our eye:

* Have we made any temporary repairs and not revisited the item?
* Have we taken weather into our contingency planning?
* Have we got Amateur Radio promotion material available?
* Will we have our antennas up in the air before pedestrian and vehicle
traffic builds up during bump in and bump out times at the camp or location?
* Have we pre-tested our internet connection and LAN under load?
* Do we have current WWC checks or similar for those States that
* require them.

* Are all our AC electrical power leads and equipment safe, would itpass Test and Tag?
* Have we made any temporary repairs and not revisited the item?
* Are all our DC distribution wiring and batteries safe and protected?
* Have we checked our campsites and antennas for damage over the recentmonths?
* Will we be working at heights to put up our antennas (i.e. on the
roof)? Can we do this safer?
* Are the locations proposed for antennas safe? If they blow down, whatwill they hit?
* Have we considered electrical storms, lightning and quick
disconnection of our equipment?
* Have we minimised the likely hood of slips, trips and falls?
* Will we have our antennas up in the air before pedestrian and vehicle
traffic builds up during bump in and bump out times at the camp or location?
* Can we establish the station outdoor works the weekend before?
* Have we taken weather into our contingency planning?
* Will our wire antennas, guy ropes, and cables be clearly visible and
* safe from passing people and vehicles?
* Have we planned to rope or tape off any RF Hot equipment?
* Have we planned to ensure that our tuners and gear is RF earthed where appropriate?
* What are our plans for station pack up, do we have a safe plan if the
weather or other plans get in the way?

* Have we pre-tested our internet connection and LAN under load?
* Have all PC's in use ready been upgraded up to the latest securityand virus patches?
* Have we done our risk management (Scoutsafe) assessment?
* Have we got enough JOTA/JOTI badges?
* Do we have current. WWC checks or similar for those States thatrequire them.
* Have we got the correct permits to camp?
* Have we got Amateur Radio promotion material available?
* Have we been to the SRESU web site to download the forms for thisyear? Victoria only !

Operating JOTA/JOTI in Victoria (VK3) ? ... Please feel free to use the
Contact SRESU page to further enquire about JOTA/JOTI.

It's certainly a useful checklist to keep on hand for those
participating in JOTA/JOTI activities, and an opportunity for all
Amateurs to review their portable ops kits and mark the weekend of the
15 & 16 October on the calendar as a "C-N-G" weekend -- that's
Compulsive Number Giving weekend, and make sure we fill the bands with
stations for the Scout and Guide groups to contact.

THE FINAL FINAL

HamfestIndia 2011 Reminder to book your railway tickets in advance.

Jaycee VU3BWB writes on the YahooGroup, "Those who wish to travel to
Kochi by train for Hamfest 2011, please book you tickets in advance as

the event coincides with Sabarimala pilgrimage season. Advance
reservation now open upto 11 December 2011. There are only few trains to
Kochi on those dates but special trains may be scheduled later for thepilgrimage."

Perhaps not unusual in a country with so many reliant on train travel,
but an eye opener for most of us in VK who can commute to as many as 4
hamfests in a year within comfortable driving distance, but it's
excellent to see that the Indian Train schedulers are adding extra
capacity for the VU hams, and if they're anything like us VK'ers,
I'd suggest a few freight trailers be attached on the return journey!

Submitting news items

If you would like to submit news items for inclusion in the VK1WIAbroadcasts,
please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of itbeing
broadcast in the very next edition of WIA National News.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

WTCN31 CWHX 160549
SEVERE WEATHER BULLETIN
ISSUED BY THE CANADIAN HURRICANE CENTRE OF ENVIRONMENT CANADA
AT 2:49 AM NDT FRIDAY 16 SEPTEMBER 2011.
---------------------------------------------------------------------
TROPICAL STORM WARNING FOR:
=NEW= BONAVISTA PENINSULA
=NEW= BURIN PENINSULA
ST. JOHN'S AND VICINITY
AVALON PENINSULA NORTH.

HURRICANE MARIA IS RACING TOWARDS SOUTHEASTERN NEWFOUNDLAND AND
IS EXPECTED TO MAKE LANDFALL AS A HURRICANE THIS AFTERNOON.

WINDS GUSTING TO 100 KM/H ARE EXPECTED OVER SOUTHEASTERN
NEWFOUNDLAND. THESE WINDS ARE FORECAST TO GUST TO 120 KM/H
OVER THE SOUTHERN AVALON.

A TROPICAL STORM WARNING MEANS THAT SUSTAINED GALES...WINDS OF
63 KM/H OR MORE...ARE EXPECTED IN THE SPECIFIED AREAS WITHIN 24
HOURS. BY NATURE A TROPICAL STORM ALSO IMPLIES THE THREAT OF
LOCAL FLOODING FROM HEAVY RAINFALL.

HURRICANE WARNING FOR:
=NEW= AVALON PENINSULA SOUTH.

HURRICANE FORCE GUSTS TO 120 KM/H EXPECTED OVER THE SOUTHERN
AVALON THIS AFTERNOON.

A HURRICANE WARNING MEANS THAT ONE OR BOTH OF THE FOLLOWING
DANGEROUS EFFECTS OF A HURRICANE ARE EXPECTED IN THE SPECIFIED
AREAS WITHIN 24 HOURS:.

(A) SUSTAINED HURRICANE FORCE WINDS...WINDS OF 118 KM/H OR
MORE;.

(B) DANGEROUSLY HIGH WATER OR A COMBINATION OF DANGEROUSLY HIGH
WATER AND EXCEPTIONALLY HIGH WAVES, EVEN THOUGH WINDS EXPECTED
MAY BE LESS THAN HURRICANE FORCE.

BY NATURE A HURRICANE ALSO IMPLIES THE THREAT OF LOCAL FLOODING
FROM HEAVY RAINFALL.
---------------------------------------------------------------------
TROPICAL STORM WARNING ENDED FOR:
AVALON PENINSULA SOUTH.
```

UPGRADED TO HURRICANE WARNING.

==DISCUSSION==
HURRICANE MARIA IS RACING TOWARD SOUTHEASTERN NEWFOUNDLAND AND IS
EXPECTED TO MAKE LANDFALL AS A HURRICANE NEAR THE ISTHMUS THIS
AFTERNOON. THIS IS A SIGNIFICANT CHANGE IN FORECAST TRACK TO THE
NORTHWEST. AS A RESULT THE HURRICANE WATCH HAS BEEN UPGRADED TO A
WARNING AND THE TROPICAL STORM WARNING HAS BEEN EXPANDED TO INCLUDE
THE BURIN AND BONAVISTA PENINSULAS.

WIND GUSTS FROM 100 TO 120 KM/H WILL LIKELY TOPPLE TREES AND BREAK
LARGE BRANCHES, RESULTING IN DOWNED UTILITY LINES AND POWER
INTERUPTIONS. DAMAGE TO SIGNAGE AND BUILDING CLADDING/ROOFING
MATERIAL IS ALSO POSSIBLE WHEN WINDS GUST TO 120 KM/H OR MORE.

HURRICANE MARIA WILL MERGE WITH A DEVELOPING TROUGH TO ITS NORTH THAT
WILL CONNECT TO A MUCH LARGER NON-TROPICAL LOW OVER LABRADOR.
STRONG WINDS LATER TODAY THROUGH SATURDAY ARE FORECAST OVER THE
REMAINDER OF THE ISLAND AND LABRADOR AS A RESULT.

HEAVY RAIN IS EXPECTED ESPECIALLY OVER MUCH OF NEWFOUNDLAND WHERE 60
TO 90 MILLIMETRES ARE EXPECTED. LOCALLY HEAVIER RAINFALL COULD LEAD
TO LOCAL FLOODING IN PRONE AREAS.

PLEASE REFER TO THE LATEST FORECASTS FOR FURTHER DETAILS.

END/HATT

Amateur Radio Newsline(tm) Report 1779 - September 16 2011

Amateur Radio Newsline report number 1779 with a release date of
Friday, September 16th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio comes to the aid of San Diego when
a power black-out takes down a part of the areas emergency service
communications network, a new Red Cross emergency team down-under seeks
alliances with amateur radio, Puerto Rico originates its first ever EAS
message, the ARRL seeks information on young hams in the 21st century
and Amateur Radio Newsline become a part of Ham Nation on TWIT.TV. Find
out the details are on Amateur Radio Newsline(tm) report number 1779
coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM COMES TO THE AID OF SAN DIEGO WHEN ITS FAIL SAFE
COMMUNICATIONS SYSTEM FAILS

A ham radio operator uses his knowledge of two-way radio to supplement
communications when power goes out and a failsafe 800 MHz system fails.
Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

According to news reports, the power mains problem began near Yuma,
Arizona. Affected by the September 8th black-out were parts on
Southern California, South-Western Arizona and Northern Mexico. All of
these areas share the same power grid and in Southern California alone
some 8 million customers lost electric service. And when the lights
went out in San Diego, so did parts of the regions 800 MHz shared
emergency communications network.

The problem that arose was that in some North County service areas
mobiles in the field could not hear their dispatchers. In other places
the dispatchers could not communicate with mobile stations. But thanks
to some thoughtful planning by North County Fire Battalion Chief Don
Stevens, KF6ATL, a combination of ham radio know-how and an ageing
commercial VHF radio system, not all was lost:

--

KF6ATL: "Probably 15 years ago most of the Fire Departments in North
San Diego County were on the VHF system. Subsequent to that, San Diego
County, fot inter-operability reasons built a regional communications

that they call the RDS system. It's a Motorola system like other Motorola systems throughout the United States.

"Before we went to the system we are dispatched on at present, we were one of the last holdouts to go onto the 800 MHz system. And when we did that, one of the decisions that a couple of us made was not only to keep our (VHF) licenses, but also to turn our then remote-base transmitters into repeaters. We felt that we were not going to do what a lot of other cities did and that was to completely get rid of their VHF infrastructure all together."

--

Stevens tells Newsline that while his department is a part of the county wide 800 MHz system, when the switchover took place he decided to keep the San Diego North County VHF system as a back-up:

--

KF6ATL: "We had about 6 or 7 frequencies licensed to what was then the Fallbrook Fire Department which is now the North County Fire Department, and slowly but surely I took those licenses and turned three of them into what we call "Command Channels" or "Command Frequencies" and we strategically located them on mountaintops throughout North San Diego County.

"One of the first repeaters we put up was at a place called Buffalo Bump. Its on Camp Pendleton. It was followed by a same-licensed repeater up on Palomar Mountain and then another frequency located on Red Mountain, all within eye-sight of Fallbrook.

"And then I have one other repeater that bI consider a low level repeater located in downtown Fallbrook."

--

That forward planning by KF6ATL paid off then the power failure hit:

--

KF6ATL: "I was off on the day that the 800 MHz failure occurred with the power outage. Luckilly, one of my counterparts who works for the city of San Marcos - Dave Schloss - recognized that there was a failure - and like myself - he realized that we needed to do something with our 800 system to have redundancy. So he reacted quickly and called the Dispatch Center and started moving all the traffic over to my North County Fire VHF repeaters."

--

We asked Stevens if his experience as a radio amateur helped in the pre-planning of the North County VHF radio back up system:

--

KF6ATL: "Pretty much everything that I've done, Iv'e done myself. I've taught myself how to program repeaters. The only thing that I didn't do was was to hang the antennas."

--

In the end, Stevens hopes other communities will do as his did and make certain that some sort of back up emergency radio system is in place. This, just in case the unthinkable happens and the primary system fails.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

If nothing else, this is another incident that proves putting all emergency communications eggs into a single, supposedly fail-safe system can very easily fail is not a very good idea. (CGC, ARNewsline(tm))

**

RESCUE RADIO: NEW RED CROSS EMCOMM GROUP DOWN-UNDER

A new Emergency Communications Network has recently been set up by the architects of Australia's Red Cross Emergency Communications known by the acronym RECOM. The RECOM organizational and technical model adopted in 1997 has been extremely successful in its work with Red Cross, and RECOM would now like to offer the new network infrastructure to other similarly setup amateur emergency communications organizations. You can find out more about this new network in an article by Phil Wait, VK2DKN, which can be found at tinyurl.com/3ccbys8 (WIA)

**

RESCUE RADIO: PUERTO RICE ORIGINATES IRS FIRST EAS NESSAGE

For the first time ever the government of Puerto Rico originated an Emergency Alert System message during the aftermath of Hurricane Irene.

According to FEMA Integrated Public Alert and Warning System Program Manager Manny Centeno, Puerto Rico had previously used NOAA Weather Radio to originate E-A-S alerts. Centeno noted that broadcasters and cable operators helped the Puerto Rico Emergency Management Agency transmit a message on August 24th.

The hurricane hit the island on August 21st and 22nd, leaving more than one million residents without power.

The Emergency Alert System or EAS is a national warning system in the United States put into place in January of 1997. This, when it superseded the Emergency Broadcast System which in turn had superseded the original CONELRAD System. In addition to alerting the public of local weather emergencies such as hurricanes, tornadoes and flash

floods, the E-A-S is designed to enable the President of the United States to speak to the citizenry within 10 minutes. However, to date the nationwide federal EAS has never been activated. (RW)

**

RESCUE RADIO: CANWARN NET ACTIVATED FOR HURRICANE MARIA

I'm Bill Pasternak, WA6ITF, back with some breaking news.

Ham radio operators in Eastern Canada are being activated once again. This as yet another tropical storm is expected to hit the Maritime Provinces in coming days.

According to Radio Amateurs of Canada, it's expected that Tropical Storm Maria will have a direct impact on Newfoundland, particularly the Avalon Peninsula. Due to a low pressure system that will likely merge, an exact track is difficult to predict. However, in the effected area storm surge, pounding surf, high winds and a unknown amount of rain tht can be expected.

As a result, full activation of a Newfoundland and Labrador Hurricane CANWARN Net will begin at 1430 UTC on Friday, September 17th on 3.740 MHz. Its operation will continue for the duration of the severe weather event. Other amateurs who are within radio range of this net are requested to keep this frequency clear until Hurricane Maria has past the area and net operations are secured. Meantime, hams in the affected area are advised to keep tuned to their local news and weather reports. (RAC)

**

YOUNG HAMS: ARRL FORMS YOUTH IN THE SECOND CENTURY COMMITTEE

The ARRL wants to learn more about getting youngsters into ham radio and has formed a special committee to find out how.

According to a Internet posting credited to K0CA, at its July meeting, the ARRL Board of Directors approved a motion authorizing the appointment of a Youth in the Second Century Committee. ARRL President Kay Craigie, N3KN, has since appointed the committee, which is chaired by Rocky Mountain Division Director and former Amateur Radio Newsline Young Ham of the Year Brian Mileshosky, N5ZGT.

The purpose and goals of this committee are to enhance the League's outreach to potential radio amateurs among America's youth. The League's centennial in 2014 will highlight not only the accomplishments of the past but also point towards Amateur Radio's future. The ARRL believes that meaningful plans to excite young Americans about amateur radio today and in the future must take into account the ideas, lifestyles, and experiences of youthful amateur radio operators.

The Committee on Youth in the Second Century will seek input from younger members of ham radio society and also from adult amateurs

working with young people., It will make recommendations to the Staff and will report to the Board of Directors beginning in January 2012. (K0CA, UseNet)

NEWS OF NEWSLINE: AMATEUR RADIO NEWSLINE JOINS THE HAM NATION TEAM

Amateur radio Newsline is now a weekly feature of Ham Nation on the TWIT TV Internet television network. The announcement was made on the Tuesday evening, September 13th edition when this reporter along with out producer Bill Pasternak, WA6ITF, joined Bob Heil, K9EID, and his co-host Gordon West, WB6NOA, to make the announcement:

--

K9EID: "Each week we are going to bring a couple of minutes of Newsline to Ham Nation and kind of keep our audience up on some of the top news."

--

TWIT TV Network founder Leo LaPorte, W6TWT, was also on hand to welcome us into the Ham Nation family:

--

W6TWT: "We are thrilled to have the addition of regular news on this show. What better place to run Newsline than right here.

--

After that, I had the honor of doing the first of the weekly 2-minute news capsules live. Ill be there for the next few weeks after which former Newsline anchorman Robert Sudock, WB6FDF, will be taking over the weekly Ham Nation news reports.

If you missed the live show, you can download the podcast and listen or watch. Both can be reached by taking your web browser to www.twit.tv/hn.

And less I forget, speaking for the entire Amateur Radio Newsline team, its great to be a part of Ham Nation. (ARNewsline(tm))

**

ENFORCEMENT: FCC FINES LPFM $12000 FOR UNCERTIFIED TRANSMITTER

The FCC has issued a $12,000 Notice of Proposed Liability to Power Ministries' owned low power FM station WRLE (LP), in Dunellon, Florida. This, after a June 2010 investigation of interference to Federal Aviation Administration operations in the near-by city of Jacksonville revealed that the stations transmitter was the source.

After receiving the complaint from the FAA, an FCC agent used direction finding techniques and traced the interfering signal to the WRLE transmitter. When instructed by the agent to turn off the transmitter the operator on-duty refused to do so. Nor would the station owner authorize it.

The agent then spoke to the station owner on the telephone, reiterating the safety of life hazard and requesting that the station turn off its transmitter. The station owner still refused to do so unless his station engineer was present. Thirty minutes later, the owner himself arrived and allowed a station inspection and then turned off the transmitter.

While waiting for the owner to arrive, the field agent noticed the transmitter wasn't certified. The gear was a CSI exciter, model EX20F and a model FM250E PTEK amplifier. When the transmitter was turned off, the agent said that the spurious emissions and interference to the FAA ceased.

Power Ministries later told the FCC the non-certified transmitter had been used at WRLE from March to June of 2010. It added a certified transmitter was being used as of that July.

Traditionally fined low-power FM stations are only fined in the hundreds of dollars for rule infractions. But in making its decision to fine WRLE $12,000, the commission found the violations were particularly egregious because of the safety issues posed to flights into and out of the Jacksonville area. (FCC)

**

ENFORCEMENT: NEW MEXICO ALLEGED POLICE JAMMER DINGED $25,000

The FCC has issued a $25,000 Notice of Apparent Liability to Monetary Forfeiture to Esteven J. Gutierrez. This for his alleged jamming of the Las Vegas Police Department's two way radio system. Amateur Radio Newslines's Norm Seeley, KI7UP, has more:

--

The story goes back to this past February 15th. That's when an agent from the Enforcement Bureau's San Diego Office arrived with an mobile direction-finding vehicle to investigate, locate, and assist in resolving the interference on 159.150 MHz. .

On his arrival, the FCC agent was briefed by the Las Vegas New Mexico Police Department's Deputy Chief about the situation that included the

subject's use of obscenities and threats against police officers and their families. A police sergeant identified the voice as that of to Esteven J. Gutierrez, who was known to the sergeant from prior incidents. The sergeant told FCC agent that he believed that the individual interfering with the dispatch channel was Gutierrez but that he had no known current address.

That evening the subject transmitted on 159.150 MHz making threats to police officers. The San Diego agent, accompanied by the police officers used radio direction-finding techniques and determined that the signal was mobile and was not transmitting from a fixed location.

On February 16th the subject again began transmitting and the agent again used direction finding and that this time the signal was coming from inside a duplex apartment. The San Diego agent informed the police sergeant of the subjects location. The sergeant along with several other officers identified and observed Gutierrez inside the duplex holding a handheld radio and shortly thereafter apprehended him. The San Diego agent and the police sergeant identified the handheld radio as an Icom model IC-F50, tuned to 159.150 MHz.

And now it appears as if its time for Guiterrez to pay the piper for his purported jamming of the Las Vegas, New Mexico Police communications system. While the combined base forfeiture for this sort of illegal action is $17,000 the rules give the FCC leeway in assessing a proposed fine. In this case the agency says that it finds Gutierrez's alleged misconduct particularly egregious because his unlicensed operation included willful and malicious interference police operations. Based on this the FCC says that an upward adjustment of $8,000 to the combined base forfeiture is warranted. Adding the two amounts together, that's $25,000 that the FCC wants for Guiterrez to pay.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona

--

Guiterrez was given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT REQUIRED: HACKER ISSUES FALSE TERROR REPORTS ON NBC NEWS WEBSITE

Talk about a truly sick joke. On the eve of the 10th anniversary of the 911 terror attacks on New York City and the Pentagon, a hacker gained access to the Twitter account of NBC News and sent out a handful of false tweets about a suspected hijacking and a plane attack at ground zero.

Staffers at NBC noticed the false tweets at around 6 p.m. Eastern time on Friday, September 9th. They quickly contacted Twitter and had the account suspended. NBC News anchor Brian Williams then read a statement on the air saying the reports were false. Several hours later the NBC Twitter account was restored and the false postings were removed.

A group calling themselves Script Kiddies mentioned themselves in the tweets and appeared to be responsible. NBC says that it has contacted authorities including the New York Police Department and FBI about the incident. As we go to air, several investigations are underway. (Published news reports)

BAND PLANNING: ARRL LOOKING AT SHF BANDPLANS

The ARRL Board has established a committee to update the suggested band plans on 33, 23, 13 and 9cm. If you are active on any of these bands or are using them in any unique ways, please send your e-mail address to Southwest Division Vice-Director Marty Woll, N6VI, who serves on that committee, and he'll let you know how to provide your input to the process. His e-mail is N6VI at arrl dot org. Or you can contact your Division's representative on the group. (ARRL Southwest Div. Communicator)

STUFF FROM SPACE: LOOK OUT BELOW

A NASA official says that the decommissioned Upper Atmosphere Research Satellite is expected to re-enter Earth's atmosphere in an uncontrolled fall in late September or early October. Much of the spacecraft is expected to burn up during re-entry, but some pieces are expected to

make it to the ground,

The Amsat News Service says that Leonard David reported in his September 7th Space Insider Column that NASA computer analysis showed about 150 component types, including the parent body of the satellite, will burn during re-entry, but up to 26 would endure the fiery fall to Earth. The analysis indicated a surviving mass of 1,170 pounds will reach Earth within a debris footprint some 500 miles long.

NASA says that the risk to public safety or property is extremely small but admits that there is a chance that pieces of debris from the satellite will crash in areas accessible to the public. It asks that if you find something you think may be a piece of the fallen bird that you do not touch it. Instead, please contact a local law enforcement official for assistance.

The Upper Atmosphere Research Satellite is 35 feet long, 15 feet in diameter, and weighs 5.7 metric tons. It's operational orbit was at 375 miles inclined at 57 degrees to the equator. The full story of its upcoming demise was published on September 7th on the Space.com website at tinyurl.com/falling-satellite. (AMSAT News Service, Space.com)

HAM RADIO IN SPACE: CUBESAT STRAND-1 GETS OPERATING FREQUENCY

The International Amateur Radio Union Satellite Frequency Coordination Panel has agreed a frequency of 437.575 MHz for the UK STRaND-1 CubeSat. This satellite will carry a Smartphone and plans to have a UOSAT style speech synthesizer and a 9600 or 19200 bps AX.25 packet downlink.

STRaND-1 is a 3 unit mini-bird measuring only 30 by 10 by 10 cm. and weighing 4 kg. Unlike previous CubeSats STRaND-1 will feature full 3-axis control with the attitude an orbit control system comprising a nano-magne-torquer, nano-reaction wheels, GPS receiver, 8 pulse plasma thrusters and a butane thruster.

A six page article on STRaND-1 appeared in the Spring issue of OSCAR News available at tinyurl.com/strand-one. (M5AKA)

**

VICARIOUSLY IN SPACE: NEW NASA WEB SPACE RIDE ALONG

NASA is giving the public the power to vicariously journey through the solar system using a new interactive Web-based tool. The "Eyes on the Solar System" interface combines video game technology and NASA data to create an environment for users to ride along with agency spacecraft and explore the cosmos. Screen graphics and information such as planet locations and spacecraft maneuvers use actual space mission data. You can begin your ride at solarsystem.nasa.gov/eyes (ANS)

HAM RADIO AND THE WWW: HAM RADIO DELUXE WILL CONTINUE

Development of the very popular Ham Radio Deluxe software suite will continue. This with word that its current developer, Simon Brown, HB9DRV, has accepted an offer from Mike Carper WA9PIE, Randy Gawtry, K0CBH and Rick Ruhl, W4PC, to purchase the source and rights to it.

Ruhl has blogged via QRZ dot com and Facebook that they plan to continue the development and support of this fine product. Among their plans appear to be a new Digital Desktop for certain Alinco, Icom, Kenwood and Yaesu radios. This would allow the use of a single USB cable to interface with select radios or a full version for MFJ, Kantronics or AEA Terminal Node Controllers. This in turn would permit faster access for emergency communications operators to their Packet TNC's.

As to when a new edition of Ham Radio Deluxe will be made available? Ruhl, who owns W4PC Software says to be please patient. A formal announcement will be forthcoming in the not to distant future. (W4PC via QRZ and Facebook)

**

HAM RADIO ON THE WEB: ADIF SEARCH WIDGET AVAILABLE FROM DH9SB

And DH9SB has announced that because more and more DXpeditions use Wordpress, that he has written a widget for Wordpress that can do a search for callsigns in the operations logs. It supports more than one callsign and references. Also, the log can be uploaded as A-D-IF to different electronic logbooks. More information on this software plug-in is available at tinyurl.com/wordpress-widget. (DH9SB)

WORLBEAT: SOUTH SUDAN TO MOVE ITS CAPITAL CITY

South Sudan's Information Minister Marial Benjamin says the new nation is planning to move its capital from the bustling but crowded city of Juba to a town that offers ample room to expand.

Marial Benjamin released a statement on Sunday, Septembr 3rd that said the government has secured more than 15 square miles of land in the town of Ramciel, which he says lies along the Nile River in Lakes State. The current capital of Juba, in the south, only allocated less than 2 square miles. Benjamin says the plan's implementation will take several years.

Deputy speaker Daniel Awet Akot added the new capital city is located some 150 miles north of Juba. The South Sudan became independent in July after a January referendum. It came to the ham bands with the ST0R DXpedition which racked up over 121,000 QS0's in its time on the air this past July 22nd through August 10th. The ARRL approved the ST0R operation for DXCC credit on August 5th. (Southgate)

**

DX

The long awaited 4W6A Timor - Leste DXpedition should be fully operational by the morning of September 17th, UTC time. The team will be active as 4W6A from Atauro Island 160 through 10 meters, using CW, SSB and RTTY with up to four stations simultaneously. MM0NDX is their pilot station for the operation and may be contacted at dxer59 (at) gmail (dot) com. QSL as directed on the DXpedition website at www.4w6a.com.

WB6OJB and K5LBU will once again be active from Lesotho as 7P8JK and 7P8CF, respectively. This, through September 22nd. In their last operation WB6OJB was on the 40 through 10 meters using mostly SSB with some CW. K5LBU will probably be mainly on PSK31 and RTTY. QSL via their home callsigns.

IN3VZE will once again be active from Malawi as 7Q7CE from the shack of his friend 7Q7HB through and October 3rd. His operation will be holiday style on 80 through 10 meters using SSB and RTTY. QSL via his home callsign, by the Bureau or direct.

JK1KSB, will once again be operational as 8Q7SO from Mirihi Island in the Maldives between October 28th and November 4th. His activity will also be holiday style on 80 through 10 meters using CW, SSB, RTTY and PSK31. QSL via his home callsign.

N1SNB will be active as 6V7V from La Somone, Senegal during the CQ World Wide DX CW Contest on November 26th and 27th. Outside the contest he plans to be on 160 and 80 meter CW and SSB from November 23rd to the 29th. QSL via N1SNB.

Lastly, Members of the "Holyland DX Group" will be active as 4X5A from Akhziv Island between 0700 UTC on Friday, October 21st through 1200 UTC on Saturday, October 22nd. Operation will be on 40 through 10 meters using CW and SSB. QSL via 4Z5LA.

**

THAT FINAL ITEM: HERE COMES THE BRIDE - ON ATV

And finally this week the story of a couple that will soon be getting married with a world wide audience. This thanks to fast scan amateur television. Robert Broomhead, VK3DN, of the W-I-A News spent some time with the happy couple and learned a lot more:

--

Audio report only. To hear it please download the MP3 version of this newscast at www.arnewsline.org

--

Our congratulations to Emily and Matthew and thank you for sharing the wonderful day iin your lives with all of us.

GB2RS NEWS

Sunday 18th September 2011

The news headlines:

* National Hamfest coming soon

* New CASHOTA award scheme

* RSGB Convention programme updated

The National Hamfest takes place on Friday 30 September and Saturday 1 October at the Newark and Notts Showground. It is organised by the RSGB in conjunction with the Lincoln Short Wave Club. Headphone and microphone specialist Bob Heil will be visiting the National Hamfest with Waters and Stanton and will also be running a workshop each day. He's been talking to Chris Jones, G0PIO from the Lincoln Short Wave Club, about his life and times. The interview can be heard on the National Hamfest website, www.nationalhamfest.org.uk. There will be a wide selection of other lectures over the two days. These include Klaus Lohmann from FlexRadio, the Group of Earth Observation and Essex CW ARC. All the details about the event, including discount tickets, can be found on the website www.nationalhamfest.org.uk.

A new amateur radio award scheme is being launched by Castles and Stately Homes on the Air. The new award covers Royal Observation Corp Bunkers and facilities and is open to any interested persons. All details of UK Bunkers, as well as details of the award and how to complete it, can be found at www.rocbunkers.co.uk. The first event ROC Bunkers will be holding will be ROC Month in October 2011, so why not visit the website and become part of this secret heritage?

The latest programme and lecture information on the RSGB Convention is available on the website www.rsgb.org/rsgbconvention. Single day or weekend tickets are selling fast, as are the overnight accommodation packages, because this year's programme is proving popular. There's a wide variety of talks for all interests, whether you are new to amateur radio or more experienced. The Contest University stream has been expanded over two days, with an opportunity for budding contesters to get together with the owners of some of the best contest stations who are willing to open their contest station to newcomers. There's also plenty to interest the VHF visitors too with talks on EME, microwave and satellite communications. For all the latest information, visit the Convention website at www.rsgb.org/rsgbconvention.

The IARU Region 1 HF Committee meeting minutes caused some alarm and confusion over the future of 7030kHz as the QRP centre of activity. This relates to the discussion about moving the frequency, and possible further discussion at the Region 1 Interim Meeting in 2013. It is important to note that these discussion points did not feature in the minutes of the final General Conference Plenary. The question as to whether 7030 kHz is the best frequency for the QRP CoA was raised in the context of discussing the DARC proposal to change the 40m Contest Preferred Segment. The HF Committee decided that this change couldn't be done without first seeking the views of the Region 1 QRP community. Whilst there is no formal Recommendation to discuss this matter at the 2013 meeting, the RSGB considers it sensible to be prepared, should this issue be raised, by seeking views from its members, as well as working closely with the G-QRP Club. As announced in last week's GB2RS, this discussion will be coordinated within the Spectrum Forum, which next meets on Saturday 5 November. The RSGB will always consult with its members and the G-QRP club before proposing or implementing QRP-related plans. The latest edition of the Six and Ten report is now available at http://g7kse.co.uk/6and10. The Six and Ten Reporting Club is an informal group of radio amateurs, mostly from the UK, who are interested in propagation studies at frequencies around the HF to VHF boundary, mainly the 6 and 10 metre amateur bands. The club produces a monthly newsletter that includes analysis of 28MHz propagation based on beacon monitoring, analysis of 50MHz activity reports broken down by propagation mode, reports and discussions on unusual propagation events, compilations of solar and geomagnetic data, lists of activity world-wide, beacon news, and results of ongoing experiments.

In under a year, the AMSAT-UK FUNcube Yahoo Group has achieved over 2000 members. The group was created by Rob, M0TFO to provide support for the AMSAT-UK FUNcube satellite and the FUNcube Dongle software defined radio. The FUNcube satellite project is an educational CubeSat project with the goal of enthusing and educating young people about radio, space, physics and electronics. It will support the educational Science, Technology, Engineering and Maths initiatives and provide an additional resource for the RSGB GB4FUN Radio Communications Demonstration Module. The target audience are school pupils in the 8 to 18 age range. As well as providing a strong 145MHz telemetry beacon for the pupils to receive FUNcube will also have a 435/145MHz linear transponder for amateur radio SSB/CW use. Graham Shirville, G3VZV and Howard Long, G6LVB will be at the RSGB Convention in October talking about the FUNcube project and FUNcube Dongle.

The 18th Region 1 ARDF Championships was held in the Romanian resort of Baile Felix in early September. It was the RSGB M40 team who were the stars this time as they obtained 4th place in the 80m team event. This followed on from a 5th place in the 2m event two days earlier. The team comprised Andrew Soltysik, G4KWQ, David Williams, M3WDD and SWL Steve Chalk.

Do you fancy being on TV? The ITV1 dating show Take Me Out is looking for an amateur radio enthusiast to appear on the show. For further

information contact Lewis Evans on 02076 916 239, or e-mail lewis.evans@talkbackthames.tv.

And now for the details of rallies and events for the coming week

The 21st Great Northern Hamfest takes place in the Metrodome Leisure Complex, Barnsley S71 1AN today, 18 September. Doors open at 11am and there will be trade stands and special interest groups. More information from Ernie, G4LUE on 01226 716 339.

Today, 18 September, the Belgium Amateur Radio & Computer Rally takes place at Hall Lotto Mons Expo, Mons, which is 50km south of Brussels. Doors open at 9am and talk in is available via repeaters on 145.600MHz & 430.325MHz. Plenty of international traders will be present. Details at www.on6ll.be.

The Midland Amateur Radio Society will be holding an open day, at the club QTH, from 10am to 4pm on 24 September. Plans are under way for refreshments, opportunities to meet the training staff and there will be displays of photographs, QSL cards. A prize exhibit is the original 1931 minute books and their cups and awards. They will also be on the air using GB8OTH. More information is on the club website, www.midamradio.net.

Now for the news of special events Throughout September, special event station GB2JB will be on the air. It commemorate the life and birth place of Jack Binns, radio operator of the Passenger Ship Republic in 1909. Operation will be from Coney Court, Brigg, and is run by Brigg & District Amateur Radio Club.

Northumbria Amateur Radio Club and the Border Amateur Radio Society will be at Barmoor Castle near Lowick in Northumberland on Sunday 18 September. They will be operating GB2BCL to commemorate the battle of Flodden Hill. GB2BCL will be operational on most HF frequencies. The event manger Roy, G0AXJ welcomes visitors to the station that will be active from 10am through to 7pm. GB2BCL will be situated at Barmoor Castle West entrance gate. Talk-in will be available on 145.500MHz. For more information please visit www.g4aax.org.uk or telephone Roy on 07421 659 150.

Crewe Heritage Centre ARC will be taking part in the Railways on the Air weekend on 24 and 25 September. They will be operating two stations using SSB and Digimodes from the First Class carriage of the Advanced Passenger Train prototype that is on permanent display at the centre. Using GB4CHC, the club hopes to work as many stations as possible during the two days on all HF bands.

And now the HF DX news compiled from 425 DX News and other sources

4W6A will be on the air from Timor-Leste until 26 September. Operation is on all bands from 160 to 10m, using CW, SSB and RTTY, with up to four stations active simultaneously. The QSL manager is M0URX, either direct with an SAE plus 1 IRC or $2, via the bureau, or LoTW.

Arnold, WB6OJB and Frosty, K5LBU will be active as 7P8JK and 7P8CF from Lesotho until 22 September. QSL via their home callsigns.

A Belgian team attempt at landing on Rockall in May 2009 was unsuccessful due to the weather conditions at the time. They are now planning to try again, with the projected date being around 27 and 28 September. Rockall is the rarest of the European IOTA islands. It has only been activated once, a few years ago, when just over 200 QSOs were made. The IOTA reference is EU-189. The website to check is www.rockall.be.

A group of operators from the Czech Republic will be in Greenland from until 26 September. They will sign OX4OK and also OX/homecalls. Look for them on 80 to 10m and also on 2m EME.

Ely, IN3VZE will be active as 7Q7CE from Malawi until 3 October. He will operate holiday style on 10 to 80 metres SSB and RTTY. QSL via home call, direct or bureau.

Guenter, DL3NBI will be active as IA5/DL3NBI from Isola del Giglio, which is EU-028, until 22 September. He plans to operate PSK, RTTY and SSB, mainly on 20 metres. QSL via home callsign either direct or via the bureau.

Now the contest news

The Worked All Britain 144MHz Low Power Phone Contest takes place today, 18 September, from 1000 to 1400UTC. Low power means a maximum power of 10 watts. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager, G3XKT, by e-mail to aebbooks@ntlworld.com. Also today, 18 September, the BARTG Sprint 75 takes place from 1700 to 2100UTC. All activity is on 75 bauds. Exchange a serial number only. Entries are single-op only and all-bands only, with sections for experts, defined as anyone who has had a top 10 placing in any BARTG contest from 2008 onwards.

Tuesday 20 September sees the 1.3GHz UK Activity Contest taking place from 1900 to 2130UTC using all modes. The exchange is signal report, serial number and locator.

The CQWW RTTY DX Contest lasts for the full 48 hours next weekend, 24 and 25 September. Starting at 0000 and finishing at 2359UTC, exchange a signal report and CQ Zone Britain is 14. Some rare countries ought to be active in this one. There are too many entry categories to list here though.

The Practical Wireless 70MHz Contest takes place for four hours on Sunday 25 September from 1200 to 1600UTC. It has sections for Low Power, meaning 10W or less, and Full Legal. The exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 5th to the 11th of September, compiled by Neil Clarke, G0CAS, on the 12th of September.

This week solar activity was high on the 6th, 7th and 8th. The largest solar flare of the period was on the 6th and was rated as an X2/2B. Activity was moderate on the other days except for the 11th, which was low. The largest solar flares took place during the hours of darkness and Europe missed the strongest of the sudden ionospheric disturbances, but was affected by some weaker ones on some days. A number of coronal mass ejections took place that headed our way and there were even more that did not. Solar flux levels declined slightly from 119 units on the 5th to 110 by the 8th but then recovered back to 121 by the 11th. The average was 115 units. The 90 day solar flux average on the 11th was 100 units, that's two units up on last week. X- ray flux levels declined from a high of C1.6 units on the 5th to B4.2 units on the 9th. The average was B5.4. Geomagnetic activity started at quiet levels with the Ap index in single figures but around midday on the 9th the first of the coronal mass ejections arrived and activity increased briefly to major storm levels. The Ap index on the 9th was 36 and 33 units on the 10th as the storm rumbled on. The average was Ap 14 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 330 kilometres per second on the 5th to around 600 kilometres per second from the 9th through to the 11th. Particle densities were low but increased to 33 particles per cubic centimetre on the 9th and 16 on the 10th. Bz on the quiet days varied between minus and plus 3 nanoTeslas and between minus 23 and plus 16 nanoTeslas at the height of the storm on the 9th. Anybody who wants to keep up to date on a daily basis or in near real time can do so easily by typing spotsandflares as one word into their favourite search engine. A radio aurora at 50 and 144MHz started on the 9th and lasted until early on the 10th. High-latitude stations, as usual, had the best of the event, although some contacts were reported as far south as 52 degrees north.

And now the solar forecast. This week solar activity is expected to vary between low and moderate levels. In general, over recent weeks, solar activity as increased with solar flare-producing sunspot groups appearing regularly. This pattern looks set to continue. Solar flux levels should around 100 units or maybe slightly higher than that. Geomagnetic activity should be at quiet levels every day, with no coronal hole disturbances expected. However, activity could increase if a large flare and a subsequent coronal mass ejection heads our way. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows are expected to be about 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate of about 18MHz. the best time to try this path will be between 1500 and 200 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS A new volunteer GB2RS news reader is required to join the current team of two reading the news at 10.30am on 145.525MHz in the Lincoln and Skegness area. The volunteer must be a member of the RSGB and willing to read the news on Sundays, taking it in turn with the existing two readers, G0EJQ and M0WDE, on a rota basis. If you would like to consider volunteering, then please contact the GB2RS News Manager Gordon Adams, G3LEQ, on 01 565 652 652 for further information.

On Monday 19 September Gloucester Amateur Radio & Electronics Society is having a workshop and VHF operating evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 19 September Lincoln Short-Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 19 September South Birmingham Radio Society is holding a committee meeting. Contact Don, on 01214 581 603.

On Monday 19 September Welland Valley Amateur Radio Society is having an operating night on the HF bands. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 20 September Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 20 September Loughborough & District Amateur Radio Club is holding a back to the 40's night. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 21 September Lincoln Short-Wave Club is having a planning meeting for National Hamfest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 21 September Midland Amateur Radio Society is making final arrangements for the society's 80th birthday celebrations. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 21 September South Kesteven Amateur Radio Society is planning its trip to the National Hamfest. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 21 September Telford & District Amateur Radio Society is having a treasure hunt with 2E0TRO. Contact Mike, G3JKX, on 01952 299

677.

On Thursday 22 September South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603. On Friday 23 September Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777 363.

On Friday 23 September Hucknall Rolls Royce Amateur Radio Club is having a talk by RSGB region 13 representative Steve Boden. More information from Dave Wilde, G1YAI, on 08444 355 593.

On Friday 23 September South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 24 September Cheltenham Amateur Radio Association commences its weekend event operating GB0GWR at Cheltenham Racecourse Station. Contact Derek Thom, G3NKS, on 01242 241 099.

On Saturday 24 September Lincoln Short-Wave Club is preparing for National Hamfest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Saturday 24 September Midland Amateur Radio Society opens its 80th birthday exhibition at the church hall from 10am to 4pm. Details online at www.radioclubs.net/mars.

On Saturday 24 September South Birmingham Radio Society is visiting the MARS 80th birthday exhibition. Contact Don, on 01214 581 603.

On Sunday 25 September Hinckley Amateur Radio Society is having a talk on Railways on the Air by John, M0JAV. Details from John, M0JAV, on 07836 731 544.

NEWS FOR THE NORTH OF ENGLAND We start with advance notice of a Train the Trainers day at Preston Amateur Radio Society on Sunday 30 October from 9am. The venue is the Main Hall, Lonsdale Club, Fulwood Hall Lane, Preston. The cost is £5, including lunch. Details are on the web at tinyurl.com/preston-ttt. Please book in advance.

On Sunday 18 September Angel of the North Amateur Radio Club is at the Great Northern Hamfest. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 19 September Angel of the North Amateur Radio Club is having a report on the rally and discussing future projects. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 19 September Sheffield Amateur Radio Club is having a talk by Nick, G4FAL on the DXpedition to Christmas Island, T32C. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 19 September Thornton Cleveleys Amateur Radio Society is having a talk by Ted, G3WBB, on the mint with a hole. Details on the web at www.tcars.org.uk.

On Tuesday 20 September Chester & District Amateur Radio Society is discussing the other man's shack. Details from Barbara Green on 07957 870 770.

On Tuesday 20 September Stockport Radio Society is having a presentation on old car radios by John Shufflebotham. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 21 September Denby Dale Radio Club is having a talk on the G8PUT logbook project. Details from Richard, M0RBG, on 07976 220 126. On Wednesday 21 September Hornsea Amateur Radio Club is having a visit by the RSGB President to help celebrate the 40th anniversary of HARC. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

RAC Bulletin 2011-029E - Nominations for Canadian Amateur Radio Hall of Fame are due by Sept. 30.
2011-09-16

This award recognizes deserving Canadian amateur radio operators for outstanding achievement and sustained service to Amateur Radio in Canada or to Amateur Radio at large. Nomination forms and details of the procedure are available from the RAC website, or http://www.rac.ca/en/rac/programmes/hall-of-fame/

For consideration in 2011, nominations and supporting documents must be submitted to RAC headquarters by the close of business on Friday, Sept. 30, 2011.

SARL NEWS - SUNDAY 18 SEPTEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with deep regret that it must be reported that the key of Theo Mcdulling, ZS1JM, went silent on the 2nd September 2011 at the age of 77 years.

Our sincere condolences to the relatives and friends of Theo.

(PAUSE)

In the news today:

SARL RADIO TECHNOLOGY IN ACTION HEADS FOR GAUTENG SATURDAY THIS WEEK

SARL GIVES FEEDBACK TO ICASA

INTERESTING BOOK FOR AMATEURS IN FLATS AND GATED COMMUNITIES

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL RADIO TECHNOLOGY IN ACTION HEADS FOR GAUTENG SATURDAY THIS WEEK

The 2011 SARL Radio Technology in Action Symposium will be held in Gauteng on Saturday 24 September at the National Amateur Radio Centre and the Sentech auditorium. The programme features some interesting discussions and presentations. There are also some great prizes to be won by simply attending. Entrance cost is R60 which includes refreshment an a finger lunch. Students and scholars who pre-book enter fee of charge.

SARL Vice President, Mark Zank, ZS6YES, will talk, in line with national heritage day, about the Heritage of Amateur Radio and where to

next. In the panel discussion the debate will be about "what if we could have an advanced Amateur Radio license in South Africa, what should it look like"? Chairmen of the Gauteng Club have been invited to participate in the debate.

John Willescroft will be taking about FPGA's and Hannes Coetzee about application of Software Defined Radio in Amateur Radio. He will take a practical approach and demonstrate his design that won the innovation competition.

Full details will be on the web this weekend at www.sarl.org.za.

SECOND LEG OF THE SARL VHF/UHF CONTEST THIS WEEKEND

The second leg of the SARL VHF/UHF contest is in full swing this weekend. There are still a few hours left to make contact with stations in rare grid squares.

VHF/UHF contests should be the test of operator ability and station design but the overriding aim is to get away for the weekend and have fun. But next after that, the aims are: To promote activity on the VHF/UHF and microwave bands, to encourage amateurs to work greater distances than usual by operating portable and/or improve antenna systems, to provide opportunities for people to activate or work new grid squares. Look about for 7P8EME they are on the air from Lesotho.

SARL GIVES FEEDBACK TO ICASA

This past week the SARL has given feedback to ICASA on a number of issues around regulations including minimum age for a class B licenses and receivers with continuous tuning. The SARL is of the opinion that there should be no minimum age for persons wishing to become a radio amateur provided they pass the relevant examination and practical test. The SARL made suggestions to ICASA how the regulation dealing with receivers with continuous tuning can be changed to accommodate the requirements of radio amateurs. The SARL also had the opportunity to check the table of Amateur frequency spectrum allocations which are now correct and ready for publication in the Government Gazette.

INTERESTING BOOK FOR AMATEURS IN FLATS AND GATED COMMUNITIES

The ARRL has published an interesting new book entitled "Small antennas for small spaces". It is a valuable resource for amateurs who live in apartments, condominiums, or houses on small lots. Filled with practical advice, this book guides you to finding the right antenna design to fit whatever space you have available. In the book you'll find ideas and projects that will get you on the air regardless of where you live! The book includes a collection of limited-space antenna ideas from well-known amateurs, including the innovative Folded Skeleton Sleeve 40 and 20 Metre Dipole Antenna by QST Technical Editor Joel Hallas, W1ZR.

The book is available in South Africa from the SA Amateur Radio Development Trust at R300 plus R30 packaging and posting. For more details about this and other books visit www.amateurradio.org.za/books.htm.

SARL MEMBERSHIP CLOSE TO THE 1 300 MARK

The membership of the SARL stood at 1 272 this Friday and we hope to break the 1 300 mark during the coming week.

If you have not yet renewed you will still have a few more days before your membership benefits will end. Pay by cheque, by bank deposit or electronics transfer. Details are on the invoice you received or call Mariska on 011 675 2393.

7P8EME DXPEDITION FUNDING

The SARL 7P8EME DXpedition appeal campaign is still in full swing. The target is R10 000. As of today the fund stands at R5 200. Go to www.amateurradio.org.za/7P8.htm for details. Please remember to send an email to artoday@sarl.org.za so that your contribution is recognised.

PLANNING TO WRITE THE RAE ON 20 OCTOBER?

RAE students are reminded that the closing date for registration for the 20 October Radio Amateur Examination is on 25 September. No late entries can be accepted. The various forms to be completed can be found on www.sarl.org.za or follow the link on the SARL Today news item on the home page.

NEED A QSL ROUTE?

Here are some great free sites for you and your friends - http://www.dailydx.com/routes.html.

K2TQC, Bill Gibbons, reports tracking down a QSO, and eventually QSL, for JZ0PH from an August 1961 QSO with Netherlands New Guinea, which was deleted from the DXCC list April 30, 1963. The operator Joop Hesp is now ZS6C. This was country No. 383 for K2TQC.

YL'S AND XYL'S ON THE GO

Heather, ZS6YE, started a YL Group. She is sends a monthly mail with interesting news to YL'S. A new Ham YL's Facebook profile has also been created. All YL's are invited to join the group; there are already several international YL's who are also friends of the group. Please contact Heather at ylgroupsa@yahoo.com or Anette zr6delta@gmail.com if you want your name also on the mailing list. Any YL and XYL is welcome to forward any interesting news to be included in the newsletter. The group is looking forward hearing from you girls.

FOLLOW A HIKING GROUP

On the 26th of Sept a group of hikers will start a 12 day hike in the Drakensberge range. It will start at Mount Aux Sauces and end at Boesmansnek.

Amateur radio will be used for communication, and to this end Johan Leslie, ZR4CAA, is a member of the group.

Base camp will also be run by a radio amateur, John Longland, ZS6AA. Use will be made of the 40 m, 80 m and the 2 m bands. For quite some time now, tests have been ongoing around the communication procedures and these procedures will be on the website www.crossroadsadventure.co.za by Monday. The procedures are aimed at making compact communications possible between the group and base camp, at certain scheduled times.

Radio amateurs are requested to listen out for these call signs and assist when an emergency situation seems to be arise by following the procedures on the website. Ragchews with the group will not be possible as they have limited battery power, but they aim to have a session at the half way mark.

CLUB NEWS

The Centurion Radio Amateur Club will again commence with technical discussions on the club's two meter repeater on 145,775 MHz. on Sunday evenings, commencing at 19:30.

For this coming Sunday Pine, ZS6GS,T plans to discuss a little known aspect of HF propagation, namely - "Magneto-ionic holes", and also tell a tongue in cheek short story.

If you are in range of the repeater, do come along and listen to these very interesting discussions. Please report in if possible.

The discussion will not take place when there is an Intecnet broadcast that evening.

MAGALIES CLUB COMMITTEE

At the club's AGM held on 10 September, committee members for the 2011 - 2012 period were elected as follows:

Chairman Thys Mar&#65533;, ZS6MJM Vice chairman Johann du Plessis, ZSZ6PSS Secretary Anette Jacobs, ZS6D Treasurer Louis Mitchell, ZS6LWM Technical adviser Sam van Zyl, ZS6JZ Digital Hannes Enslin, ZS6JDE Teenspanning: Marco Nel, ZS6MJ Social Gordon Forbes, ZS6FI Public relations Chris Smit, ZS6FCS Youth co-ordinator Johann du Plessis, ZS6PSS Competition manager Quartus de Witt, ZS6EE.

The retiring committee thanks all the MRK members for their support during the past year and wish strength to the new committee for the activities for the coming year.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that sunspot complex 1 295-1 296 has more than doubled in area and quadrupled in spot count since September 14th and is crackling with C-class flares. Another sunspot appears to be forming on the southeast portion of the sun. An increase in solar

activity is further possible during the week.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 92, a new high for this cycle.

20 to 15 m will provide the best DX opportunities with some exciting 10 m openings also possible due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS Still make a financial contribution towards the 7P8EME DXpedition which ends on 26 September. 18 September - Last day to submit logs for the ZS6JVT Youth Spring Sprint Competition. 18 September - Tonight, at 19:30 Centurion Club's technical discussion on 145,775 MHz. in Pretoria. 23 September - Take your hand-held to work today. 24 September - RTA in Gauteng. 25 September - Last day to enrol for the October RAE. 25 September - Intecnet at 19:30. 26 Sept/7 Oct - ZR4CAA and ZS6AA active with Drakensberge hiking group. 15/16 October - Jamboree on the air. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73.

NZART Headquarters Info-line Issue 238

18 September 2011

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· NZ Amateur Radio Day promotion

· KORDIA National System Award

· Call Book branch listings

· Details of the Jack Files Memorial Contest

· Housekeeping

· Conference 2012 – Nelson. Attachment.

Debby Says…I had a call from a gentleman who had some books to give away. Never one to say no to a freebee, I thought that someone out there may be interested in what he has to offer, so I asked him to send me an e-mail so that I could include all the details in this issue of HQ Info-line.

Radio and electronics magazines – from 1961 to 1982. All in fair to good order. Free to a good home (though there would be a transport cost outside Wellington)

“Radio, Television and Hobbies” (Australian) – all from Dec 61 to Dec 64 except Nov & Dec 63.

“Electronics Australia” – All from Oct 67 to May 83 (with a few before and after those) except Nov 77, Sep 80, Apr 81, May & Sep 82.

“Wireless World” (UK) – most from Aug 75 to Jan 80 (missing are Dec 75, Jun & Nov 76, Feb, Nov & Dec 77, and Oct 79)

If you are interested in these, please email djmiller@clear.net.nz

Call Book updates…later in this issue of HQ Info-Line the Call Book compiler has asked that those branches who have yet to advise their details, to forward them to him as soon as possible. I would also like to suggest you all take a look at SMART to ensure your records are accurate. The information produced in call book comes from the RSM

database, so if there are errors then you need to advise them ASAP.

Talk soon…Debby ZL2DL

NZ Amateur Radio Day Promotion
A couple of months after the 2011 NZARD, Topsy Scott ZL2LS and I discussed
an idea that is worth looking at now.

Many branches of NZART played a part in NZARD 2011 and there were many different presentations that I'm sure were excellent.

How about we send to this reflector, (arpromo@nzart.org.nz) suggestions and details of presentations that we made in 2011 so others can use suitable bits that would fit into their plans for the day in 2012.

Topsy also suggested that we should try and collect any brochures, pamphlets or handouts that clubs have and that we store them at an NZART site for others to amend and use for their own future presentations and field days etc.

So… if you have plans for NZARD, send them to this reflector and
if you have earlier brochures etc please send them as an attachment to arpromo@nzart.org.nz

Thanks and 73,
David ZL1DK

Jack Files Memorial Contest

Greetings to our neighbours in ZL!

This is a quick email to inform NZART and Papakura directly of the upcoming Jack Files Memorial Contest.

It is due to take place on October 22nd this year (1 week prior to the CQWW).

All the relevant information can be found on the website at www.jackfilesvk.blogspot.com

We have revised the rules and added extra incentives to get more ops in ZL and VK on the air. If you require any further info don't hesitate to contact me.
Derek VK4MIA

Happy Feet and Don Wilson

For those of you who attended conference here in Upper Hutt this year, you will be familiar with the following guy ‘Don Wilson’ who entertained us on the Sunday evening. If you follow the links below, he has written, sung and starred in a youtube clip about Happy Feet, the penguin found on the Kapiti Coast.

‘The ballad of Happy Feet’, the adventurous Emperor penguin.

Here are direct links to the video :

http://www.youtube.com/watch?v57ySL07_M

http://www.youtube.com/user/Donwilsonmusic

The audio download for The ballad of Happy Feet is available from iTunes :

http://itunes.apple.com/nz/album/the-ballad-happy-feet-single/id454745906

for less than $2.00, half the proceeds of which will go to the Happy Feet Appeal supporting the work Wellington Zoo does with penguins, and other animals.

A foundation course and exam will be held over the weekend of Friday 28th and Saturday 29th October and on the weekend of Friday 25th and Saturday 26th November 2011. Any individuals wishing get on the first step of amateur radio should register for the course by Monday 10th Oct 2011 and by Monday November 7th November for the November foundation course. To register go to http://www.muarc.com/courseapplicationform.htm and complete the form. More information can be gained by contacting the exam secretary Martin MI0YMF on 028 (048)38852712.

An Intermediate course will be held over 12 weeks, starting Wednesday 11th January 2012. Registration is Monday 12th Dec 2011. To register go to http://www.muarc.com/courseapplicationform.htm and complete the form. More information can be gained by contacting the exam secretary Martin MI0YMF on 028 (048)38852712.

DX News

Murat TA1AMC has been heard on the bands in recent days signing T5/TA1AMC from Somalia. It is reported that he is a member of the Turkish Ministry of Health National Medical Rescue Team and that he will be QRV from Mogadishu for the next three months. At present his DXCC status is uncertain but it looks like a case of 'Work First Worry Later'

The multi-national DXpedition to Rotuma is expected to be on the air from 27 September and will be active till 7 October. The callsign will be 3D2R and operation will be on all bands 160-10m with CW, SSB, RTTY, PSK and SSTV plus 6 and 2m EME. QSLs go via YT1AD and the logs will also be uploaded to Logbook of the World.

PA1LP will be active from Surinam in South America using the call PZ5LP from 18 September until 15 October. QSLs go via his home call.

Jelly Batteries

A new polymer jelly could be the next big step forward for lithium batteries. The jelly replaces the volatile and hazardous liquid

electrolyte currently used in most lithium batteries. Researchers from the University of Leeds hope their development leads to smaller, cheaper and safer gadgets. Once on the market, the lithium jelly batteries could allow lighter laptop computers, and more efficient electric cars.

5 MHz Newsletter now online

A new Newsletter has been launched to support the growing number of 5 MHz operating permissions globally - it's the 5MHz Newsletter. Edited by Paul Gaskell, G4MWO, one of the original RSGB 5 MHz team, it aims to be both an accurate information source of news about 5 Mhz and a platform for exchange of ideas, be they theoretical, operational, constructional or just general comments about the band. You can freely access the 5 MHz Newsletter from Google Documents at http://tinyurl.com/6fkhcmf

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

880. [RAC-Bulletin] RAC Bulletin 2011-030E - Simulated Emergency Test - SET - October 15, 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-09-18 21:08:16 UTC
From: rac-bulletins@eton.ca
Message-ID: <4E765D3F.5030903@rac.ca>
Source record: 4120
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2011-030E - Simulated Emergency Test - SET - October 15, 2011
2011-09-18

The simulated emergency test is a North America-wide exercise in emergency communications, administered by the ARRL and the RAC Emergency Coordinators and Net Managers. Both the Amateur Radio Emergency Service (ARES) and the National Traffic System (NTS) are involved. The SET weekend gives communicators the opportunity to focus on the emergency communications capability within your community, while interacting with NTS nets. The deadline for receipt of reports at RAC HQ is January 31, 2012.

As you prepare for SET:

Sign up all available radio amateurs in your area. It's a great recruiting tool.

Call a meeting of all ARES members and prospective members to outline the plan.

Contact served agencies and explain the intent and overall purpose of the SET.

Arrange publicity in local papers and radio and TV stations.

Set up liaison with one or more NTS local/section nets.

Formulate your plan around a simulated disaster.

One of the first steps to a successful SET is to get as many involved as possible, especially new Hams. They might like it so much that they stick around.

Please visit the RAC website for all of the rules and guidelines and enjoy!

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, WO2N, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W5AJ, KH6BZF, N6PSE, NQ7R, AA8EY, K8GI, K8YSE, W8GEX (60m News), AT International, DL1SBF, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, G3XTT, HP1AC, I1JQJ/IK1ADH & 425 DX News, I1RBJ, IZ3EBA, OH2BN, OK8WW, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK3GK and VK3QB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th-September, through Sunday, 18th-September there were 224 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9L, VP2E, VP2M, VP8, VP9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4J/4K, AZERBAIJAN (Nagorno Karabakh Region). Members of the "Federation of Radio Sports of Azerbaijan" and the Safari DX Activators Club are organizing a DXpedition to the Nagorno Karabakh area between September 29th and October 2nd. The DXpedition will use two different callsigns,

4K3K and 4J0K, from two different two shacks. Please be aware that the mentioned callsigns are only legal to operate in the assigned Nagorno Karabakh area. No other callsigns are issued for the named territory by the Ministry of Communication of Azerbaijan. Any other callsigns are considered illegal. QSL both callsigns via RW6HS.

4W6, TIMOR-LESTE. The 4W6A team is now active from Atauro Island (OC-232) until September 26th. Col, MM0NDX, their Pilot station, may be contacted at: dxer59@gmail.com
A few items have been mentioned on the 4W6A Facebook page:
1. Their noise level on 80m and 160m is VERY high and they reckon this will hamper their effectiveness on LF.
2. With extremely limited internet access, an online log is now available at: http://www.clublog.org/charts/?c=6A
The 4W6A Facebook page is at:
http://www.facebook.com/pages/4W6A-Atauro-Island-Oc-232/180665755315820
Activity is expected to be on all bands, 160-10 meters, using CW, SSB and RTTY with up to four stations simultaneously. The QSL Manager is M0URX, direct (SAE plus 1 IRC or 2 USDs), by the Bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation. Direct or Bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS). There is a link from the 4W6A Web site at: http://www.4w6a.com

6Y, JAMAICA. Dennis, W1UE, will be on as W1UE/6Y5 from the 6Y1V contest station on Jamaica (NA-097, WLOTA 0214) between now and October 4th. Activity will focus on the low bands using CW, SSB and RTTY, as time permits. Dennis will also participate in the following contests using the callsign 6Y6U: CQWW RTTY Contest (September 24-25th) as a Single-Op/ All-Band/High-Power entry and the California QSO Party (October 1-2nd). QSL via his home callsign; using the CBA 2009 or later.

8P, BARBADOS. Operators Hermann/DL2NUD, Frank/DL8YHR and Joachim/DL9MS will be active as 8P9HP, 8P9DL and 8P9MS, respectively, from Barbados (NA-021), between November 7-21st. Activity will be on HF bands as well as 6 and 2 meters EME. QSL via their home callsigns.

9N, NEPAL (Update). The countdown has started on the Mediterraneo DX Club's DXpedition to Nepal. It is just less than two months away and the international DXpedition team will be on air from 9N-land! Activity is scheduled to take place between November 13-25th. The team is still looking for support to help pay for all the shipping of the equipment. So they have now initiated the following: For each contribution of at least 10 Euros, they will send a nice supporter special pin. This is just the first gadget of various items of merchandising you'll find soon on their Web page. These items will be available before and after their activity. Visit the "NEPAL11" Web page at:
http://www.mdxc.org/nepal2011

C5, THE GAMBIA. After last year's successful DXpedition to The Gambia during which the Czech-Slovak team succeeded in part CQWW DX CW Contest

to gain the world trophy in the category Multi-Multi, operators Richard/ OK8WW/OM2TW and Jiri/OK1RI have organized another contest DXpedition to this country. A group of 12 operators from the Czech Republic (OK) and Slovak Republic (OM) will operate under the callsign C50C between October 21st and November 1st, and between November 20-28th. Operators mentioned are: Richard/OK8WW/OM2TW, Jiri/OK1RI, Joe/OM5AW, Jiri/OK1DO, Norbert/OM6NM, Jan/OM2IB, Lada/OK1DIX, Petr/OK1FFU, Zdenek/OK1DSZ, Vlada/OK1NU, David/ OK1RK and Vitek/OK5MM. Their main aim is to participate in both parts of the CQWW DX Contests (SSB and CW) under the callsign C5A. QSL via Brani, OM2FY. The complete details can be found at: http://www.om0c.com

E4, PALESTINE (Update). Peri, HB9IQB, who has been granted a license by the Ministry of Telecommunications & Technology in Ramallah and plans to be active as E44PM in December, has announced this week that he expects to be operational at 0001z, December 16th, or possibly a few hours before that. For more details and updates, visit the following Web page at: http://www.hb9iqb.ch/palestine.html

FJ/TO3, ST. BARTHELEMY. Operators Nikola/VE3EY and John/VE3TA will be active as FJ/homecall from St. Barthelemy (NA-146) between November 22-29th. Activity will include the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. They will use a TO3 callsign (possibly TO3A again). QSL via their home callsigns.

IOTA NEWS.....
EU-001. Villy, LA4GY, will be active as SV5/LA4GY from Rhodes Island (GIOTA DKS-006, MIA MGD-028, WLOTA 0045) between September 25th and October 10th. Activity will be on 40-6 meters using CW, SSB and the Digital modes. QSL via his home callsign, direct or by the Bureau.

EU-004. Mike, DL4ABO, will be active as EA6/DL4ABO from Mallorca Island (DIE E-021, MIA MB-004, WLOTA 1902) between October 19-24th. Activity will be QRP using a FT-817, and he will focus on 30 meters CW. QSL via his home callsign, the Bureau is preferred.

EU-038. Ric, DL2VFR, will be active as PA/DL2VFR from Ameland Island (WLOTA 1059) between September 30th and October 6th. Activity will be on the HF bands, mainly CW. QSL via his home callsign, by the Bureau or direct.

EU-058. Sergio, IZ4BBF, will be active as F/IZ4BBF from the Island of Sainte Marguerite (DIFM ME020, MIA MF-028) between October 13-16th. Activity will be on the IOTA frequencies on 40-10 meters using CW and SSB. QSL via his home callsign (see QRZ.com).

EU-131. Members of the Extreme DX & Contest Group will be active as IL3A from Lido Island (IIA VE-032, DCI VE-009), weather permitting, on Saturday, September 24th. Activity will be on 40/20/15 meters. QSL via IK3HHX, direct or by the Bureau. For

more information, see QRZ.com or the Web page at:
http://www.extremegroup.org

KP1, NAVASSA ISLAND. The "DX-World.net" Web page is reporting the following information: "Rumors coming out of Georgia, USA • with separate confirmation from a trusted source • suggest a major DXpedition to Navassa Island (#2 Most Wanted DXCC) is now in full planning stage for March 2012." More details are forthcoming.

KH2, GUAM. Miki, JJ2CJB, will be active as AC2AI/KH2 from Guam Island (OC-026) during the CQWW DX SSB Contest (October 29-30th). QSL via JJ2CJB, by the JA Bureau. Log will be uploaded to LoTW and eQSL.

KP2, U.S. VIRGIN ISLANDS. Operators Jaime/WP3A, Jimmy/KP2BH and Hugo/K2DER will be active as KP2B during the CQWW DX SSB Contest (October 29-30th) as a Multi-Op/All-Band/Remote entry. QSL via K2DER or LotW. For more details, see: http://www.wp3a.com

LX, LUXEMBOURG. Philippe/LX2A and a team of operators will be active as LX7I during the CQWW DX RTTY Contest (September 24-25th) as a Multi-2 entry. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

OJ0, MARKET REEF. Looks like Market Reef will be busy the next few weeks. Thanks to the cooperation of the Finnish Lighthouse Society and their transportation partner, Captain Mats Sjostrom of Aland Islands, Radio Arcala team (OH8X) and their associates, they have planned a 3 week operation from Market Reef (OJ0X) which began this week. Operations will be done by an international team of thirteen operators that will operate on a one week shift. This week, look for operators Salvatore/DH7SA, Dietmar/DL3DXX, Andreas/DL5CW and Robert/SP5XVY to be on the WARC bands and in the CQWW RTTY Contest (September 24-25th). This will be followed by operators Pekka/OH1TV, Miika/OH2BAD, Ilmo/OH2BO and Tapani/OH5BM, who will be on the low bands as well as the regular bands. The last week of operation will be done by Nigel/G3TXF, Martti/OH2BH, Pertti/OH2PM, Teemu/SM0W and Rick/SM6U, who will participate in the SAC SSB Contest (October 8-9th). Suggested frequencies for the above operations are:
CW - 1813 or 1826.5, 3523, 7023, 10123, 14003 or 14033, 18083 or 18083, 21003 or 21033, 24893 or 24903, 28003 or 28033 kHz
SSB - 1843, 3770, 7070, 14170, 18130, 21280, 24960 and 28490 kHz
RTTY - 10140 and 18108 kHz
Log search will be available at <http://www.clublog.org/charts/?c•0X> but it may not be updated daily due to poor Internet access from Market Reef. QSL OJ0X via OH2BH. For more details, see:
http://www.qrz.com/db/OJ0X#1st

P4, ARUBA. Robert, W5AJ, will once again be active as P40P starting October 26th, through the CQWW DX SSB Contest (October 29-30th). In the contest, he will be a Single-Op/All-Band entry. Outside of the contest, activity will be on 30/17/12 meter bands using RTTY. QSL via LoTW or direct to W5AJ.

PZ, SURINAME. Peter, PA1LP, will once again be active as PZ5LP from Nieuw Nickerie between September 18th and October 15th. Activity will probably be on 40-10 meters, mostly on BPSK31 and RTTY. He will use a FT-857 w/100 watts into a G5RV, LDG Z100 antenna tuner and Signalink. QSL via his home callsign. QSL also via LoTW or eQSL.

QSLS RECEIVED VIA THE BUREAU: 6J5M, 9L5MS, CS7A, D2CQ, DC4A, DK7YY, EA9IE, JY9NX, OK1KW, OL4HQ, PJ2/W5MPC, RL3A, TB0DX, UA9NN, UU4JMG, VU4PB, YM0DX, YU1ARC, YU1DW, YU1LA and YU2000A

SILENT KEY. Several have informed OPDX that Doc Sheller, K8RR (ex-WN8WZT, WA8ZDF, K8RZ, WT8AA, KN8Z), became a Silent Key (SK) on September 12th.

Doc may be best known for being on the ARRL DX Advisory Committee (DXAC). He was also the DXAC chairman in 1974. He was also a founding/charter member of the Mad River Radio Club. OPDX and its readers would like to send out our deepest sympathy to the family and friends of K8RR.

ST0R DXPEDITION TO THE SOUTH SUDAN (Press Release #6). "During the ST0R DXpedition to Juba, South Sudan, Team Co-Leader Paul Ewing, N6PSE, gave an on-air interview to WNYC Radio in New York City about ST0R and the team's experience in South Sudan. You can hear a recording of that interview at: http://www.onthemedia.org/2011/sep/16/hams-travel-south-sudan
In addition, our QSL cards are currently being printed and we anticipate having the first batch in the mail in mid-October. We will upload to LoTW later in 2012. Our official website is:
http://www.dxfriends.com/SouthernSudan2011
Thank you,
The Intrepid-DX Group and The DX Friends."

T32, EASTERN KIRBATI (T32C Christmas Island DXpedition). Don, G3XTT, FSDXA Publicity Officer, sent out the following press release (Bulletin #4) on September 16th: "It's been one of those years. Spratly and Jarvis had to be postponed and now our own, T32C, expedition has hit some logistical problems in that our container with its 6 tonnes of kit got as far as T30 (Tarawa), but onward shipping to T32 has proved impossible despite our best efforts and promises from those involved in 3D2, T30 and T32. The ship that was due to bring our container from Tarawa has broken down and is being towed to Fiji for repairs.
WHAT NOW -- So what happens now? The answer is that we will go ahead anyway. The team is complete and set to go, the hotel is expecting us, and the sunspots seem to be on the increase.
Thanks to Yaesu, our Global Sponsor, we will have ten FT-450D radios, which we will hand carry to T32, along with several lightweight linears. Yaesu's support has been absolutely outstanding. We will also take enough hardware to set up verticals and vertical arrays for all bands 160 through 10. It may even be possible to run multiple stations on some bands, though not to the extent that we had previously planned. All our computer equipment was to be hand-carried in any case, so daily log updates to ClubLog (see Bulletin 3) will be unaffected. Unfortunately, unless our container makes an unlikely late arrival on the island, 6m EME will have to be abandoned, and we will not have the 4-square arrays for 30 and 40. But we will do our best to set up phased systems or other antenna configurations to achieve gain, especially towards Europe where will continue to focus our efforts.
TIMINGS -- The expedition dates are unaffected, but we cannot realistically expect to have stations running on nine bands by the first weekend, though we will aim to be on some bands, at least. As we will not have everything pre-kitted, there will be a lot of building and configuration work to do once we arrive at Christmas. The good news is that we are there for nearly four weeks and will be operating through four weekends, so there should be plenty of opportunity to get into our log.
WEBSITE -- As always, but especially in these new circumstances, the

trick is to keep a close eye on our website. Do keep checking it for updates, both before and during the expedition: www.t32c.com You will also find details there of how to interact with us once we start operations
 your feedback will be especially important so that we can maximize every band opening."

T88, PALAU. Eugene, RA0FF, will be active as T88OW from the Palau Rental Shack (See http://palau.rental-shack.com/english) between December 30th and January 8th (2012). Activity should be on all bands using CW and SSB. QSL via his home callsign.

TP50, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will be active as TP50CE between September 23-24th. Activity is to celebrate the 50th anniversary of the European Social Charter. Operations are usually on all HF bands and modes, possibly the satellites. Operators mentioned are Sergiy/F0EQE, Oleg/RV3DH and Sparky/RW3AH. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

TU, IVORY COAST (Update). An Italian team consisting of Alfeo/I1HJT, Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/ IK2HKT and Angelo/IK2RZP will be active as TU2T from the Ivory Coast between October 27th and November 11th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1823, 3505, 7005, 10106, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945 and 28495 kHz
RTTY - 10140, 14080, 18104, 21080, 24902 and 2808 kHz
6m - 50105 kHz - CW, SSB and Beacon
Pilot station will be Art, IK7JWY. QSL via I2YSB, direct (2 USDs Europe, 3 USDs outside Europe and SAE [NO IRCs and stamps) or via the OQRS. QSL via the Bureau to IK2CIO. For more details, visit the TU2T Web page at: http://www.i2ysb.com/joomla5
Also, join the TU2T forum at:
http://www.hamradioweb.org/forums/forumdisplay.php?fb

VP2, ANGUILLA. Pete, VE3IKV/VA3RA, will be active (hopefully) as VP2ERA from Anguilla (NA-022) between November 25th and December 3rd. His activity will include an entry in the CQWW DX CW Contest (November 26-27th). Look for him on 40-10 meters during the contest, and on the 17m and 12m bands (plus 10m and 6m) outside of the contest. QSL via VE3IKV.

VP8, FALKLAND ISLANDS. Rich, G0ZEP, will be active as VP8DFR from the Falkland Islands (SA-002) at the end of October. He plans to visit various hill top sites from both the east and west islands, if he receives permission to activate. QSL via his home callsign (see QRZ.com for more details).

VP8ORK SOUTH ORKNEY ISLAND DVD (Review by OPDX Editor Tedd, KB8NW). Just before going to print for this week's bulletin, I had a chance to preview the 2011 VP8ORK MicroLite Penguins DXpedition's to South Orkney Islands DVD by well-known DXpedition video photographer/operator James Brooks, 9V1YC. I can say that this is another "must have" DVD for

a DXer's collection. James's talents have captured the workings of the VP8ORK DXpedition and the majestic scenery of the Antarctic on this video. It is well worth the watch. In 52 mintues you witness the loading of the radio equipment onto the ship "Braveheart" in Ushuaia, Argentina, the trip south to South Orkney (including icebergs along the way), as well as the landing, unloading and setup of equipment and shelters on the island. You get to see the extreme challenges the team endured installing antennas in the hard rugged terrain; including scenes of operators working the pile-ups and the many seals. Interviews by both operators and Nigel Jolly (owner of the Braveheart) is a delight. This five star video is now available for 25.00 USDs and shipping will begin on September 21st. To order yours today, go to: http://www.dxvideos.com/vp8orkvideo.htm

YJ, VANUATU. Operators Ben/DJ0YI and Tom/NQ7R will be active as YJ0ABP and YJ0ANR, respectively, from Vanuatu between September 27th and October 15th. They are part of the YJ0VK DXpedition (see below) and plan to operate before and after the main DXpedition operation. They plan to arrive at Port Vila on September 27th, and are expected to become operational that day until September 30th, when the main VK0VK group arrives from VK-land. After October 12th, when the main operation closes, they will remain and operate until October 15th. Their activity will be mostly CW and the Digital modes. QSL YJ0ABP via DJ0YI. QSL YJ0ANR via NQ7R.

YJ, VANUATU (Update). A team of 8 amateur radio operators from Australia and the USA will be activating YJ0VK from Port Vila on Efate Island between September 30th and October 12th. Earlier updates indicate that the team will operate with up to 4 stations on bands from 160-10m, using CW, SSB and RTTY/PSK31. They do not have plans to activate 6m. This past week Chris, VK3QB, mentioned that the team will focus on the 30/17/12 meters bands and RTTY. Also, they have authorization to operate on 60m. They will also be participating in the Oceania DX Contest, both CW and SSB. Equipment will consist of 3 Kenwood TS-480HXs running 200w barefoot and a Elecraft K3, also barefoot. Antennas will be verticals mounted on the beach for 80m, 40m, 20m and an inverted L for 160m. A Cushcraft 3 element A3WS is proposed for the WARC activity. Verticals will also be used for 15m and 10m. QSL via VK2CA, direct or by the Bureau. LoTW log upload will be available on completion of operation. For updates, visit the YJ0VK Web page at: http://yj0vk.odxg.org/yj0vk2011/default.html

ZF, CAYMAN ISLANDS. Operators Franz/OE2SNL, Wolfgang/OE2WNL and Tom/OE2ATN will be active as ZF2OE, in what they call a "Suitcase DXpedition", from Cayman Brac Island (NA-016) between October 21st and November 2nd. Activity will be focused on 160/80 meters using CW, SSB and RTTY, but they will also use the other bands, depending on the conditions. They will use two TS-480HXs with no amps. Frequencies and times of operations will be posted on their Web page before their trip and during their stay if they have an InterNet connection. QSL via OE2WNL, direct or by the Bureau. Watch for updates at: http://www.zf2oe.net

ZK2, NIUE. A group of German operators will be active as ZK2C from Namukulu, Niue (OC-040, WFF ZLFF-021, WLOTA 2139), between February

3-17th (2012). Operators mentioned are Heidi/DK1MA, Sid/DM2AYO, Rolf/
DL7VEE, Jan/DL7JAN, Klaus-Dieter/DK1AX, J�rgen/DF1AL, Heye/DJ9RR,
Dietmar/DL2HWA and Uwe/DJ9HX. Activity will be on all bands 160-6 meters
using CW, SSB and RTTY, with three stations on air simultaneously using
500 watt solid state amplifiers and various antennas. QSL via DL7JAN,
by the Bureau or direct or OQRS. Online log will be available at ClubLog.
For more information and updates, visit their Web site at:
http://zk2c.hkmann.de

ZM4, NEW ZEALAND. Members of the East Coast Contesters ZM4T/ZM2M Team
will be active using the callsign, ZM4T, in the CQWW DX CW Contest
(November 26-27th) as a Multi-Single entry. Operators mentioned are:
Lee/ZL2AL, Stan/ZL2ST, Gary/ZL2IFB, Holger/ZL3IO and Michael/ZL2FAR.
QSL via ZL2AL, direct or LoTW. Visit the ZM4T Web page at:
http://www.zm4t.com

Hurricane Marie packs a punch but then quickly exits
2011-09-17

Skies are clear and sunny today, although wing gusts are still quite strong (up to 75 km/hr) in some areas. Overnight, gusts were recorded over 140 km/hr and some areas had rainfall in excess of 75 mm, but for the most part Maria was a disappointment. She made landfall exactly where meteorologists said she would with sustained winds of 120 km/hr, but by 5:00pm local time the low pressure system that collided with her sent her scurrying quickly to the northeast, leaving no damage to speak of.

This could just as easily been Igor all over again, but we are thankful that it wasn't. To each of you who came forward to assist with this activation, thank you! We had folks man VO1EMO at the Provincial Emergency Operations Center (PEOC) providing FES NL staff with updates as well as CANWARN observations to the weather office in Gander, mobile operators providing updates, folks at home sharing HF Net Control duties and several Maritime and Ontario Hams were at the ready in case they were needed. Once again, to all of you, *thank you*.

** DD0VF rcvd 2m DXCC certificate **

After some trouble (wrong callsign, wrong type of award) I received
my 2m DXCC (#73) today . My DXCC#100 was Bob, 3D2RS in october 2010
I usualy would not make so much noise about, but it might be the 1st
DXCC with a ERP called "QRP". The max antenna gain was 16.0dBd and
the max pwr was 550W in CW and 400W (350W in average) in digi modes
This shows the chances of the software by K1JT and I'm sure there
will be someone with even lower ERP than mine soon. About 3 years
I've been against digimodes, but I changed my minds in 2006. I
never will forget my time on CW-eme with 109 inits. List of DXCCs

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Time to time it will be necessary to remember about regular updates
to the VHF-DATABASE at MMMonVHF. At mid of october we plan to
spread a new issue of our VHF-DATABASE to all DX-Cluster (and USER
which what it). So please be so kind and UPDATE IT NOW SOON! LOGIN
at MMMonVHF and follow the link to your Account > than click on
"VHF-DATABASE Update" and click on the INFO Button left side of
the Call (mostly only YOUR CALL or YOUR Expeditions calls) you
wants to change... Click on the EDIT Button (lower end of the page)
if something to change and edit the datasentence. After you have
finished your changes PLEASE do not forget to click on SAVE! Your
data will be reviewed by the Team and released to the VHF-DATABASE
as soon as possible! You will receive a confirmation E-mail when
your data is online available at MMMonVHF! The DX-Cluster will get
those updated Files only one time a year! Info or changes of OTHER
than your own Call or your Expedition Calls as well welcome. In
such a case please do use the Contact Form
http://www.mmmonvhf.de/kontact.php and pass us the
CALL you want to edit as well... Files like CALL3.txt will be
availble for free to everybody from your account and daily fresh!
To get into CALL3.txt you need to have one of the keywords (WSJT
MS or EME) at your datasentence activated!

3D2C, CONWAY REEF ACTIVITY 2011 on HF and 6m & 2m (EME)
LATEST NEWS from Lance, W7GJ, via Magic Band EME, dated 2011-09-19:
I heard from the 3D2R team, and they agreed to try some limited
EME on 2m and 6m. I am not sure exactly what that means except
that I hope they will be QRV at least when the moon is below 20 deg.
on days when the Degradation is not too high. Their revised
frequencies are posted here: http://www.yt1ad.info/3d2r/frq.html

** ZK2C from Niue qrv HF and 50 MHz **

Nine operators from Germany (DF1AL, DJ9HX, DJ9RR, DK1AX, DK1MA,
DL2HWA, DL7JAN, DL7VEE and DM2AYO) will be active as ZK2C from Niue
(OC-040) on 3-17 February 2012. They will operate CW, SSB and RTTY
on 160-6 metres with three stations. QSL via DL7JAN, direct or
bureau. Further information, including suggested frequencies,
log search and the OQRS for both direct and bureau cards, can be
found at http://zk2c.hkmann.de/ SOURCE: 425 DX News #1063

** Villy, LA4GY, qrv as SV5/LA4GY on HF and 50 MHz **

Look for Villy, LA4GY, to be active as SV5/LA4GY from the island
of Rodos [aka Rhodes] (IOTA EU-001, GIOTA DKS-006, MIA MGD-028,
WLOTA 0045), between 25 September and 10 October, 2011. QRV on
40m-6m CW, SSB and the Digital modes, using Yaesu FT817ND and
Longwire / Buddistick. QSL via home call, direct or bureau.
SOURCE: [rsgbiota.org] via ICPO Bulletin (16-23 September 2011)

** TU, IVORY COAST (IJ85), qrv as TU2T **

Look for DXpedition callsign TU2T to be active from Azuretti,
Grand-Bassam, Region du Sud-Comoe, Ivory Coast (WW Loc. IJ85CE),
between 27 October and 11 November, 2011. QRV on 160-6 metres,
using all modes as possible. Pilot station will be Art, IK7JWY.
Operators include Alfeo I1HJT, Silvano I2YSB, Vinicio IK2CIO,
Angelo IK2CKR, Marcello IK2DIA, Stefano IK2HKT and Gino IK2RZP.
A real time online log will be available during the DXpedition.
Also a forum has been set up (www.hamradioweb.com/). QSL via direct
to I2YSB, QSL via the bureauto IK2CIO. Full information, updates
and online forum can be found on their website at: www.i2ysb.com/
SOURCE: [dx-world.net] via ICPO Bulletin (16-23 September 2011)

** T88OW qrv on HF and 50 MHz **

Eugene, RA0FF, will be active from the West Plaza by the Sea Hotel,
Koror Island, Republic of Palau (IOTA OC-009, WW Loc. PJ77FI), as
T88OW between 30 December, 2011 and 8 January, 2012. QRV on 160-6 m
QSL via home call. SOURCE: [dx-world.net] via ICPO Bulletin

** 5C2 qrv again HF and 50 MHz **

Ruggero IK2PZC (5C2P), Leo I8LWL (5C2L), Fred IK7JWX (5C2J),
Simon IZ7ATN (5C2SG), Ampelio IS0AGY (5C2B) Mounaim CN8QY
(Essaouira, Morocco) and Belkaid CN8QX (Dakhla, Morocco) will
be active from their base camp located in Dakhla city (WW Loc.
IL23AQ) from 22-29 September 2011. They will also be active as
5C2 personal calls /P from the lighthouse of of Dakhla (ARLHS
WSA-001, WW Loc. IL23AQ) and the National Park of the coast of
Dakhla (WFF CNFF-007, WW Loc. IL23AR), Morocco. The main purpose
of the DXpedition is to activate Herne Island (IOTA AF-068, WW Loc
IL23CU), South Western Sahara, as 5C2 personal calls /P. Plans
are to be QRV using all modes on the HF bands, WARC bands and
6 metres. The team might try an entry in the CQWW DX RTTY Contest
(24-25 September) using the callsign 5C2P. QSL via their home calls
direct or bureau. QSL 5C2SG via IZ7ATN, direct (QRZ.com).
QSL CN8QY and CN8QX via I8LWL, direct only. At the present time
they need supporters, sponsors, contributors. Stay tuned for

further info! SOURCE: [IK7JWX] via ICPO Bulletin (16-23 Sept.2011)

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
12 - 18 September 2011

Although by September 15th there were 11 numbered regions on the visible solar disk, solar activity was low. Region 1289 (N23, L=129, class/area, Dho/450 on 10 September) was the largest region but only managed to produce low level C-flare activity. Region 1297 (S18, L=151, class/area, Dao/60 on 16 September), numbered on the 14 September, was the most active region during the period. The region produced 12 flares, including a C9/1F on 14 September at 2051 UTC, before decaying to plage late on the 17 September. Regions 1295 (N22, L=060, class/area, Dhc/300 on 18 September) and 1290 (S15, L=139, class/area, Dsi/070 on 12 September) also produced C9 flares; a long duration C9 at 12/2054 UTC and a C9/Sf at 16/1136 UTC respectively. The remaining regions produced only low to mid level C-class activity.

The only earth-directed coronal mass ejection (CME) of the week was linked to an eruption on the 13 September in the vicinity of Region 1289 (N24W25). The full halo CME was observed in SOHO / LASCO C2 imagery at 14/0000Z with an estimated plane-of-sky speed of 428 km/s which was later refined to approximately 600 km/s using STEREO COR2 imagery.

No proton events were observed at geosynchronous orbit.

The geomagnetic field ranged from quiet to active levels at mid latitudes and briefly reached severe storm levels at high latitudes. The week began with unsettled to active levels at middle latitudes with active to major storm conditions at higher latitudes as the geomagnetic field continued to be influenced by a geoeffective coronal hole high speed stream (CH HSS). Disturbed conditions continued until mid day on the 13 September. By 14 September, the geomagnetic field had returned to quiet levels as the effects of the high speed stream waned. Quiet conditions persisted until 17 September when the CME from 13 September arrived at earth. The CME

passage was first observed at the ACE spacecraft at 17/0256 UTC followed by a 21 nT sudden impulse at the Boulder magnetometer. The geomagnetic field reacted with unsettled to active conditions at mid latitudes and periods of major to severe storm levels at high latitudes. Mostly quiet conditions returned by 18 September with two active periods observed mid-day at high latitudes.

The greater than 2 MeV electron flux at geosynchronous orbit reached high levels 12-17 September.

Forecast of Solar and Geomagnetic Activity
21 September - 17 October 2011

Solar activity is expected to be at low to moderate levels from 21 - 23 September. On 24 September - 08 October, activity is expected to increase to moderate levels with a slight chance for major flare activity as old Region 1283 (N14, L=226) rotates onto the visible disk. Solar activity is expected to return to predominantly low to moderate levels for the remainder of the period.

No proton events are expected at geosynchronous orbit until 23 September. There is a slight chance for a proton enhancement from 24 September until 08 October as old Region 1283 returns to the visible disk. No proton events are expected from 09 October until the end of the period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at mostly normal to moderate levels. High levels are expected on 26 - 28 September and again on 02-03, 11-13 October due to influences from coronal hole high speed streams.

Geomagnetic field activity is expected to be mostly from 21 - 25 of September. Unsettled conditions are expected on 25 and 27 September due to CH HSS activity. On 30 September to October 01, a recurrent CH-HSS is expected to bring unsettled to occasionally active periods of geomagnetic activity. Mostly quiet conditions are expected again until 08 October when another recurrent CH HSS is expected to become geoeffective. Unsettled to Active conditions are expected with minor storm periods possible at high latitudes until 11 October. Mostly quiet conditions are expected from 12 October through the end of the period.

893. [DXNL] DXNL 1746 (Sep 21, 2011)

Newsgroup: rec.radio.amateur.misc

DXNL 1746 - Sep 21, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

3D2/R, ROTUMA ISLAND, OC-060
17 OPs will be QRV as 3D2R from Rotuma Island (OC-060) for ten days
starting on Sep 27. They will work in CW/SSB/FM/RTTY/SSTV/PSK on
160m-2m. QSL via YT1AD. Their website is: http://www.yt1ad.info/3d2r

6Y, JAMAICA, NA-097
Dennis,W1UE/6Y5, is active from Jamaica (NA-097) until Oct 4. He will
use the callsign 6Y6U during the upcoming CQWW RTTY Contest and the
California QSO Party and wants to work in RTTY also on the WARC bands
and the lowbands before the contest. QSLs via homecall (direct).

BV, TAIWAN, AS-020
Tang,BM2AAV, Eddie,BV2DD, Bruce,BV2KI, Evan,BV2KS, Kenichi,BW/JP1RIW,
Lee,BV2NT, and Lee,BX2AB, will sign BV100 in the CQWW RTTY Contest.
QSL via BV2KI. See also: http://www.bv100.tw/EN

CE, CHILE
Luis,CE2/CX1EK, is working in CW mainly on 12m and 17m again from
Sep 16 until Oct 19.
QSL direct via Luis Matho, 2303 Nordok Place, Alexandria VA 22306, USA.

CN, MOROCCO / S0, WESTERN SAHARA
Ruggero,IK2PZC (5C2P), Leo,I8LWL (5C2L), Fred,IK7JWX (5C2J),
Simon,IZ7ATN (5C2SG), Ampelio,IS0AGY (5C2B), Mounaim,CN8QY (CN8QY/p),
and Belkaid,CN8QX (CN8QX/p), will be QRV from Dakhla and also from the
lighthouse off the coast of Dakhla (WFF CNFF-007, ARLHS WSA-001) from
Sep 22-29. The main reason of this DXpedition is to activate the island
of Herne (AF-068) as 5C2/Homecalls/p. They will be active in all modes
on all HF bands (incl. WARC and 6m) and maybe they will also join the
CQWW RTTY Contest as 5C2P. QSLs via homecalls, 5C2SG direct via IZ7ATN,
CN8QY/p via I8LWL (direct). They are still looking for participants and
sponsors.

F, FRANCE
The "Council of Europe Radio Amateur Club" (CERAC-TP2CE) is going to activate the special event station TP50CE in all modes on all bands (maybe also satellite) on Sep 23/24. Occasion is the 50th anniversary of the European Social Charter. OPs will be Sergiy,F0EQE, Oleg,RV3DH, and Sparky,RW3AH. QSL via F5LGF. See also: http://ewwa.free.fr

FP, ST PIERRE ET MIQUELON, NA-032
Martin,FP/G3ZAY, will show up from Miquelon (NA-032, DIFO FP-002, WLOTA 1417) from Sep 24-29. QSL via homecall.

G, ENGLAND, EU-005
The Southgate Amateur Radio Club will use the special callsign GB0TLR which stands for "Railways on the Air" on Sep 24/25. QSL via M0XDS. Internet: http://rota.m0php.net

HK, COLOMBIA
HK1T, HK1W, HK1AA, HK3TU, HK1N, HK1R of the DX Amateur Radio Club DXARC will activate the Jumanji contest station as HK1NA during the CQWW RTTY Contest. QSLs via K6IPM.

HL, SOUTH KOREA
Don,KC6STQ, is working as HL2/KC6STQ on HF. QSL via homecall (direct).

J2, DJIBOUTI
Freddy,J28RO, will join the CQWW RTTY Contest as well. QSL via F8DFP. Internet: http://j28ro.blogspot.com

LX, LUXEMBOURG
Several OPs will sign LX7I in the CQWW RTTY Contest. QSLs via LX2A. See also: http://www.lx2a.com/lx7i.html

OJ0, MARKET REEF, EU-053
A team of experienced OPs is working from Market Reef (IOTA EU-053, ARLHS MAR-001, TWLHD WLH OJ0-001, WFF OHFF-038, WLOTA 0542) as OJ0X for the next three weeks since Sep 19. They are running three stations in CW, SSB and RTTY on 160m-10m and plan to take part also in the CQWW RTTY Contest and the SAC SSB Contest. QSL via OH2BH.
Their website is: http://www.majakkaseura.fi

PZ, SURINAME
Peter,PA1LP, is active again as PZ5LP from Nieuw-Nickerie (GJ15lw) between Sep 18 and Oct 15. He is using a FT-857 with G5RV antenna mainly in BPSK and RTTY on 40m-10m. QSL via homecall, eQSL, LoTW.

SP, POLAND
The special event station HF36POL is active from Sep 20 until Nov 6 to celebrate the departure of the 36th Polish Antarctic Expedition to the Henryk Arctowski station (WAP POL-01) in Antarctica. The expedition leaves Gdynia onboard the MV Polar Pioneer and is expected to arrive at Admiralty Bay on King George Island (AN-010, WFF SPFF-024, WLOTA 0312) to begin their research around Nov 6. The Director of the department of Antarctic Biology of the Polish Academy of Sciences in Warsaw and the president of the Polish Amateur Radio Union (PZK) invites everybody to

make the "Arctowski Antarctic Award". QSL via SP9YI.

SV5, DODECANESE, EU-001
Villy,SV5/LA4GY, is going to hit the airwaves in CW, SSB and digital
modes on 40m-6m from the island of Rhodos (IOTA EU-001, GIOTA DKS-006,
MIA MGD-028, WLOTA 0045) between Sep 25 and Oct 10. He will use a
Yaesu FT817ND with longwire and and Buddistick.
QSL via bureau or direct to his homecall.

SV9, CRETE, EU-015
Uli,SV9/DJ9XB, will be active in RTTY only from Crete (EU-015) from
Sep 22-30. During the CQWW RTTY Contest he will sign J49XB.
QSL via homecall.

YA, AFGHANISTAN
Branko,9A3PM, is working as T6BP from Kabul airport until April 2012.
Branko is member of the Croatian army and his amateur radio activities
will take place in CW and digitalen modes on HF during his spare time.
QSL via 9A6AA.

YJ, VANUATU
Ben,N6MUF/DJ0YI (YJ0ABP), and Tom,NQ7R (YJ0ANR), will be QRV from
Vanuatu between Sep 26 and Oct 14.
QSLs for YJ0ABP via DJ0YI, YJ0ANR via NQ7R.

V5, NAMIBIA
Alfons,DJ8VC, took part in severla FDs (2007-2009 and 2011) as V55V.
QSL via homecall.

VP9, BERMUDA ISLANDS, NA-005
Jamie,WW3S, and Ray,ND8L, will sign VP9I from the QTH of VP9GE in
Bailey's Bay on Bermuda (NA-005, Loc. FM72pi) in the CQWW RTTY Contest.
QSL via N1HRA.
They will use the calls VP9/WW3S and VP9/ND8L outside the contest.
QSL via LoTW or with SASE direct to their homecalls.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 24/25: CQ World Wide RTTY Contest
Sep 24/25: Greek Telegraphy Club CW Cup, info via: sv5dk@rho.forthnet.gr

IOTA collected by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-064, F, Pays de la Loire Region group: TM33LDX will be active from the
33rd annual meeting of the Clipperton DX Club in Noirmoutier on
Sep 23/24. QSL via F5CWU (bureau/direct).

EU-078, EA3, Gerona Province group: Manel,EA3EGB/p, will be QRV in SSB, RTTY
and PSK31 on 80m-10m from Meda Petita (DIE-E-043, WFF EAFF-189) on
Sep 24/25. QSL via EA3EGB (bureau/direct).

EU-131, I*3, Veneto Region group: Depending on the weather the Extreme DX &
Contest Group plans to show up as IL3A mainly on 15m, 20m and 40m from
Lido Island (IIA VE-032) on Sep 24. QSL via IK3HHX.

EU-136, 9A, Kvarner group: Dusan,S52DG, plans to become active as 9A/S52DG/p
from Krk Island (CI-046) working in SSB/CW on 160m-10m from Sep 22-25.
QSL via homecall (bureau/direct).

EU-172, OZ, Jylland east and Fyn group: Peter,OZ/DL4AMK, Dieter,OZ/DK1AW,
Mario,OZ/DL5ASE, Heiko,OZ/DG0OGM, and Lutz,OZ/DL3ARK, are going to hit
the airwaves from the Danish Island Helnaes (DIA FY-24) in SSB/CW/RTTY/
BPSK on 160-10m. They will also activate the lighthouse (ARLHS DEN-015,
NEW: WLOTA 3159) between Sep 24 and Oct 1. QSLs via homecalls.

NA-137, W1, Mayne State West group: Wayne,K9YNF/1, will be active from
Peaks Island from Sep 25-30. Wayne prefers to work in SSB on 14260 kHz
and 18128 kHz (+/- QRM) and in PSK31 on 14070.15 kHz. QSL via K9YNF.
Skeds can be arranged via e-mail to: wayne@longshortstories.com

188> hi

What does your greeting have to do with rec.radio.amateur.misc,
alt.slack,alt.usenet.kooks,comp.os.os2.advocacy,
rec.radio.amateur.policy, persent?

"so , bye bye tholen , take care"
--persent

And some people wonder why I call them Famous Last Words.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

WIANEWS WEEK COMMENCING SEPTEMBER 25 2011 THE EDITION OF NEWS FROM THE
WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 25 2011.

Plan to revive 1970s UK satellite on 137.560 MHz

40 years ago, the United Kingdom's first satellite, launched on a UK-built
rocket, went into space. Now a team from the Mullard Space Science Laboratory
in Surrey are attempting to revive it.

The Prospero spacecraft was launched by a Black Arrow rocket on October 28,
'71 from Woomera here in VK carrying a series of experiments to investigate
the effects of the space environment. The satellite operated successfully
until 1973 and was contacted annually until 1996. Its beacon on 137.560 MHz
was last heard by Amateurs in 2006.

BBC Prospero story and pics at
http://www.bbc.co.uk/news/science-environment-14783135

Prospero real-time orbital tracking page
http://www.vk3ukf.com/Space/GadgetSatProspero.htm

Audio recordings of the 0.3 watt phase modulated signal with PCM at
2048 bit/s from Prospero on 137.560 MHz can be heard on the Sounds from Space
website of Matthias Bopp DD1US

http://www.dd1us.de/spacesounds%204.html

Check out Amateur Radio magazine for many great articles including details on what may very well be the bet WIA AGM ever being held at Mildura. Already prices and activities are announced!

The DX page by VK4OQ is a great companion to keep in the shack rather than myriads of OS dx newsletters.

Arguably the best written article in Octobers AR magazine is penned by the new Ipswich AR Club President VK4MIA Derek who DEFINITELY DID NOT miss anyone in action with that clubs activation of VI4FI Sandy Cape light on Frazer Island.

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Code of Conduct

Many organizations have a code of conduct. As far as I can tell the Wireless Institute of Australia doesn't have one as such. We do have a Corporate Ethics document, which is more about how the organisation will behave when engaged in business with another organisation.

We do not appear, however, to have one of those one-page instruments with a list of behaviours or qualities that mark a good Amateur Radio Operators.

There are a few versions of an Amateur Radio Code of Conduct floating around the Internet, however the ones that I have seen are a bit too wordy to discuss here in detail.

Perhaps the Board could develop such a document, time will tell.

In the meantime, what would such a Code of Conduct require of us?
I can readily think of three main headings. There may be more, however I will discuss three.

Firstly, we must show respect to one another, for all the meanings of respect that we can think of - we must show respect for individual's background, disabilities, religion, political and sexual orientation etc etc - there are many aspects of respect that we ought to consider. We ought especially to show respect when we communicate, be it on air, online, by email or on the phone.

We must keep the good name of Amateur Radio intact. Our behaviour on air both in how we express ourselves and how we relate to others is very much on show everyone is listening, and judgements will be made depending on what is heard.

We must act lawfully in line with the Legislation and regulations that we are subject to, both under our licenses and as citizens.

So with only three headings we have it covered - we should be acting respectfully toward each other, we have the good name of our hobby to uphold, and we have legal obligations to be good boys and girls when using our toys.

That's it really. I can't conclude, however, without saying that the vast majority of people that I have interacted with or heard on air are doing those things. We all, however, need to be aware of what a Code of Conduct requires of us, and we need to remind ourselves to take it on board.

I'm Bob VK6POP, Director of the Wireless Institute of Australia Board.

HAMS ACROSS AUSTRALIA.

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

When we come to choosing those who will manage our club affairs, it is necessary to find people we can trust.

It was May last I mentioned this...and it's not surprising others have been addressing these issues. Writing in
WorldRadio Online, last May,

Dave Hayes, VE3JX, looks over these qualities, as
viewed by the QCWA - that's the US Quarter Century association not the local ladies in VK4.

http://www.worldradiomagazine.com/

Knowledge of the area, such as finances for the treasurer, common sense and humility are some of the qualities which are examined. This is a practical set of criteria used by a large body with local to national structures. At the local level, clubs are often faced with the struggle to maintain membership and can really be challenged at finding active members who volunteer for club positions.

None the less, I believe it is important that we all think over these ideas.

We may not be available to fill a role for our club but we may have a say in electing some-one who will. If we are clear in our own minds of the qualities we value, it will be that much easier to make our vote count.

I'm Geoff Emery and that's what I think....how about you?

Congratulations go out to Myron Allen, who has just attained callsign VK4FHAA following successful completion of the Foundation Assessment in Townsville during August.

Watch out for Myron on the HF Bands as he experiments with various NVIS setups.

Hello again from Doug Friend VK4OE from the Brisbane VHF Group.

Concerning the forthcoming two microwave activity events being organised by the Group, here are some more details of the "test and tune" day that's TODAY Sunday the 25th of September at Rob Bathgate VK4ZDX's place, 53 Arrol Street, Camp Hill.

Commencement time should be around 10:00 a.m. and we are willing to continue through to approximately 4:00 p.m. depending on demand.

Services available are:

Power measurement (nW to +++Watts) to 50 GHz

Return loss measurements to 26 GHz

Signal generators to 18 GHz

Spectrum analysis to 50 GHz

Minimum discernable received signal level assessment to 18 GHz

Automatic noise figure and gain measurement to 1.9 GHz, and possibly higher(?)

And all this in the presence of interested and helpful amateurs willing to try and solve 'challenges that may emerge'!

All microwave-interested amateurs and friends are welcome to be present and, weather wise, the event will happen "rain, hail or shine". Regarding food, it is not the Group's intention to provide meals but simple drinks will be available.

The BVHFG looks forward to meeting whoever will come. If you've not done so already and in order for the Group to plan appropriately, please contact me by e-mail (QRZ correct) or by phone to say that you'll be coming and approximately when.

This has been Doug Friend, VK4OE, from the Brisbane VHF Group.

VK5

Good morning this is David VK5KC with notes from the Adelaide Hills amateur Radio Society.

September has been a big month for the Club. Saturday September 3rd was the official opening of the club Shack. This is a fully renovated building on the property of the Blackwood Guide Hall.

The following Weekend 9 people attended a training course held at the Shack. All were successful, with 7 new Foundation licences and 2 Standard. Congratulations all and thanks to Sasi, Barry, Paul and Kevin for their work.

Thursday the 15th at the regular meeting, Barry VK5BW demonstrated his Vector Analyser Unit. Barry made it from a kit and demonstrated SWR, Filter properties and the sharpness of a loop antenna.

Saturday 17th a joint gathering with the North East Radio Club saw surplus computer power supplies modified to 13.5 volts high current operation. Yesterday many members joined in for a breakfast at the Shack, this will become a regular event on the last Saturday of the month.

Finally a reminder of the Annual Buy and Sell on Sunday November 20th, see www.ahars.com.au

DISCUSSION POINT

What use is an f-call?

Over the past few weeks I've been encouraging you to listen to the news, to get on-air and participate. It's easy enough for me to say, but I can understand that it might not be so simple for you to actually achieve.

Imagine for a moment that you have at least got the pre-requisites, that is, you have a license, you have a radio, antenna, power-supply, it's all plugged in and when you move the dial, you can hear stations. I realise that this assumes a whole lot of things which might not yet be true, but bear with me, I'm trying to make a point.

Imagine if you will, that you have your microphone
in your hand - or on your desk, and your finger is hovering over the magic Push To Talk button.

Now what?

What do you say?

Whom do you say it to?

How will you know it worked?

The simplest way to start is to jump in and get your feet wet, but I know that might be a little daunting for you, so instead, why not tune to a station and see what's happening?

Last week I was introduced to the 7130 dx net by another
amateur. At the time we were sitting on the ocean with our respective radios tuning to see what was around and he suggested tuning to 7.130 MHz There was

a whole group of people talking and at first it was quite confusing.

After a little while some structure started appearing and I could begin to understand what was happening - in short, people from around the globe all tuned to the same frequency at the same time with the single purpose of talking to each other.
You might want to have a look at their website which explains in great detail what it is and how it works. The web-address is www.7130dx.net and the net runs Monday, Wednesday and Friday at 0930UTC on 7.130 MHz.

Why am I telling you about this? What's the point?

It's simple, you need to understand the lingo to be able to speak the lingo. Just like speaking Italian in a room full of Japanese is not a good way to communicate, speaking without knowing the words on an Amateur Radio band is a challenge.

Finally a tip, learn your phonetic alphabet! Use it to read out number plates in the car, read out street signs, recite the alphabet, use it, that is, Uniform Sierra Echo India Tango!

Go forth and charlie oscar mike mike uniform november india charlie alpha tango echo, I say again, charlie oscar mike mike uniform november india charlie alpha tango echo.

I'm Onno, vk6flab

HOME OF THE GOOD GUYS

George Sturgess VK4WQ awarded Honorary Ambulance Officer of the Year

This is awarded to an Honorary Ambulance Officer who has made a significant contribution to QAS and has worked cooperatively to support Paramedics.

George Sturgess VK4WQ has been a Volunteer Driver with Jandowae QAS since 2008.

George's volunteer driving contribution allows the Jandowae QAS officers to spend quality time with their patients and provide timely transport to medical facilities.

George always shows professionalism and is respectful of patient confidentiality when assisting the Jandowae Officers.

George's knowledge of local areas has enabled him to construct detailed mapping of the Jandowae QAS catchment area.

George's willingness to go the extra distance to serve patients and the QAS is the reason he has been nominated and awarded the Honorary Ambulance Officer of the Year Award for 2011 for the South Western Region.

CONGRATULATIONS VK4WQ - ONE OF THE GOOD GUYS.

SILENT KEY

Last Monday Bob Bristow VK6POP attended a memorial service for Peter Hughes, VK6HU. Peter passed away several days earlier after a long illness. He was almost 83 years old.

Peter joined Scouts at the age of 11, and remained a member until his death. He achieved the Kings Scout award, and several other service and good conduct awards as an adult.

Peter held several positions in Scouting, and attended National and International events.

Life changed for Peter when he was appointed JOTA organizer for Western Australia in 1969. Some two years later, having realized that he really should take a look at Amateur Radio, Peter, after a year of study, got his license and gained the callsign VK6HU.

Peter filled the role of JOTA Organiser for Western Australia for 16 years. >From the beginning of 1985, Peter was appointed JOTA organizer for Scouts Australia. He held this role for eleven years.

During his time as State and National JOTA organizer, Peter coordinated or participated in the Amateur Radio and Electronics activities at Jamborees and other major Scout events.

In 1980, Peter was named W.A. Amateur of the year by the WIA VK6 Division.

During JOTA 2007, the Radio Scouting headquarters in Perth was named "The Peter Hughes Scout Communication Centre" in recognition of his considerable contribution to Amateur Radio in Scouting, Peter told me that he was deeply honoured by this recognition by his peers.

The funeral service was a joyous celebration of a life filled with achievements, giving of himself to his community, and a loving husband and father. Peter, being the super organized person he was, orchestrated a good part of his funeral service, and as his two sons and daughter read Peter's script of his life, we laughed and reflected on this man who we loved and respected.

73 Peter Hughes, VK6HU, silent key.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

HF Band Plan

A revised IARU Region 1 HF Band Plan has been published.

The changes are minor, and affect 40 metres and 10 metres only.

On 40 metres, the CW contest-preferred segment of 7000 to 7025 kHz has been withdrawn; this means in practice that CW contests on 40 metres are no longer confined to the first 25 kHz segment. There have also been changes to the FM part of 10 metres, with adjustments to the simplex channels and the addition of four new repeater channels.

See www.irts.ie/downloads for a copy of the new Band Plan, which includes notes detailing the changes.

==========

NEWS FROM ARNEWSLINE USA

LA CELL PHONE TICKET GIVEN TO HAM OPERATING 2 METER MOBILE

A California ham has been cited for operating mobile using a 2 meter radio installed in his car and this could become a test case to find out whether the restrictive anti-cell phone law can be used against other two-way radio users.

According to a note from Dick McKay, K6VGP, a member of the Disaster Amateur Radio Network identified as Irving Osser, KE6YR, received a ticket for using his amateur 2 meter radio in his car. According to McKay, the Los Angeles motorcycle officer stated that he saw Osser on his cell phone. KE6YR tried to show the officer the two meter radio with the coil cord microphone and said he was talking to another amateur on the radio. He also tried to show the officer the hands free system he uses on his Blackberry and finally tried to show him the cell phone log that indicated no calls were made or received.

But the officer was not interested in hearing about any of it and it has now became a tell it to the judge matter. And here is where the possibly becoming a test case for the California law. This is because Osser is an attorney by profession and plans to represent himself in court with the proper knowledge about how to address the subject.

While California does not provide any exceptions for ham radio operators, CB'ers and other non-emergency two-way radio users, by definition, two-way radio gear is not a hand held cellular telephone. None-the-less, KE6YR will still have the burden to prove in court that what he was doing was legal and that he was in fact not using a wireless telephone as defined by law.

$25000 NAL ISSUED FOR INTERFERENCE TO AIRPORT WEATHER RADAR

The FCC has issued Rapidwave, LLC of Saratoga Springs, Utah, a $25,000 Notice of Apparent Liability for Forfeiture order. This, for operating a 5 Gigahertz unlicensed Part 15 system in a manner inconsistent with rules, and for allegedly causing interference to an FAA Terminal

Doppler Weather Radar system serving the Salt Lake City International Airport. Amateur Radio Newsline's Jim Davis, W2JKD, has the details:

According to the FCC, on Oct. 27, 2010, an enforcement agent from the Denver office, along with FAA personnel, located emissions at 5600 MHz coming from a Ubiquiti Xtreme Range 5 transceiver located at the Lake Mountain communications site in Saratoga Springs, Utah. The site in question was identified as being operated by Rapidwave LLC. Over the next 24 hours the FCC and FAA personnel established that this system at the Lake Mountain site was the source of the interference.

According to the FCC, all 5 GHz unlicensed national information infrastructure devices operating in the 5.25 to 5.35 GHz and 5.475 to 5.725 GHz bands must contain circuitry known Dynamic Frequency Selection. This is a radar detection capability which allows them to detect the presence of radar systems and avoid co-channel interference. During the Lake Mountain site inspection it was determined that as it was operating, the transceiver did not have Dynamic Frequency Selection functionality. Rapidwave changed the operating frequency to stop the interference to the Salt Lake City Terminal Doppler Weather Radar.

The inspection also revealed that Rapidwave had added a high gain parabolic antenna to the system. Calculations performed by the FCC agent indicated the Effective Radiated Power for this system may have exceeded the maximum permitted by the FCC Rules for operation on the frequency used by Rapidwave. You can read the entire text of this FCC enforcement action at tinyurl.com/fcc-utah-fine.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD.

Rapidwave was given the customary 30 days to pay the fine or to file an appeal.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Hi this is Lesley, VK5LOL, that is VK5 lima oscar lima, the Alara Contest Manager. I just want to remind you that I need to receive your ALARA CONTEST logs by Friday the 30th September either by mail or email. Thank you"

Oct 1- 2 OC Oceania DX Contest Phone

Oct 8- 9 OC Oceania DX Contest CW

Oct 16 VK6 WEST AUST VHF GROUP'S SPRING SCRAMBLE

Oct 22 WIA Jack Files Contest

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

The 2011 Oceania DX contest is now only days away, with the Phone SSB
the first weekend in October and the CW section the second weekend.

This is a great opportunity to work a lot of DX stations in our Oceania area.

The aim of the contest is to promote HF contacts with stations in the Oceania
region. Oceania stations can work other Oceania and non-Oceania stations.
Non-Oceania stations can only work Oceania stations.

PHONE: 08:00 UTC Saturday 1 to 08:00 UTC Sunday 2 October
CW: 08:00 UTC Saturday 8 to 08:00 UTC Sunday 9 October

The WA VHF Group Spring Scramble is happening on Sunday 16 October
between 0230 - 0430 UTC

The object is to contact as many different stations as possible, on as
many bands, 50 MHz and above, as possible. All licensed modes may be
used and extra points can be earned for working portable & country stations.

(Rob VK6LD)

Oceania Ladder Sprints

Is there any one keen / interested in a Ladder competition over 3 modes over
3 bands, 30 minute sessions in each mode over 11 months best of 10 score,
with the lowest score dropped , 1 night a month but not in December.

The 3 modes are CW, (A Digital mode) , SSB the 3 bands are 80, 40, 20 (
the digital mode will be either RTTY , PSK) the modes and times will

You can enter 1 mode, 2 modes, or all of them it is 3 separate
competitions lumped into one on 1 night ..

After the 11 events the 1st 3 placing's get certificates and the winner of
each mode will take away a trophy each.

This will be a self-funding event the whole competition for the 11 events
will cost you $ 5-00 total which is payable before you post your first log..

The self-funding is to get certificates printed and the 3 small trophies
each year.

I am looking for 2 more trustees to help administer this and do a final rules draft so if you are interested please email me direct !
I don't care if you are at either end of the Islands or in VK ..

At this stage it's a feeler I do have some rules drawn up, I have been in touch with others around the world and they have given me some ideas and pointers. I have been working on this now for a number of months.

Oceania is lacking in quick fire events maybe this will stir some interest other that Nets every night of the week !

ARRL , RSGB and others run these Ladder sprints and are very well supported

This is for you it's up to you to respond with your thoughts ..

I am not looking for a rewrite of what is on the table I am after your thoughts and I would appreciate constructive input and not a 4 word single line time wasting comment !!

Please email the ZLDXC yahoo group or me direct

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

Amateur Radio CubeSat FITSAT-1 plans to transmit 115.2 kbps digital data in the Amateur Satellite Service 5.8 GHz band and will also carry an Optical

Communications experiment.

FITSAT-1 should be be deployed from the International Space Station by robot arm in late 2012. It will generate about 2W RF output using a 16W DC input.

The main mission will be to demonstrate high speed data transfer from a satellite, it can transmit a VGA-size (640x480 pixel) JPEG photograph in only 5 to 6 seconds.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

You may remember that a Belgian team attempted a landing on Rockall in May 2009.

This was unsuccessful due to the weather conditions at the time.
They are now planning to try again with the projected date being around 27/28 September.

Rockall is the rarest of the European IOTA islands with only one activation a few years ago when just over 200 QSOs were made.

The IOTA reference is EU-189.

WW SPECIAL INTEREST GROUPS --- ILLW

With 11 months to go to the third weekend in August 2012, some 70 have already registered, almost instantly after the International Lighthouse & Lightship weekend opened.

There was a record number of 470 this year from 55 countries. The next event has entrants from Argentina, Australia, Denmark, England, France, Germany, Honduras, Italy, Netherland, New Zealand, Poland, Scotland, Sweden, USA and Wales.

The fun weekend continues to grow and it's no surprise that those already listed make an early commitment to show their strong support.

It will be held on August 18 and 19, 2012.

The website illw.net is well worth a visit to read the reports of activations held this year, there is also a Facebook page with more than 1,000 fans, plus online registration.

A Youth Net meets Saturdays at 0100 UTC on IRLP Reflector #2.
Young Hams Net 3.590 - 7:30pm Victorian time.

ARRL FORMS YOUTH IN THE SECOND CENTURY COMMITTEE

The ARRL wants to learn more about getting youngsters into ham radio and has formed a special committee to find out how.

According to an Internet posting credited to K0CA, ARRL Board of have approved a motion authorizing the appointment of a Youth in the Second Century Committee.

ARRL President Kay Craigie, N3KN, has since appointed the committee, which is chaired by Rocky Mountain Division Director and former Amateur Radio Newsline Young Ham of the Year Brian Mileshosky, N5ZGT.

The purpose and goals of this committee are to enhance the League's outreach to potential radio amateurs among America's youth.

It will make recommendations to the Staff and will report to the Board of Directors beginning in January 2012.

==> + ON THE AIR: RADIO AMATEURS TAKE TO THE AIR TO SUPPORT NATIONAL
WILDLIFE REFUGE WEEK

Amateur Radio operators will be on the air in observance of the 2011
National Wildlife Refuge Week, October 8-16. This event will coincide
with festivals and special events at refuges that help connect people
with nature at the country's more than 500 National Wildlife Refuges.
Radio amateurs are helping spread the word about the National Wildlife
Refuge System by operating from refuges during National Wildlife Refuge
Week. This event is a chance to combine Amateur Radio's communication
capabilities with enjoyment of the outdoors, while helping others learn
about the National Wildlife Refuge System (NWRS). Hams will highlight
refuge features, wildlife and geography when making contact with other
stations across North America. Operators will make contact using SSB,
```

CW and various digital modes, including RTTY and PSK31. Read more here <http://www.arrl.org/news/radio-amateurs-take-to-the-air-to-support-national-wildlife-refuge-week>.

==> + ARRL RECOGNIZES: 2010 ARRL TECHNICAL EXCELLENCE AWARD WINNERS ANNOUNCED

Joe Taylor, K1JT, and Bruce Walker, W1BW, are winners of the 2010 ARRL Doug DeMaw, W1FB, Technical Excellence Award for their article "WSPRing Around the World" that appeared in the November 2010 issue of QST. Established in 1975 as the ARRL Technical Excellence Award, the name was changed in 1997 to honor the late Doug DeMaw, W1FB, a former ARRL Headquarters technical editor and well-known Amateur Radio author. The award consists of an engraved 9 inch pewter cup.

Joe Taylor was first licensed as KN2ITP in 1954, and has since held call signs K2ITP, WA1LXQ, W1HFV, VK2BJX and K1JT. He was Professor of Astronomy at the University of Massachusetts from 1969 to 1981 and since then Professor of Physics at Princeton University, serving also as Princeton's Dean of the Faculty from 1997 to 2004 and retiring in 2007. He was awarded the Nobel Prize in Physics in 1993 for discovery of the first orbiting pulsar.

Bruce Walker has a Bachelor in Science degree in Physics from the Massachusetts Institute of Technology and is the Director of Genome Assembly and Analysis at the Broad Institute in Cambridge, Massachusetts. Bruce was an avid shortwave listener in his youth and became a ham in 1991. His involvement in Amateur Radio has gone through several phases: homebuilt QRP, amateur satellites, early computer-based digital modes (PSK31, MSFK, etc), and occasional contesting. Read more here <http://www.arrl.org/news/2010-arrl-technical-excellence-award-winners-announced>.

==> ON THE AIR: YAESU DONATES FT DX 5000 HF/6 METER TRANSCEIVER TO W1AW

Thanks to the generosity of Yaesu <http://www.yaesu.com/>, W1AW <http://www.arrl.org/w1aw.html>, the Hiram Percy Maxim Memorial Station, now boasts Yaesu's premier transceiver -- an FT DX 5000 <http://www.yaesu.com/indexVS.cfm?cmd=DisplayProducts&ProdCatID=102&encProdID=12FF98B9C73C8988F2398C979793E2E1&DivisionID=65&isArchived=0> and SM-5000 Station Monitor. Dennis Motschenbacher, K7BV, Executive Vice President for Yaesu's Amateur Radio Sales Division, visited ARRL Headquarters on August 26 to present the radio. ARRL Chief Executive Officer David Sumner, K1ZZ, accepted the radio on behalf of the station. Sumner also serves as W1AW trustee.

"Yaesu is thrilled to continue its long support of the ARRL by donating our new premium class FT DX 50000 transceiver," Motschenbacher said. "We understand this transceiver scored some of the best receiver performance numbers every measured during ARRL Lab product testing, so ARRL Headquarters guests will now be able to slip into one of the W1AW

operating studios to get on the air and spin the knobs on one of the best of the best radios ever manufactured for the enjoyment of Amateur Radio."

W1AW Station Manager Joe Carcia, NJ1Q, thanked Yaesu for their donation of the FT DX 5000 transceiver to W1AW: "This radio is installed in Studio Three and is available for use to Amateur Radio operators visiting W1AW. The Yaesu Quadra amplifier, DMU-2000 and Yaesu SM-5000 Station Monitor are all attached and make for an excellent operating spot. The FT DX 5000 certainly complements the station."

Motschenbacher, who worked at ARRL HQ before moving to Yaesu, remarked that returning to Newington to make the presentation "was a wonderful personal experience for me. I was so happy to see many old friends inside HQ, friendships made during the four and half years I spent with ARRL before joining Yaesu. It didn't take me long to see that the staff is very busy supporting its membership and Amateur Radio as a whole!"

==> + FCC NEWS: FCC UPHOLDS $17,000 FORFEITURE ORDER TO TENNESSEE HAM

In March 2009, the FCC issued a Notice of Apparent Liability for Forfeiture (NAL) in the amount of $17,000 to David Edward Perka, KA3PRB, of Lewisburg, Tennessee. The FCC alleges that Perka "willfully and repeatedly violat[ed] section 301 of the Communications Act of 1934, as amended, by operating without a license in the Maritime Radio Service and willfully violat[ed] Section 333 of the Act by maliciously interfering with the United States Coast Guard on the International Distress, Safety and Calling Channel in Annapolis, Maryland." Perka, who admitted to the findings, requested a reduction in the forfeiture amount, based on his inability to pay, but in a Forfeiture Order released by the FCC on September 21, 2011, the Commission refused to lower the amount. Read more here <http://www.arrl.org/news/fcc-upholds-17-000-em-forfeiture-order-em-to-tennessee-ham>.

==> + ARRL SEEKS TREASURER

After more than 31 years of distinguished service to the ARRL as its volunteer Treasurer, Jim McCobb, K1LU, has decided to step down when his current term expires in January 2012. The ARRL is seeking qualified candidates from among its membership. The Board of Directors elects the Treasurer and other officers at its Annual Meeting in even-numbered years.

The Treasurer is a non-voting member of the Board of Directors and must be a licensed radio amateur and a Full member of the ARRL for four continuous years prior to nomination. The ARRL By-laws <http://www.arrl.org/arrl-by-laws> define the role of the Treasurer as follows:

- In consultation with and subject to the general supervision of the Administration and Finance Committee, provides for the investment and reinvestment of the surplus funds of the League in any bonds or stocks

or other securities as would be selected by a trustee with the care of a prudent investor.
- Reports to and attends all regular meetings of the Board of Directors.
- Serves as a member of the Administration and Finance Committee.

The position is unpaid; however, necessary expenses including travel to meetings are reimbursable.

A Search Committee has been established to recommend one or more candidates for Treasurer to the Board. Additional information about the position is available here <http://www.arrl.org/files/media/News/ARRL_Treasurer-Position_Description.pdf>.
Interested and qualified members are invited to submit a Statement of Interest and qualifications by November 14, 2011 to the Secretary, preferably by e-mail <dsumner@arrl.org>.

==> HAYS AFFINITY GROUP PROVIDES ARRL MEMBERS WITH EQUIPMENT PROTECTION, CLUB LIABILITY INSURANCE PLANS

On May 1, 2011, the ARRL began a new partnership with Hays Affinity Group to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. Hays -- who took over from Marsh Affinity Group Services -- serves as the program administrator to provide equipment insurance to ARRL members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays has introduced new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/hays-affinity-group-provides-arrl-members-with-equipment-protection-club-liability-insurance-plans>.

==> + HB9DRV SELLS RIGHTS TO HAM RADIO DELUXE

Simon Brown, HB9DRV, has sold the rights to his popular Ham Radio Deluxe software package to a group consisting of Mike Carper, WA9PIE, Randy Gawtry, K0CBH and Rick Ruhl, W4PC. All three principals have more than 25 years of experience with radio data communications. Rick Ruhl is the president of W4PC Software, Inc whose products include the PakRatt, PKTerm and Radio Operations Center software suites. Randy Gawtry is the president of Timewave Technology Inc whose products include the PK and DSP families of data controllers and other commercial data products. Mike Carper is an experienced Fortune 500 technology executive, educator and featured speaker in the areas of wireless technologies and IT Service Management. Read more here <http://www.arrl.org/news/hb9drv-sells-rights-to-ham-radio-deluxe>.

==> SOLAR UPDATE

Tad "Somewhere the Sun is shining <http://www.youtube.com/watch?v=Fo0j5a6e8WA>" Cook, K7RA, reports:
Compared to the uneventful past few years, sunspot activity was truly

remarkable this week. The daily sunspot number for September 16 was 173. We haven't see numbers like this in more than six years, when the sunspot number was 181, way back on July 5, 2005 in Solar Cycle 23. The solar flux reached 150.1 on September 18. Just six months ago it was slightly higher, 153 on March 7 and 155 on March 8, but prior to that the only higher number was 157.3 on August 22, 2005, about 7 weeks after the sunspot number of 181. Currently, the solar flux and planetary A index forecast from USAF/NOAA calls for solar flux of 144 on September 22-23, 140 on September 24-25, 145 on September 26-28, 130 on September 29 through October 1, and 135 on October 2-5. The planetary A index is predicted at 5 on September 22-24, 8 on September 25, 5, 8, 5, 5, 15 and 8 on September 26 through October 1, and 5 on October 2-7. Look for more information on the ARRL website on Friday, September 23. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Go-Go's Stuck in My Car <http://www.youtube.com/watch?v=Fo0j5a6e8WA>.

==> + ARRL INVITES MEMBERS TO EXPRESS OPINIONS IN QST

Each month in QST, the ARRL devotes a page to print letters from its members. This is a chance for you to express your opinions -- good or bad -- on ham radio-related matters. Your opinion counts! Send your letters electronically to qst@arrl.org or via postal mail to Correspondence, 225 Main St, Newington, CT 06111. You can also fax your letters to 860-594-0259. We read every letter received, but we can only publish a few each month. We reserve the right to edit your letter for clarity and to fit the available page space. Letters published in QST may also appear in other ARRL media. The ARRL assumes no responsibility for statements made by correspondents.

==> + ON THE AIR: JARL QSL BUREAU HAS NEW ADDRESS

As of October 1, 2011, the Japan Amateur Radio League's (JARL) QSL Bureau will have a new address. If you use the JARL QSL Bureau, please send your QSL cards to JARL QSL Bureau, 1324-3 Kanba, Hikawa-cho, Izumo-shi, Shimane 699-0588 JAPAN.

==> THIS WEEK ON THE RADIO

This week:

- September 23 -- NCCC Sprint Ladder
- September 24 -- AGCW VHF/UHF Contest
- September 24-25 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; Texas QSO Party; CQ Worldwide DX Contest (RTTY)
- September 25 -- UBA ON 6 Meter Contest
- September 26 -- QRP Homebrewer Sprint
- September 27 -- 222 MHz Fall Sprint (local time)
- September 28 -- SKCC Sprint

- September 28-29 -- CWops Mini-CWT Test

Next week:

- October 1 -- TARA PSK Rumble Contest; EU Autumn Sprint (SSB)
- October 1-2 -- California QSO Party; Oceania DX Contest (SSB); WAB HF Phone Contest; EPC Russia DX Contest
- October 2 -- UBA ON Contest (SSB)
- October 3 -- German Telegraphy Contest
- October 4 -- ARS Spartan Sprint
- October 5 -- 432 MHz Fall Sprint1 (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane-hamfest>,
Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention

Amateur Radio Newsline(tm) Report 1780 - September 23 2011

Please note that this is an extended Amateur Radio Newsline report and contains three breaks.

Amateur Radio Newsline report number 1780 with a release date of Friday, September 23rd, 2011 to follow in 5-4-3-2-1.

The following is a QST. Ham radio assists as a 145 square mile wildfire rages in an isolated area of Minnesota, IARU Region One looks at a possible change to the QRP Center of Activity Frequency, the DX0DX operation from the Spratley Islands is cancelled due to safety concerns and Soyuz flights to the International Space Station to resume in November. All this and more on Amateur Radio Newsline(tm) report number 1780 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: RACES AND THE BOUNDARY WATERS CANOE AREA FIRE

Hams in Minnesota became a backbone of communications for several days. This as authorities continue to deal with a 145 square mile wildfire that began in mid-August from a lightning strike in a remote area of the state.

The fire is located in an area called the Boundary Waters Canoe Area. This is a very large region along the US and Canadian border in North-East Minnesota where no motorized equipment or vehicles are allowed. Generally, wildfires in remote areas such as this are allowed to burn out as a part of natures own forest renewal. This fire went for several weeks with no problem until a front came through with strong North-West winds and blew it into a lightly populated zone. That in turn brought out a massive firefighting effort.

In a recent news story, WDIO television interviewed Jim Anderson, N0JWA, about the involvement of amateur radio in this emergency. We caught up with Jim a few days later and he told us that hams from Lake County RACES were called out on Tuesday, September 13th when the evacuation of the small fishing town of Isabella appeared imminent:

--

N0JWA: "We been training with all types of drills or activities through the years and the real call came last Tuesday from the Lake County EOC and the Lake County Sheriff. So seven of our guys got their

stuff together, grabbed their go kits and away they went."

--

Also sent to the area was the groups well equipped communications trailer:

--

N0JWA: "We also had a communications trailer that went to Lake County first and they were directed to go up to Isabella. We had hams located there in Isabella, and we also had them in Silver Bay and in Finland (Minnesota). And those were evacuation points."

--

Anderson told Newsline that a formal net was in place to handle health and welfare traffic:

--

N0JWA: "N0MR, he was in a city in-between Duluth and the fire area and he served pretty much as net control. I was on this end here in Duluth prepared to do wgt I would have to do in any calling-out or calling family members o let them know that their relatives, sons, daughters, mothers, fathers, whomever that were up in the fire area were OK."

--

N0JWA that he was preparing to drive up to the fire area to act as a relief net control when word came on Sunday, September 18th that the services of the RACES operators were no longer required. This was because it had begun to rain in the fire area.

Winter weather tends to arrive early in the Northern Latitudes. Hopefully, this seasonal change will help to quickly extinguish this rather fearsome blaze. (N0JWA, N0ZRD)

**

RESTRUCTURING: REGION ONE QRP CENTER OF ACTIVITY COULD CHANGE

The IARU Region 1 High Frequency Committee meeting minutes caused some alarm and confusion over the future of 7030 kHz as the Region 1 QRP center of activity. This relates to the discussion about moving the frequency, and possible further discussion at the Region 1 Interim Meeting in 2013.

It is important to note that these discussion points did not feature in the minutes of the final General Conference Plenary. The question as to whether 7030 kHz is the best frequency for the QRP center of activity was actually raised in the context of discussing a proposal from Germany's Deutscher Amateur Radio Club to change the 40 meter Contest Preferred Segment.

The High Frequency Committee decided that this change couldn't be done without first seeking the views of the Region 1 QRP community. Further discussion across IARU Region 1 is expected over the coming months and years. It's important to remember that any change in the Region 1 plan for any spectrum will in some way eventually impact on Q-R-P operations in Regions 2 and 3 as well. (IARU R-1)

**

DX NEWS: SPRATLEY ISLANDS OPERATION CANCELLED DUE TO SAFETY CONCERNS

Plans to activate Thitu Island in the Spratley group have been cancelled. This due to the deteriorating safety to life and property issues in the South China Sea.

Back in January, some 30 hams had planned to operate for three weeks from the Philippines controlled island using the call DX0DX. Due to the security concerns the DXpedition was put on hold. Now, the Team Leader VK3FY says that it's off for good.

The Spratlys which lie between Vietnam, China, Malaysia, Brunei, and The Philippines is a much sought DX entity. However, VK3FY indicates that having a responsibility for the well being of the operators, he has concluded that the risks outweigh the wants or needs of the hobby. Its well known that personal safety conditions in the region have been deteriorating over the past 12 months.

And we will have more DX news near the end this weeks newscast. (VK3PC)

**

HAM RADIO IN SPACE: NEXT MANNED FLIGHT TO ISS WILL BE NOV 14

NASA and the Russian Federal Space Agency have agreed on a November 14th date for the first manned Soyuz rocket. This following the launch failure of a similar booster carrying a robotic cargo ship last month.

The decision follows an investigation by Russian space officials to identify the source of that failure and ensure it won't plague future launches. It also clears the way for a new three-member crew to launch on a Soyuz to the International Space Station, sustaining the orbiting lab's 10-year streak for a continuous human presence in space.

The two space agencies had temporarily suspended all manned Soyuz flights while Russian engineers investigated the August 24th launch failure that sent the Progress 44 spacecraft packed with food and supplies for the space station. That spacecraft crashed over Siberia shortly after liftoff.

As most listeners know, in the wake of last summer's retirement of NASA's space shuttles, the Russian Soyuz is the only means of transportation for people to and from the ISS. (Various reports)

**

HAM RADIO IN SPACE: THREE ISS CREW MEMBERS RETURN TO EARTH

Meantime, another Russian Soyuz capsule carrying three returning Expedition 27 astronauts from the International Space Station touched down safely in central Kazakhstan on September 16th.

NASA astronaut Ron Garan, KF5GPO, and Russian cosmonauts Andrei Borisenko, RW7LFG, and non-ham Alexander Samokutyayev landed some 93 miles southeast of the city of Zhezkazgan at 10 a.m. their local time. This, after spending 164 days in space on board the International Space Station.

But during re-entry there were some rather tense moments due to a yet unexplained communications breakdown. Repeated calls to the Soyuz TMA-21 capsule from Mission Control outside Moscow, went unanswered for several minutes, well after the craft had de-orbited. Communication was eventually established between the crew and an Antonov fixedwinged aircraft circling the landing site.

Sergei Volkov, UA1OSS, Mike Fossum, KA5AQG and Satoshi Furukawa, KE5DAW, are serving as the current Expedition 29 crew aboard the ISS. (Various reports)

ENFORCEMENT: HAM FINED $17000 FOR MARITIME BAND INTERFERENCE

The FCC has told a Tennessee ham that he must pay a $17,000 fine. This after admitting that he transmitted without a license on a United States Coast Guard frequency. Amateur Radio Newsline's Don Carlson, KQ6FM, is in Reno with the details:

--

In an acation date September 20th, the FCC has affirmed a $17,000 forfeiture order issued to to David Edward Perka, KA3PRB, of Lewisburg, Tennessee. This, for willfully and repeatedly violating section 301 of the Communications Act by operating without a license in the Maritime Radio Service and maliciously interfering with the United States Coast Guard on the International Distress, Safety, and Calling Channel in Annapolis, Maryland.

This case goes back to the spring of 2008. At that time agents in the FCC's Columbia Maryland Office alleged that on April 6th and April 7th of that year David Edward Perka operated on Marine Channel 16 or 156.800 MHz, which is the International Distress, Safety, and Calling Channel for stations operating in the Maritime Radio Service.

The unauthorized transmissions on April 6th, 2008 consisted of Perka making threatening statements to the United States Coast Guard. The ones on April 7, 2008 consisted of tones from a Dual-Tone Multi-Frequency keypad.

Although Perka holds an amateur license, the FCC says that he does not hold any form of certification to operate in the Maritime Service. The FCC order says that Perka later admitted to FCC agents that the transmissions on April 6, 2008 were intentionally transmitted to harass the United States Coast Guard. .

On March 27, 2009, the Columbia Office issued Perka a $17,000 Notice of Apparent Liability for Forfeiture. In his response, Perka admitted to the findings leading to the proposed fine. At the same time he requested a reduction based on his inability to pay.

In examining Perka's response, the FCC says that is required to take into account the nature, circumstances, extent and gravity of the violation. Also, with respect to the violator, the degree of culpability, any history of prior offenses and ability to pay.

The FCC says that its Notice of Apparent Liability issued to Perka specifically stated that a cancellation or reduction based on inability to pay will not be considered unless the petitioner provides certain specific documentation. The Commission says that the only documentation Perka submitted was a single unemployment check from the State of Maryland dated April 6, 2009.

After receiving Perka's response the Enforcement Bureau staff provided him an additional opportunity to submit the proper documentation. The regulatory agency says that while it has evidence that Perka received that letter, to date it has received no response. Based on this the FCC says that it has no basis for assessing Perka's financial situation As such a forfeiture in the amount of $17,000 in this matter is warranted in this case.

For the Amateur Radio Newsline, Im Don Carlson, KQ6FM, in Reno.

--

Perka was given the usual 30 days to pay the monetary forfeiture or to file a further appeal. (FCC)

**

ENFORCEMENT: MAJOR REDUCTION IN FINE TO FLORIDA UNLICENSED BROADCASTER

And a follow-up to another case we recently reported on. This involving an unlicensed broadcaster in Florida named Fritzner Lindor who was caught operating on 94.7 MHz in the city of Orange Park.

Back in June 2010, agents from the FCC's Tampa office had traced an unauthorized signal on 94.7 MHz to Lindor's home. During a station inspection, the commission said that Lindor admitted he had purchased the transmitter and operated it without a license. He also admitted

that he knew his actions violated the Communications Act.

Lindor was eventually issued a $15,000 Notice of Apparent Liability. In his response he did prove the fine to be a severe economic burden by submitting the required documentation. In the end the Commission agreed to a dramatic reduction in fine from $15,000 down to only $300. Lindor was given the normal 30 days to pay. (FCC)

**

RADIO RULES: FCC GRANTS CAP-EAS TIME EXTENSION

Broadcasters and cable-casters are issuing a collective sigh of relief. This, with word that the FCC has approved another extension for broadcasters to comply with the Common Alerting Protocol or CAP-EAS deadline.

The new deadline is June 30, 2012 and supersedes the previous compliance date o this coming Sept. 30th. An earlier deadline was extended in March of this year.

The announcement was made at a regulatory session at the Radio Show that was being held this year in Chicago. In its statement the FCC noted that no one can yet comply with the new E-A-S rules because the commission has not finalized all the key technical specifics necessary for receiving CAPformatted alerts. (RW)

**

RADIO RULES: W6TIA ON CAP-EAS PROTOCOL

Meantime, EAS expert Richard Rudman, W6TIA, blogs that FEMA has a plan for how broadcast stations will get domain names or I P addresses that they will need to program in to their Common Alerting Protocol or CAP encoders/decoders. These are the devices which will then "poll" the federal CAP message alerting system. That's how primary stations will get their EAS alert messages to be re-transmitted across the daisy chain.

Rudman says Antwane Johnson, who is the Division Director and Program Manager for FEMA's Integrated Public Alert and Warning or IPAWS System told him that a PIN will be assigned to each of the approved EAS equipment vendors. To receive a PIN, each vendor will need to e-mail FEMA IPAWS requesting the PIN and the structure of the Atom feed URL.

W6TIA adds that once final security checks have been completed, FEMA IPAWS will update the EAS community with the release of the domain names to be used by the broadcaster community. More about the Integrated Public Alert and Warning System and how it might affect you can be found online at www.fema.gov/emergency/ipaws. (RW)

**

RESCUE RADIO: HAM RADIO TO FOLLOW A ZS HIKING GROUP

Ham radio will be used for lifeline and safety communications. This as a group of South African hikers embark on a 12 day hike across some rugged terrain.

The trip begins on the 26th of September at Mount Aux Sauces and end at the city of Boesmansnek. At least two South African radio amateurs will be involved in the mission. Johan Leslie, ZR4CAA, is a member of the hiking group with the base camp station manned by John Longland, ZS6AA.

The bands to be used are 80, 40 and 2 meters. Hams worldwide are being requested to listen out for these call signs and assist if an emergency situation should arise. (SARL)

**

BREAK 2

Coming to you this week from Florida's sunny shores, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO BUSINESS: HRD VERSION 5.1 TO BE FREE UPGRADE TO REGISTERED USERS

The version 5.1 release of Ham Radio Deluxe will be made available at no charge to registered users when completed. So say Mike Carper,WA9PIE, Randy Gawtry, K0CBH and Rick Ruhl, W4PC.

The trio announced last week that they had acquired the source and rights to the Ham Radio Deluxe suite of software from Simon Brown, HB9DRV. Since then there had been a lot of rumor on the Internet chat sites as to what would happen next.

A lot of that was cleared up with the release of a statement by Carper, Gawtry and Ruhl over the weekend of September 17th and 18th posted on Facebook and other websites. In addition to making version 5.1 a free upgrade to registered users, the trio say that they plan to continue improving Ham Radio Deluxe to keep it as the best ham radio package available.

Whether or not it will remain free after the release of version 5.1 was not discussed in their news release. Right now Carper, Gawtry and Ruhl say that they are in the process of building a development environment for Ham Radio Deluxe. They say that their main concern is to begin by addressing some of the bugs in the existing "To Do List" for the upcoming version 5.1 release. (HRD Team)

**

HAM HAPPENINGS: K9HAM AT THE WINGS AND WHEELS FLY IN

Turning to ham radio happenings, word that the Lewis and Clark Radio Club of Godfrey, Illinois, will be operating special event station K9HAM on September 24th. This, for the 17th annual Wings and Wheels Fly-in slated to be held at the St. Louis Regional Airport.

Operation of K9HAM will be from 10:00 A.M. until 4:00 P.M. Central Time, weather rpermitting. The primary operating frequency will be 14.245 S.S.B. +/- QRM on 20 meters. A commemorative certificate will be available with your card and a self addressed stamped envelope or electronically direct to your e-mail.

The Wings and Wheels Fly-In is an annual event that features a display of historic war aircraft and vintage automobiles. More about it is on-line at www.stlouisregional.com. (KF9F)

**

HAM HAPPENINGS: THE CANADIAN AMATEUR RADIO HALL OF FAME 2011

Nominations for Canadian Amateur Radio Hall of Fame for 2011 close on September 30th. This award recognizes deserving Canadian amateur radio operators for outstanding achievement and sustained service to amateur radio in Canada or to ham radio at large. Nomination forms and details of the procedure are available from the Radio Amateurs of Canada website, or direct at tinyurl.com/canada-award (RAC)

**

NAMES IN THE NEWS: K0KG NAMED NEW CQ DX AWARDS MANAGER

Some names in the news. First is Keith Gilbertson, K0KG, who as been named by CQ Magazine to succeed Billy Williams, N4UF, as its CQ DX Awards Manager. According to an announcement from CQ, Keith Gilbertson is retired vocational and technical education teacher and community college administrator. He is a veteran of the U.S. Air Force and Air Force Reserve who lives in Rochert, Minnesota, with his wife, Jeannie. They have two adult children and four grandchildren.

CQ adds that effective immediately, any correspondence relating to the CQ DX Award program should be directed to Keith Gilbertson, K0KG, 21688 Sandy Beach Lane, Rochert, Minnesota. 56578-9604. K0KG can also be reached by e-mail ato keith (dot) gilbertson (at) cq (dot) com.

Gilbertson's appointment follows the retirement of Billy Williams, N4UF, after more than three decades of service to the amateur radio DX'ing community. (CQ)

NAMES IN THE NEWS: N5HYP AND THE SCOUTING MERIT BADGE CLASS

Congratulations to Tom Schuessler, N5HYP, for a successful Radio Merit Badge class and amateur radio satellite demo at the National Scouting Museum. The Boy Scout station K2BSA/5 had contacts with numerous stations during its operational hours. It will again be again be

active on October 15th for the 2011 Scouting Jamboree on the Air. (ANS)

NAMES IN THE NEWS: KA3HDO RETIRES FROM NASA AFTER 36 YEARS

After an illustrious 36 year career with NASA, Frank Bauer, KA3HDO, has retired from the agency.

In his farewell note to his colleagues, Bauer said that for someone who dreamed about space exploration as a very young child and started at NASA when the Apollo program was in its twilight, it has been truly a pleasure to spend over 3 decades developing and operating systems as part of the NASA team. Bauer said that he has had what he called a phenomenal time contributing to countless Human and Robotic spaceflight missions, flight tests, technology experiments, pioneering systems, studies, formulations and on-orbit operations activities as well as numerous agency-level, U.S. Government and international strategies and initiatives.

In addition to his job with NASA, KA3HDO, had a parallel volunteer career as one of the leaders of the manned Amateur Radio in Space program. Among his many achievements was taking manned ham radio operations on-orbit from the now retired space shuttles under the SAREX operation over to the International Space Station and into the ARISS program.

Bauer, who stepped down from ARISS and AMSAT duties in March of 2009, had served as ARISS Program Leader and ARISS International Working Group Chair. Since 1991, he had also held the title of AMSAT Vice President for Human Spaceflight Programs.

In May of 2009 Bauer was presented with the ARRL President's Award for his many contributions to ham radio's part of mans exploration of space. (ANS)

DOWN BUT NOT OUT: GET WELL WISHES TO WB6FDF AND W2ML

Two people long associated with Amateur Radio Newsline are currently suffering medical problems. Retired news anchor and board member Robert Sudock, WB6FDF, is in a rehab facility in Long Beach, California where he is recovering from a badly burned foot and a flare-up of an previous medical problem. Once back on his feet Robert will be come the permanent news anchor for the weekly Newsline-produced news capsules that you will see on the Ham Nation Internet TV show that airs Tuesday nights at live dot twit dot tv. Get well wishes go to him via e-mail to wb6fdf (at) arnewsline (dot) org.

And Steve Mendelsohn, W2ML, who many knew as an early Newsline reporter before becoming the ARRL Hudson Division and later as ARRL 1st Vice President has been diagnosed with stage 4 pancreatic cancer. That said, Steve says that he is determined not to let his chemotherapy

treatments slow him down. At least not very much.

Steve who works for ABC Television in New York City and who also brought game-day frequency coordination to the National Football League is profiled in a rather amazing to read story in the NY Jets on-line magazine. You can view by taking your web browser to tinyurl.com/Steve-Mendelsohn. Steve can be reached by e-mail to W2ML (at) arrl (dot) net and we are sure a kind word of support from the ham community would be very welcome right now. (ARNewsline(tm), CGC, others)

HAM RADIO IN SPACE: FUNCUBE GROUP MEMBERSHIP EXCEEDS 2000 In under a year the AMSAT-UK FUNcube Yahoo Group has achieved over 2000 members.

The group was created by Rob Styles, M0TFO, at the end of October 2010. Its purpose is to provide support for the AMSAT-UK FUNcube satellite and the FUNcube Dongle Software Defined Radio package.

For those not aware, the FUNcube satellite is an educational micro-bird project with the goal of educating young people about radio, space, physics and electronics. Once on-orbit, FUNcube will provide a strong 145 MHz telemetry beacon for the pupils to receive. The bird will also have a 435 to145 MHz linear transponder for cross band SSB and CW communications.

The target audience for FUNcube is school students age 8 to 18. Planners say that FUNcube will support the educational science, technology, engineering and maths initiatives. It will also provide an additional resource for the RSGB's GB4FUN radio communications demonstration van.

Information on the FUNcube satellite project is at FUNcube.org.uk. You can join the FUNcube Yahoo Group at groups dot yahoo dot com and using the search feature to locate the FUNcube group. (M0TFO)

**

RADIO IN SPACE: FIND YOUR GRAIL - ON X BAND

The NASA Grail mission to the Moon should downlink on 2280.6 MHz and 2279.511 MHz. Also, X-Band Doppler ranging beacons are on 8451.5995 MHz and 8451.7995 MHz. And with due respect to Monty Python, if you have the gear to receive these frequencies, with this information at hand, you might just find your Grail. (ANS, others)

**

ON THE WEB: THE SIX AND TEN REPORTING CLUB

If you are a ham who likes to operate in the boundary area between High Frequency and low VHF, then the Six and Ten Reporting Club may be for you. This is an informal group of radio amateurs, mostly from the UK, who are interested in propagation studies at frequencies around the HF to VHF boundary. This means the 6 and 10 meter amateur bands.

The club produces a monthly newsletter that includes analysis of 28MHz propagation based on beacon monitoring, analysis of 50MHz activity reports broken down by propagation mode. Also included are discussions on unusual propagation events, compilations of solar and geomagnetic data, lists of activity world-wide, beacon news, and results of ongoing experiments.

The latest edition of the Six and Ten report is now available. You will find it in cyberspace at g7kse.co.uk/6and10. (Southgate)

RADIOSPORTS: REGION 3 ARDF CHAMPIONSHIP IN VK SEPTEMBER 23 - 28

The 8th ITU Region 3 Amateur Radio Direction Finding Championships are being held from September 23rd to the 28th at Maldon in Australia's Victoria state. This is a historic gold mining area about a two hours drive from Melbourne airport.

This competition is being hosted by the Wireless Institute of Australia, and run by the Victorian Amateur Radio Direction Finding Group. Accommodation will be at the Victorian Blue Light Youth Camps in Maldon. For further information, please contact Wireless Institute of Australia A-R-D-F Coordinator John Bramham by e-mail to vk3www (at) wia (dot) org (dot) au. More is on-line at www.ardf.org.au. (WIA, Southgate)

DX

In DX, word that preparations for the large multi-national 3D2R DXpedition to Rotuma are going according to plan. The team will meet in Suva, Fiji on September 22nd and depart for Rotuma on the 25th. They expect to be operational sometime on the 27th on 160 through 10 meters using CW, SSB, RTTY, PSK and SSTV. They also will hve stations

on 6 and 2 meter moonbounce with a focus on Europe and Africa. QSL via YT1AD or electronically using Logbook of the World.

The Oh J-Zero-X team has successfully landed on Market Reef for the first leg of its three week stay. Their focus will be on low-bands and RTTY, including the weekend's CQ World Wide RTTY Contest. Please keep watching the Oh J-Zero-X on QRZ dot com for updates. QSL this one via OH2BH

KL7JR and his XYL WL7MY will be active stroke HI3 from the northern coast of Hispaniola using SSB on the High Frequency bands until 2013 concentrating on 80, 40, 22, 17 and 6 meters. They also plan some experiments with mobile antennas from their 3rd floor balcony. Skeds are possible via e-mail to KL7JR (at) yahoo (dot) com Their QSL route can be found on QRZ.com.

W6HGF/KH0, will be active from Saipan from Sep 20th through the 30th. He will focus on RTTY and and plans to take part in the CQ World Wide RTTY Contest. Other modes will be used if time permits. QSL direct to W6HGF either direct or via Logbook of the World.

TA1AMC is on a humanitarian mission in Mogadischu, Somalia and will be operational stroke T5 during his spare time. He will be there for the next three months. QSL as directed on the air.

IZ4AMS will be active from Tinetto Island on October 9th and 10th using the call IZ4AM. If you make contact, please QSL as directed on the air.

Lastly, a Belgian team attempt at landing on

Rockall Island in May 2009 was unsuccessful due

to the weather conditions at the time. They are

now planning to try again, with the projected

date being around September 27th or 28th.

Rockall is the rarest of the European Islands on

the Air and has only been activated once a few

years ago when just over 200 QSO's were made.

Foir the latest information keep a cyberspace

eye on www.rockall.be. The Islands on the Air

reference for Rockall Island is EU-189.

THAT FINAL ITEM: LPFM DONATED TO ILLINOIS STATE UNIVERSITY And finally this week, students at Illinois State University are the recipient of a Low Power FM license given to the school by a religious broadcaster. Bill Pasternak, WA6ITF, is in the nerwsroom with the details:

--

Some good news for the proponents of college level radio. On September 1st, the Federal Communications Commission approved the ownership transfer of WEWT-LP from Rock in Victory Ministries to the Illinois State University Foundation. This was accompanied by a change in call letters to WZND-LP. As a result, 103.3 MHz will be the Low Power FM voice of Illinois State University students with the potential of reaching nearly 75,000 listeners with its 83 watts of power.

It should be noted that college radio advocates have long been protesting the loss of student-run FM stations. On campuses nationally, cash-strapped colleges and universities are selling or leasing stations to outsiders. And as broadcast licenses and studio equipment are lost, at best, students end up with Internet-only stations.

At least in Illinois, that's about to change.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

And that's a nice way to round out this week's newscast. (Radio Survivor)

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX RTTY Contest announcements. Also, we wanted to provide the OPDX readers with a consolidated listing of the CQWW DX RTTY Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 17-September, through Friday, 23rd-September there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9L, VP2V, VP6, VP8, VP9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). By the time you read this, Paul, 2E1EUB, will once again be active as 2M1EUB as for 14 days until about October 8th, weather permitting. The first week will be from the Island of Skye (western Scotland, IOTA EU-008, IOSA NH07, SCOTIA CN14, WLOTA 1626). The second week will be from the eastern side of Scotland in the Cairngorms National Park (WFF GMFF-001). Activity will be on 160m, 80m, and the satellites, as well as 2m SSB. Checkout QRZ.com under 2M1EUB for more info.

3D2R, ROTUMA (Update). By the time you read this a large multi-national team will be preparing to leave for a DXpedition to Rotuma from Lami Bay, Suva, departing by ship to Rotuma (OC-060) on September 25th. The Team expects to arrive in Rotuma and become active on Tuesday, September 27th. They will complete their DXpedition on October 7th. Their main goals of this DXpedition are to work every amateur radio operator who needs Rotuma for a new DXCC country. They will be active as 3D2R on all bands from 160-2 meters, including the 60m and 6m, using CW, SSB and RTTY. They will also be active on PSK, SSTV and EME. Special attention will be made to work stations from Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so they ask everyone in the honor of HAM SPIRIT to stand by when asked so that they may fulfill this need. They plan to upload their logs on a daily basis to their online log. They will upload to LoTW approximately six months following the DXpedition. The team is still currently seeking additional Club and Individual Sponsors to help them defray the costs of carrying out this DXpedition. QSL via YT1AD, direct or by the Bureau. For more details and update, see the 3D2R Web page at: http://www.yt1ad.info/3d2r/index.html

4J/4K, AZERBAIJAN (Update). Members of the "Federation of Radio Sports of Azerbaijan" and the Safari DX Activators Club are organizing a DXpedition to the battle line of the Nagorno Karabakh area between September 29th and October 2nd. The DXpedition will use three different callsigns (not two as first mentioned), 4K3K, 4J0K and 4J0SFR. Please be aware that the mentioned callsigns are only legal to operate in the assigned Nagorno Karabakh area. No other callsigns are issued for the named territory by the Ministry of Communication of Azerbaijan. Any other callsigns are considered illegal. QSL both 4K3K and 4J0K via RW6HS. QSL 4J0SFR via 4J5T. For more details, please see QRZ.com.

4W6, TIMOR-LESTE. The 4W6A team will only be active for a few more days from Atauro Island (OC-232) until September 26th. As of 0930z, September 23rd, they had 29546 QSOs with 10747 unique callsigns (11815/CW, 17001/SSB and 730/RTTY). Watch the 4W6A Facebook page for updates at: http://www.facebook.com/pages/4W6A-Atauro-Island-Oc-232/180665755315820 Remember the QSL Manager is M0URX. QSL direct (w/SAE plus 1 IRC or 2 USDs), by the Bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation. Direct or Bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS). There is a link from the 4W6A Web site at: http://www.4w6a.com

5C, MOROCCO (Reminder/Update, IOTA, LH and WFF Op!). Operators Ruggero/ IK2PZC (5C2P), Leo/I8LWL (5C2L), Fred/IK7JWX (5C2J), Simon/IZ7ATN (5C2SG), Ampelio/IS0AGY (5C2B), Mounaim/CN8QY (CN8QY/p) and Belkaid/CN8QX (CN8QX/p) are now active from the city of Dakhla and the lighthouse (ARLHS WSA-001), which is part of the National Park off the coast of Dakhla (WFF CNFF-007), Morocco, until September 29th. Their main purpose of this DXpedition is to activate Herne Island (AF-068) in South Western Sahara IOTA Group (CN), using the callsign 5C2/homecall/p. Specific dates are unsure (it may happen as this is being sent out). PLEASE NOTE: This does not count for Western Sahara (S0) for DXCC. Activity will be on all HF bands, including 30/17/12m, and 6 meters, using all modes. The team might try an entry in the CQWW DX RTTY Contest (September 24-25th) using the callsign 5C2P. QSL via their home callsigns, direct or by the Bureau. QSL 5C2SG via IZ7ATN, direct (see QRZ.com). QSL CN8QY/p via I8LWL, direct only.

60M NEWS TIDBITS (From the W8GEX 60m News).....
* Jose, CT1EEB, reports that Portugal Hams are now authorized to use the frequency of 5288.5 kHz in addition to the already authorized frequencies of 5371.5 kHz and 5403.5 kHz. Same modes and power level.

* Dave, A92IO, reports 5.373 MHz and 5.405 MHz USB are being used in Bahrain.

* Geoff, VE4BAW, President and Chair Radio Amateurs of Canada, also Co-Chair of Canadian Amateur Radio Advisory Board, reports Canada will be on 60 meters sometime this fall.

* After several negotiation and requests, the Telecommunication Institute in Slovakia now allows stations to operate on 60m band between 5258.5-5410.0 kHz for experimental purposes. The allowed power is max. 100w ERP and licences are valid for 1 year as same as in OK-land.

6Y, JAMAICA. Operators Lajos/VE3NE and Gyorgy/VE3NZ will be active as 6Y3M during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via VE3NE.

7Q, MALAWI. Operators Rob/GM3YTS and Gav/GM0GAV will be active as 7Q7GM between October 31st and November 13th. Activity will be CW only with a focus on the low bands, especially 160/80m. They are hoping to have an online log available. Look for all QSOs to be uploaded to LoTW as soon they return home. QSL via GM4FDM.

8Q, MALDIVES. Jim, G3VDB, is intending to once again be active as 8Q7EJ from Vilamendhoo Island Resort (AS-013) between October 31st and November 13th. Activity will be holiday style mainly on 20 meters using CW, SSB, PSK31 and RTTY. QSL via his home callsign. The 2009/2010 8Q7EJ logs are available on the Clublog Web page at: http://www.clublog.org/logsearch/8Q7EJ

C21A - DXPEDITION NAURU POSTPONED! Members of the "Pacific DXers" team have announced: "This operation has been postponed until next year due to advice from the Nauru Consulate and airline (airline could not guarantee the flights due to internal problems). So.. An alternative destination has been arranged on short notice... We are now proud to be able to announce that "Tuvalu" (T2) will be activated between November 11th and

December 8th, with most of the same team." For more information, see T2 below.

CN, MOROCCO. Stefano, IK2QEI, will be active as CN3A from Safi during the CQWW DX RTTY Contest (September 24-25th) as a Single-Op/All-Band entry. QSL via LoTW.

CR3, MADEIRA. Members of the Madeira Contest Team will be active as CR3A during the CQWW DX SSB Contest (October 29-30th) as a Multi-? entry. Operators mentioned are Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Miguel/CT3IA, Tiago/CT3KU, Jose/CT3KY, Jose/CT3NT (CT1BOH) and possibly others. QSL via LoTW.

EF8, CANARY ISLANDS. Look for EE8E from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), to be on the air during the CQ Worldwide DX RTTY Contest (September 24-25th) as a Multi-Single entry. Operators mentioned are Valery/RD3A, Juan/EA8CAC, Pekka/EA8AH and Alex/UA5C. QSL via LoTW.

EK20, ARMENIA (Special Event). To celebrate the 20th anniversary of independence of Armenia, look for amateurs of Armenia to use the special prefix "EK20" beginning September 21st. A special award is available for working at least 20 QSOs/SWL with these special radio stations on all HF bands, including 30/17/12m, and on any modes (CW, SSB and Digital). QSLs for these special prefixes may be sent to: P.O.Box 22, Yerevan, Armenia 0002, or per the operator's instructions. The electronic award can be received in the form of a digital image file sent to you, so you may print the certificate on your printer. Send log extract of the contacts to: ek7dx@yahoo.com
Stations mentioned are: EK20A, EK20AF, EK20DX, EK20FB, EK20GB, EK20GM, EK20H, EK20KE, EK20LX, EK20RL and EK20TA.

FG, GUADELOUPE. Armin, DK9PY, will be active from here between November 6-25th. Activity will be only CW on all bands (except 160m) in the lower CW area (15 kHz) from the band edge. He will concentrate on the 30/17/12m bands. Callsign and QSL route to be announced.

FH, MAYOTTE. Phill, F6GNT, will be active as FH8NX from Mayotte Island (AF-027) until March 2013. Activity will be on 20-10 meters using SSB. QSL direct to: Phillip Ward, 36 Totorosa 2, Labattoir 97610, Mayotte. Also, QSL via eQSL.

FJ/TO3, ST. BARTHELEMY (Update). Operators Nikola/VE3EY and John/VE3TA will be active as FJ/homecall from St. Barthelemy (NA-146) between November 22-29th. Activity will include the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. They will use the callsign TO3A. QSL via their home callsigns. QSL TO3A via VE3EY. An online log search for TO3A and FJ/VE3EY will probably be available after the operation here: http://dx.fireroute.com/to3a

FP, ST.PIERRE & MIQUELON. Members of the Cambridge University Wireless Society (CUWS - G6UWS) will be active as FP/homecall from Miquelon (NA-032) between September 24-29th. The six operators mentioned are

Dominic/M0BLF, Martin/G3ZAY, Simon/G4EAG, Tom/M0TOC, Robert/M0VFC and
Gavin/M1BXF. Meet the operators and see their YouTube trailer at:
http://www.youtube.com/watch?v=rsKfnO4TEPU
The team will be "vlogging" on YouTube while they are on Miquelon Island.
Activity will be on all bands using CW and SSB. QSL via the operator's
home callsign. Also, check out their Facebook and Twitter pages at:
http://www.facebook.com/pages/Cambridge-University-Wireless-Society-in-St-Pierre-et-Miquel
on/116233735144983
http://twitter.com/#!/cuwsinfp

HB0, LIECHTENSTEIN. Mek, SP7VC, will be active as HB0/SP7VC between
October 25-31st. Activity will be on 160-10 meters including the 17/12m
using SSB. He will also be on 6m, if open. Mek will also be active in
the CQWW DX SSB Contest (October 29-30th). Equipment will consist of
an IC-746, HEX Beam, R-7 vertical, INV-L for 160/80m, 3 element yagi for
6m, an ALPHA 76A and a PA for 6m. QSL via LoTW or his home callsign,
by the Bureau or direct.

II9, ITALY. The II9K Contest Team will be active from Sicily during the
CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. Operators
mentioned are Giuseppe/IT9HBT, Girolamo/IT9GNG, Rino/IT9FXY, Vincenzo/
IT9ECQ and Maria/IT9FRA. QSL via IT9HBT.

IOTA NEWS.............
AF-019. Emilio, IZ1GAR, will be active as IH9/IZ1GAR from Pantelleria
Island (IIA TP-001, WLOTA 0041) between November 23-28th. In
the CQWW DX CW Contest (November 26-27th), Emilio will be
active as IH9R and as a Single-ZOp/Single Band (40m) entry.
Pantelleria counts a Multiplier Zone 33 Africa Italy for the
CQWW DX rule (islands are located over the African continent
platform). QSL via IZ1GAR, direct or by the Bureau.

AF-019. Tony, IK1QBT, will be active as IH9/IK1QBT from Pantelleria
Island (IIA TP-001, WLOTA 0041) between November 23-28th. In
the CQWW DX CW Contest (November 26-27th), Tony will be active
as IH9X (Operating class TBD). QSL via IK1QBT, direct or by
the Bureau.

AF-068. By the time you read this Simon, IZ7ATN, should be active as
5C2SG/p from Herne Island until September 28th. Simon attempted
an operation in 2010 from this rare island, the operation was
NOT validated by RGSB IOTA Manager. He states that his main
goal is:
* To fulfill the DESERVING needing AF-068 in their IOTA score,
mainly who already made QSO with him in 2010.
* Those who sent DIRECT QSL to him for 2010 operation, PLEASE
make a NEW QSO!
* NO need to send him a second QSL, just drop him QSO details
via mail at <simon.iz7atn@vodafone.it> as he will use your
previous contribution to reply you!
* Remember: ONLY a new QSO with 5C2SG callsign will allow you
to get you a QSL back using the previous request you made!

Simon uses the following operating policies:
* PLEASE TAKE NOTE: only ONE QSO is needed for IOTA operations.
Multiple bands QSOs are unuseful as this callsign is not for
DXCC purpose! By making more than one QSO you let another
station MISS a QSO as he has LIMITED time to be on the
island. THINK about it and let others make QSO with him
like you did! Those who insist to make MORE than ONE QSO
will be later REMOVED from the log.

* 5C2SG will ALWAYS split up, usually 5 kHz.
* 5C2SG will reply ONLY to FULL call-signs. 2-letter will
be IGNORED.
* 5C2SG will operate SSB only on 10-15-17-20 meters.
QSL via IZ7ATN, by the Bureau or direct (see QRZ.com for
more details).

EU-189. (Update OPDX.1026) The same Belgian team that made an attempt
to land and operate from Rockall Island in May 2009 is about
to set sail again on September 24th. Only this time they have
a much larger vessel called the "Cdt. Fourcault" which has a
variety of tools that should warrant a safe landing in almost
all sea or weather conditions including a helicopter! See the
Web page: http://ibiza-style.com/pages/en/luxury_style/people/241-a_mysterious_vessel.html
Estimated travel time is about 4 days from the harbor in
Antwerp, so they should be on the air around September 28th. On
operations from the ship, they will use the callsign ON4ATW/MM.
Callsign to be used when on Rockall is MM0RAI/p. Activity will
be on 80-10 meters using CW and SSB. Suggested frequencies are:
CW - 3516, 7016, 10116, 14016, 18084, 21016, 24906 and 28016
Listening up 3 kHz.
SSB - 3763, 7063/7163, 14263, 18136, 21263, 24963 and 28463 kHz
Listening up 5 kHz or on 3863 and 7236 kHz.
QSL via ON4ATW (LoTW, by the Bureau or direct). Keep an eye on
their Web site for last minute updates and news at:
http://www.rockall.be

KH6BZF PROPAGATION FORECAST/REPORT (September 24th-October 1st)....
Sep 24 AN SOLAR REFERENCE KEYS
Sep 25 AN --------------------
Sep 26 AN BN - Below Normal
Sep 27 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 28 AN LN - Low Normal
Sep 29 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 30 AN-LN DIS - Disturbed
Oct 01 HN-AN VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between

7-16 and "K" index will be 3 or less

LM9L40, NORWAY (Special Event/Contest Op). Members of the "Nedre Romerike Gruppe av NRRL" (club station - LA9L) will be active as LM9L40Y through December 31st, to celebrate their 40th anniversary. QSL via LA9L, by the Bureau or LoTW only. No direct! Also, look for Olaf, LB8IB, to be active as LM9L40Y in the CQWW RTTY DX Contest (September 24-25th) from the LN8W contest station in Rakkestad. He will be a Single-Op/All-Band/High-Power entry. QSL via LA8HGA.

OJ0, MARKET REEF (OJ0X Update - Message from DL3DXX, DH7SA, DL5CW and SP5XVY): Dated September 21st - "After a one-day delay, we finally made it. Perfect weather yesterday for our landing; more wind today but in spite of that you will find the logs uploaded for the first night. We are still in the process of establishing our stations and antennas. That means we are quite busy; the SteppIR is working fine, and we have 30M and 40M dipoles up and running so far. Will erect the Titanex, weather permitting today. 30M sounded like a lot of Aurora, with difficult propagation into USA and Japan, and a huge pileup from Europe on the first night. But we worked a lot of DX, including the US West Coast and Midwest. No generator problems so far; with so much power from the six windmill generators, the diesel generator has not been fired up yet. 73 de DL3DXX, DH7SA, DL5CW & SP5XVY"

QSL INFO AND NEWS.....
QSL Hector, CO6CBF, via his manager George, WA5KBH, (USA Stations Only). Stations outside of the USA can send direct via his QRZ.com address. Hector has been very active on satellites and recently received his Satellite VUCC Award. His home grid is EL92, but he plans to operate from other grids in Cuba in the near future.

Pedro, EA5GL, informs OPDX readers that he has the logs for the following operations (and any future by activations) Hiro, JA6WFM, since 1997: HC5WW, HC5WW/HC8, HD5J, HQ3J, HR3J, HR3/JA6WFM, JA6WFM/HC5, JA6WFM/HI8, JA6WFM/TG9, NP3J, NP3J/HI3, TI5EBU, TI5WFM, YN6WFM and YN6WW. If you need a QSL, use the address on QRZ.com.

NEW QSL MANAGER. Pedro, EA5GL, informs that he is the new QSL Manager for LU7HZ and KP4EIT.

II1A QSL ROUTES (Correction). Paul, F/I1RBJ, informs that his old II1A contest callsign between 1990 and 1996 has now be reassigned to IK1SPR (not IK1PSR as mentioned last week) starting with the forthcoming contests. So, PLEASE QSL to him. He is expected to be quite active. Paul states that he still receives request now and then for II1A. He has all the logs still, so if you still need a QSL, please QSL via his F/I1RBJ address.

JARL QSL BUREAU (New Address). As of October 1, 2011, the Japan Amateur Radio League's (JARL) QSL Bureau will have a new address. If you use the JARL QSL Bureau, please send your QSL cards to JARL QSL Bureau, 1324-3 Kanba, Hikawa-cho, Izumo-shi, Shimane 699-0588 JAPAN.

NEEDS SOME HELP. Alex, PY2SEX, needs some information about Cologne (Koln), Germany and/or any HAM Radio operators there because it is a good possibility that he may be moving there. He can be reached via his E-mail address at: py2sex@gmail.com

QSL RECEIVED VIA LoTW: 6W2SC, 9K2OK, AL7TC, BV100, F1ILA, FM/R5GA, FY5PO, HA3LI, IK2QEB, J5UAP, JA2MOG, JE1LFX, JH0INP, JH1HGC, JV5A, KP2/NY6X, OD5/DL6SN, OE3GCU, OL90FOLK, RU3EG, UA9CGL, VE6CMV, VP2ETN, YO3FRI, YT9M, ZP6CW and ZS2DK

QSLS RECEIVED VIA MAIL: 4A4A, 8P9AA, 9H4JX, CP4BT, E51PMR, EY7AD, FO/F6CTL, HC1HW, SX5F, VK9NN and ZK2A

QSLS RECEIVED VIA THE BUREAU: 5D0IPY, 6Y1V, DJ3HJ, F5OW, F6EAO/P, FM5CD, FO8RZ, HA8TP, HH2/OH2TA, HR9/IK2QPR, LX1HD, OH3SR, OH4TI, OS6C, PA0GMW, PA123OLS, R8MC, RA34SI, RA3TT, RU3EQ, RV3LE, SK4TL, SO8A, SQ3LVO, TA2KN, TM6WRC, TN7C, UR5FA/MM, UT0EA, UT5UR, UX3MZ, VP2MNK, YT0A, YU7NW, YU7YG, YV5TX, Z36N, Z36W, Z37M, ZL1BYZ and ZL6LH

T2, TUVALU. With the "Pacific DXers" postponing their DXpedition to Nauru (see C2 above), the group has reorganzied their first DXpedition to Tuvalu (OC-015)to take place between November 11th and December 8th. Callsign will be T2T. Operators mentioned are Eddie/VK4AN, Bill/VK4FW, Eric/VK4NEF, Tim/NL8F, Jay/K4ZLE and Julian/W5SL. Activity will be on all HF bands, 160-6 meters using CW, SSB, RTTY and PSK31. They expect to have at least 3 stations on the air with a dedicated station set up on 6 meters running in an interrupted beacon mode. QSL Manager is the Pacific DXers, or by the Bureau via VK4FW. Bureau requests are also accepted by E-mail to eliminate sending your QSL via the Bureau (saves time!). PLEASE NOTE: VK4FW is the current QSL Manager for Pacific DXers: Bill Horner, 13 McConnell Rd, Maidenwell, QLD 4615, Australia --or--
via E-mail: QSL-Mgr@pacific-dxers.com
If an InterNet connection (doubtful)can be established during the operation an online log will be updated on a regular basis, otherwise it will be uploaded as soon as they return home. LoTW and eQSL will be uploaded within 12 months after the operation finishes. For more details and updates, visit: http://c21.pacific-dxers.com/T2T.html
PLEASE NOTE: Operators K4ZLE, VK4AN, VK4FW, VK4NEF and W5SL will operate from Fiji prior to Tuvalu between October 26th and November 9th.

T32, CHRISTMAS ISLAND (Reminder). Just a reminder that members of the Five Star DXers Association (FSDXA) will activate T32C from Kiritimati (Christmas Island) between September 27th and October 25th. The T32C team will have no less than 41 operators, some of whom will be there for the whole period, others will be there for the first or second half. At any one time there will be around 30 operators on the island permitting them to operate round the clock on all bands with propagation and other factors permitting, two stations active on each of 80-10 meter bands. Internet access to and from Christmas Island is limited. However, logs will be uploaded to ClubLog (www.clublog.org) on a daily basis and any news posted with be on the T32C website. For more details/updates, visit their Web page at: http://www.t32c.com

V2, ANTIGUA. Bud, AA3B, will be active as V26K from Antigua (NA-100)
between November 24-28th. Activity will include the CQWW DX CW Contest
(November 26-27th) as a Single-Op/All-Band/Low-Power entry. Outside of
the contest, activity will be all CW on the HF bands only. QSL via AA3B.

The following stations are expected to be active in the
CQ World Wide DX RTTY Contest (September 24-25th, 2011)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2011 CQWW DX RTTY Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:

GB2RS NEWS

Sunday 25th September 2011

The news headlines:

* National Hamfest starts on 30 September

* T32C DXpedition to go ahead despite equipment difficulties

* RSGB Convention adds more lectures

Former BBC weatherman, Jim Bacon G3YLA will open the National Hamfest this year. The ceremony takes place at 10am on Friday, 30 September, when the main exhibition hall will open. Gates open at 9.30am for access to the Bring and Buy and Car Boot area. The Bring and Buy is bigger this year and arrangements have been made to speed up check-in. Forms may be downloaded from the website so that you can book in quicker. Check in is from 9.30, half an hour earlier than the main exhibition hall. If you are looking for a lift to the National Hamfest, or can offer one, e-mail clive@nationalhamfest.org.uk and your details will appear on the Car Sharing and Lifts page on the website. US microphone manufacturer Bob Heil will conduct a workshop each day of the show as part of the lecture stream. An interview with Bob can be downloaded from the National Hamfest website. Full details with directions are at www.nationalhamfest.org.uk.

The 5 star DXers Association's T32C expedition to Kiritimati due to start on 28 September has hit some logistical problems. The container with its 6 tonnes of kit got as far as T30, Tarawa, but onward shipping to T32 has proved impossible. The DXpedition will go ahead anyway because thanks to the global sponsor, Yaesu, ten FT-450D radios will be carried as luggage by the team along with several lightweight linears. The operators will also take enough hardware to set up verticals and vertical arrays for all bands 10 through to 160m. All the computer equipment was to be hand-carried in any case, so daily log updates to ClubLog will be unaffected. Unfortunately, unless the container makes an unlikely late arrival on the island, 6m EME will have to be abandoned, and they will not have the 4-square arrays for 30 and 40m. Keep an eye on the website at www.t32c.com for updates

The RSGB Convention takes place on 7 to 9 October and there is just 1 week remaining for bookings. The latest news from the programme is that Bob NQ1R from the ARRL will provide a virtual tour of the ARRL and Tom GM4DOZ will speak about radio astronomy and its roots in amateur radio. With the unfortunate difficulties the T32C DXpedition has getting

equipment to the island, the lecture from Steve Nichols on the reality of propagation to increase your chances of working this DXpedition is sure to be a popular one. Full details of the most up to date timetable, details of the lectures and booking information can be found at www.rsgb.org/rsgbconvention.

The British Astronomical Association is organising a 'meteor watch' exercise for the coming Draconids shower, between 7 and 9 October. It would be interesting to compare meteor scatter counts against activity reported by visual observers up and down the country. The Draconids are not normally a large event but are subject to occasional outbursts and there has been speculation that this year could produce one of these. Observations are requested across the three days: 7, 8 and 9 October. Preferably these would be around-the clock, but if this is not possible between 1500 and 2300UTC on the three days. Counts in 15-minute bins will be appropriate for most of the time but on the evening of 8 October, most likely between 1800 and 2100UTC the rates may be changing very quickly and so it would be advantageous to have the counts in 5-minute bins. It is very important that receiver settings and antenna alignment are kept constant throughout the period of observation. If possible, the beam of the antenna should be directed towards the mid-point of the great circle path joining the transmitter and receiver locations. Paul Hyde, G4CSD the BAA Coordinator for the Radio Astronomy Group, will be consolidating the observations into a single report which will be sent to all participants. Please contact him by e-mail at radiogroup@ britastro.org for further information on how to submit reports.

NASA is giving the public the power to vicariously journey through the solar system using a new interactive Web-based tool. The Eyes on the Solar System interface combines video game technology and NASA data to create an environment for users to ride along with agency spacecraft and explore the cosmos. Screen graphics and information such as planet locations and spacecraft manoeuvres use actual space mission data. You can begin your ride at http://solarsystem.nasa.gov/eyes/.

A new Newsletter has been launched to support the growing number of 5MHz operating permissions globally. The 5MHz Newsletter is edited by Paul Gaskell, G4MWO, one of the original RSGB 5MHz team. It aims to be both an accurate information source of news about 5MHz and a platform for exchange of ideas, be they theoretical, operational, constructional or just general comments about the band. You can freely access the 5MHz Newsletter from Google Documents at http://tinyurl.com/6fkhcmf. Although originating in the UK, the 5MHz Newsletter invites world-wide interest, both in readers and contributors. Understandably all that we ask is when contributing items of news concerning new 5MHz permissions or allocations, that the contributor can provide a means of official verification of such. It is hoped to produce the 5MHz Newsletter on a quarterly basis, its size being dependent of course on news and other relevant contributions from 5MHz operators and listeners around the world. For those without Internet access wishing to have a paper copy

of the 5MHz Newsletter, a Self-Addressed Envelope of sufficient size to take folded A4 sheets, together with adequate postage, or IRCs in the case of outside of the UK, will bring a copy of the latest edition. Requests should be addressed to G4MWO, who is QTHR in the UK Callbook and on QRZ.com

Did you know that a real life radio amateur was involved in the famous 1961 recording of Tony Hancock's The Radio Ham? His name was Alan Florence. He was just 18 years of age and was working as a recently appointed sound engineer at Star Sound Studios off Baker Street in London. These days he is also known on the bands as G7CDK and although he wasn't licensed back in 1961, Alan claims that the experience did have some influence on him taking the RAE in later years. Saturday 1 October will be the 50th anniversary of the Pye recording. The Radio Ham was never made for radio but not to be out done, the digital station BBC Radio 4 Extra will be broadcasting The Radio Ham and the equally famous Blood Donor between 1400 and 1500BST on Saturday 1 October. The shows can also be heard online at www.bbc.co.uk/radio4extra and on the BBC Radioplayer for seven days after transmission. Last year RSGB member and BBC presenter Jim Lee, G4AEH, brought Alan, G7CDK together with the show's iconic writers Galton and Simpson, to remember the events of the 1 October 1961. Extracts from the interview, in which the writers reveal why they chose the radio ham scenario will be broadcast as a series of shorts or fillers between the pre-recorded announcements, throughout the day.

There have been a few technical difficulties at the printers and, as a result, the October issue of RadCom will be posting a week late. Our apologies to Members but this is entirely out of our hands. The posting date of the November issue is unaffected and that will still post on Monday 17 October as planned.

And now for the details of rallies and events for the coming week

The National Hamfest organised by the RSGB in association with the Lincoln Short Wave Club takes place on Friday 30 September and Saturday 1 October. The venue is the George Stephenson Pavilion, Newark and Nottinghamshire Showground, Lincoln Road, Winthorpe, Newark NG24 2NY, which is close to the junction of A1/A46/A17. There will be trade stands, a Bring and Buy, special interest groups, an RSGB bookstall, lectures and a car boot area. Full details of the rally may be found at www.nationalhamfest.org.uk.

The RSGB Convention takes place at Horwood House near Milton Keynes on 7 to 9 October. Five lectures streams are available on both Saturday and Sunday, totalling 65 lectures to choose from. There is also a Partners Programme for those not interested in the radio events of the weekend with a trip to Stowe Landscape Gardens and Milton Keynes. Both UK and US exams are available over the weekend, see www.rsgb.org/rsgbconvention for full details.

Now for the news of special events

Throughout September, special event station GB2JB, will be on the air to commemorate the life and birth place of Jack Binns, radio operator of the Passenger Ship Republic in 1909. Operation will be from Coney Court, Brigg and is run by Brigg & District Amateur Radio Club.

The Crewe Heritage Centre ARC will be taking part in the Railways on the Air on 25 September. They will be operating two stations using SSB and Digimodes from the First Class carriage of the Advanced Passenger Train prototype that is on permanent display at the centre. Using GB4CHC the club hope to work as many stations as possible during the two days on all HF bands.

This year Justices of the Peace in England and Wales are celebrating their 650th anniversary of serving the community. The Scarborough Special Events Group will be on the air as GB650JP over the weekend of 1 and 2 October, to mark the anniversary. QSL cards will be sent via the Bureau. Anyone requiring a direct QSL can apply via the club callsign G0OOO. SWL listener reports are also welcomed.

To celebrate the 40th anniversary of HMS Belfast's arrival in the Pool of London, in October 1971, the London Group of the RNARS will be active as GB40HMSB between 1 October and 31 December. A commemorative QSL card will be available in the New Year. And now the HF DX news compiled from 425 DX News and other sources

A Belgian group plan to activate on Rockall, EU-189, around 27 or 28 September. Hoping for good weather and calm seas, during the four day voyage to EU189 they will be one the air as ON4ATW/MM. Details at www.rockall.be.

IN3VZE will once again be active from Malawi as 7Q7CE until 3 October. His operation will be holiday style on 10 through to 80 metres using SSB and RTTY. QSL via his home callsign, either via the Bureau or direct.

Operators from the Cambridge University Wireless Society will be active from Miquelon, which is IOTA reference NA-032, until 29 September. Look for FP/M0BLF, FP/G3ZAY, FP/G4EAG, FP/M0TOC, FP/M0VFC and FP/M1BXF all bands, CW & SSB.

A team of 8 amateur radio operators from Australia and the USA will be activating YJ0VK from Port Vila on Efate Island between 30 September and 12 October. Earlier updates indicate that the team will operate with 3 stations on bands from 10 to 160m, using CW, SSB and RTTY or PSK31. They do not have plans to activate 6m. The YJ0VK team has obtained authorization to operate on 60m.

Preparations for the large multi-national 3D2R DXpedition to Rotuma are going according to plan. They expect to be on the air from 27 September to 7 October. They will be active on 10 to 160m using CW, SSB, RTTY, PSK and SSTV, plus 6 and 2m EME, with a focus on Europe and Africa when propagation permits. QSL via YT1AD. www.yt1ad.info/3d2r/index.html.

Now the contest news

The 48 hour CQWW RTTY DX Contest comes to a close today, 25 September, at 2359UTC. The exchange is signal report and CQ Zone Britain is 14. Some rare countries ought to be active in this one. There are too many entry categories to list here though.

The Practical Wireless 70MHz Contest takes place for four hours today, Sunday 25 September, from 1200 to 1600UTC. It has sections for Low Power (10W max) and Full Legal. The exchange is signal report, serial number and locator.

Tuesday 27 September sees the 50MHz UK Activity Contest take place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator. At the same time on Tuesday 27 September the SHF UK Activity Contest takes place. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

Thursday 29 September sees the CW leg of the 80m Club Sprint taking place from 1900 to 2030UTC. The exchange is both callsigns, serial number and name. The 1.2/2.3GHz Trophy Contest takes place for eight hours on Saturday 1 October. After several years of modest but steady participation, the number of entries to this event increased substantially last year, even though propagation was nothing special and the weather was awful. Using all modes from 1400 to 2200UTC, the exchange is signal report, serial number and locator.

The Oceania DX SSB Contest runs for 24 hours from 0800 on 1 October to 0800UTC on 2 October. QSOs with stations in Oceania are the only ones that count for points, which basically means working VK, ZL and the Pacific islands. The exchange is signal report and serial number.

The Worked All Britain HF Contest runs on 20m to 10m for 24 hours from 1200UTC on 1 October to 1200UTC on 2 October. Using all modes on the 14 to 28MHz bands, UK stations send a report, serial number and WAB area, while non-UK stations send report, serial number and DXCC country. Inter-UK QSOs do not count for points in this one.

The IARU 432MHz-248GHz Contest runs for 24 hours from 1400UTC on 1 October to 1400UTC on 2 October. The exchange is signal report, serial number and locator. The first six hours coincides with the RSGB 1.2GHz/2.3GHz Trophy Contest. From 1600UTC to 2000UTC the SSB leg of the EU Sprint takes place. Being a sprint, of course there's a QSY rule. It says that if you make a QSO as a result of calling CQ or QRZ, you then have to QSY a minimum of 2kHz before you can make another QSO. And please don't forget that the exchange includes both callsigns.

The 21/28MHz Contest takes place on Sunday 2 October. The planned deletion of this event from the contest calendar may have contributed to the substantial increase in entries in all sections last year. They are hoping for similar results this year. Taking place from 0700 to 1900UTC and using CW and SSB on the two bands, the exchange is signal report, serial number and district.

And now the solar factual data for the period from the 12th to the 18th of September, compiled by Neil Clarke, G0CAS on the 19th of September.

The Sun had many groups visible everyday, for example, the 15th had 11 groups visible. Many of these groups were producing C class solar flares. In total over one hundred took place. Most days an M class solar flare was expected but never took place, but on the 12th and the 14th a C9 flare occurred, failing by fractions to reach the M class category. Small sudden ionospheric disturbances took place along with a number of coronal mass ejections, one of which headed our way, more on the later. Solar flux levels increased from 124 units on the 12th to 150 by the 18th. The average was 135. The 90 day solar flux average on the 18th was 103, that's three units up on last week. X-ray flux levels increased from B5.3 units on the 13th to B9.2 by the 18th. The average was B6.9 units. The first disturbance arrived on the 12th when the Ap index was 27 units and 17 units the next day, this was in response to a coronal hole. As mentioned earlier, one of the coronal mass ejections arrived early on the 17th when the Ap was 32 units. The source was a C9 solar flare taking place on the 14th. There were some quiet days also, for example, on the 16th the Ap was only 2 units. The average was Ap 13 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline form 680 kilometres per second on the 12th to 350 by early on the 17th. Particle densities were low except for a brief rise to 18 particles per cubic centimetre on the 17th. Bz varied between minus and plus 3 nanoTeslas on the quieter days and between minus 12 and plus 14 nanoTeslas on the 17th. Once the disturbance of the 12th and the 13th had ended HF propagation reached or exceeded predicted values for most of the time, with 28MHz open at times and openings to all continents on 24MHz. On the 17th MUFs of around 33MHz were recorded.

And now the solar forecast. The Sun is going through a restructuring phase where what was the quiet side of the Sun is now the active side on its return a couple of weeks later. This week solar activity should be at low levels but there is the chance that activity could rise to moderate levels. Solar flux levels should be around the 120s or even higher. Geomagnetic activity is expected to be at quiet levels barring any Earth directed coronal mass ejections till towards next weekend when a small coronal hole disturbance is expected. MUFs during daylight hours at equal latitudes should be around 26MHz for the south and 23MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 29MHz. The optimum working frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will be between 1000 and 1500 hours.

And that's all for this week from the propagation team.

NEWS FOR THE MIDLANDS On Sunday 25 September, Hinckley Amateur Radio Society has a talk on Railways on the Air by John, M0JAV. Details from John, M0JAV, on 07836 731 544.

On Monday 26 September, Derby RAYNET Amateur Radio Group has no meeting as they are on RAYNET duties. Contact Martin, G7MKS, by e-mail at contactus@derbyraynet.co.uk

On Monday 26 September, Gloucester Amateur Radio & Electronic Society will be contacting Brian, G4CIB and Leta, G4RHK on Lundy from the new shack. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 26 September, Lincoln Short-Wave Club has a National Hamfest meeting at the Newark Showground. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 26 September, South Birmingham Radio Society is holding a Field Day planning meeting and open night. Contact Don, on 01214 581 603. On Monday 26 September, Sutton Coldfield Amateur Radio Society has a general meeting. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 27 September, Derby & District Amateur Radio Society has a Night on the Air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 27 September, Lincoln Short-Wave Club is preparing for the National Hamfest on site. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 27 September, Loughborough & District Amateur Radio Club is holding a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 27 September, Mid-Warwickshire Amateur Radio Society is having a talk on computer topics by Dave, G8UIO. Details from Don, G4CYG on 01926 424 465.

On Tuesday 27 September, Worcester Radio Amateur Association is holding a construction night looking at high altitude balloon construction. Details from Rich Moles, M0UVA, by e-mail to secretary@m0zoo.co.uk

On Wednesday 28 September, Lincoln Short-Wave Club is preparing on site for the National Hamfest 2011. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 28 September, Midland Amateur Radio Society is holding a debrief and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 28 September, Telford & District Amateur Radio Society is having a video evening. Details from Mike, G3JKX, on 01952 299 677.

On Thursday 29 September, Lincoln Short-Wave Club has more preparations for the National Hamfest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 29 September, South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 30 September, Coventry Amateur Radio Society has a radio workshop planned. Contact John, G8SEQ, on 07958 777 363.

On Friday 30 September, Lincoln Short-Wave Club is at the National Hamfest in the Newark Showground. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Friday 30 September, South Birmingham Radio Society has a visit to the National Hamfest planned. Contact Don on 01214 581 603.

On Friday 30 September, South Birmingham Radio Society is having a construction evening. Contact Don on 01214 581 603.

On Saturday 1 October, Midland Amateur Radio Society has a visit to National Hamfest at Newark and Lincoln showground organised. Details from Norman, G8BHE, on 01214 229 787.

On Saturday 1 October, South Birmingham Amateur Radio Society is visiting the National Hamfest at Newark and Lincoln Showground. Contact Don, on 01214 581 603. On Saturday 1 October, Worcester Radio Amateur Association has a club trip to the National Hamfest organised. Contact Rich Moles, M0UVA, by email to secretary@m0zoo.co.uk.

NEWS FOR THE NORTH OF ENGLAND On Monday 26 September, Angel of the North Amateur Radio Club has a talk at 7.30 pm. All welcome. Details from Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 26 September, Bolton Wireless Club has a talk on Software Defined Radio with Chris G4HYG and Ian G0CTO. For details, send an email to boltonwireless@gmail.com.

On Monday 26 September, Sheffield Amateur Radio Club is holding a Mini Fleamarket & Quiz or video night. Details from Peter Day, G3PHO, by e-mail to sarc@g3pho.org.uk

On Monday 26 September, South Manchester Radio & Computing Club is holding a technical forum. Details from Ron, G3SVW, on 01619 693 999.

On Monday 26 September, Thornton Cleveleys Amateur Radio Society has a talk on Construction. Details on the web at www.tcars.org.uk.

On Tuesday 27 September, Chester & District Amateur Radio Society has an operating evening. Details from Barbara Green on 07957 870 770.

On Wednesday 28 September, Hambleton Amateur Radio Society (Northallerton) has a talk on Valve Theory by Tony, G8FLV. Details from Tony Wilson, G3MAE on 01609 881530

On Wednesday 28 September, Hornsea Amateur Radio Club is having an activity evening with a DVD. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 29 September, Hornsea Amateur Radio Club is taking part in the 80m Club Sprint CW contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 29 September, Ripon & DARS is having an on the air and club night. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 29 September, South Manchester Radio & Computing Club is having a talk on Flanders Swann by Graham, G8TXW. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 29 September, Wakefield & District Radio Society is having a social evening and going on the air from the HQ. Details from Ken, 2E0SSQ, on 07900 563 117.

On Friday 30 September, East Cleveland Amateur Radio Club is holding a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 27 September, Kilmarnock & Loudoun Amateur Radio Club is holding a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 27 September, Livingston & District Amateur Radio Society is running Morse code practice. Information from Norman, on 07740 946 192.

On Wednesday 28 September, Lothians Radio Society is attending a talk on WWW - Words, Wires, Waves & the World-Wide Web at the Museum of Communication, Burntisland by Prof. Tom Stevenson. Details from Andy Sinclair, by e-mail to secretary@lothiansradiosociety.com.

On Thursday 29 September, Aberdeen Amateur Radio Society is having a quiz. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 25 September, Coalhouse Fort Amateur Radio Society is holding an Open Day. Information from John Parker, M1DUC, by e-mail to coalhouserad1o@yahoo.com.

On Tuesday 27 September, Brede Steam Amateur Radio Society is having an evening in the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 27 September, Chelmsford ARS is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 27 September, Dorking & District Radio Society has a talk on The STEPPIR Antenna by Rob Barter, M0ZAF. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 27 September, Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 28 September, Chesham & District Amateur Radio Society is holding a night on the air with CW practice. More from Terry, G0VFW on 01442 831 491.

On Wednesday 28 September, Crawley Amateur Radio Club has a talk on FFT's and the PC in your Shack. More information from John, G3VLH, on 01342 714 402.

On Wednesday 28 September, Hastings Electronics & Radio Club has a talk byJohn, G0MTJ entitles Baird revisited. Details from Gordon, on 01424 431 909. On Wednesday 28 September, Newbury & District Amateur Radio Society has a talk on The Effect of Solar Activity on Radio Propagation by Dr Lucie Green. Details from Rob, G4LMW on 01635 862 737.

On Wednesday 28 September, Norfolk Amateur Radio Club has an informal evening. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 28 September, Worthing & District Amateur Radio Club will put GX3WOR on the air. Details from Phil, G4UDU on 01903 816 684.

On Thursday 29 September, Bittern DX Group has a club meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 29 September, Lowestoft & District PYE Amateur Radio Club is holding a club night at the shack. Information from Lee, 2E1LJL on 01502 564 242.

On Thursday 29 September, Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Sprint CW contest. Details from Chris Danby, G0DWV on 01603 898 678.

On Friday 30 September, Mid-Sussex Amateur Radio Society has a talk by Tony, G3NPF on home construction. Contact Peter, G4AKG, on 01444 239 371.

On Friday 30 September, Wimbledon & District Amateur Radio Society is having a talk on QRP and the FOXX-3 kit by Eric, G0KRT. Details from Andrew Maish, G4ADM on 020 8335 3434.

On Saturday 1 October, Crystal Palace Radio & Electronics Club continues its Foundation training course. Contact Bob, G3OOU, on 01737 552 170.

On Sunday 2 October, Worthing & District Amateur Radio Club is holding the Sunday Morning Breakfast Meeting at the Goring Caf&#65533;. Details from Phil, G4UDU on 01903 816 684.

NEWS FOR THE SOUTH WEST On Monday 26 September, Bristol RSGB Group has a talk from Mike an historian from a well known government establishment in Cheltenham. Details from Robin, G3TKF, on 01225 420 442.

On Monday 26 September, Exeter Amateur Radio Society has a club night at the Moose Centre. Details from Nick, 2E0NRJ on 01363 775 756.

On Wednesday 28 September, Thornbury & South Gloucestershire Amateur Radio Club is holding an on the air night. Information from Tony, G0WMB on 01454 417 048.

On Thursday 29 September, South Bristol Amateur Radio Club has an on the air evening. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 29 September, Swindon & District Amateur Radio Club has an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday 30 September, North Bristol Amateur Radio Club is holding a committee meetingDetails from Paul, on 0117 908 9795. On Friday 30 September, Torbay Amateur Radio Society has a club meeting. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Thursday 29 September, Aberystwyth & District Amateur Radio Society is having a club night on the air with David, 2W0EDW on 145.500 then 145.550MHz. Details from Ray GW7AGG, on 01970 611 853.

911. [RAC-Bulletin] Special Event Station VA3IF - October 5-11, 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-09-24 01:55:27 UTC
From: rac-bulletins@eton.ca

Special Event Station VA3IF - October 5-11, 2011
2011-09-23

The Guelph Amateur Radio Club is once again setting up a special event station at the birthplace of Lieutenant Colonel John McCrae House in Guelph Ontario. John McCrae was the author of the poem "In Flanders Fields". The special event station, in honour of peace and remembrance, will operate from the McCrae House Museum from November 5 to November 11. We will be operating with the call sign VA3IF on 10m, 15m, 20m, 40m and 80 m, as well as IRLP, node 2260.

SB DX @ WW < KB8NW $OPDX.1029.1
Ohio/Penn DX Special Bulletin No. 1029.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1029.1
BID: $OPDX.1029.1
September 24, 2011
Editor Tedd Mirgliotta, KB8NW (Currently in Murfreesboro, TN)
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network OH2BN and N6PSE for the following DX information.

Press Release #3 from the 3D2R Rotuma DXpedition Team.

All 3D2R Team members have now assembled in Suva, Fiji. Upon our arrival, we learned that our shipping container is delayed in New Zealand. Fortunately, the team members have brought radios, amplifiers and antennas with them to Fiji. We will be able to run five stations and emphasize the low-bands as planned.

We are now preparing our ship for our two day voyage to Rotuma. We anticipate arriving in Rotuma late in the evening of September 27th and we expect to be active early on September 28th.

The 3D2R team wishes you good luck and good fun in working us.

Thank you,

The 3D2R Rotuma 2011 Team.

LATEST FROM MARKET REEF

Talking to Market Reef today found happy campers with everything working well and DL3DXX & SP5XVY getting ready to run the RTTY Contest multi-single. This will be the very first time OJ is activated for the CQWW RTTY Contest. Good luck on contacting OJ0X over the weekend.

The other two operators - DL5CW and DH7LA - continue to run two more stations, mostly on WARC bands plus 160M. The 160M Titanex of DL3DXX fame will be kept up for the next two weeks, and the follow-up group will keep 160M busy. The change of operator crew is scheduled for Tuesday, and the weather looks cooperative at this point. See the weather report: <http://www.g3txf.com/dxtrip/OJ0X/OJ0X.html>

The lighthouse has a new 3kW wind generator that keeps sixteen 200Ah batteries charged. When reaching the low limit, a 5kW generator automatically starts charging the batteries. The total available power is three times 5kW, that is 15kW. So this is why OJ0X is running three stations with amps without making their hands dirty:

<http://www.oh6vm.org/market/>

Also, the group is supported by a Finnish Lighthouse Society person who provides hot meals twice a day. Our DXpeditioners report good food quality and quantity.

A poor Internet connection eliminated log search updates last night but they will try again over the weekend.

It has been a great week of fighting against Mother Nature and making people happy on several odd bands and modes, such as 12M, and a lot of camaraderie among those working on the barren rock. That's when international DXpeditioning is always at its best.

SARL NEWS - SUNDAY 25 SEPTEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

LOGBOOK OF THE WORLD TAKE PART IN INTECNET THIS EVENING

HAM RADIO DELUXE CHANGES HANDS

7P8 EME DXPEDITION NEEDS YOUR SUPPORT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

LOGBOOK OF THE WORLD TAKE PART IN INTECNET THIS EVENING

This evening at 19:30 the Intecnet will be held on a repeater near you. Join Chris Burger as he talks through the features and answers questions about the Logbook of the World.

Since the early days, amateurs have exchanged QSL cards to confirm contacts. Apart from the fun associated with colourful postcards from all over the world, the cards also provide a means of verifying claimed contacts for a wide variety of awards.

Large DXpeditions now make over 100 000 contacts. Confirming these contacts takes a large amount of work and expense. An electronic means of confirming contacts would eliminate much of the work and expense, and also reduce traffic through the world's QSL bureau.

Starting in 2001, the ARRL built a secure database called Logbook of the World, or LotW. Using LotW, it is very often possible to get confirmation of a DX contact within 24 hours, a far cry from waiting months or years for a card to arrive via the bureau.

One of the early proponents of electronic QSLing and the only non-American alpha tester on LotW was Chris Burger, ZS6EZ. Chris has placed over a quarter of a million contacts on LotW. He joins us tonight (25 September) to explain why participation makes sense and will explain the nuts and bolts of placing your own logs onto LotW.

HAM RADIO DELUXE CHANGES HANDS

Simon Brown, HB9DRV, has sold the rights to his popular Ham Radio Deluxe software package to a group consisting of Mike Carper, WA9PIE, Randy Gawtry, K0CBH, and Rick Ruhl, W4PC. All three principals have more than 25 years of experience with radio data communications. Rick Ruhl is the president of W4PC Software Inc. whose products include the PakRatt, PKTerm and Radio Operations Center software suites. Randy Gawtry is the president of Timewave Technology Inc. whose products include the PK and DSP families of data controllers and other commercial data products. Mike Carper is an experienced Fortune 500 technology executive, educator and featured speaker in the areas of wireless technologies and IT Service Management.

"Simon has done a fantastic job with this software," Carper said. "His vision for integrating rig control, rotor control, logging, digital modes, and satellite operations into a single integrated feature-rich software suite has captivated the ham radio community. We'd like to see this product continue in a way that respects the hard work put into this package by Simon and others, maintaining that vision, while delivering timely fixes and feature enhancements in the future, will be the number one priority."

"After many years writing the Ham Radio Deluxe software it's necessary to take a break and hand the whole project over to another team," said Simon Brown, HB9DRV. "The support effort required has become more than I can realistically manage, with many thousands of users, new radios and other hardware appearing all the time and unexpected changes to the infrastructure used by Ham Radio Deluxe such as QRZ.com. I no longer have any time at all for other projects. As some of you will know, I have formed a company called SDR-RADIO.com GmbH and I am now working in the Software Defined Radio arena with RFspace. This is the technology of the future; a future I want a part of. In 2012 I plan to return to England and get back on the air, something I haven't done much during the last 25 years."

The new owners are in the process of building a development environment for Ham Radio Deluxe and they plan to begin by addressing some of the bugs in the existing "To Do List" for an upcoming version 5.1 release. The 5.1 release, when completed, will be made available at no charge to registered users.

7P8 EME DXPEDITION NEEDS YOUR SUPPORT

The SARL fundraising for the 7P8 EME DXpedition has not yet reached the target of R10 000. Please support this event with your donation. Full details are on www.amateurradio.org.za/7p8.htm. This DXpedtion is a

record setting Expedition for EME, as far as infrastructure, equipment, band coverage & antenna systems are concerned, which has ever visited another country - all with mobile equipment. The group is covering all the VHF-UHF frequencies from 50 MHz to 1 296 MHz [excluding 4 metres].on EME.

RAE CLOSING DATE

Students are reminded that the closing date for registration for the Radio Amateur Examination is Monday 26 September. No late entries can be accepted.

RAE Instructors are reminded that the regulations that were in force before 1 April this year will be used in the examination as the final revised regulations are not available. Please ensure that students are aware of this.

More information on the RAE and the required forms can be found on www.sarl.org.za or call Mariska during office hours on 011 675 2393

SARL WEB PROPBLEMS CONTINUE

The SARL Council is painfully aware that there are problems with the SARL web. The team working on it believe that they will be able to stabilise the situation soon. When you cannot connect please try again a little later. The SARL apologizes for the inconvenience.

FOLLOW THE DRAKENSBERG HIKERS

Tonight, 25 Sept., the group of hikers start on the Grand Traverse, a 12 day hike in the Drakensberge. Johan Leslie, ZR4CAA, goes with and he will keep contact with John Longland, ZS6AA, at the base camp. John will also be active on KwaZulu-Natal 2 m repeaters and h requests amateurs on those repeaters to monitor the repeaters for any possible emergencies and then pass any QSPs to John, ZS6AA. If any battery power remains at the end, Johan will be available for chats from 07:00 on 1 October on 7,070 MHz. Go to www.crossroadsadventure.co.za beforehand for details and the communication procedure.

CQ HOU KOERS

CQ Hou Koers, the Voortrekkers' annual radio communications day, takes place on Saturday the 15th of October. Young people from across SA and Namibia will be active on the amateur bands. Please support them.

Radio amateurs are requested to offer their services to local Voortrekker groups. Because the day coincides with JOTA, it offers interesting opportunities for interaction between Voortrekkers and Scouts.

Enquiries may be sent to Andries, ZS6VL, whose email address is andries.visagie@natref.com.

ZS6JVT 40 METER YOUTH SPRING SPRINT

Although there were many stations active during the competition, it was very disappointing that only 5 logs were submitted. It can be questioned whether it will be worth while to continue with the competition, but next time it may be beter.

The results are as follows:

1st - ZS6JVT - 55 2nd - ZS44RK - 52 3rd - ZS6NGB - 38 4th - ZR6D - 29 5th - ZS2J - 23

The organizers of the ZS6JVT Youth Spring Sprint thanks all who took the trouble to send in log sheets.

CLUB NEWS

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 08 October 2011 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PV,T at 083 267 3835.

The East Rand Amateur Radio Club will have their second flea market for the year on the 1st of October 2011 at the Selpark primary school's sportgrounds in Pridgeon str, Selection Park, Springs. It will last from 11:00 till 15:00. For table bookings contact Judy, ZS6JDY, on 079 730 2030 or for more detail send an email to zs6jdy@vodamail.co.za. Hope to see you all there.

The East Rand Amateur Radio Club is proud to announce its new committee elected with their AGM on the 17th September as follows:

Chairman Francois Jacobs, ZS6COI Vice Chairmen Glynn Chamberlain, ZS6GLN &

Leon Lessing, ZS6LMG Honourory Treasurer Andre van Tonder, ZS6HE Secretary Judy Pretorius, ZS6JDY Web master Glynn Chamberlain ZS6GLN Repeater Custodian Hampie Findt

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that solar activity has been high with one X-Class flare and multiple M-Class flares taking place about when the new sunspot rotates into view on the eastern limb. This region is not yet in prime position for earth directed Coronal Mass Ejections.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 93.

All the bands from 20 to 10 m will provide lots of fun with DX opportunities at different times of the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 25 September - Last day to enroll for the October RAE. 25 September - Intecnet tonight at 19:30. 26 Sept/7 Oct - ZR4CAA and ZS6AA active with Drakensberge hiking group. 1 October - East Rand Amateur Radio Club flea market starting at 11:00. 8 October - West Rand

Amateur Radio Club's flea market at 12:00. 15/16 October - Jamboree on the air. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 25th September 2011

Silent Key

It is with deep regret that we learned of the death of James Canning, father of Brian, EI8IU. James was buried last Wednesday 14th. Our sincere sympathy to Brian. Ar dheis D go raibh a anam.

Amateur Station Licence Exam

A final reminder that next Thursday, 29th September, is the closing date for applications to sit the next examination. The examination itself takes place on Friday 14th October. See www.irts.ie/exam for information about the exam and how to enter.

IRTS Youth Co-ordinator

Following the recent IARU conference in South Africa, members societies were urged to appoint a Youth Coordinator. At the last IRTS committee meeting held on September 10, Ger McNamara EI4GXB was appointed to the role.

Ger is seeking ideas from members on how to best generate interest in Amateur Radio among young people and can be contacted on 087 2532512 or ei4gxb /at/gmail /dot /com.

EI4GXB Radio Theory Notes

Ger EI4GXB advises us that he has uploaded files to the Radio Theory section of his website which he has used for the theory class last year in Limerick. They may be of help to any candidates sitting the examination in October. Go to www.ei4gxb.com for further details. Comments welcome to Ger on ei4gxb /at/gmail /dot /com

---

Limerick Radio Club

Limerick Radio club have changed their club meeting night to Wednesday night going forward. The next meeting will be on Wednesday 12 October. Full details can be found on www.limerickradioclub.ie

---

RSGB Convention

The RSGB convention takes place this year on October 7th, 8th and 9th. Full details from www.rsgb.org/rsgbconvention

---

SEARG

There will be a meeting of SEARG next Monday, September 26 at 20:30. John, EI7IG will be giving a short presentation about his experiments with Photovoltaic Solar panels over the last number of years.

New Lough Erne Amateur Radio Club Committee

Lough Erne Amateur Radio Club elected a new Committee at its AGM on Wednesday past (21 September). The new Chairman is Tommy Nelson, Mi0RVH. Tommy came into amateur radio via the Club's Foundation course in February 2010, then Intermediate Course in February 2011, and the Advanced exam for a Full Licence in June past. The Club is proud of this and similar successes by its many new members, and is delighted that that one of them has become its Chairman. The vice Chairman is Herbie Gi6JPO, Secretary Michael Mi5MTC, and Treasurer Jamie 2I0MFB. The report at the AGM detailed progress and achievements in the past year, in which it had won the UK-Runner-Up Club of the Year Award. The Silver Anniversary Lough Erne Rally was also reported. The next Lough Erne Rally is set for a very easily remembered date - Sunday 1 April 2011. Michael Clarke Mi5MTC Secretary Lough Erne ARC Email mi5mtc/ at/ learc / dot/ eu

---

Foyle & District Amateur Radio Club

Foyle & District Amateur Radio Club Annual Rally will be held on Sunday 6th November 2011 at 12.00 hours. Venue: Best Western White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA Traders attending; TA Electronics, P&D CB & Amateur Radio Supplies, JBT Trading, MI3NIE Wire Antennas, Steven Boyd (Second Hand Radios), The Green Man,IRTS Stand, RSGB QSL Bureau.

DX News

There will be a short DXpedition to the Nagorno Karabakh district of Azerbaijan from 29 September until 2 October. The callsigns to look out for are 4K3K and 4J0K. These are the only valid callsigns in use in this district. QSLs go via RW6HS

For those who still need Market Reef for their DXCC there will be activity until 11 October. The callsign is OJ0X and the station will be manned by different teams of international DXers who will each spend a week on the reef.

Don't forget that the T32C expedition to Christmas Island will be happening very soon. Christmas Island is a Pacific Ocean atoll, just over 200 kilometres north of the Equator. The team are scheduled to arrive on the island next Wednesday 28 September. As soon as the stations are set up we can expect plenty of pile-ups as the worldwide DX fraternity try to get this one into their logbooks. Remember that two IRTS members are on the team in the shape of Paul EI5DI and Dave EI9FBB. Others in the team come from the UK, Germany, France the USA and Japan. For up to date news check out www.t32c.com. This is a major DXpedition, involving a team of up to 40 operators in all.

The original plan was to use 16 Yaesu FT DX 5000 rigs, each powering a 1kW amplifier. Unfortunately these rigs will not be delivered on time due to shipping difficulties, so the team is making do with FT-450D rigs and smaller amplifiers. The group's yagi antennas are also held up, so they will be using verticals and vertical arrays instead.

Another major DXpedition coming up is the joint US/Australian trip to Vanuatu. The callsign will be YJ0VK and dates for the operation are 30 September until 12 October. They will be on all bands 160-10m using CW, SSB and RTTY/PSK31. QSLs go via VK2CA.

4M from Slieve Bloom

Vinny, EI5GLB will be working 4mtrs from the Slieve Bloom mountains on Sunday 2nd October at approx 13.00 all are welcome to call in. Working conditions will be a Motorola cm140 25watts and a 1/4 wave dipole frequency 70.300mhz. Looking forward to getting reports de ei5glb.

Tiree Expedition (MS0WRC)

For the 8th year running members of the Workington Radio Club from West Cumbria are planning to visit the Hebridean Islands off the West Coast of Scotland. This year they will be joined once more by members of the Sands contest group from Morecambe in Lancashire and Brendan (EI6IZ).

The team of 11 operators will travel to the Island of Tiree (EU-008) on the 1st October and operate throughout the following week from their base in Caoles on the North East coast of the Island.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network G3XTT and OH2BH for the following DX information.

T32C Bulletin #5 (Press Release)
Aloha from Hawaii.
Some of you have noted that our Advance Party on Christmas Island
have been active from time to time this week, checking out propagation.
We are delighted to see that the solar flux has been high and T32C has
already worked Europe on 28MHz!

The remainder of the initial team is now assembled here in Honolulu
and I write this immediately following a team meeting at which we have
worked out the final details of logistics for getting to the island
and setting up for what will still be a large-scale operation. We have
10 Yaesu FT-450 transceivers and eight linear amplifiers, along with
the hardware to put up gain antennas for 10 through 80, and a big
vertical for 160. We also plan to install Beverages for receiving.
We particularly want to extend thanks to KH6OO and KH7U who have been
a great help to us here on Hawaii.

We fly to Christmas Island tomorrow, and it is likely there will be
no more operation until the weekend, as we get everything installed
and ready to go. In any case, we will aim to post any breaking news
to our website via the Captain Cook hotel's Internet facility.

VL: OJ0 PRESS RELEASE
TODAY MONDAY, SEPT.26 ON MARKET REEF, OJ0X

Sorry for the sad news that Nigel, G3TXF cannot make it to OJ0.
Its a magic place - you will miss a lot.

The team is in fine spirit and we have just up-loaded QSOs up to this point - totally 18,316.
And after all, we had succeeded with 2600 QSOs in CQWW RTTY, after terrible beginning.

See log search and more on OJ0X at QRZ.com

We were ready to start at 00:00z but with the first CQ the computer crashed and after restart microham did not work again. Took us hours to re-install everyhting but it did not help and after several hours we decided to go to sleep. In the morning Robert tried again and finally succeeded. We lost about 7 hours in the beginning and another hour when the Alpha 91B died and during short power cuts.

High bands were in good shape but hard to compete against all the high power stations in EU. Without internet and the possibility to find and work multipliers and without having a second station for multiplier hunting we do not have a chance for a top position. We simply could not get the second station working in RTTY.

Learning: Never use borrowed equipment in a contest that have never played together and not has been tested before :-)

Now we are up to the last day. The weather is still fine but more wind is predicted so we hope to meet the next team; Pekka, OH1TV, Miika, OH2BAD, Ilmo, OH2BO and Tapani, OH5BM tomorrow as they have left Finland and should arrive in Alands early on Tuesday morning.

73 and greetings from the team
Dietmar

** MS Propagation info from MMMonVHF for October **

This month the attention of meteor enthusiasts will be captured
by the return of Draconids meteor shower. In fact, several
Researchers have forecasted an Outburst of Draconids on October 8th
Even if no meteor storm is expected, there is a general consensus
that the evening UT hours of October 8 should produce ramarkable
Draconids activity. Many mathematical models predict the outburst
around 20h UT, but the ZHR level is hard to predict, though.
Usual Orionids shower and a good background of sporadic meteors
will ensure good opportunities for MS Dxing the rest of the month.
Have a look to shower predictions for October 2011 at our MMM
MS-Propagationpage: http://www.MMMonVHF/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** BIG GEOMAGNETIC STORM **

A strong geomagnetic storm is in progress following the impact
of a coronal mass ejection (CME) today, Sept. 26th, at approx.
12:15 UT. Analysts at the Goddard Space Weather Lab report a
"strong compression of Earth's magnetosphere" and the possibility
that satellites in geosynchronous orbit have been exposed to solar
wind plasma and magnetic fields. Mid- to high-latitude sky watchers
should be alert for auroras after nightfall. Observing tip:
The hours around local midnight are usually best for spotting
Northern and Southern Lights. Check http://spaceweather.com for
images and updates. SOURCE: http://spaceweather.com
PLEASE REMEMBER TO SPOT AURORA QSOs at www.MMMonVHF/aur.php

** MMMonVHF Meeting 2011 in / Danube valley JN48nb **

Maybe you have seen or heard about the Meetings of the TEAM
of MMMonVHF during past years. In 2011 the Team will meet at
Danube valley (near Erwin, DK5EW, JN48nb) - We do have a very
full programm during the sept.29th till oct. 2nd, but if any
chance we will show up on 144 MHz and/or in the different Chat!
As well we will trying some GEOCACHING and will set a Travel-
Bug to travel around the world in the name of MMMonVHF sept.30th
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Still very few updated past weeks only - So we will remember again
to update the VHF-DATABASE at MMMonVHF. At mid of october we do plan
to spread a NEW ISSUE of our VHF-DATABASE to all DX-Cluster (and
USER which what it). So please be so kind and UPDATE IT NOW SOON!
LOGIN at MMMonVHF and follow the link to your Account >
http://www.mmmonvhf.de/usraccount.php than click on "VHF-DATABASE
Update" and update or set your info to the VHF-DATABASE! THANK YOU

917. 2011 International Humanitarian Award

Newsgroup: rec.radio.amateur.misc
Date: 2011-09-27 15:16:34 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110927135808.A4444203F7@bmail.arrl.org>
Source record: 4157
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

ARRL INVITES NOMINATIONS FOR 2011 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2011 ARRL International Humanitarian Award http://www.arrl.org/international-humanitarian-award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

A committee appointed by the League's President recommends the award recipient(s) to the ARRL Board, which makes the final decision. The committee is now accepting nominations from Amateur Radio, governmental or other organizations that have benefited from extraordinary service rendered by an Amateur Radio operator or group.

Amateur Radio is one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, thereby spreading goodwill across political boundaries. The ARRL International Humanitarian Award recognizes Amateur Radio's unique role in international communication and the assistance amateurs regularly provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army, a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references.

All nominations and supporting materials for the 2011 ARRL International Humanitarian Award must be submitted in writing in English to ARRL International Humanitarian Award, 225 Main St, Newington, CT 06111 USA. Nomination submissions are due by December 31, 2011. In the event that no nominations are received, the committee itself may determine a recipient or decide to make no award.

The winner of the ARRL International Humanitarian Award receives an engraved plaque and a profile in QST and other ARRL venues.

Ron Tomo, KE2UK, from New York, was the recipient of the 2010 ARRL International Humanitarian Award. Tomo’s life exemplified Public Service through Amateur Radio,from providing phone patches during the

Vietnam War, providing communications support during 9/11 with MARS and the United States Service Command, as well as serving in the US Coast Guard Auxiliary as a Communications Officer playing a pivotal role during Hurricanes Katrina and Rita.

Nominations Open for George Hart Distinguished Service Award

The George Hart Distinguished Service Award may be presented by the Board of Directors to the ARRL member whose service to the ARRL's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System.

Selection criteria include

Operating record with the National Traffic System; or participation within the Amateur Radio Emergency Service; or

Station appointments and/or leadership positions held within the Field Organization.

Procedure:

Nominations shall be accepted from anyone.

Nominations shall be submitted to the Membership and Volunteer Programs Manager at ARRL HQ by November 1.

Nominations should document as thoroughly as possible the nominee's lifetime activities and achievements within the Field Organization. It is expected that nominated candidates will have 15 or more years of distinguished service.

The Programs and Services Committee will serve as the Review Committee.

The Board of Directors shall make the final determination at its Annual Meeting in January.

The award shall consist of: An engraved plaque, a cover letter, and coverage in QST.

Nominations for the 2012 George Hart Distinguished Service Award and any related supporting material and letters of recommendation may be sent to ARRL Headquarters to the attention of Dave Patton, NN1N, ARRL Membership and Volunteer Programs Manager (nn1n@arrl.org) or to Steve Ewald, WV1X (wv1x@arrl.org). The nomination period continues until November 1, 2011.

DXNL 1747 - Sep 28, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

4J, AZERBAIJAN
Member of the Federation of Radio Sports Aserbaidschan and the
Safari DX Activators Club are planning a DXpedition to Nagorno-Karabakh
from Sep 30 until Oct 2. They will use the callsigns 4K3K, 4J0K and
4J0SFR, there are no other legal callsigns for this area.
QSLs for 4K3K and 4J0K via RW6HS (direct), 4J0SFR via 4J5T.

9A, CROATIA
9A/DO6SR and 9A/DO9ST are working in SSB and PSK31/63 on 80m/40m/15m/
10m and maybe also 2m from Kaptol until Sep 30. They were using 9A4P
in the CQWW RTTY Contest last weekend. QSLs via homecalls.
9A4P via bureau, LoTW eQSL, or direct to DO6SR (only for this contest).

A2, BOTSWANA
Sajid,VA3QY, will be active as A22EW from Sep 29 until Oct 18.
QSL via homecall.

CN, MOROCCO
The team of the 5C2 DXpedition has many problems with police, military,
power, antennas, etc. but they continue to be active until Sep 28.

FH, MAYOTTE, AF-027
Phill,F6GNT, is working in SSB on 20m-10m signing FH8NX until Mar 1,
2013. QSL via homecall, see also QRZ.com.

FR, REUNION, AF-016
Willi,FR/DJ7RJ, will be QRV from Reunion (AF-016) from Oct 4-26. Willi
plans to work mainly on the lowbands using a K2 with 500 watts amp
and an Inverted L antenna. QSL direct via CBA.

GM, SCOTLAND, EU-008
Paul,2E1EUB, is active again as 2M1EUB in SSB on 160/80m, via satellite
and on 2m until Oct 8. During the first week he will work from the Isle

of Skye (Western Scotland, EU-008, IOSA NH07, SCOTIA CN14, WLOTA 1626).
He will then move to the Cairngorms National Park (GMFF: Community 001)
in the eastern part of Scotland for the second week. QSLs via 2E1EUB.

JW, SVALBARD, EU-026
Karl,LA8DW, plans to show up from Svalbard (EU-026) again signing JW8DW
from Sep 28 until Oct 5. Logsearch at: http://www.logsearch.de
QSL via homecall, via bureau or direct (only with IRC and SAE).
The log will be uploaded to the LoTW as well.

V6, MICRONESIA, OC-010
V63DX (JA7HMZ) and V63T (JA7GYP) are going to become active in CW, SSB
and RTTY from Pohnpei (OC-010) on Oct 3-8.
V63DX via JA7HMZ, V63T via JA7GYP (direct).

VE, CANADA
The special event station CJ3A will be activated on all HF bands to
celebrate the centennial of "Parks Canada" (1911-2011) throughout the
month of October 2011. QSL via VE3LA.
More information about "Parks Canada" can be found at:
http://www.pc.gc.ca/progs/celebrations/index.aspx

YA, AFGHANISTAN
Les,WB8LES, is a pilot based in the FOB (Forward Operation Base) Shank
in Loghar province of Afghanistan. He is expected to show up as T6LB
in October using an Icom 7000 and a sloper antenna by AES. Times and
frequencies will be published on QRZ.com.

YJ, VANUATU, OC-035
A team of eight HAMs from Australia and the USA will be active as YJ0VK
from Port Vila on Efate Island (OC-035) between Sep 30 and Oct 12. They
will run three stations in CW/SSB/RTTY/PSK31 on 160m-10m (incl. 60m).
QSL via VK2CA. The log will be uploaded to LoTW after the DXpedition.
Updates can be found at: http://yj0vk.odxg.org/yj0vk2011/default.html

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 1: EPC Russia DX Contest
Oct 1: Oceania DX Contest
Oct 1: California QSO Party
Oct 1: DARC HF-HELL Contest (80m)
Oct 1: European Sprint Contest
Oct 2: ON Contest 80m
Oct 2: RSGB 21/28 MHz Contest
Oct 2: Komi-Ruhrgebiet Memoriam QSO-Party

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-008, GM/MM, Inner Hebrides: A group of English HAMs plans to show up
as MS0WRC from the Isle of Tiree (WLOTA 2232) from Oct 1-8.
QSL via G0MTD (bureau/direct).

EU-038, PA, Noord Holland/Friesland/Groningen Province group: Ric,PA/DL2VFR,
will be active mostly in CW from Ameland between Sep 30 and Oct 6.
QSL via DL2VFR (bureau/direct).

EU-042, DL, Schleswig-Holstein State North West group: German HAMs announced
to become active from Hallig Hooge (Ockenswarft,DLFF-013) signing DK0RZ
and DL0DFF in SSB/CW/PSK31 on the HF bands from Oct 5-8.
QSL via bureau (bureau/direct).

EU-065, F, Bretagne (Finistere North West) Region group: TM5Q will be QRV
from Quemenes (DIFM AT-039/FFF-027) in SSB/CW/PSK31 on 10m/15m/20m/40m
between Sep 30 and Oct 2. The QSL manager is F4ELI (bureau/direct).

EU-127, DL, Schleswig-Holstein State South West group: DJ4EL/p wants to work
from Helgoland-Duene (WLOTA 2130) on 12/17/40m from Sep 30 until Oct 3.
QSL via DJ4EL (bureau/direct).

NA-085, W4, Florida State North West group: K4L will be active from
St. George Island on the usual IOTA frequencies from Oct 5-9. He will
activate the lighthouse Cape St. Georges (ARLHS: USA-1057) as well.
QSLs can be requested online. See also QRZ.com.

Correction: Special Event Station VA3IF - November 5-11, 2011
2011-09-23

[Note: The corrected date in the subject line]

The Guelph Amateur Radio Club is once again setting up a special event station at the birthplace of Lieutenant Colonel John McCrae House in Guelph Ontario. John McCrae was the author of the poem "In Flanders Fields". The special event station, in honour of peace and remembrance, will operate from the McCrae House Museum from November 5 to November 11. We will be operating with the call sign VA3IF on 10m, 15m, 20m, 40m and 80 m, as well as IRLP, node 2260.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
19 - 25 September 2011

Solar activity ranged from low to high levels during the period. Activity was low during 19 - 20 September with C-class flares from Regions 1295 (N22, L = 057, class/area Ekc/550 on 23 September), 1296 (N26, L = 040, class/area Dai/130 on 15 September), and 1301 (N19, L = 330, class/area Eso/210 on 21 September). Activity increased to moderate levels on 21 September due to an M1 x-ray flare at 21/1223Z. A further increase to high levels occurred on 22 September with an X1/2n flare at 22/1101Z from Region 1302 (N12, L = 282, class/area Fkc/1300 on 24 September) as it rotated into view. The X1 was associated with Types II/IV radio sweeps, a Tenflare, and a non-Earth-directed CME. Activity decreased to moderate levels on 23 September with low-level M-class flares from Regions 1295 and 1302. Activity returned to high levels on 24 September with three major flares from Region 1302: an X1/2b at 24/0940Z associated with Types II/IV radio sweeps, a Tenflare, and a halo-CME; an M7/1f at 24/1320Z, with a much faster partial halo CME that appears to overtake the previous CME; and an M5 at 24/2036Z. Finally, an M3 flare from Region 1302 at 24/1921Z had an associated Type II sweep, Tenflare, and partial-halo CME (estimated P.O.S. speed 632 km/s). Activity decreased to high levels on 25 September with Region 1302 and 1303 (S28, L = 034, class/area Cso/070 on 25 September) both producing multiple M-class events.

A greater than 10 MeV proton event at geosynchronous orbit began at 23/2255Z in response to the X1 flare on 22 September and was in progress at the close of the summary period.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal to moderate levels during 19 - 21 September. Fluxes decreased to normal levels during 22 - 25 September.

Geomagnetic activity was at quiet levels during most of the period.

Forecast of Solar and Geomagnetic Activity
28 September - 24 October 2011

Solar activity is expected to be at moderate to high levels with more major flare activity from Region 1302 until it crosses the west limb on 03 October. Activity is expected to decrease to low levels during 04 - 19 October.On 20 October, activity is expected to increase to low - moderate levels with the return of Region 1302 for the remainder of the forecast period.

There will be a chance for another proton flare from Region 1302 until it departs the visible disk on 04 October. No proton events are expected at geosynchronous orbit for the remainder of the period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during 28 September - 03 October. An increase to normal to high flux levels is expected during 04 - 05 October due to CH HSS effects. Normal to moderate fluxes are expected during 06 - 10 October as CH HSS effects subside. Fluxes are expected to rise to normal to high levels from 11 - 15 October due to CH HSS effects. 1A return to normal to moderate background levels is expected from 16 - 24 October.

Geomagnetic activity is expected to be at unsettled to active levels on 28 September as CME effects subside. A decrease to quiet levels is expected on 29 - 30 September. Activity is expected to increase to quiet to unsettled levels during 01-02 October due to a coronal hole high-speed stream (CH HSS). A return to quiet levels is expected during 02 - 07 October. Activity is expected to increase to quiet to active levels during 08 - 11 October as another CH HSS disturbs the field. A return to predominantly quiet levels is expected for the remainder of the period.

922. The ARRL Contest Update for September 28, 2011

Newsgroup: rec.radio.amateur.misc

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

September 28, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Some Enchanted Opening - Oceania DX Contest
- California, Pennsylvania, and Arizona QSO Parties
- NCJ Passes the Baton
- Scouting's JOTA - Coming Up
- Come and Join Us On the Airwaves - in HD!
- Digital Texas Soapbox
- Alpha Male Hooks
- A Well-Scoped Website
- Elmer Tried

NEW HF OPERATORS - THINGS TO DO

If you enjoyed the Texas QSO Party <http://txqp.net/> last weekend, the
California QSO Party <http://cqp.org/> or CQP is another great warm-up
for contest season (as are all of the big state and regional QSO
parties) and provides for a lot of county-hunting fun. All 58 counties
will be active to one degree or another including some that are hard to
work. The Pennsylvania <http://www.nittany-arc.net/> and Arizona
<http://www.azqsoparty.org/> QSO parties follow hot on California's
heels, too. Or turn your beam towards the South Pacific for some
Oceania DX Contest <http://www.oceaniadxcontest.com/> fun!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

No tarnish has been reported on the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Oct 1-2
```

- PSK Rumble - The Fall Classic
- EPC Russia DX Contest--Digital
- Oceania DX Phone Contest--Phone
- Worked All Britain HF Contest--Phone
- California QSO Party
- EU Autumn Sprint--Phone
- RSGB 21/28 MHz Contest
- ARS Spartan Sprint--CW (Oct 4)
- Fall VHF Sprints--432 MHz (Oct 5)

Oct 7-8

- SNS and NS Weekly Sprints--CW (Oct 7)
- DX/NA YLRL Anniversary Party (Oct 7)
- Makrothen RTTY Contest
- Oceania DX CW Contest
- Scandinavian Activity Contest--Phone
- Arizona QSO Party
- EU Autumn Sprint--CW
- Pennsylvania QSO Party
- FISTS Fall Sprint--CW
- North American RTTY Sprint
- SKCC Weekend Sprintathon--CW
- 10-10 Sprint (Oct 10)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

There are new fingertips at the editorial helm of the National Contest Journal <http://ncjweb.com/> as Kirk Pickering K4RO takes command from Al Dewey, K0AD. Kirk has written the popular "Contesting 101" column for several years and brings years of contest experience to the job. He's also the current president of the Tennessee Contest Group <http://www.k4ro.net/tcg/> and is a regular high-scorer in major contests. Kirk also plays a number of instruments and is a founding member of the Spurious Emissions <http://www.youtube.com/watch?v=FhGy6vUZbME>.

A new record for solar flux (a GOOD record) in sunspot cycle 24 was reached at 2000 UTC on Sep 24 according to the Penticton observatory <http://www.swpc.noaa.gov/ftpmenu/lists/radio.html>. Tomas NW7US observes, "(the) Last time the radio flux was at this level was 2003-Nov-02. That's over eight years ago!"

The CQ Worldwide Contest's "Xtreme" category will have a new entrant this year from the KP2B team <http://www.kp2b.org/> of WP3A, KP2BH, KP4TR, K2DER, WP3C, and KP4WW. You can learn more about their plans as they develop from the website. Perhaps your club could put together an "xtreme team"! (Thanks, Jaime WP3A)

It's not just us - everybody likes to build things! In the furniture business, it's referred to as the IKEA Effect <http://neoacademic.com/2011/09/22/unfolding-the-ikea-effect-why-we-love-the-things-we-build/>

by which people value their own home-assembled pieces more than ready-built. I'm sure that kit owners feel the same way.

HamJam 2011 <http://www.hamjam.info/> kicks off again this year on October 22nd. Held in Roswell, the one-day event features a great lineup of speakers and leaves plenty of time for enjoying the area and socializing.

NASA reports that solar flares (like the one that happened on Monday) may affect Earth <http://science.nasa.gov/science-news/science-at-nasa/2011/19sep_secretlives/> even more than previously thought! The secret is in the extreme UV data showing a large amount of energy being emitted well after the main event. Here is a video <http://www.youtube.com/watch?v=EFTQTI12Cpk> showing a big flare at many different high-energy wavelengths - I don't think sunblock lotion would be of much help! (Thanks, Tom K1KI and Tim K3LR)

The next PileUP! on-line magazine <http://www.helsinki.fi/%7Ekorpela/PU/PU.html> will have as its theme, "The Last Blast". You can see the editors busily preparing the issue in the photograph! All contributions are welcome in any dimension - except time as the deadline is 15 December. (Thanks, Ilkka OH1WZ)

Another changing of the guard was announced for the QRP ARCI <http://www.qrparci.org/> as long-time contest manager, Jeff VA3JFF turns over the reins to Jim K9JWV. The QRP ARCI contest program is a great way for new contesters to get started. (Thanks, Jim K9JWV)

A little Sweepstakes history - the oldest domestic contest, beginning in January 1930, it was called "The All-Section Sweepstakes Contest". It was truly a relay contest with 1 point for sending a complete message with at least 10 words of text in correct message format and 1 point for receiving a similar message. Most stations worked were not in the contest and had to be schooled (on the air) on the desired info exchange. 68 sections were possible and 48 sections participated. The contest ran for 14 days on 80, 40, and 20 meters - mostly CW but some phone entries. The first winner was W1ADW with a whopping 153 QSOs in 43 sections - when did he have time to sleep? (Thanks, SS Manager, Larry K5OT)

For those of you up too late and for whom a reckoning of rambling ruminants has not produced the desired result, Bill K2TT recommends this document of Federal procedures <http://www.ntia.doc.gov/files/ntia/publications/manual_5_11.pdf> related to RF spectrum allocation.

Curious minds want to know - what is the name of the clever combinations of phonetics that makes a phrase out of a ham call sign? For example, WJ1B (ARRL COO, Harold Kramer) becomes "Works Just One Band". Harold suggests "hamonym" and there is no obvious other "-nym word <http://www.fun-with-words.com/nym_words.html>" but perhaps your

editor is just a big nymcompoop.

Web Site of the Week - The annual Jamboree On The Air (JOTA)
<http://www.scouting.org/scoutsource/international/programenrichment/jota_joti.aspx>
happens this year on October 15 and 16. During this annual event Scouts
and Guides all over the world speak to each other over Amateur Radio.
Most Scout stations depend on local volunteer efforts of hams. You can
help set up a station, volunteer your own station, or just answer calls
on the air from scout stations. Help demonstrate Amateur Radio to
Scouts from either end of the contact!

WORD TO THE WISE

Shunt - as in "shunt-fed tower
<http://new-ham-radio.blogspot.com/2010/07/shunt-fed-tower-what-is-that.html>",
means a component connected in a parallel circuit so that current can
bypass some other component or connection. Shunt connections are often
from an energized conductor to ground. To "shunt-feed" means to use an
impedance-matching circuit connected between an antenna's feed point
and a ground system.

==> SIGHTS AND SOUNDS

You may remember "Come and Join Us on the Airwaves" by Andrew-John OZ5E
and his wife Lissa who were filmed singing at various heights on a
tower with the beautiful Danish countryside in the background. They've
just updated the video to HD and you can view it here
<http://www.youtube.com/watch?v=p8TXmwOpjJs>! (Thanks, Bill WA6ITF)

Al AD6E recommends the videos of obsolete technology from the Museum
of Obsolete Objects, <http://www.youtube.com/user/MoooJvM> particularly
the rotary telephone and abacus. The telegraph key is listed as having
been made obsolete in 2007 but that would be news to the hams I'm
listening to on 10 meters at the moment!

What's the latest with K1JSS' Dash, the Dog-faced Ham
<http://dashtoons.com/>? There's always something interesting with Dash
such as his trendy new radio and the Giant Opera Lady Antenna at the
North Pole.

==> RESULTS AND RECORDS

Dink N7WA has just published the Soapbox
<http://www.eskimo.com/%7Emwdink/3830/> comments from the CQ Worldwide
RTTY and Texas QSO Party contests. What's the post-contest scene? Find
out from these compilations of scores submitted via the 3830
<http://www.hornucopia.com/3830score/> claimed-score reporting web
site.

The preliminary results of the July 2011 NAQP RTTY
<http://www.ncjweb.com/naqprttyprelim.php> contest are posted online.
Congratulations to AA5AU for top Single-Op and W6YX for top Multi-Two
scores. (Thanks, NAQP RTTY Manager, Mark K6UFO)

The preliminary results for the recent North American CW Sprint <http://www.ncjweb.com/sprintcwprelim.php> can be found on the NCJ website. Congrats to Steve, N2IC/5, on his victory. (Thanks, NA CW Sprint Manager, Tree N6TR)

The eleventh USA ARDF Championships <http://www.wb8wfk.com/2011_ARDF_WEB/index.html> and sixth IARU Region 2 ARDF Championships have just wrapped up in Albuquerque, New Mexico. You can learn about the competitions on the Homing In <http://www.homingin.com/farsnews.html#albq> website, maintained by Joe K0OV.

Preliminary results of last month's Worked All Europe DX CW Contest <http://www.darc.de/referate/dx/contest/waedc/en/results/cw/> can now be found online. (Thanks, WAE DX Contest Manager, Joerg HB9/DL8WPX)

Who's the fastest operator? Has anyone ever run a 300-hour on CW? Or a 500-hour on Phone? You can find out on the top rate list <http://www.qsl.net/oh1noa/rates.htm> maintained by OH1NOA. This list includes CW and SSB rates calculated both by clock hour and from "best 60 minutes". (Thanks, Jim AD1C)

If you are wondering about the overall history of contest scores, browse on over to the K5TR Contest Score database <http://www.k5tr.net/scoredb>. George K5TR and a team of volunteers have entered hundreds of thousands of line scores from many major contests <http://www.k5tr.net/scoredb/contest_list.php> dating back into the 1970's in some cases. Of course, you'll enter your own call first - we all do - but this is a very useful search tool for all sorts of purposes. There are many more contest scores to be entered! If you would like to volunteer or just find out what's involved, email George <geoiii@kkn.net>.

OPERATING TIP

Today's tip from new Sweepstakes Manager, Larry K5OT works not only for Sweepstakes but for many domestic contests in which even a Little Pistol can be plenty loud. "If you are new contester or if it's been a while since your last one, don't spend all of your time searching and pouncing to find stations to work. Find a clear frequency high in the band and call CQ! Keep it short - like a 1-by-2 : CQ SS KAY FIVE TANGO RADIO, KAY FIVE TANGO RADIO CONTEST. If someone answers, work them and call CQ again. If you get a 'THIS FREQUENCY IS BUSY' or 'QRL', don't be upset. Spin the dial and find another spot to land. Keep the transmissions brief and frequent, and you will be surprised at how many stations will find you."

==> TECHNICAL TOPICS AND INFORMATION

The best gorilla hooks <http://www.rescuetech1.com/iscritrecoveryhooknew.aspx> Dave AB7E knows about "are extremely strong (check the specs) and very light weight (only one pound each). I use three of them ... two on the end of climbing straps so that I am never disconnected from the tower while

climbing, and a third one on my belt so that I can cinch myself up close to the tower while working." Dave particularly likes them because, "The throat opening is large enough to get around the cross braces on my AN Wireless heavy duty tower, and also around the 2-inch diameter mast when I get to the top of the tower."

A better and less expensive choice than carbon composition resistor for most applications that require high peak surge capacity and low inductance is the Ohmite "OY" series <http://www.ohmite.com/catalog/pdf/ox_oy_series.pdf> of ceramic composition resistors. These can be used as antenna or transmission line terminations or static discharge resistors. (Thanks, Paul, W9AC)

Tony K1KP recommends a delta loop as a low-band antenna with vertical polarization but that does not need a good ground. "An equilateral triangle, apex up, fed λ-wavelength from the top, will give vertical polarization. The bottom leg of the delta loop can be only a few feet off the ground and it provides the 'ground return' for the antenna. The impedance of a single loop is around 100 ohms and can be matched with an electrical quarter wave of 75-ohm coax."

Here's a topic that I know we all wrestle with from time to time - wires. More accurately, the large number of wires involved with "wireless" and their management. This problem has been multiplied by the addition of computers to the station, so listen in as the Slashdot <http://ask.slashdot.org/firehose.pl?op=view&type=story&sid=11/09/18/034254> crowd discusses the problem from the network point-of-view.

Ramsey Kits has updated their venerable 555 timer kits <http://www.allspectrum.com/store/ultimate-555-timeroscillator-kit-through-hole-p-7999.html>
- these are useful for all sorts of timing jobs and are easily modified or adapted to custom jobs. These new kits use terminal blocks for connections which is more convenient than having to solder directly to the board. There are both through-hole and SMT versions.

Nuts and Volts sells a kit for a small bench-type supply <http://store.nutsvolts.com/home.php?cat=422> that supplies +5 V and +/-12 V. This supply is a very useful item for testing and breadboarding analog and digital circuits.

When your radial field is limited to short distances from the base of the antenna, a roll of mesh is equivalent to a large number of individual radials - with the further advantage that you can roll them all up at once. You can read NC0B's Ham Radio article <http://www.sherweng.com/documents/GroundScreen-sm.pdf> in which he compared several different layouts for a given amount of mesh. (Thanks, Ian GM3SEK)

Here's a link to a Microsoft blog <http://blogs.technet.com/b/next/archive/2011/09/09/microsoft-garage-download-mouse-without-borders.aspx>

that announces release of a new app that allows a single mouse to be used with multiple Windows computers. Pat W5VY thinks this may have potential for use in SO2R (Single-Op, Two Radio) stations.

Hams have club houses, the do-it-yourselfers have "hacker spaces". This should all look very familiar and attractive to hams. There is probably a hacker space near you if you live in a suburban or metropolitan area, such as LVL1 <http://www.lvl1.org/about/> in Louisville, KY. (Thanks, George K5KG)

Technical Web Site of the Week - Tektronix veteran <http://www.vintagetek.org/>, Don W7WLL recommends the YouTube videos by W2AEW <http://www.youtube.com/user/w2aew?blend=21&ob=5> as really good tutorials on using an oscilloscope for ham radio measurements. He also has an excellent video at the same site titled "Scopes For Dopes" - it is an excellent tutorial for those who are daunted by the oscilloscope.

==> CONVERSATION

Elmer Tried

It's the start of the northern hemisphere's season of major contests and that occasionally leads some of our more competitive peers to leave the straight and narrow. Doctor Beldar decided a song was in order and here is his degradation of Merle Haggard's famous, "Mama Tried <http://www.youtube.com/watch?v=ffHcGlF0xDw>".

73, Ward N0AX

The first thing I remember knowing,
Was the filaments a-glowing,
And a Novice dream of Yagis way up high.
Seeking plaques of walnut brown,
In my ham shack hunkered down,
No-one could change my mind but Elmer tried.

Once a contest wonder child,
>From a ham club, meek and mild:
My Elmer seemed to know what lay in store.
Despite all my license learning,
Towards DQ, I kept on turning.
'Til Elmer couldn't hold me anymore.

And I turned twenty-one unlicensed, ticket down the toilet bowl.
No-one could steer me right but Elmer tried, Elmer tried.
Elmer tried to show me better, but his teaching, I denied.
That leaves only me to blame 'cause Elmer tried.

That old Heathkit, rest its soul,
Couldn't take the contest load;
So I replaced it with some three-hole shoes.

Logging spots with calls I guessed
Rubber-clocking all the rest
Elmer tried to raise me right but I refused.

And I turned twenty-one unlicensed, ticket down the toilet bowl.
No-one could steer me right but Elmer tried, Elmer tried.
Elmer tried to show me better, but his teaching, I denied.
That leaves only me to blame 'cause Elmer tried.

==> CONTESTS

28 September through 11 October 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

PSK Rumble - The Fall Classic--Digital, from Oct 1, 0000Z to Oct 1, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and call area (see Web site). Logs due: Oct 31. Rules <http://www.n2ty.org/>

EPC Russia DX Contest--Digital, from Oct 1, 0400Z to Oct 2, 0359Z . Bands (MHz): 1.8-28. Exchange: EPC member nr or serial and grid square. Logs due: Oct 17. Rules <http://www.epc-ru.ru/>

Oceania DX Phone Contest--Phone, from Oct 1, 0800Z to Oct 2, 0800Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: Nov 7. Rules <http://www.oceaniadxcontest.com/>

Worked All Britain HF Contest--Phone, from Oct 1, 1200Z to Oct 2, 1200Z. Bands (MHz): 14-28. Exchange: RS, serial, DXCC entity or WAB area. Logs due: Oct 23. Rules <http://www.worked-all-britain.co.uk/>

California QSO Party--Phone,CW, from Oct 1, 1600Z to Oct 2, 2200Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial and state/prov/"DX" or CA county. Logs due: Oct 31. Rules <http://www.cqp.org/>

EU Autumn Sprint--Phone, from Oct 1, 1600Z to Oct 1, 1959Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

RSGB 21/28 MHz Contest--Phone,CW, from Oct 2, 0700Z to Oct 2, 1900Z. Bands (MHz): 21,28. Exchange: Serial and UK district. Logs due: Oct 17. Rules <http://www.rsgbcc.org/hf/rules/2011/r2128.shtml>

ARS Spartan Sprint--CW, from Oct 4, 0200Z to Oct 4, 0400Z. Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

SNS and NS Weekly Sprints--CW, from Oct 7, 0200Z to Oct 7, 0300Z. Bands (MHz): 1.8-14. Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules

<http://www.ncccsprint.com/rules.html>

DX/NA YLRL Anniversary Party--Phone,CW,Digital, from Oct 7, 1400Z to Oct 9, 0200Z. Bands (MHz): 1.8-28. Exchange: Serial, RST, and section/province/country. Logs due: 30 days. Rules <http://www.ylrl.org/>

Makrothen RTTY Contest--Digital, from Oct 8, 0000Z to Oct 9, 1600Z. Bands (MHz): 3.5-28. Multiple operating periods. Exchange: 4-character grid square. Logs due: Nov 14. Rules <http://home.arcor.de/waldemar.kebsch>

Oceania DX CW Contest--CW, from Oct 8, 0800Z to Oct 9, 0800Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: Nov 7. Rules <http://www.oceaniadxcontest.com/>

Scandinavian Activity Contest--Phone, from Oct 8, 1200Z to Oct 9, 1200Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: Oct 23. Rules <http://www.sactest.net/>

Arizona QSO Party--Phone,CW,Digital, from Oct 8, 1600Z to Oct 9, 0600Z and Oct 9, 1400Z to Oct 9, 2359Z. Bands (MHz): 3.5-28, 50,144. Multiple operating periods - See website for frequencies. Exchange: RS(T) and AZ county or S/P/C. Logs due: Oct 31. Rules <http://www.azqsoparty.org/>

EU Autumn Sprint--CW, from Oct 8, 1600Z to Oct 8, 2000Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

Pennsylvania QSO Party--Phone,CW,Digital, from Oct 8, 1600Z to Oct 8, 0500Z and Oct 10, 1300Z to Oct 10, 2200Z. Bands (MHz): 1.8-28, 50,144, Frequencies: CW--40 kHz above band edge and 1.810; SSB--1.850, 3.825, 7.200, 14.280, 21.380, 28.480. Exchange: Serial and ARRL/RAC section. Logs due: Nov 14. Rules <http://www.nittany-arc.net/>

FISTS Fall Sprint--CW, from Oct 8, 1700Z to Oct 8, 2100Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, name, FISTS number or pwr. Logs due: 30 days. Rules http://www.fists.org

North American RTTY Sprint--Digital, from Oct 9, 0000Z to Oct 9, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, QTH, name. Logs due: 7 days. Rules <http://www.ncjweb.com/>

SKCC Weekend Sprintathon--CW, from Oct 9, 0000Z to Oct 9, 2359Z. Bands (MHz): 1.8-28, 50. Monthly on the second Sunday local time. Exchange: RST, QTH, name, SKCC nr or "none". Logs due: 5 days. Rules <http://www.skccgroup.com/>

10-10 Sprint--Phone,CW,Digital, from Oct 10, 0001Z to Oct 10, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Oct 25. Rules <http://www.ten-ten.org/>

VHF+ CONTESTS

Fall VHF Sprints--Phone,CW,Digital, from Oct 5, 7 PM to Oct 5, 11 PM. Bands (MHz): 432. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

PSK Rumble - The Fall Classic--Digital, from Oct 1, 0000Z to Oct 1, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and call area (see Web site). Logs due: Oct 31. Rules <http://www.n2ty.org/>

California QSO Party--Phone,CW, from Oct 1, 1600Z to Oct 2, 2200Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial and state/prov/"DX" or CA county. Logs due: Oct 31. Rules <http://www.cqp.org/>

Arizona QSO Party--Phone,CW,Digital, from Oct 8, 1600Z to Oct 9, 0600Z and Oct 9, 1400Z to Oct 9, 2359Z. Bands (MHz): 3.5-28, 50,144. Multiple operating periods - See website for frequencies. Exchange: RS(T) and AZ county or S/P/C. Logs due: Oct 31. Rules <http://www.azqsoparty.org/>

Pennsylvania QSO Party--Phone,CW,Digital, from Oct 8, 1600Z to Oct 8, 0500Z and Oct 10, 1300Z to Oct 10, 2200Z. Bands (MHz): 1.8-28, 50,144, Frequencies: CW--40 kHz above band edge and 1.810; SSB--1.850, 3.825, 7.200, 14.280, 21.380, 28.480. Exchange: Serial and ARRL/RAC section. Logs due: Nov 14. Rules <http://www.nittany-arc.net/>

SKCC Weekend Sprintathon--CW, from Oct 9, 0000Z to Oct 9, 2359Z. Bands (MHz): 1.8-28, 50. Monthly on the second Sunday local time. Exchange: RST, QTH, name, SKCC nr or "none". Logs due: 5 days. Rules <http://www.skccgroup.com/>

==> LOG DUE DATES

28 September through 11 October 2011

- September 28 - WAE DX Contest, SSB <http://www.darc.de/referate/dx/contest/waedc/en/rules/>
- September 30 - AGCW Straight Key Party <http://www.agcw.org/en/?Contests:Straight_Key_Party>
- September 30 - Kansas QSO Party <http://www.ksqsoparty.org/rules/>
- September 30 - Hawaii QSO Party <http://karc.net/OperatingEvents/HawaiiQSOParty/HIQSOPartyRules.html>
- September 30 - ALARA Contest <http://www.alara.org.au/contests/31st-alara-contest-rules/>
- September 30 - Russian District Award Contest <http://rdaward.org/rdac1.htm>
- October 1 - Feld Hell Sprint <http://sites.google.com/site/feldhellclub/Home/contests>
- October 1 - Ohio State Parks on the Air <http://parks.portcars.org/ospota/wp-content/uploads/2010/12/ospota-rules-2011.pdf>
- October 2 - Scandinavian Activity Contest, CW <http://www.sactest.net/>
- October 3 - SARL VHF/UHF Analogue/Digital Contest <http://www.sarl.org.za/public/contests/SARL_2011_Contest%20Manual_issue_9.pdf>
- October 3 - Colorado QSO Party <http://www.ppraa.org/coqp/2011%20COQP%20Rules%2011-1.pdf>
- October 3 - Russian RTTY WW Contest

<http://www.qrz.ru/contest/detail/93>
- October 3 - CIS DX QPSK63 Contest
<http://www.cisdx.srars.org/cisdxc.pdf>
- October 4 - QCWA Fall QSO Party <http://www.qcwa.org/qso-party.pdf>
- October 4 - International G3ZQS Memorial Straight Key Contest
<http://www.fists.org/straightkey.html>
- October 5 - MI QRP Labor Day CW Sprint
<http://www.qsl.net/miqrpclub/contest.html>
- October 6 - Tennessee QSO Party <http://tnqp.org/wp/?page_id=11>
- October 9 - WAB 144 MHz QRP Phone
<http://wab.intermip.net/Contest%20Rules.php#OtherRules>
- October 9 - PODXS 070 Club Jay Hudak Memorial 80m Sprint
<http://www.podxs070.com/80-meter-jay-hudak-memorial-sprint>
- October 10 - AGCW VHF/UHF Contest
<http://www.agcw.org/en/?Contests:VHF-UHF_Contest>
- October 10 - SARTG WW RTTY Contest
<http://www.sartg.com/contest/wwrules.htm>
- October 11 - Swiss HTC QRP Sprint <http://www.htc.ch/node/138>
- October 11 - QRP ARCI VHF Contest

==> HURRICANE IRENE: BEAST OF THE EAST

Scorned by Florida, Irene vented her fury on the rest of the east coast
and many inland areas. Reports from Section Managers and other key ARES
leaders on critical aspects of response efforts follow.

Hurricane Irene produced a significant impact across Massachusetts,
Vermont, and much of New York and New England. Tracking of Hurricane
Irene started when the system was in the Bahamas, and Turks and Caicos
Islands and the National Hurricane Center "cone of uncertainty," which
is a cone that describes track uncertainty for the center of the
hurricane to reach a particular location, covered much of southern New
England on Tuesday, August 23. During this timeframe, the first
coordination message to Amateur Radio and non-Amateur Radio SKYWARN
Spotters, Emergency Management and other agencies was posted to the
SKYWARN email list covering the National Weather Service Taunton,
Massachusetts coverage area. Messages were issued once per day through
Thursday, August 25 and were increased to two messages a day on Friday
as Tropical Storm and Hurricane Watches and Warnings were posted for
the region. These messages were also posted via Facebook and Twitter as
listed under the WX1BOX, Amateur Radio station at the NWS Forecast
Office, social media Web sites and on the WX1BOX home page
<http://www.wx1box.org/> so that spotters could prepare and then be in
position to report severe weather conditions.
```

>From an ARES perspective, a call between the Section Emergency Coordinator, Assistant Section Emergency Coordinators and senior ARES staff members was held Tuesday evening. This ramped up to the entire staff of DECs, ASECs and the SEC by Wednesday evening and were held nightly with two calls held on Saturday. A follow-up call was held late Sunday afternoon. The Western Massachusetts section also participated in the calls and coordination between the Eastern and Western Massachusetts ARES SECs took place throughout the event.

Eastern Massachusetts ARES was placed on stand-by on Thursday, with deployments all day Sunday, August 28. The Eastern Massachusetts ARES Stand-by Status was lifted the following Tuesday when conditions across the area had improved sufficiently that no further agency requests were anticipated and power slowly returned to people in the region. Information on the ARES stand-by and agency deployments was posted to the Eastern Massachusetts ARES web site <http://ares.ema.arrl.org/>.

In the Eastern Massachusetts section, two town EOCs and one school Amateur Radio station serve as control points within the section to maintain contact with the various ARES and SKYWARN Nets in the region. They are located in the town of Acushnet (WA1EMA) led by South Coast Massachusetts EC Ed Caron, KA1RSY, the town of Bridgewater led by Assistant SEC Carl Aveni, N1FY, and at the Dexter-Southfield School/Clay Center Observatory in Brookline, Massachusetts (WX1CLA/W1CLA) led by Metro Boston DEC Marek Kozubal, KB1NCG. In addition, the National Weather Service Forecast Office in Taunton (WX1BOX) was also staffed with Amateur Radio operators that included Eastern Massachusetts SEC Rob Macedo, KD1CY, John Bacon, K1JWB and soon to be licensee Nick Snow. Coordination took place between WX4NHC, the Amateur Radio station at the National Hurricane Center in Miami, Florida, and the WX1BOX NWS Taunton Amateur Radio station.

In the Western Massachusetts section, SEC John Ruggiero, N2YHK, placed ARES on stand-by on Friday, August 26. Amateur Radio operators supported a minimum of 12 EOCs in his section. In the commonwealth of Massachusetts, there is no county government and counties only represent a geographical collection of towns so staffing takes place at the local and town level with some smaller cities and towns having one EOC centrally located between them. Also staffed were the Pioneer Valley Chapter of the American Red Cross where staffing was continuous from Sunday, August 28, through Friday, September 2, the Greenfield Community College Regional EOC and the Berkshire Medical Center in Pittsfield, Massachusetts. In terms of shelters, a minimum of 11 shelters were staffed across western Massachusetts.

Several dozen local city and town EOCs were also staffed in the Eastern Massachusetts section. The city of Boston EOC was staffed with Amateur Radio operators for the first time in an actual storm related event. In the past, it had only been staffed during the Boston Marathon and major events such as the Democratic National Convention in 2004. Several regional Red Cross shelters were staffed with Amateur Radio operators across the section. This included seven shelters and the Red Cross

headquarters on Cape Cod and three shelters and a Red Cross base outside of Cape Cod. Cape Cod DEC Frank O'Laughlin, WQ1O, led Cape Cod ARES operations. In addition, North Shore ARES supported the Beverly and Bay Ride Hospitals and the Peabody, Massachusetts EOC. Assistant SEC Jim Palmer, KB1KQW, and North Shore DEC Eric Horwitz, KA1NCF, led these operations. The Cape Ann Amateur Radio Association supported the Gloucester EOC and the Gloucester Hospital with hams at each location. South Shore DEC Phil McNamara, N1XTB, reported numerous town EOCs staffed including the towns of Carver and Mansfield. Also, for the first time, the FEMA Region 1 Maynard Federal Response Center was staffed with an Amateur Radio operator, Kate Murphy, KB1USO, Metro Boston EC, providing a link to their center for the first time in a storm related incident.

One of the major roles ARES and SKYWARN play in the commonwealth of Massachusetts is providing situational awareness and disaster intelligence information during a weather event and in a hurricane it is no different. ARES-SKYWARN operations lasted 19 hours. In the 19 hours of activation, amateurs at the NWS Taunton Forecast Office handled several hundred reports of wind damage, storm surge, flood measured rainfall and wind reports from across the entire coverage area, which is all of Massachusetts except for Berkshire County, Rhode Island, Northern Connecticut and Southern New Hampshire. Approximately a dozen SKYWARN nets were stood up across the region to support the reporting from all areas. These reports were distributed to state and federal emergency management officials as well as the media. At the height of the storm, over 600,000 were without power in Massachusetts with over 1,000,000 without power in Massachusetts, Rhode Island and Connecticut combined. Measured wind gusts between 70 and 80 mph were reported by Amateur Radio operators and this information was sent directly to the National Hurricane Center via the VoIP Hurricane Net <file:///%28http:/www.voipwx.net>http://www.voipwx.net <http://www.voipwx.net/>, which was merged with the Echolink/IRLP New England Reflector <http://new-eng.com/> system.

Some amateurs were directly impacted by the storm with trees falling on their houses from the high winds and many hams lost power but were able to remain on the air through emergency power backup. Amateur Radio operators were key in providing what was happening during the hurricane in near real-time to public safety officials. This was particularly true in Western Massachusetts where major flooding shut down major highways such as Interstate 91 and almost cut off entire towns in Franklin County and parts of the hill-towns of northwestern Massachusetts. Some of those first reports of major flooding came from Amateur Radio operators.

Western Massachusetts SEC N2YHK alerted Eastern Massachusetts ARES on the potential need for ARESMAT support to Franklin County as one shelter was filled to capacity and a second shelter was opened with communications in the area spotty due to hilly terrain and the stress the flooding had caused on the communications infrastructure.

Lessons

Irene's impact to the region was that of a strong tropical storm/minimal category 1 hurricane. Its large wind field that expanded to between 250 and 300 miles along with its heavy rainfall caused significant issues over a widespread area from North Carolina through New York and New England. It shows that all tropical systems are dangerous and there is little difference between a strong tropical storm versus a minimal category 1 hurricane particularly where the wind field is as large as Irene and the tremendous amount of rainfall the system had.

Over 200 amateurs supported the operation between deployments and SKYWARN Net support in Eastern Massachusetts. At least 65 amateurs from Western Massachusetts participated by providing services in direct support of those deployed in the field. There were many more that provided storm reports and net assistance, as well as supporting logistics and administration. After action reports are still being compiled. They will eventually be posted to the Eastern Massachusetts ARES <http://ares.ema.arrl.org/>Web site, Western Massachusetts ARRL <http://wma.arrl.org/news.php> web site and the NWS Taunton SKYWARN WX1BOX <http://www.wx1box.org/>Web site with notifications sent over Facebook and Twitter as well. These reports will include the the names of amateur operators that deployed to the various agencies and other lessons learned from Hurricane Irene. [Contributors: Mike Neilsen, W1MPN, former Eastern Massachusetts SM and OES; John Ruggiero, N2YHK, Western Massachusetts SEC; principal author Rob Macedo, KD1CY, Eastern Massachusetts SEC, ARES SKYWARN Coordinator for NWS Taunton Massachusetts, and Director of Operations for the VoIP Hurricane Net; and Carl Aveni, N1FY, Eastern Massachusetts ASEC and Assistant ARES SKYWARN Coordinator for NWS Taunton Massachusetts].

North Carolina

In North Carolina, Section Manager Bill Morine, N2COP, reported that commercial network infrastructure remained largely intact, but emphasized "that this was the first large scale disaster in the state since ARES EC and higher appointments required ICS 100, 200, 700 and 800 training and certification." Morine said that "55% of the state's 100 counties now have ICS-credentialed ECs, and there are almost 400 ICS-credentialed operators in ARES. The result was that emcomm assignments were effected like clockwork in conjunction with our primary served agency: North Carolina Emergency Management (NCEM)." Morine said that "after the storm passed, many ICS credentialed ARES personnel reported to the agency's Eastern Branch Regional Coordination Center (RCC) in Kinston, where communications for the affected areas in the Outer Banks were being handled. This was the first time in the state that we also had several COMM-Ls (Communications Unit Leader) being used. This storm response validated the NIMS/ICS system, and showed that it's working well here in North Carolina."

Morine thanked the state's operators: "Much appreciation goes to the thousands of operators across the state who got on the air to help with

Hurricane Irene emergency communications. Hams in the northeastern counties and on the Outer Banks saw tremendous damage. The Tar Heel Emergency Net <http://www.ncarrl.org/nets/THEN/index.html>(THEN) was on the air almost continuously."

"Disasters like Hurricane Irene cause repeaters to light up as new and inactive operators gather on air with reports but also to find out what's going on. It's important we all welcome such operators but they may need gentle reminders about when to identify, to wait for courtesy tones, allow for time between transmissions, and to observe Net Control Station (NCS) instructions during directed nets, especially on repeaters designated for ARES or SKYWARN. During declared emergencies and activations, nets should function with order. Many government officials as well as the public listen to Amateur Radio repeaters on scanners, so we always should be at our best." -- Bill Morine, N2COP, North Carolina Section Manager

North Carolina Governor Beverly Perdue, taking time to speak to ARES EC Tom Brown, N4TAB, and company during her visit to the North Carolina Emergency Operations Center, offered her personal thanks for the support that Amateur Radio provided. -- Raymond Woodward, K3VSA, Public Information Coordinator, North Carolina ARRL

Connecticut

In Connecticut, veteran Section Manager Betsey Doane, K1EIC, reported that Hurricane Irene "sure visited" her state/section: "We have not had an emergency of this scale in some time." Preparations in the state began with SEC Wayne Gronlund, N1CLV, ASEC Rod Lane, N1FNE, and K1EIC convening a net of ARES and NTS ops to review plans and procedures for the emergency and to update all on the status of the SEC's plans for activation. More than 80 operators checked in.

"We do not have county government in the state," Doane said. "Our Section is divided into five Emergency Management regions. During the hurricane, SKYWARN nets were activated every two hours and NWS stations were also operational. SKYWARN DEC Steve Williams, K1SJW, and his net managers and net control stations performed yeomen's work coordinating and controlling the many nets. There were 98 check-ins from Hartford and Tolland counties alone. The operator of WX1BOX at the National Weather Service Office in Taunton, Massachusetts, checked into the Hartford Tolland county nets on the 146.79 MHz Pioneer Valley Repeater Association repeater throughout the storm. WX2ALY at the National Weather Service Office in Albany, New York checked into the Litchfield County nets through the 147.285 MHz Southern Berkshire ARC repeater in Sharon that is tied into the KB1AEV system. SKYWARN nets in Windham County used the K1VSC W2LK Airmail system to send reports to the NWS office in Taunton, Connecticut SKYWARN, ARES leadership and DEMHS Region #4.

DECs in each region reported that they had hams in several EOCs and at Red Cross shelters. Linked repeater systems were all active and used

shared resources. Both Flexnet and State Police packet networks as well as some Winlink RMS's were fully operational. Doane said her emcomm team "is very appreciative of our repeater and digital system owners and operators who are committed to public service. It takes a lot of work and expense to run these systems." She reported that "we kept our membership informed on the air and through our ARES reflector and Section Web sites when we had Internet availability."

Doane's leadership team, which is affectionately called "the CALC," the CT ARES Leadership Council, met regularly on the air to share status updates. Unfortunately, some clubs lost power at repeater sites and others lost entire repeater systems.

On the NTS side, all nets were active with great participation. A welfare message was given to Doane by ASM K1HEJ from an op in Vermont inquiring about his brother in Milford. Doane couldn't get through on the phone but new DEC WA1SFH successfully delivered the message in person and got a "good news" reply back.

ARRL PIC KA1WPM distributed news releases about ARES operations and participated with the SM and SEC in a Web conference with ARRL staff conducted by ARRL Emergency Preparedness Manager W5MPC. Doane thanked the ARRL staff for their vigilance and continuing offers of support.

Connecticut ops were commended by emergency management directors and Red Cross shelter managers across the state for their

outstanding communications work. New relationships were formed in the Section. Amateur Radio communications with the city of Stamford led by EC WB2RYV, who participated in planning meetings with city officials, is one example.

Eastern Pennsylvania

In Eastern Pennsylvania, Section Manager Eric Olena, WB3FPL, reported that "shelters in most counties were open for two to three days with lack of power being the main concern. There was flooding in only a few areas."

New Hampshire

New Hampshire Section Manager and SEC Al Shuman, K1AKS, was situated at the State EOC and saw firsthand both on the HF and VHF sides how well things went: "We had a number of repeaters go down as electricity failed. I was impressed on how well our troops dealt with adversity to keep things going."

Over two hundred members of New Hampshire ARES responded to the call-up in the days just prior to Hurricane Irene with some advance VHF nets being activated on Friday afternoon and a number of shelters and the State of New Hampshire being manned on Saturday. All 12 ARES Groups representing ten counties were represented. "We were asked to provide situation reports via both HF and VHF nets to the State EOC, which were

directly fed into the State's WebEOC <http://esi911.com/esi/index.php?option=com_content&task=view&id=14&Itemid=30> data base. Damage from the storm was primarily in the northern and northeastern part of New Hampshire with significant road erosion and collapsed bridges. The southern part of the state was plagued with sporadic losses of electricity. No deaths were reported in New Hampshire. NH-ARES and their served agencies worked seamlessly to our agreed operational plan."- Al Shuman, K1AKS, New Hampshire SM/SEC

ARRL and W1AW

ARRL HQ went into monitoring mode on Irene long before she made landfall in North Carolina. Thanks to Angel, WP3GW, Public Information Officer for ARRL's Puerto Rico Section, we were getting reports on Irene as she made her way across Puerto Rico and the Caribbean.

On Tuesday August 23rd the ARRL HQ Emergency Response Team went into monitoring mode for Irene. The decission for activation came later in the week as Irene's path became more certain.

ARRL hosted conference calls for Section officials in Irene's path and issued daily updates on related activities. Irene's impact on the east coast fell on a weekend when HQ would normally be closed. To assist the affected Sections W1AW was staffed and on the air from 0700 local Saturday through 1400 local Sunday. Station operators monitored traffic nets, assisted with relays, passed traffic through the Hurricane Watch Net and through NWS Taunton, MA.

One kudo that should be mentioned is to Sean Kutzko, KX9X, ARRL's Contest Branch Manager. Sean gave very generously of his time over the weekend of Irene's landfall. He spent many hours at W1AW passing storm related traffic to NWS Taunton via Echolink. Many times I hear of the divide between EmComm and contesting, but it is a divide created by us. When there is a true emergency and we (the Amateur Radio Service) are needed, we come through regardless of our differences or interests within Amateur Radio. To Sean and all those that step up to plate when called upon...thank you!

Special thanks to HQ staff who helped keep W1AW on the air over the weekend; KX9X, NJ1Q, K1FUG, N1ND, W3IZ, WV1X, NC1L, AG1YK, and KA1JPA.

Submitted - Mike Corey, W5MPC, ARRL Emergency Preparedness Manager

==> ARES&#65533; BRIEFS

"EmComm for the Apocalypse" is the title of a presentation to be made at the ARRL PACIFICON <http://www.pacificon.org/> 2011 convention next month in Santa Clara, California, by David Kidd, KA7OZO, of Oregon ARES/RACES and Bart Lee, K6VK. The subject is electromagnetic pulse (EMP) and emergency communications. "If your gear is solid state, it's cooked unless it's protected," said Lee. PACIFICON 2011, The Great West Coast Ham Radio Convention, returns to the San Francisco Bay Area and will again be sponsored by the Mount Diablo Amateur Radio Club.

PACIFICON 2011 will take place Friday, October 14 through Sunday, October 16, at the Marriott Santa Clara Hotel.

ARRL SET: This Weekend October 1 and 2

This nationwide exercise is the chance to test your emergency operating skills and the readiness of your communications equipment and accessories in an emergency-like deployment. ARRL Field Organization Leaders at the Section and local levels -- along with many other volunteers who are active in public service and emergency communications -- are developing emergency-like scenarios in consultation with a variety of agencies for whom radio amateurs are known to provide service during emergencies. To find out how you can step up and be a part of the local or Section-level activities, contact your Section Manager. You can find contact information for all 71 ARRL Section Managers on page 16 of any issue of QST. Additional contact information may also be found on the ARRL <http://www.arrl.org/>Web site. ARES®, the National Traffic System (NTS), the Radio Amateur Civil Emergency Service (RACES) and members of the ARRL Field Organization will participate and practice emergency operation plans, nets and procedures.

GlobalSET: November

GlobalSET <http://www.iaru.org/emergency/>is an exercise taking place twice annually, usually in April/May and November. Participants are headquarters stations of national IARU Member-Societies and of stations of specialized emergency communications groups world-wide. GlobalSET is not a contest, but an exercise; messages are being exchanged between stations and forwarded to a regional headquarters station in each of the three IARU Regions. In addition to the training of operators in message handling, GlobalSET also aims at increasing the awareness for the global and regional Center of Activity (CoA) Frequencies <http://www.iaru.org/emergency/>. GlobalSETs are sponsored and organized by IARU Region 1 and regularly announced on the IARU <http://www.iaru.org/emergency/> web site with a link to the rules and details for each event.

==> LETTERS

Amateur Radio in Disasters: One Step Forward, One Step Back

With recent events such as the Japan earthquake and Hurricane Irene still fresh on the mind, I was heartened to read David Sumner's (K1ZZ) astute opinion on the changing role of Amateur Radio in emergency communications in the September 2011 issue of QST. In a world of social media, real-time crisis mapping, and pervasive smartphone use, the role of Amateur Radio is indeed changing, even as we remain a core tool in the communications toolbox. David's essential point assumes that a successful response to any significant emergency requires different agencies and organizations working together in a collaborative and trusting manner.

Unfortunately, just a few pages later Rick Palm's (K1CE) article about the Florida-based EMCOMM-1 vehicle does a fundamental disservice to that trust. No, it's not about the vehicle: from what I read and have seen online, it seems to be a fine vehicle and its builders are to be commended for their efforts. What I take exception to was the hyperbole and explicit attitude that said "Hams do it better than government - look how wasteful and incompetent they are." This "us versus them" attitude is exactly what is NOT needed in modern emergency response, and unfortunately only reinforces the negative stereotypes held in certain served agencies of the Amateur Radio service. The attitude is wasteful, and serves no useful purpose.

Whether we choose to acknowledge it or not, the technologies used in emergency response communications are changing radically right in front of our eyes. We also have to understand and accept the legitimate roles that other organizations have to contribute. After 9/11 and Hurricane Katrina, isn't it obvious that we either all sink or swim together? -- Rakesh Bharania, N6ILG, San Jose, California

FEMA's Fugate on C-SPAN

It's true though perhaps sad that I spend more time watching the various C-Span channels instead of operating. Anyway, I was channel surfing yesterday and caught the end of a talk by Craig Fugate, the FEMA administrator. Basically, he described how he had refined his approach to relief and emergency services over the years, to more clearly assess and identify problem areas, instead of working from a methodology. He sounded very practical and functionally-oriented, and his approach reminded me of the Op-Ed and feedback that appeared in the last and previous ARES E-Letter issues. It would be worthwhile viewing (from C-Span's Web site <http://www.c-span.org/>) for anyone interested in emergency response. Also, it seems to me that Mr. Fugate would be an interesting subject for an interview, for either QST or the ARES E-Letter. - Mike Harla, N2MHO, Vineland, New Jersey

==> K1CE FOR A FINAL

One of the things that jumped out at me in the wake of Hurricane Irene was how far the ARRL HQ's planning, preparation and response initiatives have come since the old days, when I was responsible for them. Back in those days, the HQ response was mostly reactionary, as opposed to pre-planning and coordination protocols. Some of that changed after Hurricane Hugo, but the quantum leap for HQ's emergency response and planning came with the vision of the executive management at HQ, especially Chief Operating Officer Harold Kramer, WJ1B. Staff was hired with the dedicated mission of ramping up HQ's emergency preparedness and response, and most importantly, support to the field, and coordination. They have done an excellent job.

A good example of the manifestation of this new era was the "webinar" convened by ARRL HQ's Emergency Preparedness Manager Mike Corey, W5MPC, before the storm was to impact the east coast. The purpose of the Internet-based meeting was for ARRL Sections in the path of Irene to

provide a brief update on Amateur Radio activities. Section Public Information Coordinators, Section Traffic Managers, and other key Section level staff were invited to attend. These section staffers would provide information from key Section staff in the overall update. A spokesperson for each Section was named, and briefings from nineteen Sections were conducted. A synopsis of Amateur Radio activity in each Section ahead of Irene was provided, along with any anticipated needs, HF emergency net information, Echolink/IRLP, and D-STAR nets operating, and a back up point of contact for each Section. Good job, HQ.

See you next month! 73, Rick K1CE

WOCN31 CWHX 291145
Tropical cyclone information statement issued by the Canadian
Hurricane Centre of Environment Canada at 8:49 AM ADT Thursday
29 September 2011.

Tropical cyclone information statement for:
=new= Newfoundland
=new= Nova Scotia.

For tropical storm Ophelia.

This is the only planned statement at this time.

Ophelia and frontal zone to potentially combine over Atlantic
Canada this weekend.

==discussion==
Tropical storm Ophelia is forecast to intensify into a hurricane and
pass east of Bermuda late Saturday. A non-tropical low pressure
system with an associated frontal zone to its east is forecast at the
same time to move into the maritime provinces. As Ophelia moves
northward, it is expected that the front will nearly stall somewhere
over the maritime provinces potentially giving heavy rainfall.
Depending on the intensity of Ophelia, strong winds could affect
parts of Atlantic Canada late this weekend. As of Thursday morning,
computer models predict various scenarios for Ophelia's track,
ranging from Eastern Nova Scotia to well offshore over the Grand
Banks off Newfoundland. The Canadian Hurricane Centre will be
closely monitoring the tropical storm and frontal feature and may
begin issuing regular 6-hourly forecasts on Friday.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the
latest:

- forecast position, central pressure table.

- strength and predicted wind radii table.

- hurricane track information map.

- technical discussion.

Please also refer to the public and marine forecasts and warnings
issued by Environment Canada for your area.

==> + ON THE AIR: SCOUTS TO TAKE TO THE AIRWAVES FOR THE 54TH JAMBOREE
ON THE AIR

Each year, more than 500,000 Scouts in more than 100 countries take
to the airwaves on the third full weekend in October -- and this year
will be no different. The Jamboree On The Air (JOTA) is a Scouting and
Amateur Radio event sponsored by the World Scout Bureau of the World
Organization of the Scout Movement. JOTA is an annual event where Boy
Scouts, Girl Scouts and Girl Guides from all over the world speak to
each other via Amateur Radio. Since 1958 -- when the first Jamboree on
the Air was held -- millions of Scouts have met through this event.
Many contacts made during JOTA have resulted in pen pals and links
between Scout troops that have lasted many years. The radio stations
are operated by radio amateurs, and many Scouts and leaders hold
licenses and have their own stations. The majority of JOTA Scouts
```

participate through stations operated by local radio clubs and individual hams. Read more here <http://www.arrl.org/news/scouts-to-take-to-the-airwaves-for-the-54th-jamboree-on-the-air>.

==> + ARRL BRIEFS WHITE HOUSE STAFF ON AMATEUR RADIO'S CAPABILITIES DURING EMERGENCIES

On September 12, at the invitation of White House Cybersecurity Coordinator Howard A. Schmidt, W7HAS <http://www.arrl.org/news/white-house-names-ham-as-new-cybersecurity-coordinator>, the ARRL briefed several members of the National Security Staff on the capabilities of the Amateur Radio Service to communicate in emergencies. "The White House is looking for ways that the great work of Amateur Radio operators can continue to support emergencies in the future with particular attention to increased use and dependency on Internet-based technologies," Schmidt said. The ARRL presentation, conducted by Emergency Preparedness Manager Mike Corey, W5MPC -- along with President Kay Craigie, N3KN, and Chief Executive Officer David Sumner, K1ZZ -- focused on Amateur Radio's current and evolving capabilities to provide Internet messaging connectivity.

==> + AMATEUR RADIO IN SPACE: TAKE THE ARISSAT-1 SURVEY

AMSAT <http://www.amsat.org/amsat-new/> is inviting radio amateurs to complete a 19-question survey regarding ARISSat-1 <http://www.arrl.org/news/arissat-1-finally-deployed-from-iss>. "Please take a few minutes to answer the questions <https://www.surveymonkey.com/s/arissat1-operation>," said Steven Bible, N7HPR. "The survey results will be posted to the official ARISSat-1 website <http://www.arissat1.org/>." ARISSat-1 was deployed from the International Space Station in August 2011 and is active on the following frequencies and modes:

- 145.950 MHz FM Downlink: FM transmissions will cycle between a voice ID as RS01S, select telemetry values, 24 international greeting messages in 15 languages, as well as SSTV images. If you successfully receive the SSTV transmissions, you are invited to upload your picture to the ARISS SSTV Gallery <http://www.amsat.org/amsat/ariss/SSTV>.
- 435 MHz - 145 MHz Linear Transponder: The linear transponder will operate in Mode U/V (70 cm up, 2 meters down). It is a 16 kHz wide inverting passband from 435.742 to 435.758 MHz and the convention will be to transmit LSB on the 435 MHz uplink and receive USB on the 145 MHz downlink between 145.922 and 145.938 MHz.
- 145.919 MHz/145.939 MHz CW Beacons: The CW transmissions will be call sign ID RS01S, select telemetry and call signs of people actively involved with the ARISS program.
- 145.920 MHz SSB BPSK-1000 Telemetry: The BPSK transmissions will feature a new 1kBPSK protocol developed by Phil Karn, KA9Q. When the CW2 beacon on 145.919 MHz is active, this indicates that the BPSK-1000 format is being transmitted. If the CW1 beacon on 145.939 MHz is

active, the backup of BPSK-400 format is being transmitted.

==> + AMATEUR RADIO IN SPACE: AMSAT SPONSORS ARISSAT-1 RE-ENTRY CONTEST

AMSAT Secretary Alan Biddle, WA4SCA, said the ARISSat-1 Team is looking for entries in the Chicken Little Contest. This is your opportunity to calculate or guess when ARISSat-1 falls out of orbit. This is defined as the time it crosses an altitude of 78 kilometers, which is considered to be the point of no return. "This involves your prognostications, calculations, guesses, darts-in-the-calendar submissions for when ARRISSat-1 makes its final orbit," Biddle said. "We have a fair number of submissions from all over the world from adults, but very few from students. If you know of one who might be interested, encourage them to enter." Read more here <http://www.arrl.org/news/amsat-sponsors-arissat-1-re-entry-contest>.

==> + AT THE WORKBENCH: THE DEADLINE FOR THE THIRD ARRL HOMEBREW CHALLENGE IS APPROACHING

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members. Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more. The deadline for the Third Homebrew Challenge is Tuesday, November 1. Read more here <http://www.arrl.org/news/the-deadline-for-the-third-arrl-homebrew-challenge-is-approaching>.

==> ARRL EXECUTIVE COMMITTEE TO MEET IN VIRGINIA THIS WEEKEND

The ARRL Executive Committee will meet October 1 in Virginia. The agenda <http://www.arrl.org/files/media/News/2011_Oct_ARRL_EC_agenda.pdf> for the meeting is now available. According to the ARRL By-Laws <http://www.arrl.org/arrl-by-laws>, the Executive Committee is assigned specific responsibility for:

- Applying existing Board policy to make decisions between Board meetings.
- Evaluating proposed rules and regulatory changes for the Board.
- Assisting staff and General Counsel in Board recommendations for petitions to the FCC and other governmental and international agencies.
- Periodically reviewing and recommending to the Board any changes in the ARRL Articles of Association, By-Laws, Standing Orders, and Memoranda of Understanding with other organizations.
- Monitoring progress of Board actions and recommendations (task tracking).

- Monitoring progress of the implementation of, and suggesting ongoing revisions to, the ARRL Strategic Plan, working in conjunction with Standing Committees as appropriate.
- Reviewing and recommending programs designed to represent the organization to the public, enhance the organization's image, and communicate with the media.

==> + ARRL INVITES NOMINATIONS FOR 2011 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2011 ARRL International Humanitarian Award. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize those radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

As one of the few telecommunication services that allows people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army, a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references. Read more here <http://www.arrl.org/news/arrl-invites-nominations-for-2011-international-humanitarian-award>.

==> SOLAR UPDATE

Tad "The Sun shines forever <http://www.youtube.com/watch?v=7w0MWv4rfH0>" Cook, K7RA, reports: Our Sun has been very active this past week, with the average solar flux rising nearly 12 points to 155.5, while the average daily sunspot numbers dropped nearly 41 points to 96.1. This implies fewer, but more intense, sunspots. A huge sunspot group numbered 1302 emerged on September 22. This was the source of a coronal mass ejection that triggered an immense geomagnetic storm. The planetary A index peaked at 67 on September 26, followed by 30 the next day and 24 on September 28. The planetary K index reached 8 for two of the three-hour reporting periods on September 26, indicating an intense geomagnetic storm. The resulting aurora was observed in many places, including Maine, Massachusetts, Michigan, Minnesota, New York, North Dakota and South Dakota. On September 22, there was a major X1.4 class solar flare at

1100 UTC, with a large CME, but this was when sunspot 1302 was just coming over the horizon, so it wasn't Earth-directed. On September 24, sunspot group 1302 produced a larger X1.9 flare. Currently, the latest forecast from NOAA/USAF has solar flux for September 29-October 7 at 130, 130, 125, 120, 120, 115, 110, 110 and 140, and then 145 on October 8-10 and 140 on October 11-17. The predicted planetary A index is 12, 5 and 8 on September 29 through October 1, then 5 on October 2-7, then 8, 15, 12 and 8 on October 8-11 and 5 on October 12-21. Look for more information on the ARRL website on Friday, September 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Bananarama's Through a Child's Eyes <http://www.youtube.com/watch?v=7w0MWv4rfH0>.

==> + ARRL INVITES MEMBERS TO EXPRESS OPINIONS IN QST

Each month in QST, the ARRL devotes a page to print letters from its members. This is a chance for you to express your opinions -- good or bad -- on ham radio-related matters. Your opinion counts! Send your letters electronically to qst@arrl.org or via postal mail to Correspondence, 225 Main St, Newington, CT 06111. You can also fax your letters to 860-594-0259. We read every letter received, but we can only publish a few each month. We reserve the right to edit your letter for clarity and to fit the available page space. Letters published in QST may also appear in other ARRL media. The ARRL assumes no responsibility for statements made by correspondents.

==> THIS WEEK ON THE RADIO

This week:

- October 1 -- TARA PSK Rumble Contest; EU Autumn Sprint (SSB)
- October 1-2 -- California QSO Party; Oceania DX Contest (SSB); WAB HF Phone Contest; EPC Russia DX Contest
- October 2 -- UBA ON Contest (SSB)
- October 3 -- German Telegraphy Contest
- October 4 -- ARS Spartan Sprint
- October 5 -- 432 MHz Fall Sprint (local time)

Next week:

- October 7-9 -- YLRL DX/NA YL Anniversary Contest
- October 8 -- FISTS Fall Sprint; EU Autumn Sprint (CW)
- October 8-9 -- Arizona QSO Party; Pennsylvania QSO Party; Makrothen RTTY Contest; Oceania DX Contest (CW); Scandinavian Activity Contest (SSB)
- October 9 -- North American Sprint (RTTY); UBA ON Contest (CW)
- October 10 -- 10-10 International 10-10 Day Sprint
- October 12 -- NAQCC Straight Key/Bug Sprint; NAQCC-EU Monthly Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update

<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more

Amateur Radio Newsline(tm) Report 1781 - September 30 2011

Amateur Radio Newsline report number 1781 with a release date of Friday, September 30th, 2011 to follow in 5-4-3-2-1.

The following is a QST. FEMA issues new emergency communications guidelines to the public but neglects to mention any form of personal two way radio. Also, scouting gets ready for the annual Jamboree On The Air, the leader of the aborted DX0DX Spratley Island operation says all donations will be refunded in full, CQ Publishing to offer all of its magazines in the digital domain and a ham radio song gets a new look on the World-Wide-Web. All this and more on Amateur Radio Newsline(tm) report number 1781 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: FCC AND FEMA ISSUE PERSONAL COMMUNICATIONS EMCOMM TIPS TO THE PUBLIC BUT NEGLECT TWO-WAY RADIO

The FCC and FEMA have issued guidelines on what steps citizens should take before, during and after a local disaster, but no personal form of two way radio is included. Amateur Radio Newsline's Don Carlson, KQ6FM is here with the details:

--

In an FCC press release, Chairman Julius Genachowski said that when disaster strikes, the ability to communicate is essential. However, power outages and other issues can interfere with the way people ordinarily communicate, making it harder to reach loved ones or emergency services.

Genachowski noted that the FCC is committed to ensuring the public's safety through the reliability of our nation's communications networks. But there are also simple steps that consumers can take to prepare for a disaster as well as practical ways to better communicate during and after an event. As such, Genachowski encourages all Americans to become familiar these the new communications tips and share them with friends and family.

Also making a statement was FEMA Administrator Craig Fugate. He said that between the East Coast earthquake, Hurricane Irene, Tropical Storm Lee, and wildfires in Texas and California, the public has received a lot of powerful reminders that disasters can strike anytime. This in

turn and can often make it difficult for the public to communicate with friends, loved ones or emergency personnel.

Fugate said that an important part of preparing for disasters includes getting ready for potential communications challenges. He called the new guidelines simple tips that are easy for anyone to follow and could make a world of difference when it matters the most.

Among the simple steps suggested by the two agencies is to keep charged batteries and car-phone chargers available for back-up power for your cell phone. Also to not rely on Internet based telephones that come with bundled services. This means having hard copper wire service between you and the phone company central office. Also, keep at least one non-cordless wireline phone in your home because in most cases it will work even if you lose power. Also have a battery powered radio or television receiver available along with some spare batteries.

It should be noted that personal communications services including 11 meter C-B, the Family Radio Service and Amateur Radio were not mentioned in the new tips jointly issued by FEMA and the FCC. There is no mention of having a set of inexpensive Family Radio Service in your home. Nothing said about owning a battery powered C-B radio set to the local REACT channel or getting to know a neighbor who is a ham radio operator that will likely have communications when all else has failed.

The tips do note that broadcasters are a strong source of time critical information but also note that citizens should avoid putting strain on easily overburdened wireless service networks by watching streaming broadcasts and other high bandwidth services.

For the Amateur Radio Newsline, Im Don Carlson, KQ6FM, in Reno.

RESTRUCTURING: REVISED REGION 1 HF BANDPLAN UNVEILED

A revised International Amateur Radio Union Region One High Frequency Band Plan has been published. The changes are minor, and affect only the 40 and 10 meter bands in Europe, Africa and the middle-East.

On 40 meters, the CW contest-preferred segment of 7 point 000 to 7 point 025 MHz has been withdrawn. In practice this means in practice that CW contests on 40 meters are no longer confined to the first 25 kHz segment.

On 10 meters the changes are to the FM portion of the band. This includes adjustments to the simplex channels and the addition of four new repeater channels. A copy of the new IARU Region One High Frequency Band Plan can be obtained at www.irts.ie/downloads. (IARU

-R1)

**

HAM RADIO AND SCOUTING: JOTA 2011 - OCTOBER 15 - 16

Get Ready for Scouting's Jamboree on the Air. This year's JOTA takes place on October 15th and 16th. Amateur radio Newsline's Mark Abramovich, NT3V, is here with the details:

--

This international event is getting a big push this year from the Boy Scouts of America, which, in cooperation with the American Radio Relay League, has been promoting not only participation of Scouts, but ham mentors who have a great opportunity to become Elmers to the next generation of potential radio operators.

Jim Wilson, K5ND, is the national organizer for the Boy Scouts of America participation in Jamboree on the Air...

"Jamboree on the Air is the largest Scouting event in the world," Wilson explains. "Last year, the World Organization of Scouting Movement reported just over 700,000 Scouts participated in the event from just under 6,000 stations around the world."

This year, Wilson says the BSA and ARRL, have teamed up to boost U.S. involvement. And, so far, the numbers are looking pretty good.

"We have 76 stations registered and if we count up the number of participants that they're expecting at their event, we're right around 10,000," Wilson says.

Many of the American stations will be setting up at weekend camporees or jamborees with a big opportunity to introduce Scouts to the fun of talking on the radio, using a computer for PSK activity, or even talking to an astronaut.

"NA1SS, which is the International Space Station, is going to be on the air throughout the JOTA weekend," Wilson says. "Astronaut Mike Fossum (KF5AQG), who is also a Scoutmaster, is going to be on the air during breaks from his work schedule.

"And, they think he's going to be available most of the passes around the world. The uplink is 144.490 and the downlink is 145.800 megahertz. So watch for that. I think that will be pretty cool."

Wilson, is also the new trustee for the Boy Scouts of America K2BSA call sign. He says you'll hear that and other special call signs on during JOTA.

"K2BSA actually has authorized some operations in California, here in Texas, in Alabama,"

Wilson says. "A number of 1-by-1 call signs like W2H is out of the Southern New Jersey Council and there's quite a few others."

Wilson cautions that JOTA operators, in the excitement of the moment, have to also be aware of third-party agreements.

"We have some information on that on our website, thirdparty traffic agreements," Wilson says. "So, if they're talking with a particular country that doesn't allow thirdparty traffic, they do need to be cautious.

"The ARRL keeps that list up to date working with the IARU and so we link to that list and we warn them about those concerns because we don't want to get anybody into trouble."

Wilson says the best resource on JOTA right now is the BSA's own website, which contains all the right links.

"We offer a website with resources on there for Scouting leaders and for amateur radio operators to get involved in Jamboree on the Air," Wilson says. And that's at www.scouting.org/jota."

Look for KC3BSA, Venture Crew 59's station on the air from eastern Pennsylvania on JOTA Friday night and Saturday during JOTA. Stop by and talk to some of our Scouts. For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

If you have the time, please get on the air October 15th and 16th, and support this very worthwhile scouting and ham radio event. (ARNewsline(tm), NT3V)

DX NEWS: VK3FY SAYS ALL DX0DX DONATIONS WILL BE REFUNDED IN FULL

Chris Dimitrijevic, VK3FY, says that every dollar donated to the now cancelled DX0DX Spratley Island DXpedition will be refunded. In an e-mail to Newsline, VK3FY says that as the organizer and team leader of the DX0DX operation that he will refund every team member, sponsor and the generous DX foundations the full amount of their contribution payment made.

Previously, it was announced that the refunds may be less than the amount contributed. But in his e-mail to us VK3FY says that he has decided that he will personally make up any monetary shortfalls from his own funds.

As reported last week, the long planned DX0DX was cancelled due to concerns about the personal safety of those traveling in the

For information concerning DX0DX refunds including refunds to DX Foundations please e-mail chris (at) vk3fy (dot) com. We will have more DX related stories as the end of this weeks newscast. (Via e-mail from VK3FY)

RADIO LAW: GOP QUESTIONS FCC SPECTRUM GRANT TO LIGHTSQUARED

Opponents of the proposed LightSquared national broadband network operating adjacent to Global Positioning System or GPS frequencies have new allies. The Republican party. Norm Seeley, KI7UP, has more in this report:

--

The proposed LightSquared high speed broadband network appears to be becoming a true political hot potato. This as the GOP raises the question of political favoritism in the FCC granting of a permit to the company to begin experimental construction of the system almost a year ago.

On Thursday, September 8th several leading Republicans questioned why the Federal Communications Commission fasttracked an initial approval of the LightSquared proposal. A company that the GOP claims to have ties among Democrats. It also questions the use of spectrum that other agencies say disrupts GPS devices that are an integral part of hurricane-tracking systems, military and commercial airlines and millions of civilian users.

At a House hearing, Republicans criticized the FCC for not using its own engineers to examine whether LightSquared's technology posed interference issues. The agency admitted that it relied on tests run by LightSquared and the Global Positioning System supply industry. But the FCC has defended its process, saying it has led to better understanding of an emerging technology.

Republican lawmakers note that the FCC gave a crucial green light this past January for LightSquared to begin building its system without a full commission vote. This, despite warnings from companies and federal agencies that the satellite network would harm communication systems essential to national security and public safety.

An FCC spokeswoman added that the agency granted expedited approval for LightSquared's proposed national broadband system only on the condition that the company resolves interference problems with GPS providers and other technologies.

But GOP lawmakers and members of a coalition formed by the GPS industry noted that the spectrum used by LightSquared was never intended for

cellular telephones or other broadband devices. Rather back in 2002 the FCC granted a license to LightSquared, then known as SkyTerra, on the condition that its primary business would be to provide services for satellite phones.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, following the politics from Scottsdale, Arizona.

--

With Republicans and Democrats in Congress at odds over just about every issue, the LightSquared proposed broadband communications system could find itself trapped in a long and very bitter political power play. (Published News Reports)

ENFORCEMENT: UNLICENSED STATION IN PUERTO RICO FINED $15000

The FCC has issued a $15000 Notice of Apparent Liability to Eleuterio Lebron of Guayama, Puerto Rico. This for operating a radio station without Commission authorization to be on the airwaves.

After receiving an interference complaint this past June, agents from the San Juan office traced the source of radio transmissions on 88.5 MHz to a building in the city of Guayama. They then made measurements and determined the signals exceeded Part 15 operation limits. During a station inspection, Lebron confirmed over the phone that he owned the station. He then told the operator on duty to take the station off the air.

In issuing its decision to fine Lebron the FCC said thathe controlled the station's operations, and the agency found that he willfully operated the station in apparent violation of the rules. Because the operation occurred on more than one day, the regulatory agency also found that the apparent violation was repeated.

The base fine for operating a station without a license is $10,000. Because Lebron had been warned verbally and in writing illegal back in February 2010 that operating a station without a license was, and continued to operate the station anyhow, the commission tacked on another $5,000, bringing the total fine to $15,000.

Lebron was given the customary 30 days to pay or ask to have the fine cancelled or reduced. (FCC)

RADIO BUSINESS: CQ PUBLISHING TO OFFER ALL MAGAZINES IN DIGITAL FORMAT

New York based hobby electronics publisher Richard Ross, K2MGA, has announced that his CQ Communications will launch multi-platform digital editions of all of its magazine titles before the end of 2011. These titles include CQ magazine, CQ VHF, Popular Communications and

WorldRadio Online.

According to Editorial Director Rich Moseson, W2VU, the digital editions will supplement, not replace, current print editions, and will feature enhancements not possible in the print medium. Versions will be available for a variety of online and mobile platforms including PC, Mac, iPhone, iPad, Android 2.0 and higher.

Examples of features that will be possible in the digital world include live links to all World Wide Web addresses listed in each issue as well as supplemental content. This will include such additions as photo albums, audio and video files, software and more.

The digital editions of the CQ publications will be hosted by Zinio dot com. Zinio is one of the top names in the emagazine publiushing business. Moseson says that CQ's choosing of Zinio will assure that our magazines will always be able to take advantage of new technology when it becomes available.

The digital launch will begin in late October with the November issue of an enhanced, multi-platform, version of WorldRadio Online, which will again become a paidsubscription publication. This will be followed by the November issue of CQ, which, appropriately, is the magazine's first annual Technology Special. The fall issue of CQ VHF and the December issue of Popular Communications will round out the introductions.

Digital editions will be available by single copy and by subscription. Details will be in the near future in the magazines and on all CQ Communications websites. Moseson noted that many CQ book titles are already available in digital form on CD. (CQ)

HAM HAPPENINGS: AMSAT 2011 SYMPOSIUM - NOVEMBER 4 - 6 IN SAN JOSE CA

Turning to ham happenings, the 2011 AMSAT Space Symposium will be held November 4th through the 6th at the Wyndham Airport hotel in San Jose, California. This annual gathering will feature sessions on satellite operating techniques, the latest plans from the amateur satellite world and much more. Coinciding with the symposium, the AMSAT Board of Directors will hold its annual meeting at the same venue on November 3rd and 4th. If you plan to attend either or both, you can register on-line at tinyurl.com/space-symposium-reg (ANS)

**

HAM HAPPENINGS: MUD 2011 OCT. 13 - 16 IN CONNECTICUT

The North East Weak Signal Group is sponsoring the combined Eastern VHF/UHF conference and Microwave Update 2011 Conference. The dates are October 13th to the 16th at the Holiday Inn Hotel in Enfield, Connecticut. As a special treat this year a tour of the Haystack Observatory in Massachusetts will be available to those interested.

More about this once a year gathering is on-line at www.microwaveupdate.org (WZ1V, VHF Reflector)

**

HAM HAPPENINGS: "THE FINAL LAUNCH" TEAM EFFORT CONTINUES

And a follow up to a previous story about Special Event Station N4S that recently commemorated "The Final Launch" of America's Space Shuttle Program. This with the flight of Atlantis from the Kennedy Space Center on mission STS-135.

It turns out that during its operation, N4S made 2,956 contacts world-wide and QSL requests are being processed. Several "QSL parties" by members of the North Brevard Amateur Radio Club are making progress in responding to all of those amateur radio operators requesting confirmation. More about this one is on-line at www.northbrevardamateurradioclub.com (AA4MI)

**

ON THE AIR: VA3IF IN MEMORY OF PEACE AND REMEMBRANCE

Canada's Guelph Amateur Radio Club will once again be operating special event station VA3IF at the birthplace of Lieutenant Colonel John McCrae House in Guelph, Ontario. John McCrae was the author of the poem "In Flanders Fields". The station will honor the twin concepts of peace and remembrance. It will operate from the McCrae House Museum from November 5th to the 11th on 80 through 10 meters as well as IRLP node 2260. (VE3XTM via RAC)

NAMES IN THE NEWS: CO6CBF MAY BE FIRST SATELLITE VUCC FROM CUBA

Hector Martinez, CO6CBF, has uploaded his 100th satellite QSL in Logbook of the World and is expected to become the first satellite VUCC award recipient in Cuba. Meantime, George Carr, WA5KBH says that he has received the satellite contact logs and cards from Hector and is ready to perform as QSL manager. Contacts from CO6CBF home grid of EL92 and his recent trip to EL91 and FL01 are being processed. If you have made contact with Hector, please send your cards to his callbook address and include a SASE. (WA5KBH)

**

NAMES IN THE NEWS, W8ILC RETIRES FROM ARRL FIELD ORGANIZATION AFTER 50 YEARS OF SERVICE

And after more than five decades of continuous service, Ron Moorefield, W8ILC, has announced that he is retiring from the ARRL Field Organization effective October 1st.

Currently the District Emergency Coordinator for Ohio District Three, W8ILC began his volunteer service back in 1960 as the Assistant Emergency Coordinator for Ohio's Montgomery, Preble and Greene Counties in 1960. In 1963 he was appointed Emergency Coordinator for these same counties from 1963 to 1983. When the ARRL started the District Emergency Coordinator position, he took on that role and served in it to the present.

Over his five decades of service, Moorefield was involved in a number of major emergency response callouts. These include the 1974 and 2000 Xenia tornadoes, the September 1978 Miamisburg train derailment, several blizzards, numerous ice storms and many floods.

During his tenure, Moorefield said that his group developed a very good relationship with the American Red Cross and many other served agencies. In announcing his retirement W8ILC said that he will continue to support ARES but that after more than 50 years that he feels its time to turn group's leadership over to new blood.

In addition to his five decade participation in Ohio ARES Moorefield has also been one of the true guiding lights of the yearly Dayton Hamvention since its inception. (ARNewsline(tm))

ON THE AIR: NEW 6 METER NET IN GEORGIA

A group of hams near Atlanta, Georgia, have begun a weekly 6 meter net and welcome everyone who might wish to participate. Check in is at

00:30 UTC on 50.155 Mhz. The gathering is kept informal and conducted for the purpose of increasing the activity level on the 6 meter band. The current net control station is Rob Momon, N4VPI, located in La Grange about 60 miles southwest of Atlanta. If you hear them, please join in. (W4GCB)

**

ON THE AIR: ANNOUNCING REGISTRATION FOR ILLW 2012

With 11 months to go, some 70 entities have already signed up almost instantly after registration for the 2012 International Lighthouse and Lightship weekend opened. This fun ham radio celebration continues to grow and it's no surprise that those already listed make an early commitment to show their strong support.

The 2012 International Lighthouse and Lightship Weekend will be held on August 18th and 19th. Ongoing information along with registration can be found on-line at illw.net. You can also follow this event by becoming a friend of its Facebook page with more than 1,000 fans so far. (VK3PC)

**

DX

In DX, word that Routuma Island should now be on the air. In a press release issued late last week the 3D2R team said that it had assembled in Suva, Fiji, and was preparing for its two day ocean voyage to Rotuma. They anticipated arriving late in the evening on September 27th and hoped to be on the air early on September 28th. If you make contact, QSL via YT1AD

W1UE will be operating from the 6Y1V contest station on Jamaica through October 4th. His activity will focus on the low bands using CW, SSB and RTTY, as time permits. QSL via his home callsign using any call directory dated 2009 or later.

DL2NUD, DL8YHR and DL9MS will be active as 8P9HP, 8P9DL and 8P9MS, respectively, from Barbados between November 7th and the 21st. Their operation will be on the High Frequency bands as well as 6 and 2 meter moonbounce. QSL via their home callsigns.

The countdown has started on the Mediterraneo DX Club's DXpedition to Nepal. This operation is slated to begin on November 13th and run through the 25th. More information on this one is on-line at www.mdxc.org/nepal2011

VE3EY and VE3TA will be active portable FJ from St. Barthelemy between November 22nd and the 29th. Using a T Oh 3 prefix callsign. Their operation will will include the CQ World Wwide DX CW Contest on November 26th and 27th as a Multi-Single entry. QSL via their home callsigns.

Lastly, word that DL5YMM will be active portable HK0 from San Andres Island from October 5th to the 13th. No operating times or frequencies have been announced. If you work him, QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: COME AND JOIN US ON THE AIRWAVES REVISITED

And finally this week, the story of a music video about ham radio. It title is "Come and Join Us On The Airwaves" and it was written and performed by Andrew John Huddleston, OZ5E. Andrew, along with his wife Lissa Ladefoged, are country music devotees who live in Aarhus, Denmark, and are likely best known simply as The Ham Band. This, as a result of their 1994 CD of amateur radio related songs simply titled "Seek You."

About a decade ago, Andrew and Lissa produced a ham radio video titled "Come And Join Us On the Airwaves." The video features Andrew in a tuxedo atop a 100 foot high tower and Lissa at the 60 foot level performing the song while un corking a bottle of Champaign. Unfortunately, when the video was posted to YouTube, the technology of the day did not do justice to the visual content. Now with the advent of High Definition video on the YouTube site, that has all changed:

--

OZ5E: "The original version of the video that we uploaded to YouTube wasa actually quite good quality. I would say medium quality. It was viewed by about 18,000 people which I thought was quite impressive.

"And then the strangest thing happened. Some other people; I think two or three other individuals, have uploaded really low quality versions of the video (with) the wrong aspeact ratio and rotten sound and these versions have been viewed by no less than half a million people. So we thought to put the High Definition version out there so that people can see that our (ham) radio station is a very, very pretty one."

--

Comparing the original posting to the new upload by Andrew using true 720p high definition video is breathtaking. Especially when you look past the singers on Andrew's tower and gaze at the splendor of the Danish countryside where it was produced. It's so sharp and crystal clear that its as close as one can get to being there. You can experience the new Hi Definition "Come And Join Us On The Airwaves" on YouTube. Just use the shortcut of tinyurl.com/ham-song.

The groups website is in cyberspace at www.hamband.com. And less we forget to mention it, everyone seen on the tower was using safety gear. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 2nd October 2011

The news headlines:

* RSGB Convention next weekend

* GPS disruption tests due in East Anglia

* International support for RSGB-proposed 472 to 480kHz amateur band

The RSGB Convention takes place next weekend, 7 to 9 October at Horwood House, near Milton Keynes. Booking for room packages closes today, 2 October, but day tickets, priced £6.50, are available for either Saturday or Sunday. Lectures run from 9.30am to 5.45pm on Saturday and 9am to 3.30pm on Sunday. See www.rsgb.org.uk/rsgbconvention for details.

Ofcom has announced that multiple jammers will be disrupting the SatNav GPS system around Stanford, East Anglia, between 0900 and 1730BST from 3 to 7 October. There will be multiple jammers, land based, within 5km of N52° 31.0' E000° 45.0' using 24MHz band signals centred around 1575.42MHz. It is stressed that Safety of Life operations will at all times take precedence over exercise activities. For further in formation contact InfoGPS.Notices@ofcom.org.uk.

For several years the RSGB has been very actively involved in preparations for the 2012 World Radio Congress, or WRC-12. The work centres on creating a European Common Proposal, or ECP, for a secondary amateur allocation in the band 415 to 526.5kHz. Society representatives have been working with one of CEPT's project teams to secure a positive outcome on this, the only amateur radio-related agenda item. At its meeting between 26 and 29 September the CEPT project team approved a draft ECP for an 8kHz-wide band between 472 and 480kHz. This draft ECP now goes to CEPT's Conference Preparatory Group for formal ratification in November. This breakthrough, at the 11th and final meeting of the project team, occurred with the submission by Ofcom of an RSGB-drafted compromise ECP proposal. Whilst the 8kHz band differs from that agreed by CITEL, a similar regional grouping of countries to CEPT but in the Americas, there is a 6kHz overlap. Of course there is still some way to go, but the prospect of an agreed CEPT position is good progress, representing a 48 country block vote going into next year's WRC-12. It needs to be noted that the draft ECP comes with significant caveats to avoid interference to the primary user, as well as the existing

secondary user services. These are the maritime and aeronautical radionavigation services respectively. As secondary users we would also not be afforded any protection. It should be acknowledged that we have had support from a number of Region 1 national societies as well as Ofcom in getting to this position

The British Astronomical Association is organising a meteor watch exercise for the coming Draconids shower, between 7 and 9 October. It would be interesting to compare meteor scatter counts against activity reported by visual observers up and down the country. The Draconids are not normally a large event but are subject to occasional outbursts and there has been speculation that this year could produce one of these. Observations are requested across the three days of 7, 8 and 9 October. Preferably these would be around- the clock, but if this is not possible, between 1500 and 2300UTC on the three days. Counts in 15-minute bins will be appropriate for most of the time but on the evening of 8 October, most likely between 1800 and 2100UTC, the rates may be changing very quickly and so it would be advantageous to have the counts in 5- minute bins. It is very important that receiver settings and antenna alignment are kept constant throughout the period of observation. If possible, the beam of the antenna should be directed towards the mid-point of the great circle path joining the transmitter and receiver locations. Paul Hyde, G4CSD the BAA Coordinator for the Radio Astronomy Group, will be consolidating the observations into a single report which will be sent to all participants. Please contact him by e-mail to radiogroup@britastro.org for further information on how to submit reports.

The T32C DXpedition to Kirimitati now has 10 Yaesu FT-450 transceivers and eight linear amplifiers on the island, along with the hardware to put up gain antennas for 10 through 80 metres, and a big vertical for 160m. They also plan to install Beverages for receiving. Operation should be in full swing by this weekend and they aim to post any breaking news on the DXpedition website, www.t32c.com.

The Central Scotland Mini Convention is a new event planned for June 2012. It will be held at the Crofthead Farm Community Education Centre, Livingston. Planned attractions include traders' tables, a bring and buy stall and a programme of talks. Further details will be posted at http://uk.groups.yahoo.com/group/cshrc when they become available.

In under a year the AMSAT-UK FUNcube Yahoo Group has achieved over 2000 members. The group was created by Rob Styles, M0TFO at the end of October 2010. Its purpose is to provide support for the AMSAT- UK FUNcube satellite and the FUNcube Dongle software defined radio package. There are two talks at this year's RSGB Convention on the Funcube satellite and the FUNcube dongle by Graham Shirville, G3VZV and Howard Long, G6LVB respectively.

The 54th Jamboree On The Air will take place on 15 and 16 October. This year's theme is Peace, Environment and Natural Disasters. Within this year's JOTA, an emergency communications exercise will take place on

Saturday, 15 October, 2011 in the afternoon, European time zone. This simulated emergency test will include the Headquarters station, HB9S, of the World Organisation of the Scout Movement, which will be operated by amateurs from 5 different countries.

And now for the details of rallies and events for the coming week

The RSGB Convention takes place at Horwood House near Milton Keynes on 7 to 9 October. Five lecture streams are available on both Saturday and Sunday, totalling 65 lectures to choose from. There is also a Partners Programme for those not interested in the radio events of the weekend, with a trip to Stowe Landscape Gardens and Milton Keynes. Both UK and US exams are available over the weekend. See www.rsgb.org/rsgbconvention for full details.

The Autumn Militaria & Electronics & Radio Amateur Hangar Sale takes place on 9 October at the Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and admission is £2.50. There will be civil, military and vintage radio equipment plus vehicle spares and more. Contact Rod Siebert, 01270 623 353. Now for the news of special events

To celebrate the 40th anniversary of HMS Belfast's arrival in the Pool of London, in October 1971, the London Group of the RNARS will be active as GB40HMSB between 1 October and 31 December. A commemorative QSL card will be available in the New Year.

And now the HF DX news compiled from 425 DX News and other sources

DL8KX and DD8ZJ will be active as 9H3KX from Gozo Island between 8 and 14 October. Their operation will be on the HF bands using CW and SSB. QSL via DL8KX either direct or via by the bureau.

There is a joint US/Australian trip to Vanuatu until 12 October. The callsign will be YJ0VK. They will be on all bands from 10 to 160m using CW, SSB and RTTY/PSK31. QSLs go via VK2CA.

DK0RZ will be on the air from Hallig Hooge, which is IOTA reference EU-042, on 5 to 8 October. They plan to operate CW, SSB and PSK31. QSL via the bureau.

DJ7RJ will be operating as FR/DJ7RJ from Reunion Island, which is IOTA reference AF-016, between 4 and 26 October. He will operate CW and SSB on 10 to 160m, with a focus on the low bands using a 500 watt amplifier into an inverted L antenna. QSL via home call, direct or bureau.

A group of operators from the Workington Radio Club and the Sands Contest Group will be active as MS0WRC from the Isle of Tiree until 8 October. QSL via G0MTD, direct or bureau.

Now the contest news

The IARU 432MHz-248GHz Contest runs until 1400UTC on 2 October. The exchange is signal report, serial number and locator.

The 21/28MHz Contest takes place today, Sunday 2 October. The planned deletion of this event from the contest calendar may have contributed to the substantial increase in entries in all sections last year. They are hoping for similar results this year. Taking place from 0700 to 1900UTC and using CW and SSB on the two bands, the exchange is signal report, serial number and district.

Tuesday 4 October sees the 144MHZ UK Activity Contest taking place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

On the 8th and 9th, the CW legs of the Oceania DX and the EU Sprint take place. The Oceania DX is from 0800 to 0800UTC and the EU Sprint from 1600 to 2000UTC. Being a sprint, of course there's a QSY rule. It says that if you make a QSO as a result of calling CQ or QRZ, you then have to QSY a minimum of 2kHz before you can make another QSO. And please don't forget that the exchange includes both callsigns. And now the solar factual data for the period from the 19th to the 25th of September, compiled by Neil Clarke, G0CAS on the 26th of September.

After several warnings about a sudden increase in solar activity, this week it happened with a bang. Solar activity started the period at low levels with large C class solar flares on the 19th and the 20th. On the 21st, a large new sunspot group was rotating into view, and it produced an X1 solar flare on the 22nd. Activity continued to increase and on the 24th a further X1 class solar flare took place, along with a number of large M class flares, and not all from the same group because two small groups produced weaker M class flares. Strong sudden ionospheric disturbances and large coronal mass ejections accompanied many of the large solar flares. Solar flux levels increased steadily during the period from 141 units on the 19th to 158 by the 23rd. The figure for the 24th was 190, however, this was measured at the usual delay that coincided with a large solar flare taking place at the same time, so the figure is what we call `flare enhanced', a more realistic figure would have been around the mid 160's, but the figure of 190 will be recorded which makes that the highest daily figure for this cycle. The next day the figure was 169. The average was 157 units. The 90 day solar flux average on the 25th was 108, that's five units up on the previous week. X-ray flux levels increased from B7.1 units to C2.7 by the 25th. The average was C1. Geomagnetic activity was quiet all week with the Ap index into the low single figures every day. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 450 kilometres per second. Densities were low throughout and the Bz varied no more that minus 5 and plus 6 nanoTeslas during the period.

And now the solar forecast. This week still should see the active side of the Sun looking our way, at first anyway, but by next weekend solar activity should decline as the large sunspot group rotates out of view. Solar flux levels should decline to around the 120's later in the week. Geomagnetic activity should be quiet at first but, due to a coronal hole, activity should increase by next weekend. A warning though, at

any time this week a coronal mass ejection could arrive and with it geomagnetic activity will increase significantly. MUFs during daylight hours at equal latitudes should be around 30MHz for the south and 27MHz for the north, though these levels should decline as the week progresses and will be much lower if any large scale magnetic storms take place. Darkness hour lows should about 12MHz. This week the Five Star DXers Association DXpedition to Christmas Island in the Pacific with the callsign T32C will be under way. Hopefully by now the pile ups will be somewhat smaller. If the solar flux levels remain high then best time to try to work them on 28MHz will be between 0930 and 1130 short path and around 0900 on the long path. Failing that, 14MHz will be open from around 0730 through till around midday on the short path and from 0600 on the long path. With it being a polar path, quiet magnetic conditions are almost essential and any medium sized disturbances will make it all the more difficult to work them. Next week we will have the LF bands forecast.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 2 October Cheltenham Amateur Radio Association is starting a new meeting for those just discovering the hobby. The initial meeting will be at 4pm on Sunday at the Brizen Youth Centre, Up Hatherley Way, Cheltenham. More information, including a location map and Facebook contact, is at www.caranet.co.uk.

On Sunday 2 October Lincoln Short-Wave Club is clearing up after the National Hamfest For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 3 October Gloucester Amateur Radio & Electronics Society is having a talk by Cliff Powlesland, G8CQZ on a DDS based signal generator. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 3 October South Birmingham Radio Society is putting the shack on the air and having an open meeting and ragchew. Contact Don, on 01214 581 603.

On Tuesday 4 October Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 4 October Friskney and East Lincolnshire Communications Club is having a talk on RAYNET by A Clark, G8EVI. Contact Chris, M0MFP, on 01507 442 240.

On Tuesday 4 October Loughborough & District Amateur Radio Club is holding an open forum for ideas about the forthcoming open day. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 5 October Midland Amateur Radio Society is having an open meeting, putting the shack on the air and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 5 October South Birmingham Radio Society is having a lecture in the main hall at 8pm. Contact Don, on 01214 581 603.

On Wednesday 5 October South Kesteven Amateur Radio Society is looking back at the National Hamfest. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 5 October Telford & District Amateur Radio Society HQ is closed and there is a committee meeting at Stafford Park. Contact Mike, G3JKX, on 01952 299 677. On Thursday 6 October Derby RAYNET Amateur Radio Group is having a demonstration of software defined radio by Steve, G8EBM. Contact Martin, G7MKS, via email to contactus@derbyraynet.co.uk.

On Thursday 6 October Salop Amateur Radio Society is holding its construction competition. Details on the club website at www.salop-ars.org.uk.

On Thursday 6 October South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 7 October Coventry Amateur Radio Society is having a talk by G4GEE on radio and cruising the Scottish islands & Norwegian fjords. Contact John, G8SEQ, on 07958 777 363.

On Friday 7 October South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Sunday 9 October Midland Amateur Radio Society is at the RSGB Convention at Horwood House, Little Horwood, Milton Keynes. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 9 October South Birmingham Radio Society is at the RSGB Convention at Horwood House, Little Horwood, Milton Keynes. Contact Don, on 01214 581 603.

NEWS FOR THE NORTH OF ENGLAND On Sunday 2 October Hornsea Amateur Radio Club is taking part in the 21/28MHz Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 3 October Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 3 October Sheffield Amateur Radio Club is having a social evening. More information from Peter Day, G3PHO, by email to

sarc@g3pho.org.uk.

On Monday 3 October Thornton Cleveleys Amateur Radio Society is having a natter night and construction competition. Details on the web at www.tcars.org.uk.

On Tuesday 4 October Chester & District Amateur Radio Society is having a quiz versus Wirral and District. Details from Barbara Green on 07957 870 770.

On Tuesday 4 October Halifax & District Amateur Radio Society is continuing its Intermediate and Foundation training courses and constructing a new aerial to be erected at the Church. Contact Martin, M0GQB, on 01422 341 317.

On Wednesday 5 October Lothians Radio Society is having a talk about DXpeditioning to Senegal & Jersey by Tom Wylie, GM4FDM. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 6 October Aberdeen Amateur Radio Society is holding a junk sale. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 7 October Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA The GB2RS news readings in the Bromley, Kent area, terminated recently when the main news reader had to stand down for personal reasons. The readings took place at 7pm on 145.525MHz and at 8pm via 70cm repeater GB3OK. Unfortunately the reserve news reader is also no longer available. Consequently, two or three new volunteer readers are required urgently. Volunteers must be members of the RSGB and need to be within the service area of the Bromley repeater, GB3OK. The retiring readers were in Chislehurst and Crayford. The reading via GB3OK had extensive coverage with a large following. If you are interested, please contact the GB2RS News Manager, Gordon, G3LEQ, on 01565 652 652 for further information.

On Sunday 2 October Worthing & District Amateur Radio Club is having its breakfast meeting at the Goring Cafe. Contact Phil, G4UDU, on 01903 816 684.

On Monday 3 October Braintree & District Amateur Radio Society is planning for JOTA and having a talk on RAYNET by G0DEC. For more information contact John, M5AJB, on 01787 460 947.

On Monday 3 October Burnham Beeches Radio Club is having a surplus equipment sale. Contact Dave, G4XDU, on 01628 625 720.

On Monday 3 October Edgware & District Radio Society is having a short talk by Steve, G0PQB on the Royal Airship Works. More information from Mike, G4RNW, on 02089 500 658.

On Monday 3 October Felixstowe & District Amateur Radio Society is having a fish & chip supper. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 3 October Southdown Amateur Radio Society is having a talk at Chaseley. Details from John, G3DQY, on 01424 424 319.

On Monday 3 October Surrey Radio Contact Club Autumn is having a surplus equipment sale. Contact John, G3MCX, on 02086 883 322.

On Tuesday 4 October Chelmsford Amateur Radio Society is holding its AGM. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 4 October Verulam Amateur Radio Club is holding its 50th Birthday Dinner at 8pm at the Quality Hotel, St Albans. Details from Tony, 2EOWAP, on 01727 853 087.

On Wednesday 5 October Chesham & District Amateur Radio Society is having a general meeting and CW training session. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 5 October Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Wednesday 5 October Worthing & District Amateur Radio Club is holding a discussion evening. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 6 October Cray Valley Radio Society is having a presentation on high performance antennas by Justin Johnson, G0KSC. Contact Malcolm Bryan, G8MCA, on 07906 433 965 On Thursday 6 October Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

what does that fact that you have a limited vocabulary ,
have to do with the diameter of your head
```

SB DX @ WW < KB8NW $OPDX.1029.3
Ohio/Penn DX Special Bulletin No. 1029.3

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1029.3
BID: $OPDX.1029.3
September 30, 2011
Editor Tedd Mirgliotta, KB8NW (Currently in Murfreesboro, TN)
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and G3XTT for the following DX information.

T32C Bulletin #6 (Press Release)

Our plan is to commence operations at midnight local time today here in Christmas, which is 1000 UTC Friday 30th September. We expect to be active on several bands from the start.

We do, however, have only one station per band for the time being, so for the first few days will probably alternate modes on a (roughly) 24 hour basis. On the non-WARC bands we expect to start on CW and then, at 1200 UTC on Saturday, move to SSB and make a serious multi-multi entry in the Oceania contest (which runs for 24 hours). This should get our SSB operations off to a great start. We are able to work all comers in the contest, so we very much want your call, whether you are taking part or just need a T32 QSO. We will give you a contest report (RS+serial number); if you are taking part please give us your serial number in return.

OTHER DXPEDITIONS

We are very much aware that there are other expeditions active at this time, and will take every care to avoid causing any sort of mutual QRM. This may well mean that we operate on frequencies other than those that we pre-announced. No doubt we will be spotted on the Cluster network, in any case.

ONGOING PLANS

We remain committed to maximising band openings to Europe, but expect the number of callers in the first few days to make this difficult if not impossible. But bear in mind that we will be active for 3 weeks and four weekends, so there should be plenty of opportunities (propagation permitting) for a QSO. We will continue to send out news and

photographs when the opportunity arises • our website is being regularly updated by webmaster G3WPH and those of who you who use Twitter can follow us on G7VJR•s Twitter feed (@G7VJR).

938. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1317448801@panix.com>
Source record: 4178
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Information - Ophelia - 2011-10-01 05:46:11 UTC
2011-10-01

This is the latest from the Canadian Hurricane Center. Amateurs in the Maritimes and Newfoundland are well advised to test and fuel your generator in preparation in case you are called upon. Ophelia is still being evasive. Winds don't seem to be a factor, however rainfall might be a factor.

==========

WOCN31 CWHX 010545
Tropical cyclone information statement updated by the Canadian Hurricane Centre of Environment Canada at 2:44 AM ADT Saturday 1 October 2011.

Tropical cyclone information statement for:
Newfoundland
Nova Scotia.

For hurricane Ophelia.

The next statement will be issued by 9:00 AM ADT.

Hurricane Ophelia to pass east of Bermuda today. Will spread Gales to offshore Maritimes waters Sunday evening. Moisture From Ophelia could enhance rainfall over the region later in The weekend.

==discussion==
1. Summary of basic information at 3:00 AM ADT.

Location: near 27.2 north 63.1 west.

About 590 kilometres south-southeast of Bermuda.

Maximum sustained winds: near 195 km/hour.

Present movement: north at 28 km/hour.

Minimum central pressure: 957 MB.

2. Public weather impacts and warnings summary.

Ophelia is forecast to remain at or near a category-three storm for much of today then pass east of Bermuda later this afternoon. Meanwhile an unrelated non-tropical weather system with a frontal zone extending into the tropics is forecast to move into the maritime provinces today and Sunday. As Ophelia moves northward, it is expected that the this frontal system will nearly stall over Nova Scotia and Newfoundland.

Computer models are still showing a range of scenarios for Ophelia's track - ranging from not far east of Cape Breton to well offshore over the Grand Banks off Newfoundland.

A. Wind.

Greatest chance for strong winds from Ophelia is over Eastern Newfoundland as well as offshore Maritimes and Newfoundland waters. At this point in time, there is about a 50% chance of tropical storm-force winds over Eastern Newfoundland. Tropical storm-force is approximately 60 gusting to 90 km/h. Chance of hurricane-force gusts (120 km/h) over land is only about 5-10%.

B. Rainfall.

Rainfall warnings will likely be issued for parts of Nova Scotia this morning for rain from the previously mentioned non-tropical system.

Some forecast scenarios indicate this stalled frontal system could tap in to some of Ophelia's moisture Sunday night or into Monday giving the possibility of additional heavy rainfall over parts of Nova Scotia and Newfoundland. We will be monitoring this aspect of the weather systems particularly closely given the potential for very heavy rainfall with that setup.

C. Surge/waves.

Too early to speculate on surge effects. Waves will likely be a concern along the South Coast of Newfoundland later this weekend. Ocean swell will also likely begin to reach the Atlantic coast of Nova Scotia later on Sunday into Monday.

3. Marine weather impacts and warnings summary.

Given Ophelia's expected track will bring it near southeastern Maritimes marine areas by Sunday evening, gale warnings have been

issued for Laurentian Fan and the southeastern half of East Scotian Slope. Storm or possibly hurricane force winds could effect these waters as well as the Grand Banks early on Monday.

Large waves expected - especially to the right of Ophelia's track as it moves into Canadian waters.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the latest:

- forecast position, central pressure table.

- strength and predicted wind radii table.

- hurricane track information map.

- technical discussion.

Please also refer to the public and marine forecasts and warnings issued by Environment Canada for your area.

End

WIANEWS WEEK COMMENCING OCTOBER 2 2011.

THIS WEEKS NEWS THANKS TO AMATEUR RADIO NSW AND
JOHN VK2JPM AND TIM VK2ZTM AND IS PRODUCED BY MATHEW MAGEE

THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA
IS FOR WEEK COMMENCING OCTOBER 02 2011.

DAYLIGHT SAVINGS IS HERE (OR THERE).

The annual curtain fading season has hit in the southern eastern states
and will end on the first Sunday in April 2012.

VK2WI maintains the local times of 10 am and 7.30 pm for these services.
For those using UTC there is a one hour shift.

This time change is a good occasion to renew batteries in all those clocks and
smoke alarms.

(SOURCED TO VK2WI NEWS)

Antenna Masts - A Golden Opportunity for NSW Amateurs

Antenna Height Regulations- NSW Planning Review

We Radio amateurs view our antenna structures as things of beauty, but not
everyone shares those sentiments. Everyone would agree large antennas should be
subject to the development approval process, but what about antennas lower than

say 10 metres?

Some councils say that no permit is required for a free-standing mast of 6m, or if attached to a bulding no higher than 3m above the peak roof height. This height is really too low for an effective HF antenna.

The difficulty here is that there are no uniform rules across the Nation, let alone the State, or even across a city. So, an antenna that does not require development approval in one local government area may be out of the question alltogether in another.

Some councils simply don't know, or put radio amateur antennas in the same catagory as commercial communications facilities, with the same restrictions.

Amateur radio towers and antenna heights are regulated through local environment plans (LEPs). In NSW, the Dpt of Planning is looking to change to the way LEPs are made and to make them more flexible. To this end a planning review team is holding a series of public meetings around NSW and is accepting written submissions.

There MAY be an opportunity here to improve the situation for radio amateurs in NSW - the most populous state for hams - if as many NSW radio amateurs as possible make written submissions to the review. We believe written submission would be more effective that attending the public meetings - but time is short.

Background information and directions on how to make an effective written submission will be placed on the WIA website at www.wia.org.au

(Phil Wait VK2ASD)

EMERGENCY service crews could not find the downed Angel Flight that killed three people until hours after the crash because the aircraft's locator transmitter did not activate.

An Australian Transport Safety Bureau investigation found the crash site was not located until two hours after the crash.

The ATSB found witnesses raised the alarm immediately but the plane's emergency locator transmitter did not activate, complicating the rescue operation.

news.com.au/breaking-news/angel-flight-crash-site-was-hard-to-find/story-e6frfku0-1226141806082#ixzz1Z267idOG

DO NOT ADJUST YOUR SET.

COOLOOLA Coast (VK4) TV reception is on the improve following adjustments to the new digital transmitters at the three sites.

A Digital Switchover Taskforce spokesman said following reports of reception difficulties in Cooloola Cove, Tin Can Bay and Rainbow Beach, the Taskforce found a number of issues that required further investigation by broadcasters an engineering team from Regional Broadcasting Australia made adjustments to the three new digital transmitters.

Last weekend an intermittent transmitter fault was identified. Broadcasters expect that they will be able to permanently resolve the fault with assistance from the transmitter manufacturer within a few days.

The Summertime of Amateur Radio

Greetings from the WIA, this is Ewan VK4ERM, considering the Summertime of Amateur Radio.

With the warmer months upon us and those lazy, hazy days of summer so close, many of us will be taking the opportunity to escape into the solitude of the bush for weekends or longer periods to enjoy portable operation in locations away from manmade noise and interference. While there we may well enjoy the company of family, friends, wildlife, on air contacts and fire.

Did I say fire?

Unfortunately, I am not referring to the well prepared campfire where people stare into the dancing flames and glowing embers solving the problems of the world but those uninvited fires that can arrive with terrifying rage and devastating effect.

Equally it can be your campfire blazing beyond practical need spiralling embers downwind to trigger spot fires in your area. Sadly, raging bush fires have caused human tragedy and property loss in most parts of Australia for hundreds of years. Many of us are experienced in assessing operating and camp sites for fire and other hazards but we cannot always assume that those with us understand the requirements nor our mental planning so it is very much the responsibility of the experienced person, whoever that may be, to ensure fire safety in the field is understood and applied by all present.

Just as we have load lists for our radio gear and tools, our camp and feeding needs so to should we have a load list and plan for fire prevention and management around our site.

Here I do not intend, nor do I have time, to cover all aspects of fire prevention and management but simply to prompt your thoughts and action on what you should attend to in your circumstances before heading out bush and when you get there.

Perhaps the first thing for your consideration is the weather forecast for the region you intend to go to and that comes down to risk assessment. If there is a high fire danger and hot dry winds forecast is it really worthwhile taking the risk of going?

Is there an alternate route out of the site you have chosen should it need to be taken to escape any fire threat?

Do other people, family or friends, know exactly where you will be and when you are expected to return? Just make sure you go to where you say you will and don't wander off elsewhere and return when you say you will if you are unable to notify them otherwise.

At your campsite have you established a fire point with extinguisher, beater, metal rake and sprayer? Seems a lot but gold when you need them.

Have you briefed everyone on where it is and assigned tasks to each of them in the event of a campsite fire or approaching fire?

Is your generator and fuel sited down hill from the rest of the camp? Does everyone who needs to know understand how to refuel and conduct generator checks?

How do you know?

Are all vehicles facing the exit route? It may seem trivial but if a major blaze is about to engulf you then every split second counts.

A wealth of further information is available from government internet sites in all states of Australia. I encourage you to gather the information and develop your fire prevention and management plans for your Summertime of Amateur Radio in the great Australian bush.

This has been Ewan VK4ERM for the WIA Board.

HAMS ACROSS AUSTRALIA.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

One thing that identifies a community is the shared identity and commitment of its members. I like to think of the world wide hobby of amateur radio as a community. But like the motto of recent years, it is very much a case of thinking globally and acting locally.

Our local radio club, or any club, is a community, a community of interest. How that community governs itself often defines whether it grows, remains static or drops off the radar. If there is a sharing of experience and knowledge and a willingness to include all people in the club activities, then perhaps we have made a start in growing our club.

It is well recorded how the formation of self interest groups within organisations tend to undermine the homogeneity, the unity and purpose of the organisation. From organisational psychology, group dynamics, business studies and on and on the literature is overwhelming that cliques can spell the death of a group.

It may not be even an obvious self indulgence within the clique but a lack of enthusiasm, a been there done that and it didn't work dogmatism that can do the damage. The alpha male who refuses to relinquish control can be equally damaging and we all know the saying that you can't teach an old dog new tricks.

We all want to enjoy our club activities and it is for each of us to make our club a success.

I'm Geoff Emery and that's what I think....how about you?

Several radio amateurs have expressed the thought that a 'weekend away' to a mutually convenient place would be a good idea for amateurs in the North Queensland region.

Such an event is, at the moment, not seen as a particular Club event, rather as a gathering of like-minded people.

If your have suggestions, ideas or simply wish to make your interest known please contact Mal Seal VK4MSS EMAIL vk4mss@wia.org.au

(SOURCED TO TARC)

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

It's the time of year that radio clubs seem to find the busiest. Hello,
I'm Geoff Emery, VK4ZPP from Maryborough Radio and Electronics Group, Inc.

MERG managed to fit into the last Sunday of September, its Annual General Meeting and its regular monthly meeting. In the election of office bearers for the coming year, the members confidently voted in the persons who had been currently filling the vacant positions. The old team goes forward for a new year but this time with some extra inspiration.

Recently returned to the city where he grew up, Queensland Advisory Committee Chairman, Mike Charteris, VK4QS, attended the meeting and conducted the elections. Mike also shared with MERG a few thumbnails of his time in the Ipswich and District Radio Club and the strategies that had helped that club grow in the community. Mike advised the meeting that he wishes to support all radio clubs in the Wide Bay/Fraser Coast regions to grow.

This is indeed good news for amateur radio in this part of VK4 that we have a dedicated advocate, an experienced amateur who can draw on external success to promote the work of the Wireless Institute of Australia, the affiliated Clubs and the individual amateur.

>From Maryborough, Queensland, this has been Geoff, VK4ZPP.

VK6

jeff johnson arrives

He will be making final calls on 20 and 40 meters during the early afternoon (12 noon to 2 pm vk6time) on 7.045 and 14.090.

After walking 162 days (in the same pair of shoes) VK4XJJ Jeff will arive at Steep Point the most westerly tip of VK today Sunday.

HOME OF THE GOOD GUYS

Our 'Good Guy' this week is Gerry, VK7GK, who has made an extraordinarily generous donation to R.E.A.S.T. which includes a fantastic tower and rotator.

Sincere thanks to Gerry for thinking of the club!

(Tony VK7VKT Secretary REAST)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

REGION ONE QRP CENTER OF ACTIVITY COULD CHANGE

The IARU Region 1 High Frequency Committee meeting minutes caused some alarm and confusion over the future of 7030 kHz as the Region 1 QRP center of activity. This relates to the discussion about moving the frequency, and possible further discussion at the Region 1 Interim Meeting in 2013.

It is important to note that these discussion points did not feature in the minutes of the final General Conference Plenary. The question as to whether 7030 kHz is the best frequency for the QRP center of activity was actually raised in the context of discussing a proposal from Germany's Deutscher Amateur Radio Club to change the 40 meter Contest Preferred Segment.

The High Frequency Committee decided that this change couldn't be done without first seeking the views of the Region 1 QRP community. Further discussion across IARU Region 1 is expected over the coming months and years. It's important to remember that any change in the Region 1 plan for any spectrum will in some way eventually impact on Q-R-P operations in Regions 2 and 3 as well.

(ARNEWSLINE)

Did you know?

Did you know that a real life radio amateur was involved in the famous 1961 recording of Tony Hancock's The Radio Ham?

His name was Alan Florence. He was just 18 years of age and was working as a recently appointed sound engineer at Star Sound Studios off Baker Street in London. These days he is also known on the bands as G7CDK and although he wasn't licensed back in 1961, Alan claims that the experience did have some influence on him taking the RAE in later years.

Last year RSGB member and BBC presenter Jim Lee, G4AEH, brought Alan, G7CDK together with the show's iconic writers Galton and Simpson, to remember the events of the 1 October 1961.

The 5MHz Newsletter

A Newsletter has been launched to support the growing number of 5MHz operating permissions globally.

The 5MHz Newsletter is edited by Paul Gaskell, G4MWO, one of the original RSGB 5MHz team. It aims to be both an accurate information source of news about 5MHz and a platform for exchange of ideas, be they theoretical, operational, constructional or just general comments about the band.

You can freely access the 5MHz Newsletter from Google Documents at http://tinyurl.com/6fkhcmf

Although originating in the UK, the 5MHz Newsletter invites world-wide interest, both in readers and contributors.

Woman becomes radio ham to stay in touch with husband

Ham radio is the only link Donna Sweeney VA7DSW has to her seafaring husband David Vincent VA7DGV as he sails across the Pacific.

Canada.com reports that "David Vincent [VA7DGV] left Nanaimo more than a year ago to island-hop across the South Pacific.

He is living his dream - and Donna [VA7DSW] is keeping track of every detail through her home radio. She searches frequencies each morning for news he's OK.

Sailing the open sea can be dangerous when you're travelling it alone, but Amateur Radio is a boon!

The ARRL has published an interesting new book entitled "Small antennas for small spaces".

tHE sarl SAYS It is a valuable resource for amateurs who live in flats, units or town-houses on small lots.

Filled with practical advice, this book guides you to finding the right antenna design to fit whatever space you have available. In the book you'll find ideas and projects that will get you on the air regardless of where you live!

Ask at our WIA Bookshop to see if this copy is in yet, visit wia.org.au

Rugby enthusiasts, look out for ZL4RUGBY operated by ZL4PW until 31st October.
This is to celebrate the 2011 Rugby World Cup being played in New Zealand.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

Ultrasonic beam = wireless charging

The day when we don't have to plug in our consumer electronics is getting closer, claim a new startup firm named uBeam that has developed a safe way of beaming power to your devices.

Rather than using inductive charging, which has a very short effective range and usually requires that the charger and device be in close proximity to each other, uBeam uses an ultrasonic transducer to convert power from your wall socket into inaudible sound energy. On the device side, there's a battery adapter that converts the sound energy back into power to charge your batteries. The ultrasonic frequency used is well above the range that can be heard by humans or dogs.

November through March 0900 UTC 7.068 MHz

UARS is gone, but you can still enter the ARISSat-1 Chicken Little Contest!

Now that everybody has climbed out from under their beds, it might be a good time to think about entering the ARISSat-1 Chicken Little Contest.

They are still looking for calculations/guesses/darts-in-the-calendar submissions for when ARRISSat-1 makes its final orbit. So far a fair number of submissions from all over the world from adults, but very few from students.

If you know of one who might be interested, encourage them to enter.

The details are in the web edition, best read when you read this weeks text news on wia.org.au

While it is not going to receive the coverage of UARS, the closest submissions in each category will be recognized. Right now, the deadline is the 15th of October, though since ARISSat-1 is "floating like a butterfly" that MIGHT get extended.

www.amsat.org/amsat-new/ARISSat/ARISSatContest

DISCUSSION POINT

What use is an f-call?

This week I'd like to share with you an experience I had on air a couple of days ago.

I was tuned to 7.093 and I called CQ DX at about 4pm in the afternoon. I'd been listening on all bands for most of the afternoon and finally was beginning to hear some movement on 40 meters. There had been contests happening on all manner of frequencies, near and far, but for some reason or another, I wasn't getting through.

There were a couple of hams having a chin wag a little further up the dial but they seemed too engrossed to have a chat with someone else, so I dialled up the VK calling frequency and called for CQ DX.

The call I got back was: "What are you doing calling CQ DX on this frequency at this time of the day?" - at first I was confused, it sounded like I'd trod on someone's toes, so I asked, "Sorry, is this frequency in use?" - I got an unclear answer and then: "What were you expecting in the way of DX?" to which I replied: "Something outside of Perth would be a great start."

I didn't really get a response, or I didn't understand the response, either way, I felt like I'd done something wrong, but was unable to determine what it was that I might have done to receive the ire of the other station.

Now don't get me wrong, the station wasn't abusive, didn't swear or tell me off exactly, but I didn't really feel welcome and soon after packed up and went home.

At the time, there were four other amateurs with me and I asked them what had happened that might have caused this kind of response. They explained that it might have been a little early to get good propagation on 40 meters but that I shouldn't worry too much, because there were always a few people on air with a bit of a chip on their shoulder.

Further discussion revealed that at least one amateur who was with me on that day had been the recipient of a similar treatment early in their amateur involvement and that the effect had not been forgotten. Since that experience, I've heard a few other mutterings about f-calls and their short-comings.

You'll notice that I've not mentioned any call signs during this story, it's because I'm not trying to pick on a particular amateur who, in my opinion,

could do with a hug, but because my experience with the rest of Amateur Radio has been so very different. It seems that every where I've been, I get welcomed almost as a long lost friend, even though the ink on my license is barely dry.

So, in closing, all I really want to say, is thank you for welcoming me into this hobby. Thank you for encouraging me and if you as an f-call are ever on the end of this kind of experience, I encourage you to remember that there are some 3 million or so amateurs around, "mostly harmless" as Douglas Adams might have put it.

I'm Onno, vk6flab

INTEREST GROUPS --- MILITARY

Learn about the early RADAR system of WW2 called CHAIN HOME SYSTEM.

VK2's St. George Amateur Radio Society will be meeting on Wednesday night,

that's THIS 5th of October in the 1st Kyle Bay Scout Hall, Donelly Park, Connells Point at 7:30pm.

At the meeting there will be a video presentation and discussion on "Radar Before the Magnetron"

The CHAIN system otherwise known as AMES Type 1 (Air Ministry Experimental Station) consisted of radar fixed on top of a radio tower mast, called a 'station' to provide long-range detection of aircraft.

Most stations were also able to measure the angle of elevation of the aircrafts flight formation which, together with the range, gave the height.

World voice calling frequencies:
3.690 & 3.940 MHz, 7.090 & 7.190, 14.290, 18.140, 21.360,
24.960, 28.390, 50.160

Calling frequencies for Slow Scan TV (SSTV):
3.630, 7.033, 14.227

Calling Frequencies for PSK31
14.070

JOTA takes on emergency communications

Within this year's Jamboree On The Air an emergency communications exercise will take place on Saturday, 15 October in the afternoon (European time zone).

Details of this simulated emergency test are now published and will include the Headquarters station, HB9S, of the World Organization of the Scout Movement, which is be operated by hams from five different countries.

This year's JOTA theme offers an excellent opportunity to raise the awareness for the role of the Amateur Radio Service in disaster situations.

IARU International Coordinator for emergencies, Hans Zimmerland F5VKP/ F/HB9AQS suggests that this this information be widely known.

For more information contact World JOTA organiser, Richard Middelkoop at RMiddelkoop@scout.org

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

941. SARL NEWS - SUNDAY 2 OCTOBER 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-01 19:00:16 UTC
From: website@sarl.org.za
Message-ID: <20111001190006.31D9333C93@panix2.panix.com>
Source record: 4181
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 2 OCTOBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

AN ADVANCED LICENCE - AN INTERESTING DEBATE

WHAT CAN RADIO AMATEURS DO WITH THE HF BEACON PLANNED FOR CPUT'S CUBESAT?

SORRY BUT YOU ARE CUT OFF!

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

AN ADVANCED LICENCE - AN INTERESTING DEBATE

At the RTA held at the Gauteng Radio Technology in Action symposium last weekend, the question "If South Africa gets an advanced licence what should it look like?" was actively discussed by chairmen and representatives of several Gauteng clubs and delegates present at the RTA. The consensus was "yes", the SARL should pursue this issue with ICASA at the Amateur Radio Symposium for ICASA staff planned for February 2012. The discussion concluded that such a license should support two main objectives: to involve more radio amateurs in technology and to stimulate competition amongst radio amateurs in all aspects of the hobby. What the requirements are for such a licence had a wide range of responses and undoubtedly will still be debated for some time. There was a fair amount of agreement that it should be experimentally based and not be an academic examination.

An Edited version of the debate will be made available for downloading next weekend. It is currently 80 minutes long and inevitably in a debate of this nature there is a lot of duplication. Once you have listened to the recording please make your comments and suggestions.

The SARL will also hold an Intecnet on the subject on Sunday 30 October 2011 at 19:30. Clubs who do currently not link their local repeater to the teleconference bridge are invited to start making arrangements. More details will follow in future SARLNEWS bulletins and the Email letter to members.

WHAT CAN RADIO AMATEURS DO WITH THE HF BEACON PLANNED FOR CPUT'S CUBESAT?

On Friday the Cape Peninsular University of Technology unveiled it's first CubeSat, which will be on show at the 62nd International Astronomical Congress starting at the Cape Town International Convention centre later today.

It is not certain when the satellite will be launched but once in orbit the satellite will provide some interesting experimental activities for radio amateurs. An article recently published in EngineerIT can be downloaded from the SA AMSAT website at www.amsatsa.org.za, giving more details.

During the week there will be two amateur radio satellite presentations "Taking Amateur Radio into Space" and "SA AMSAT - a 30 year history of Space Activity in South Africa". The presentations will be made available on the SA AMSAT website next week.

SORRY BUT YOU ARE CUT OFF!

Yes, we are sorry that you are excluded from access to the SARL members only section and the forum and that you will not get the next edition of Radio ZS because you have not renewed your 20111/2012 subscription. To change this position, please renew now. If you are not sure, send an e-mail to admin@sarl.org.za or call Mariska at 011 675 2393.

SARL WEB MAKING PROGRESS

We are making progress with the SARL web. It has been more stable over the past week but not all issues have been resolved and the efforts between the SARL team and the ISP are ongoing.

RADIO TECHNOLOGY IN ACTION 2012

You are invited to make input to the programme for the 2012 series of Radio Technology in Action Symposium. What subjects would you like to see covered? Are you interested in presenting at the 2012 RTAs? Send us your comments to rta@sarl.org.za.

CQ PUBLISHING TO OFFER ALL MAGAZINES IN DIGITAL FORMAT

New York based electronics publisher Richard Ross, K2MGA, has announced that his CQ Communications will launch multi-platform digital editions of all of its magazine titles before the end of 2011. These titles include CQ magazine, CQ VHF, Popular Communications and WorldRadio Online.

According to Editorial Director Rich Moseson, W2VU, the digital editions will supplement, not replace, current print editions, and will feature enhancements not possible in the print medium. Versions will be available for a variety of online and mobile platforms including PC, Mac, iPhone, iPad, Android 2.0 and higher.

Examples of features that will be possible in the digital world include live links to all World Wide Web addresses listed in each issue as well as supplemental content. This will include such additions as photo albums, audio and video files, software and more.

The digital editions of the CQ publications will be hosted by Zinio dot com. Zinio is one of the top names in the e-magazine publishing business. Moseson says that CQ's choosing of Zinio will assure that their magazines will always be able to take advantage of new technology when it becomes available.

The digital launch will begin in late October with the November issue of an enhanced, multi-platform, version of WorldRadio Online, which will again become a paid-subscription publication. This will be followed by the November issue of CQ, which, appropriately, is the magazine's first annual Technology Special. The fall issue of CQ VHF and the December issue of Popular Communications will round out the introductions.

Digital editions will be available by single copy and by subscription. Details will in the near future be in the magazines and on all CQ Communications websites. Moseson noted that many CQ book titles are already available in digital form on CD.

DRAKENSBERGE HIKKERS: AMATEURS ON THE READY

On Tuesday 27 Sept. member number one of the hiking team, Bart van Dijk, sprained his knee and base camp was alerted at 19:00 of the incident but the group did not request a CASEVAC. The Wednesday SKED would thus be vital and due to poor conditions on 80 m the previous morning, base amp requested a few amateurs to listen in on the early morning SKED. The response was overwhelming. A whole crowd of amateurs helped to listen to the report from the group. Bart however recovered sufficiently to continue and although the hikers are slightly behind schedule, they are well on their way to the halfway mark.

CLUB NEWS

The Centurion Radio Amateur Club will present a technical talk on the club's two meter repeater on 145,775 MHz on Sunday evening, (tonight)commencing at 19:30.

The subject for the talk this evening is: "Feedlines as matching transformers" and it answers a question recently posed on the SARL forum, namely: "Can one match an antenna by altering the length of its feedline?" And of course there will also be a tongue in cheek amateur story!

If you are in range of the repeater, do come along and listen to this very interesting discussion presented by Pine, ZS6GST. Please report in if possible.

The Midlands Amateur Radio Club held it's AGM on 17 September. At the committee meeting which followed, the following portfolios were allocated:

Chairman and Website ZS5ML Vice Chairman and Events ZR5SF Treasurer and Secretary ZS5AZ Site Maintenance and Digital ZR5S Technical and Training ZS5EFP Hamnet and Disaster Management ZS5DDM

We wish the new committee well for year ahead.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity has been high with a C9.3 and a M1.2 solar flare from sunspot 1 302. The Coronal Mass Ejection from this region caused the geo-magnetic field to be unstable having from time-to-time a negative effect on propagation conditions. There is still a chance of isolated M- and X-class flares from this region. Sunspot 1 305 showed some growth and now has a Beta-Gamma magnetic field harbouring huge amounts of energy.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 80.

All the bands from 20 to 10 m will provide lots of fun with DX opportunities at various times of the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

8 October - West Rand Amateur Radio Club's flea market at 12:00. 15 October - CQ - Hou Koers 15/16 October - Jamboree on the air. 30 October - Intechnet on new proposed license Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, Z6SBWN.

Thank you for listening, 73.

2011-10-01

Good afternoon,

Here is the latest update issued at 3:13 pm ADT.

Here is the latest update. As it now appears that the most significant
impact will be on the St. John's area, population density becomes a
factor. If activation of the PEOC goes ahead tomorrow night, VO1EMO
will monitor 3.740 and the NL Linked Repeater System through Echolink
node 278794. Your usual assistance and cooperation is appreciated.

WWCN31 CWHX 011944
SEVERE WEATHER BULLETIN
ISSUED BY THE CANADIAN HURRICANE CENTRE OF ENVIRONMENT CANADA
AT 4:44 PM ADT SATURDAY 1 OCTOBER 2011.

TROPICAL STORM WATCH FOR:
=NEW= ST. JOHN'S AND VICINITY
=NEW= AVALON PENINSULA NORTH
=NEW= AVALON PENINSULA SOUTH.

HURRICANE OPHELIA IS FORECAST TO TRACK CLOSE TO THE
SOUTHEASTERN PORTION OF NEWFOUNDLAND MONDAY MORNING WITH A
POSSIBILITY OF TROPICAL STORM CONDITIONS.

A TROPICAL STORM WATCH MEANS THAT A TROPICAL STORM OR AN
INCIPIENT TROPICAL STORM CONDITION POSES A POSSIBLE THREAT TO
THE SPECIFIED AREAS WITHIN 36 HOURS.

==DISCUSSION==
GIVEN THE CLOSE RANGE OF HURRICANE OPHELIA'S TRACK TO THE AVALON
PENINSULA MONDAY MORNING, A TROPICAL STORM WATCH IS BEING ISSUED BY

THE CANADIAN HURRICANE CENTRE FOR THAT REGION. THIS MEANS THAT THERE IS A POSSIBILITY OF TROPICAL STORM FORCE WINDS (60 GUSTING TO 90 KM/H) FROM OPHELIA.

THIS IS NOT A WARNING - BUT SIMPLY A REMINDER TO MONITOR THE WEATHER FORECASTS FROM ENVIRONMENT CANADA CLOSELY IN THE EVENT OPHELIA TRACKS FARTHER NORTH. IN TERMS OF WAVES, IT IS QUITE LIKELY THAT ROUGH SURF CONDITIONS WILL DEVELOP ALONG THE SOUTHERN PORTION OF THE AVALON (AND BURIN) PENINSULA. MORE DETAILS REGARDING WAVE CONDITIONS CAN BE FOUND IN THE CANADIAN HURRICANE CENTRE BULLETIN UNDER HEADER WOCN31 CWHX OR AT WWW.HURRICANES.CA.

PLEASE REFER TO THE LATEST FORECASTS FOR FURTHER DETAILS.

END/FOGARTY/TELFORD

WOCN31 CWHX 011856 CCA
Tropical cyclone information statement corrected by the Canadian Hurricane Centre of Environment Canada at 3:56 PM ADT Saturday 1 October 2011.

Tropical cyclone information statement for:
Newfoundland
Nova Scotia.

For hurricane Ophelia.

The next statement will be issued by 9:00 PM ADT.

Corrected bulletin - replacing 'minus' with 'metres' in Section 3. Hurricane Ophelia tracking northward this weekend - Affects in parts of Nova Scotia and Newfoundland late Sunday And Monday.

==discussion==
1. Summary of basic information at 3:00 PM ADT.

Location: near 30.5 north 62.8 west.

About 270 kilometres southeast of Bermuda.

Maximum sustained winds: near 195 km/hour.

Present movement: north at 40 km/hour.

Minimum central pressure: 952 MB.

2. Public weather impacts and warnings summary.

Ophelia is forecast to remain at or near category-three intensity for the remainder of the day and pass east of Bermuda this evening. Meanwhile an unrelated non-tropical weather system with a frontal zone extending into the tropics will remain nearly stationary over Nova Scotia and Western Newfoundland for the remainder of the

weekend. Ophelia and the rain associated with it is not forecast to move into Southeastern Newfoundland until Monday morning.

Computer models are showing different scenarios for Ophelia's track - ranging from the Burin Peninsula in Newfoundland to 200 kilometres south of the Avalon.

A. Wind.

Greatest chance for strong winds from Ophelia is over the Burin and Avalon peninsulas of Newfoundland. At this point in time, there is about a 50% chance of tropical storm force winds over Eastern Newfoundland. Tropical storm force is approximately 60 gusting to 90 km/h. A tropical storm watch may be issued later today or tonight for these regions. Chance of hurricane-force gusts (120 km/h) in this area remains low at 5-10%.

B. Rainfall.

Rainfall warnings are in effect for parts of Nova Scotia for rain from the stalled non-tropical system.

This stalled frontal system could tap in to some of Ophelia's moisture tonight through Monday giving the possibility of additional heavy rainfall over Eastern Nova Scotia and Newfoundland.
Rainfall directly from Ophelia is expected over Eastern Newfoundland. Expect a 4 to 6 hour period of heavy rainfall over these regions Monday morning. 50 to 75 millimetres is possible with rainfall rates up to 20 millimetres/hour.

C. Surge/waves.

Waves will be a concern along the South Coast of Newfoundland Monday. We are still establishing details of what to expect in terms of wave heights, but 5-7 metre waves are likely along the South Coast of Newfoundland - Fortune bay and east. Ocean swell will also begin to reach the Atlantic coast of Nova Scotia later Sunday and Monday. Incident swell height of 3 metres breaking in the 4-metre (10-14-foot) range is possible late Sunday night along the Atlantic coast of Nova Scotia. With regard to storm surge, 40 to 60 cm is possible Monday morning around the Avalon and Burin peninsulas. This should not pose significant problems but a farther-north track would necessitate an increase in forecast water levels.

3. Marine weather impacts and warnings summary.

Given Ophelia's expected track brings it near southeastern Maritimes marine areas by Sunday evening, a storm warning has been issued for Laurentian Fan. Storm or possibly hurricane force winds could effect the fan and most likely the Grand Banks Monday.

Large waves are expected - especially to the right (southeast) and close to Ophelia's track as it moves into Canadian waters.
Greatest threat for large waves is over the Grand Banks.

Wave heights up to 10 metres are possible. More details will be
established later today.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the
latest:

- forecast position, central pressure table.

- strength and predicted wind radii table.

- hurricane track information map.

- technical discussion.

Please also refer to the public and marine forecasts and warnings
issued by Environment Canada for your area.

END/FOGARTY

RAC Bulletin 2011-031E - RAC Insurance Program for 2012
2011-10-02

$10,000,000 Total Liability Coverage to continue....
Liability coverage raised to $5,000,000 from $3M/event with no
increase in premium....
Equipment loss/damage to continue at no increase in rates....
Home, Car and Travel Health coverage coming !

The Radio Amateurs of Canada is pleased to announce that the highly popular RAC Insurance Program will be available again in 2012, and with increased coverages at no increase in rates. The Program provides several types of coverage including liability insurance for Club activities and its members, equipment loss/damage coverage for Affiliated Clubs and their RAC members, and new this year will be the availability of additional insurance coverage for a RAC member's house, car and travel health insurance, which will be of particular interest to Snowbirds. All of these coverage�s are the best available in Canada and are offered at an extremely competitive rates. The RAC Insurance Program is provided as a benefit of membership for RAC Affiliated Clubs and their RAC members.

Highlights of the Program for 2012 include:

- Liability Insurance for Affiliated Clubs of $10,000,000/$5,000,000 per occurence for 2012 at the lowest cost in Canada.
- Equipment loss/theft/damage coverage for only $10/$1000 of actual equipment value per year.
- RAC members of Affiliated Clubs in the program get liability coverage extended for their home stations at no charge.
- Liability coverage�s for portable operation, advertising liability and personal injury.
- Home, Car and Travel Health coverage coming soon.

Complete details of the 2012 RAC Insurance Program and how to apply for or renew coverage can be found on the RAC website at http://www.rac.ca/insurance2012.

For questions concerning policy and coverage details please contact Jerry Beneteau VE3EXT, the RAC Insurance Program Advisor, at ve3ext @ primus.ca

For questions about how to apply or renew, please contact Linda Friars VE9GLF, the RAC Insurance Program Administator at ve9glf@nbnet.nb.ca

Applications for 2012 are available on the RAC Website and must be
received by the RAC Insurance Program Coordinator by November 15th for
new applicants and December 1st for renewals. Please note the new address
.

The applications should be sent to :

RAC Bulletin 2011-032E - New Office Administrator
2011-10-02

I am pleased to announce that the Radio Amateurs of Canada has recently recruited Frank Greene as Office Administrator. Frank's appointment comes after an extensive search for just the right person to manage our head office.

Frank comes to RAC with an extensive management and business background. He has worked in sales and marketing, accounting and administration, human resources, staff coordination, facilities management, and project management, and has participated in several consulting assignments from capacity planning to disaster contingency planning.

His mission is to provide exemplary service to our members. Don't hesitate to contact Frank when an issue arises.

On behalf of the RAC Board and Executive I want to welcome Frank to the Radio Amateurs of Canada.

Limerick Radio club have changed their club meeting night to Wednesday night going forward. The next meeting will be on Wednesday 12 October. Full details can be found on www.limerickradioclub.ie

---

Tipperary Amateur Radio Club

The Tipperary Amateur Radio Group due to popular opinion has decided to change their meetings in future to the first Wednesday of the month, the next meeting of the group will take place on Wednesday next the 5th of October in the Raheen House Hotel,Raheen Road, Clonmel at 8.30pm All are welcome.

South Dublin Radio Club

This Tuesday 4th of October from 8pm South Dublin Radio Club will demonstrate hands on operation at 10 Gighertz and above. There will be live demonstrations of reception of TV signals from 10 gigahertz and above and details of how an ordinary LNB can be modified to cover the Amateur Band from 10 to 10.5 Gigahertz for Amateur Television reception. Included will be an explanation of why those involved in Amateur Television mount their satellite dishes upside down causing unusual looks from the neighbours! Visitors are always welcome. Directions are on the club website http://www.southdublinradioclub.ie

---

Cork Radio Club

Cork Radio Club will meet at the Community Centre, Carrigtwohill on Monday next October 3rd at 2030. New members are always very welcome.

Enquiries to Jeremy EI5GM on 083 3317710

EI4GXB Radio Theory Notes

Ger EI4GXB advises us that he has uploaded files to the Radio Theory section of his website which he has used for the theory class last year in Limerick. They may be of help to any candidates sitting the examination in October. Go to www.ei4gxb.com for further details. Comments welcome to Ger on ei4gxb /at/gmail /dot /com

---

Mid Ulster Amateur Radio Club

The Mid Ulster Amateur Radio Club's monthly meeting will be held on Sunday 9th October 2011 at 3pm. It will be held in Brownlow Resource Centre, Brownlow Road, Craigavon, BT65 5DL. Memebers and Non- Members old and new are welcome to attend. Details are available at www.muarc.com.

Mayo Radio Experimenters Network

The annual Mayo Radio Experimenters Network club radio rally will take place on Sunday 20th November 2011. Doors open at 11.00 am.

The venue will be the Welcome Inn Hotel in Castlebar.

If you would like further details please contact: Rally Organiser - Padraic Baynes EI9JA on 087 - 695 7154 (email pbaynes1 at eircom /dot /net), or email club PRO. David Hatfield EI3ECB on ei3ecb at gmail /dot /com or text or phone the club mobile phone number 086 20 89 777.

DX News

Willi DJ7RJ will be QRV from Reunion Island in the Indian Ocean signing FR/DJ7RJ from 4 October until 26 October. He will be operational on all bands 160-10m on CW and SSB. QSL to his home call.

Another Indian Ocean activity at the moment is Phil F6GNT who will be in Mayotte until March 2013. He is using the callsign FH8NX.

Just a reminder for the prefix hunters that the station LM9L40Y will be on the air until the end of December. This call is operated by members of the LA9L radio club in Norway and is to celebrate the 40th anniversary of the club.

Al VE1AWW will be going back to Sable Island early this month and will be active as CY0/VE1AWW. This is a work assignment but Al will be QRV when possible.

Armenia: amateur radio special event

To celebrate the 20th anniversary of the independence of Armenia, amateur radio special event stations there have been authorised to use the special prefix EK20. A special award is available for working at least 20 QSOs/SWL with these special radio stations on all HF bands, including 30/17/12m, and on any modes (CW, SSB and Digital). QSLs for these special prefixes may be sent to: P.O.Box 22, Yerevan, Armenia 0002, or per the operator's instructions. The electronic award can be received in the form of a digital image file sent to you, so you may print the certificate on your printer. Send log extract of the contacts to: ek7dx /at/ yahoo.com

---

150th Birth Anniversary

Special Event: VA3AAR celebrating the 150th anniversary of the birth of Dr. James Naismith, Almonte native, to honour the inventor of basketball at the Mill of Kintail near his birthplace. Frequencies: 20 m 14150 kHz +/- 5 kHz, 40 m 7250 kHz +/- 5 kHz, 80 m near 3755 kHz.

>Date: Sunday, November 6, 2011, 24 hour operation 0000-2359 UTC (8:00 p.m. Eastern November 5 to 8:00 p.m. Eastern November 6)

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1030
BID: $OPDX.1030
October 3, 2011
Editor Tedd Mirgliotta, KB8NW (Currently in Murfreesboro, TN)
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, N2OO, NG3K & ADXO, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, KH6BZF, K8GI, K8YSE, W8GEX (60m News), N0HJZ, AT International, DK9TN, DL5YWM, DL1SBF, DK8JB & The DX News Letter, DxCoffee.com, DX-World.Net, EA5GL, F6AJA & Les Nouvelles DX, G3SXW, HP1AC, HS0ZCW, I1JQJ/IK1ADH & 425 DX News, I1RBJ, JK1KSB, OH2BH, OZ6OM & 50 MHz DX News, PA7FM, Pete's-DX-Newsdesk, RSGB IOTA Web Site, UT5UY, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

*** EDITOR'S SPECIAL NOTE: Some of you may have noticed that the bulletins have been being published from Murfreesboro, TN. I am doing this remotely and it is not easy. I am here in TN because my daughter gave birth to my FIRST GRANDCHILD - Lliam Tyler Jones (9 lbs 6 oz. 21 3/4 in. - on September 27th). I am now a GRANDPA... It will seem that I will be making many trips to TN now....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th-September, through Sunday, 2nd-October there were 229 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T33, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP8, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2R, ROTUMA (Update). The 3D2R team is now on the air. Last day of operations will be October 6th. They will be on all bands from 160-2 meters, including the 60m and 6m, using CW, SSB and RTTY. They will also be active on PSK, SSTV and EME. They plan to upload their logs on a daily basis to their online log. They will upload to LoTW approximately six months following the DXpedition. According to their Web page, they have made (as of October 2nd) 30134 QSOs (11856/SSB, 17027/CW, 1154/RTTY and 97/PSK31). QSL via YT1AD, direct or by the Bureau. For more details and updates, see the 3D2R Web page at: http://www.yt1ad.info/3d2r/index.html

4W6, TIMOR-LESTE. The 4W6A team is now QRT as of September 26th. They made 41361 QSOs with 13255 unique callsigns (18954/CW, 21191/SSB and 1216/RTTY). Remember the QSL Manager is M0URX. QSL direct (w/SAE plus 1 IRC or 2 USDs), by the Bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation. Direct or Bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS). There is a link from the 4W6A Web site at: http://www.4w6a.com

5N, NIGERIA. Bodo, DL3OCH (ex-5N0OCH), will be active as 5N7Q from Abuja between October 3-15th. He is there for maintenance work on a broadcast station. Activity will be on 40-10 meters using one of the largest fully rotatable short wave antennas in the world (his antenna gain is over 20 dbi on all bands). Modes will be CW and SSB. QSL via DF8DX.

5V, TOGO. Arnauld, F4FOO, will be active as 5V7MA from Togo between December 19th and January 4th. Activity will be limited to his free time on 20-10 meters SSB only. QSL via his home callsign.

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH from Uganda starting November 23rd for three weeks. Activity will have an emphasis on low bands using a new amp. QSL via his home callsign.

6O, SOMALIA. Michael, PA5M, is now active as 6O0M from Somalia until October 4th. Activity will be limited to his spare time because he works for the UN under the WFP. Operations should be on 80-10 meters using CW, SSB, RTTY and very little PSK31. Main activity will probably be during his local evenings, after 1800z, using wire antennas and a FT857. QSL via PA7FM. For more details see: http://www.6o0m.pa7fm.nl

8Q, MALDIVES. Seiji "OKU", JK1KSB, will once again be active as 8Q7SO from Mirihi Island Resort (AS-013, WW Loc MJ63jo) at South Ari Atoll between October 28th and November 3rd. Activity will be holiday style on 80-10 meters using CW, RTTY, SSB and PSK31. QSL via JK1KSB, by the Bureau or the address on QRZ.com.

A7, QATAR. Members of the Lufthansa Amateur Radio Club (LARC) in cooperation with the Qatar Amateur Radio Society (QARS - A71A) will once agin be active as A71DLH from here between October 22-29th. Their activity will be on all bands using CW, SSB and the Digi modes. Operators for this year's 2011 operation are Mustapha/DL1BDF, Wolfgang/DK2DO, Bernd/

DL2NTC, Michael/DB4XN, Michael/DF4HR and Sven/DG3HT. They will send their QSLs via the DARC Bureau or QSL via their QSL Manager DL0LH. Online log will be available at:
http://www.dl0lh.de/index.php?option=com_content&view=article&id=8&Itemid=4

AH0, MARIANA ISLANDS. Kan, AB2RF/JJ2RCJ, will be active as AH0/AB2RF from the Saipan Rental Shack on Northern Mariana Island (OC-086) between November 2-5th. Activity will be focused on the low bands, RTTY and PSK. QSL via JJ2RCJ, direct or by the Bureau or LoTW. For more details about the Saipan Rental Shack, see the following Web page at:
http://saipan.rental-shack.com/english/index.html

C6, BAHAMAS. Rich, N0HJZ, will be active as C6ARW from Grand Bahama Island between October 27-31st. Activity will be on 160-10 meters (no 30/17/12m) using CW and SSB. Operations will also include the CQWW DX SSB Contest as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign direct.

CN, MOROCCO. Jim, W7EJ, will once again be active as CN2R during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via W7EJ.

CY0, SABLE ISLAND. Look for Alan, VE1AWW, to return to Sable Island again on October 5th and stay until the end of the year. Activity will be limited to his spare time using just a vertical and dipole. QSL via his home callsign.

EF9, CEUTA AND MELILLA. Salvador, EA5DY, will be active as EF9A from Ceuta and Melilla during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (??m) entry. QSL via his home callsign.

EL, LIBERIA. Once again members of the VooDoo Contest Group will be active from here beginning November 21st. This is their 23rd straight year, but this time it will from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQWW DX CW Contest (November
26-27th) as a Multi-Multi category using the callsign EL2A. Outside of the contest, the following mentioned operators will use their own personal callsigns: Ned/AA7A (EL2NS), Roger/G3SXW (EL2A), Fred/G4BWP (EL2WP), Mike/KC7V (EL2MF), Lee/KY7M (EL2LF) and Bud/N7CW (EL2CW). QSL via their home callsign. Logs will be uploaded to LoTW.

HK0, SAN ANDRES ISLAND. Daniel, DL5YWM, will be active as HK0/DL5YWM from San Andres Island (NA-033) between October 5-13th. Activity will be on 40-6 meters using CW and SSB. He states that a detour to Providencia (NA-049) will be decided at the "last minute". QSL via DL5YWM.

HK0NA MALPELO ISLAND 2012 DXPEDITION PRESS RELEASE (Dated Sept. 30th):
"The Malpelo 2012 DXpedition is pleased to announce that the HK0NA operating team has added two new operators, both physicians..W0GJ and K9SG. The team now consists of 18 operators representing eight countries.
Two members of the team will travel to Malpelo for a reconnaissance visit in late October. The purpose is to check out possible operating sites and

make final decisions on the type and placement of antennas. We want to try to have antennas oriented for all parts of the DX world. Also, some equipment will be moved onto the island and stored until our DXpedition begins in late January 2012.
Every effort is being made to extend the length of time available for operating. This requires coordination with the authorities and agencies that oversee the island and the charter boat company. It appears that we can get to the island one day earlier and may have the option of staying a few extra days. Of course, our costs will rise accordingly.
The current plan has the team QRV on or about January 23rd for 12-14 days. Operations are planned on 160 through 6 meters on CW, SSB and one Digital mode.
Several of the Elecraft K3s are already in Colombia. The other K3s, five KPA500 amplifiers, antennas from DX Engineering, and Spiderbeam 65 foot masts for the low band antennas will be shipped soon. The Alpha 8410s are on their way.
The Malpelo team is paying all their transportation expenses to/from Colombia and putting up about one-half of all the DXpedition costs. To cover the remainder of our expenses, your financial assistance is kindly requested. Contributions are being sought from DX Foundations, DX Clubs and individual DXers. You may contribute directly to DXARC (Colombia) or to K4UEE (North America), DJ9ZB (Europe), or JA1ELY (Asia/JA). See our website: www.hk0na.com for further information on how you can help.
N2OO and the SJDXA have graciously agreed to handle QSL duties.
We plan periodic press releases with information of interest. Also, watch the website for breaking news.

Thanks, , Jorge Prieto, HK1R, DXpedition leader
Bob Allphin, K4UEE-co-leader
Gregg Marco, W6IZT-co-leader"

HU, EL SALVADOR. Mario, YS1GMV,and a team of operators will be active as HU1YS from "Club de Radioaficionados de El Salvador" (C.R.A.S.) in San Salvador during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via EA5GL.

IOTA NEWS.....
AF-019. Angelo, I2ADN, will be active as I2ADN/IG9 Lampedusa Island (IIA AG001) during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (10m) entry. QSL via I2ADN.

AS-080. Over the past weekend, a team of 13 operators were expected to be active as HL0V from Anmyon Island between October 1-3rd. QSL via HL2UVH.

EU-095. Paul, I1RBJ, operated September 27th from the Island of IF in the FRIOUL GROUP as F/I1RBJ/P and just made a few dozen 20m SSB QSOs. This was only a test for a much larger all band operation in October. Paul tells OPDX, "I did operate portable atop the Chateux d'If on If Island, the Chateux being famous for the Earl of Montecristo of A.Dumas. Fantastic place! QSL to my F/I1RBJ Montauroux address PSE."

NA-075. You still may have time to work Heinz/VA7AQ and Frank/VE7DP
as homecall/7 from Pender Island until 2200z Monday, October
3rd. Activity will be on 40/30/20/17 meters. QSL via their
home callsign.

OC-133. Saty, JE1JKL, will be active as 9M6NA from Labuan Island,
East Malaysia, during the CQWW DX CW Contest (November 26-27th)
as a Single-Op/All-Band entry. QSL via JE1JKL, direct or E-mail
requests for Bureau QSL to: 9m6na@jsfc.org
For more info, see: http://jsfc.org/je1jkl/9m6na.html

OC-239. Operators Joni/YB9WZJ and Har/YB0MWM will be active as
homecall/9 from Doom Island between Ocober 1-8th. Activity
will be on 20/17 meters SSB with some RTTY and PSK31. All
QSLs via YB9WZJ.

KH2, GUAM. Masanori, JA1OZK, will be active as KH2KY from Guam (OC-027)
between October 22-29th. Activity will be on the HF bands. QSL via his
home callsign.

KH2/NH2, GUAM. Dave, N2NL, will be active as NH2T from Guam (OC-026)
during both the CQWW DX SSB Contest (October 29-30th) and CQWW DX CW
Contest (November 26-27th) as a Single-Op/Assisted entry. He is expected
to be here until the summer of 2013. Dave will be active (outside of
contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or
via W2YC.

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during
the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band
(possibly 15m or 10m) entry. QSL via LoTW. For more details, see:
http://www.wix.com/n2tta1/kp2mm

KH6BZF PROPAGATION FORECAST/REPORT (October 3-9th)....
Oct 03 AN SOLAR REFERENCE KEYS
Oct 04 AN --------------------
Oct 05 AN BN - Below Normal
Oct 06 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 07 AN LN - Low Normal
Oct 08 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 09 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NH0, MARIANA ISLANDS. Mazshita, JF2SKV, will be active as NH0S from
Saipan (OC-086, USI NI002S, WLOTA 1333), Northern Mariana Islands,
between October 27-31st. Activity will be on CW, SSB, RTTY and PSK.
QSL via JF2SKV.

OJ0X SEPTEMBER 1 REPORT (Press Release by OH2BH): There is no doubt autumn is approaching the North and the weather is becoming rather unstable. The second group - OH1TV, OH2BAD, OH2BO, OH5BM - has experienced the full variety while radio propagation hit the rock bottom.
It is not often that Northern Lights are visible on the latitude of Market Reef - now the Aurora Borealis was seen on the last day of the German group but also the current second week's Finnish group. There were predictions of a recovery of band conditions for this weekend &#65533; but no signs of it yet.
Worse is expected again on the horizon, and the forecast for next Tuesday is high winds. Hence the group for the third week will need to travel to Aland Islands early to be stand-by for a potential advanced outing.
If you are still in need of some band points, you may watch the weather reports at http://www.g3txf.com/dxtrip/OJ0X/OJ0X.html direct from the Market Reef automatic weather station. There the Titanex 160/80M vertical may be taken down today as preparation for early departure as well as for poor propagation on the low bands.
But the spirits remain high among the group as they have passed 30,000 QSO and eagerly wait for 10M to open up. Nevertheless, the third week's group - OH1ND, OH2BH, SM0W and SM6U - may take advantage of any 10 & 12M openings to all regions of the world.
OJ0X also experienced some curious magic as UPS delivered a new RF choke for their burned Alpha 91B amplifier. Thanks to quick action from Acom Bulgaria, the choke arrived in Finland the following day. Unfortunately, UPS&#65533;s one-day service anywhere in Europe did not extend to Market Reef. Hopefully the next group will be able to bring the third amplifier back on line.
Are you guys in the audience having any fun yet? With 60,000 hits at QRZ.COM, some of you are still there. The band slot race is still there with ON7GB and LZ1NG leading Europe with 20 points while Asia's JA4DND is close behind (19). The US East Coast is suffering from poor propagation with K5EK running far behind at 14 points. Just enjoy the log search facility operated by Nigel, G3TXF www.clublog.org/charts/?c&#65533;0
X
but save any queries until the operation is finished."

PJ2, CURACAO. Andy, DK5ON, will be active as PJ2/DK5ON from Curacao (SA-099) between March 12-30th (2012). Activity will be on 40-6 meters using CW, SSB, RTTY and PSK. QSL via his home callsign.

PJ4, BONAIRE. Wim, ON4CIT, will be active as PJ4J from Bonaire (SA-006) between October 27th and November 9th. Activity will focus on RTTY and SSB. QSL via his home callsign.

PLANNING DXPEDITION AROUND THAILAND? Charles, HS0ZCW, states, "If you are planning a DXpedition to places that could include Bangkok as a staging point, I can definitely recommend using Bangkok as the place. Advantages include new airport with connections everywhere, good and cheap hotels, cheap food and transportation locally, interesting place for short tour, and best of all, a 5 square block area packed with

electronic parts. In the Bangkok Bon Mhor district downtown are hundreds of shops selling coax and coax plugs, any electronic part and ICs, and is very complete. Not sold are yagis below 10 meters. Recommend shipping your radios on to final destination but any Yaesu radio can be sold over the counter for export but must order first for Bangkok pick up. I will be happy to give advice."

HELP SAVE THE DX LOGS! Bob, N2OO, from the QSL Manager Society, states, "If anyone knows of any DX or DXpedition logs and blank cards that are in jeopardy of being trashed, PLEASE save them! If you are a QSL Manager and can't be bothered any more, PLEASE contact us! Contact the QSL Managers
Society and we pledge to locate a quality replacement QSL Manager. Just because a DXpedition log is old does not mean that it is not worthy of being saved! Save DX Logs!"
Go to <www.qsl.net/qslmanagers> or E-mail qslmanagers@qsl.net

NEW QSL MANAGER. Pedro, EA5GL, informs that he is the new QSL Manager for the following stations for the upcoming CQWW DX SSB Contest: CE3EEA, NH7O, 6Y5JH and HU1YS.

QSLS RECEIVED VIA THE BUREAU: R1ANB

T32, CHRISTMAS ISLAND (Reminder). The Five Star DXers Association (FSDXA)
group is now active as T32C from Kiritimati (Christmas Island) until
October 25th. As of 0659z, October 2nd, the T32C operation has made
14265/QSOs with 7145 Unique Callsigns (7344/SSB, 6919/CW and 2/RTTY).
Logs will be uploaded to ClubLog <www.clublog.org/charts/?c&#65533;2C&a&#65533;bed
>
on a daily basis and any news posted will be on the T32C website. For
more details/updates, visit their Web page at: http://www.t32c.com

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO,
Carlos/TI2KAC, Juan Carlos/TI2JCY and TI2ZM will be active as TI8M from
Costa de Pajaros, during the CQWW DX SSB Contest (October 29-30th) as a
Multi-2 entry. QSL via TI2KAC, direct preferred but bureau "OK". Look
for activity before the contest on 160-10 meters.

TK, CORSICA. Operators Mario/DJ2MX, Simon/DJ4MZ, Maththias/DK4YJ,
Ulf/DK5TX, Christoph/DK9TN, Luise/DL2MLU and Bernhard/DL6RAI will be
active as TK/homecall between November 23-28th. Activity will include
an entry in the CQWW DX CW Contest (November 26-27th) as a Multi-2
category using the callsign TK4W. QSL TK4W via OQRS (Online QSL Request
System) and QSLs for TK/homecall via their home callsign. For more
details, see: http://www.dq4w.de/2011/tk4w

TO7, MARTINIQUE (NA-107). Dim, UT5UGR, will once again be active as
TO7A during the CQWW DX CW Contest (November 26-27th) as a Single-Op/
All-Band/High-Power entry. QSL TO7A via UT5UGR.

TX5, MARQUESAS ISLANDS (Update/Reminder). Alex, UT5UY, wants to remind
OPDX readers that an international team of operators will be active
from Hatiheu, Nuku Hiva (OC-027) between October 19th and November 1st.
Activity will be on all bands and modes including an entry in the CQWW
DX SSB Contest (October 29-30th). Operations mentioned are on 160-10
meters (includingv30/17/12m bands) on CW, SSB and RTTY, using 4 stations
on the air at the same time on different bands and modes. The following
callsigns will be used:
TX3T &#65533; Activity between October 16-19th and November 1-4th, will
be from Papeete, Tahiti (OC-046) -- before and after their
Marquesas operation.
TX7M &#65533; The main callsign for their activity between October 19th
and November 1st, will be from Hatiheu, Nuku Hiva (OC-027),
Marquesas Island.
TX5A &#65533; Their callsign for the CQWW DX SSB Contest from Hatiheu,
Nuku Hiva (OC-027), Marquesas Island.

Operators mentioned are Oleg/R3FA (leader), Alex/UT5UY (co-leader), Michel/FO5QB, Alex/US0KW, Andy/UU4JMG, Alex/UX0LL, Andy/RK7A, Leo/UA7A, Oleg/US7UX, Serege/UR5MID and Mike/RU3UR. QSL Manager is Eugene, RZ3EC. There are three options to QSL - Bureau (using the OQRS), direct to QSL Manager and LoTW (All QSO(s) data will be placed into LoTW after Expedition is over). There is a survey available on their Web page for bands/modes needs. The team is looking for sponsors. For more details, visit the TX7M Web page at: http://www.tx7m.com

UK, UZBEKISTAN. Takhir, UA1ZEY, is now active as UK/UA1ZEY from Samarkand until October 13th. Activity will be mainly CW. QSL via RW6HS direct, or to UA1ZEY by the Bureau.

V5, NAMIBIA (Ops Needed!). David, GI4FUM, of the CQ DX African Safaris, is planning a DXpedition to Namibia next year in March and is looking for operators. He states that their host will be Andre, V51B, in Orange-mund in Southern Namibia. The whole adventure starts in early March and includes a sight seeing tour before ending up at Orangemund for 10 days of operating prior to being an entry in for CQ WPX SSB Contest (March 24-25th). There would be the opportunity to do some sight seeing in Namibia before returning home via Cape Town. If interested in joining David's group, send an E-mail to: gi4fum@arrl.net
For more details, visit the CQ-DX African Safaris Web site at: htp://www.3da0ss.net

VK0, MACQUARIE ISLAND. A second operator has joined Kevin, VK0KEV, on the Island of Macquarie (AN-005). Look for Trevor, VK8TH, to be active as VK0TH. His length of stay is not known. Activity so far has been on PSK31, but he is expected to be on 80-6 meters using a Yaesu FT-897 into a 5 band vertical and a 40m dipole. QSL via JE1LET (direct only).

VP9, BERMUDA. Bob, G3PJT, will be active as VP9/G3PJT between March 8-15th (20120. Activity will include the RSGB Commonwealth Contest 2012. QSL via his home callsign. For more details, see: http://www.beru.org.uk

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
26 September - 02 October 2011

Solar activity ranged from low to moderate levels during the period.
Activity was moderate on 26 September with Region 1302 (N12, L=282,
class/area Fkc/1300 on 24 September) producing a M4/1b event at
26/0508 UTC and a M2/2b event at 26/1443 UTC. Solar activity
decreased to low levels on 27 September before increasing again to
moderate levels on 28 September when Region 1302 produced a M1/1n
event at 28/1328 UTC with an associated Tenflare (320 sfu). Another
decrease to low levels occurred on 29 September before levels
increased once again to moderate levels on 30 September through 02
October. Region 1305 (N12, L-249, class/area Dsi/190 on 2 October)
produced a M1/1f event at 30/1906 UTC. Associated with this event
was a Type II radio sweep with an estimated speed of 690 km/s as
well as a 260 sfu Tenflare. Despite limited STEREO data, a slower
CME is believed to be potentially geoeffective from this event.
Region 1305 produced a M1/1n event at 01/0959 UTC, and produced a
possible earth directed CME, with an associated Type II radio sweep
(estimated speed of 850 km/s), Type IV radio sweep, and a 180 sfu
Tenflare. On 02 October, Region 1305 produced a M3/1n event at
02/0050 UTC that was associated with an Earth directed CME visible
in STEREO imagery with an estimated speed of 532 km/s. Finally,
Region 1302 produced a M1/Sf event at 02/1723 UTC.

A greater than 10 MeV proton event at geosynchronous orbit began at
23/2255 UTC in response to an X1 flare on 22 September, reached a
maximum of 35 pfu at 26/1155 UTC, and ended at 27/0430 UTC. Fluxes
returned to background levels for the remainder of the period.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels from 26 to 29 September. Fluxes increased
to high levels on 30 September, returned to normal to moderate
levels on 01 October, and back to high levels on 02 October.
```

Geomagnetic activity ranged from quiet to severe storm levels during the period. Increased activity on 26 - 28 September was due to effects of an expected CME from 24 September. Increased activity early on 29 September was due to nighttime sub-storms. Increased activity on 01 - 02 October was due to a solar sector boundary crossing (SSBC) prior to the onset of high speed stream (HSS) effects from a favorably positioned coronal hole (CH).

Forecast of Solar and Geomagnetic Activity
05 October - 31 October 2011

Solar activity is expected to be at low to moderate levels during 05 - 15 October with a slight chance for M-class flare activity from Region 1305 until it crosses the west limb on 07 October, and the return of old Region 1295 (N24, L=57) on 08 October. A decrease to low levels is expected during 16 - 17 October after Region 1295 rotates off the west limb. During 18 - 25 October, activity is expected to increase to low to moderate levels with a slight chance for major flare activity as old Region 1302 rotates back onto the visible disk. Activity is expected to return to low levels for the remainder of the forecast period (26 - 31 October) after old Region 1302 rotates off the west limb.

No proton events are expected at geosynchronous orbit from 05 - 17 October. There is a slight chance for a proton enhancement from 18 - 27 October due to the return of old Region 1302. No proton events are expected during 25 - 31 October.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at mostly normal to moderate levels. High levels are expected during 9 - 14 and 28 - 31 October due to influences from coronal hole high speed streams.

Geomagnetic field activity is expected to be mostly unsettled on 05 October due to a CME arrival. Activity is expected to increase to active levels on 06 October due to continued CME effects. Activity is expected to decrease to mostly unsettled levels during 07 - 09 October as effects from the CME subside and a negative polarity coronal hole moves into a geoeffective position. Activity is expected to continue to decrease to mostly quiet levels during 10 - 27 October. During 28 - 30 October, activity is expected to return to mostly unsettled levels due to a positive polarity coronal hole. Finally, activity is expected to decrease to mostly quiet levels on 31 October.

954. Ohio/Penn DX Special Bulletin #1030.1

T32C Bulletin #7 (Press Release)

We have now been operating for four days and have passed the 50,000 QSO milestone. There is still almost 3 weeks to go, so those who are still needing us on various bands and modes have many opportunities still to come. This bulletin is by way of a summary of what has been done and what is planned.

Bear in mind that this has turned out to be something of an unplanned Field Day style operation, and we now have no expectations of our container of equipment arriving while we are here on Christmas Island. Instead, the team hand carried just over one metric tonne of equipment (poles, cables, radio gear, computers, etc) to the island. We are extremely grateful to all those who loaned equipment at short notice to help enable the expedition to take place and be successful. Inevitably we have had teething problems, as we have a variety of amplifiers, Microham routers, etc. where we would, ideally, like to have standard equipment and interfaces. Fortunately the transceivers are consistent as Yaesu came to our rescue with the loan of ten FT-450D radios at very short notice.

Antenna-wise, we have two-element vertical dipole arrays by the sea for 20 through 10, quarter-wave verticals with elevated radials for 30 and 40, a quarter wave vertical with ground radials for 80 and a 15m high T antenna with ground radials for 160. We also have two Beverage receive antennas for 160 and now have additional vertical dipoles for 10, 15 and 20 to allow us to retask the low band stations as second stations on those bands when LF is closed. We are continually refining our antenna systems within the limits of the wire, poles and coax that we have here, though the second tranche of operators who arrive in a week's time will bring more.

We started our SSB operations at the weekend with an entry in the Oceania SSB contest in which we believe we have comprehensively beaten the previous contest records. We will not, however, be entering the CW leg as this would undoubtedly lead to a lot of unnecessary duplicate contacts as we will by then have been very active on CW on all bands.

There has been high demand for Christmas Island, especially on LF and also on 10 and 12 where, for many years, there has been little or no propagation. So far the sunspots have been helping those bands along, with 10m being our QSO leader to date. We have pretty much been working all comers to clear the decks so that we can begin to focus more on Europe where band openings are much more limited than to the US and Japan. We would appreciate cooperation from those two areas - US and Japanese stations should find plenty of opportunity to work us on all bands. We did have to delay starting our RTTY operations - our original plans would have allowed us to be on RTTY right from the start. The good news is that RTTY is now well under way on several bands. If 10m continues to play well, we may even show up on FM!

On 160, we made our first European contacts last night, Italy and Germany and at our sunset and Russia, Ukraine and Finland at our sunrise. Hopefully these openings will improve over the next week or two. 80m shows a similar pattern but with longer openings, but right now only our topband station has access to the Beverages.

We will continue to make regular updates on our website and Michael G7VJR will no doubt update Twitter while he is here (he leaves with the first group next week). The online log on ClubLog is getting a very high hit rate, as expected - we are uploading logs twice a day, at 7am and 7pm local time here. The Internet connectivity from the hotel is turning out to be better than we had anticipated (since our site visit a year ago the hotel has installed a satellite Internet), and not only does this make log uploading easier but has meant that we have been able to follow everyone's feedback better than expected - we are grateful for that and it feeds into our daily team meetings. There is a feedback facility on the t32c.com website, which is the best way to reach us.

Finally, for that small but enthusiastic group of 6m EMEers, we are still hoping to give this mode a go in the second two weeks of the expedition, but cannot at this time make any guarantees.

Don G3XTT
T32C Publicity Officer

Latest news from Rotuma.
73 Nenad VE3EXY

Today is the sixth day of our activity. Propagation not so good,
but our team continues to work with much pleasure. Current situation,
as you can see on the chart, is 54.600 QSO's.

Important: We must finish our activity 12 hours earlier than what was anticipated in our schedule. Our last QSO will be on October 5th at 11:00 GMT. Our expected time of departure will be at 12:00 GMT, October 5th from Rotuma to Suva, Fiji Islands.

We will do our final LOG update upon arrival in Suva, Fiji on October 8th 2011. There shall be no more updates from Rotuma Island after this.

On-line log is at: http://www.qslnet.de/member/yt3w/yt1ad/logsearch.php

Thanks for all contacts,

directional-and-non-directional-antenna-systems/hp-rca-rotatable
---
Stations in Nigeria may use the special prefix 5N51 during the month of
October to celebrate 51 years of independence of Nigeria.

9M2, WEST MALAYSIA, AS-073
Andrea,9M2/IZ1MHY, will be QRV in holiday style working in SSB on
10m/15m/20m from Redang Island (AS-073) until Oct 9.
QSL via homecall and LoTW.

CY0, SABLE ISLAND, NA-063
Al,VE1AWW, is working on Sable Island (NA-063) from Oct 5 until Dec 31
and will be active as CY0/VE1AWW during his spare time. QSL via VE1AWW.

D2, ANGOLA
Craig,MM0SSG, is working as D2SG during his spare time for the next six
to nine months, also in CW with max. 25 wpm. Please be aware that power
failures are normal in this area. QSL via GM4FDM and LoTW.

DL, GERMANY
DM55JES stands for 55 years of amateur radio in the town of Jessen.
The special event station with the DOK 55JES is active until Dec 31.
QSLs should be sent via burau or direct to Andy, DK4WA.

G, ENGLAND, EU-005
The special event station GB40HMSB celebrates the 40th anniversary of
the arrival of HMS Belfast in London until Dec 31. QSL via G0TOC.

Check their website at: http://www.gb2rn.org.uk/home/home.shtml
---
The special call GB650JP is activated until Oct 28 to mark 650 years
of Justices of Peace serving the community in England and Wales.
QSLs will be sent automatically via the bureau, direct QSLs via G0OOO.

H4, SOLOMON ISLANDS, OC-065
Jacek,SP5DRH, will show up as H40KJ from Pigeon Island (OC-065) mainly
in CW on 160m (focussing on Europe) and 80m and in RTTY on 17m/15m from
Oct 8-21. QSL via SP7DQR, the log will be uploaded to the LoTW as well.
See also his website at: http://www.sp5drh.com/h40

HK0/SA, SAN ANDRES ISLAND, NA-033
Daniel,HK0/DL5YWM, will be active from San Andres Island (NA-033)
working in CW/SSB on 6m-40m from Oct 5-13. QSL via DL5YWM.
A quick side-trip to Providencia (NA-049) may be possible as well.

JA, JAPAN, AS-007
The special event station 8J2SUN is celebrating the 40th anniversary
of Susono city on Honshu (IOTA AS-007, WLOTA 2376) during October.
QSL via bureau.

LA, NORWAY
Some members of the Nedre Romerike Gruppe av NRRL are activating the
special callsign LM9L40Y until Dec 31 to celebrate their 40th jubilee.
QSL only via bureau to LA9L or via LoTW.

PA, THE NETHERLANDS
The special event stations PG540BUFFALO and PG540BUFFALO/J will show up
on the bands between Oct 7 and Nov 3. They are celebrating the friend-
ship between the HAM radio groups "Projectgroep 540" (Kennemerland) and
"The Buffalo's" (Zandvoort). QSL for PG540BUFFALO via PA2REH and for
the JOTA station PG540BUFFALO/J via PA0SNY. See also QRZ.com.

PY, BRAZIL
Members of the Teresina DX Group will be QRV in SSB/CW/RTTY on 160m-10m
signing ZW8TS from the Sete Cidades national park from Oct 6-9.
QSL via PS8NF. Their website is: http://www.teresinadxgroup.com

UJ, UZBEKISTAN
Takhir,UK/UA1ZEY, is active from Samarkand mostly in CW on the HF bands
until Oct 13. QSL via RW6HS (direct), UA1ZEY (bureau).

V4, SAINT KITTS AND NEVIS, NA-104
John,W5JON, is going to become active again as V47JA from Calypso Bay
on St. Kitts (NA-104) between Oct 10 and Nov 5. Listen for him in SSB
on on 6m-80m (incl. 60m) and also in the WWDX SSB Contest (SOAB class).
His XYL Cathy,W5HAM, will show up as V47HAM from time to time.
QSLs via W5JON and LoTW.

VE, CANADA
The special event station VC3ARCI celebrates the 50th anniversary of
the QRP Amateur Radio Club International. QSL via VA3JFF.

VK0/MQ, MACQUARIE ISLAND, AN-005
Trevor,VK8TH, is working as VK0TH on 80-6m from Macquarie (IOTA AN-005,
WAP AUS-08, WFF VKFF-566, Grid: QD95lm) with 100 watts and a vertical.
The length of his stay is not known. QSL via JE1LET (direct).
He has been spotted also in PSK on 20m (working Europe on 14070 kHz
after 0600 UTC). This is very interesting since Macquarie Island should
be on top of the most wanted lists for all digital modes. A logsearch
is available at: http://www.hrdlog.net/SearchQSO.aspx?log=0TH

XU, CAMBODIA
Hiroo,JA2EZD, is active again as XU7SSB and XU7AAA working in SSB on
17m-6m until the mid of October. QSL via homecall.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 5/6: DIG Birthday Contest
Oct 7-9: DX/NA YL Anniversary Contest
Oct 8: The Makrothen Contest (part 1 and 2)
Oct 8: VFDB Contest (part 5 and 6)
Oct 8: European Sprint Contest
Oct 8: FISTS Sprint Contest
Oct 8/9: Oceania DX Contest
Oct 8/9: Scandinavian Activity Contest
Oct 9: North American Sprint
Oct 9: ON Contest 80m
Oct 9: The Makrothen Contest (part 3)

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Michael,EA8/DL3FCG, will stay on Tenerife from
Oct 9-17. QSL via DL3FCG.

AS-024, JA6, Yaeyama Islands: Kan,JE1SCF, is working on Yaeyama Island from
Oct 6-8 and will be active as JE1SCF/JR6 during his little spare time.
QSL via JE1SCF (bureau/direct).

EU-023, 9H, Malta group: DL8KX and DD8ZJ will sign 9H3KX in SSB and CW on
the HF bands from the island of Gozo (WLOTA: 0046) from Oct 8-14.
QSL via DL8KX (bureau/direct).

EU-058, F, Provence-Cote d'Azur: F/IZ4BBF will be QRV in SSB and CW on the
usual IOTA frequencies on 40m=10m from Sainte Marguerite Island from
Oct 13-16. QSL via IZ4BBF (bureau/direct).

EU-083, I*1, Liguria Region group: IZ4AMS/p plans to become active from
Tinetto Island in SSB on 20m/40m/80m on Oct 9/10. QSL via IZ4AMS.

OC-239, YB9, Irian Jaya's Coastal Islands West: YB9WZJ/p and YB0MWM/9 are working from Doom Island in SSB and also some RTTY/PSK31 on 20m and 17m until Oct 8. QSL via YB9WZJ.

OPs WANTED

David,GI4FUM, of CQ DX African Safaris writes (http://www.3da0ss.net):
"I'm planning to run a DXpedition to Namibia next March. Our host is
Andre,V51B, in Oranjemund in Southern Namibia. The plan is to fly into
Cape Town at the beginning of March and spend a few days there sight seeing:
Table Mountain, Robin Island, wine tasting in the Stellenbosch area etc.
We would then hire vehicles and drive up the west coast to Oranjemund for
10 days operating prior to putting an entry in for CQ WPX SSB which is
24th/25th March. There would be the opportunity to do some sight seeing in
Namibia. Return home via Cape Town."
If you are interested in joining him, please send David an e-mail.

SAVE DX LOGS!

This appeal comes from Bob Schenck, N2OO: "If anyone knows of any DX or
DXpedition logs and blank cards that are in jeopardy of being trashed,
PLEASE save them! If you are a QSL Manager and can't be bothered any more,
PLEASE contact us! Contact the QSL Managers Society and we pledge to locate
a quality replacement QSL Manager. Just because a DXpedition log is old it
does not mean that it is not worthy of being saved!"

Ohio/Penn DX Special Bulletin No. 1030.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1030.2
BID: $OPDX.1030.2
October 5, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network OH2BH, OH2BN and W2VU for the following DX information.

CQ NEWS (w/correction): The following was received by Rich Moseson, W2VU, Editor: FOR IMMEDIATE RELEASE - CQ ANNOUNCES ADDITIONAL PLAQUES FOR CQ DX MARATHON - "CQ magazine is pleased to announce a significant expansion in the number of DX Marathon plaques to be awarded each year. Presently, the Northern Illinois DX Association sponsors the only two plaques – one for the top Unlimited Class score and one for the top Formula Class score. Starting with the announcement of the 2011 Marathon results in the June 2012 issue, DX Marathon Administrator John Sweeney, K9EL, says additional plaques will be awarded for the following top scores:

Top CW score – Plaque sponsored by Bencher, Inc.

Top SSB score - Plaque sponsored by the Collins Amateur Radio Club in Memory of Art Collins, W0CXX

Top Single band scores (10,12,15,17,20,30,40,80) – Plaque sponsor wishes to remain anonymous

Top Continental scores - Plaque sponsor wishes to remain anonymous

An additional sponsor for top Digital Mode score is desired. Please contact the DX Marathon Administrator, K9EL, at k9el@dxmarathon.com if you wish to sponsor this plaque.

Please check the DX Marathon website (www.dxmarathon.com) for details on the new plaques and qualifying scores.

With the addition of the Republic of South Sudan to the DXCC list, CQ has also added the Republic of South Sudan as a qualifying entity for the 2011 DX Marathon. An updated score sheet (2011.4) and updated CQ Country Lists are now available on the DX Marathon web site.

The CQ DX Marathon is a year-long activity encouraging DXing on the HF bands. Competition begins anew each January 1st. Details are available on the CQ magazine website (www.cq-amateur-radio.com) and on the DX Marathon website."

OH0X PRESS RELEASE: Report received from Martti, OH2BH/OJ0X,
-- 73 Jarmo OH2BN

"MARKET REEF WITH NEW BLOOD - OCTOBER 4

It was at noon on Tuesday when the second and third week teams changed on the fly and quickly put fresh energy and two signals on the air again, now with a repaired Alpha 91B. It works! From now on OH1ND, OH2BH, SM0W and SM6U are in command.

An exhausted team of OH1TV, OH2BAD, OH2BO and OH5BM was sent home to get on with life as landlubbers again. Their 16.500 QSOs were added to the Log Search facility at QRZ.COM, now totaling some 37,000.

With lots of IT expertise and new data equipment, it still seems that the Internet is not reliable and more work needs to be done. The teams left four people on the small island of Ensk&#65533;r between OH0 and OJ0 to install a new cell site so traffic can be boosted for data and news delivery to the outside world.

After running their first thousand QSOs, mostly on 15m SSB to Japan and USA, the ops heated the island sauna behind the breakwater and enjoyd their new remote life.

They now have three complete stations, squeezing all available power from the wind generator charged plant. The overall target is set at 50,000 QSOs, and they have decided not to leave the reef before that goal is accomplished.

The wind is gathering momentum but the team is safe."

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-10-06
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** MMMonVHF Meeting 2011 at Danube valley JN48nb **

The Team of MMMonVHF have had a nice Meeting with a lot of fun
during the past "long" weekend. As guestï¿½s Pete, OE5MPL and
Ebbi, DL8SCQ (with his wife Elena) was visiting us and took
part at some trips around JN47/JN48. Some discussions about
future plans and goals of MMMonVHF have been done and we are
have to find some good solutions - in detail the USER of the
VHF-DX-Portal will be informed after the changes have been done.
As well there was a nice GEOCACHING trip through the hilly area
of Danube valley and the "cache treasure" was found and a Travel
-Bag was placed in the cache look at:

** SAD NEWS AGAIN - Al, WA4EWV got SK **

t is with great sadness that my good friend Al WA4EWV passed away
September 30th,2011 at a hospital in Tallahassee Florida, following
a brief illness. Those who knew Al will remember his quick smile,
kind nature & truly wonderful sense of humour. I met Al & Bettie
while wintering in Florida.Al was very interested in satellite work
& EME putting together a very nice station.He loved chasing new
countries. Al was a captain for Delta airline & flew a 767-ER from
Atlanta to Frankfurt & back every week.As he flew over Nova Scotia
& Newfoundland every week He said to me when I retire I will visit
Atlantic Canada instead of flying over it all the time. So he did

& that is when I met Al & Bettie. Al had a brilliant mind when it
came to computers & often helped me with problems I could not
resolved. Al was a great friend & a devoted husband to Bettie & an
equally devoted Father to his three children. He was taken far too
soon, & too suddenly. I will miss you, we will miss you. Rest in
Peace my dear friend - SOURCE: Serge VE1KG via MoonNet
The Team of MMMonVHF will pass our deep sympathy and condolences
to his family. Rest in peace dear Al! SOURCE: The MMMonVHF Team

** Mek, SP7VC, qrv from Lichtenstein, HB0, HF & 6m **

Mek, SP7VC, will be active as HB0/SP7VC on 25-31 October 2011 from Liechtenstein. Bands: 160-10m plus WARC SSB, 6m if open - also active in CQWW DX SSB Contest (29-30 October). Equipment will consisted of: IC-746, HEX Beam, R-7 vertical, INV-L 160 and 80m, 3el yagi for 50Mhz, ALPHA 76A, PA 6m. QSL via home call, direct or bureau. Logs will be uploaded to LoTW. [NG3K]
SOURCE: ICPO Bulletin (23-30 September 2011)

** LA6Q EU-061 qrv HF & 50 MHz **

Hello. LA6Q will be active from IOTA EU-061 Spjï¿½rï¿½y (Spjaeroy) Island. Operators: LA5UKA Bjï¿½rn and LA9VDA Trond. Dates: 7 - 9th October. Bands: 6m ms and 10 - 40m. Modes: SSB, CW, DIGI. QSL via LA9VDA, more info at qrz.com <http://qrz.com>. 73
SOURCE: LA9VDA, Trond via [GOLIST]

** V4, SAINT KITTS AND NEVIS, NA-104 **

John,W5JON, is going to become active again as V47JA from Calypso Bay on St. Kitts (NA-104) between Oct 10 and Nov 5. Listen for him in SSB on on 6m-80m (incl. 60m) and also in the WWDX SSB Contest (SOAB class). His XYL Cathy,W5HAM, will show up as V47HAM from time to time. QSLs via W5JON and LoTW. ** VK0/MQ, MACQUARIE ISLAND, AN-005 **

Trevor,VK8TH, is working as VK0TH on 80-6m from Macquarie (IOTA AN-005, WAP AUS-08, WFF VKFF-566, Grid: QD95lm) with 100 watts and a vertical. The length of his stay is not known. QSL via JE1LET (direct). He has been spotted also in PSK on 20m (working Europe on 14070 kHz after 0600 UTC). This is very interesting since Macquarie Island should be on top of the most wanted lists for all digital modes. A logsearch is available at:
http://www.hrdlog.net/SearchQSO.aspx?log=VK0TH
SOURCE: DXNL 1748 - Oct 5, 2011

** CM86,87,94,95 Grid Trip Schedule / qrv 50 MHz **

Thanks to all who responded with thoughts regarding a drive business trip I need to make between DM13 and CM97. Predictably, only a few

FFMA chasers (within meteor scatter range) needed grids located up and down the coastal southern half of California - other than CM79 and offshore CM93/DM02. However, there were a number of the gang who needed grids for their WSJT awards. That's enough "need" for me! My plan will be to make two grid line stops on the way up to Santa Clara CM94/95 and CM86/87. If the CM86/87 line stop doesn't pan out I will split the time so both get some action. While the trip will focus on WSJT because Es aren't expected, I will be watching for them closely. Anyone needing these grids (but do not use WSJT) wanting to try CW or SSB scatter, simply drop me a note. We'll make a sked and give it go. CM94/95 October 12 starting at 1300z - through morning...will look for Es CM86/87 October 13 starting at 1300z - throughout day if possible ...will look for Es - Call K7BV - Reports I send grids & use ST/SH for RRR and 73. You please NO grids and DO use SH/ST. Frequency/mod 50.255 - FSK441/ISCAT, me always in 1st sequence. If Es appear, will try 50.155. Station KW to 3el yagi at 20 feet, FT 450 Coordination I do expect to have Internet access to Ping Jockey. ON4KST if Es appear. If I missed anything, please let me know. Thanks for the fun! 73

** DL89/DL99 for Christmas? **

I have been doing some thinking...always a dangerous thing. My XYL is going to be back home in Indonesia visiting family over the Christmas/New Year holiday period. Sooooo...I am thinking a quick (?) run out to the DL89/DL89 grid line to operate for 3-4 days to catch some winter Es for the Leader Board gang and others might be a worth while venture. Certainly such a trip in the summer Es would probably be more successful. However, I will not be able to do that after my move to FM04 this winter. My thoughts about a DL89/DL89 grid line trip are:
1. Winter Es during that week often produce good 1hop openings as well as some 2hop Es which would be required for contacts to New England and to the PacNW.
2. Meteor scatter QSO would be possible for a very large portion of the USA.
3. A portable set up on 6m with a KW and 7 elements...or even 3el's ...probably hasn't been done from this area in some time, if ever, therefore, such an operation very well might score a new grid or two for many who need them for FFMA.
Of course on the down side, we have: -Maybe the band wouldn't open at all and only the meteor scatter people would benefit.-The drug runners would put a bullet in my head. - My wife would put a bullet in my head because this trip would cost about $600 for fuel, eats, sleeps. This type of adventure easily falls within parameters for my motto "True Adventure Requires an Uncertain Outcome" therefore it makes sense to me! Your thoughts and suggestions please. k7bv"at"aol.com if you wish to send a private msg.

** 3D2C, CONWAY REEF ACTIVITY 2011 on HF and 6m & 2m (EME) **

LATEST NEWS from Lance, W7GJ, via Magic Band EME, dated 2011-09-29:
I spoke to them on 28 mHz while they were enroute. There will be no
6 or 2 meter EME operation. They lost the container with all that
equipment because of a ship breakdown and they will not get the
container. Looks like another chance lost, but hopefully they will
have better luck with shipping on their next DXpedition!
SOURCE: tnx to Lance, W7GJ direct to MMMonVHF

** 3D - Fiji - qrv HF & 50 MHz **

Seb, F8IJV, is making plans to be in Fiji during October 2011
(dates are not final yet). Activity will be limited to his free
time (this will not be a DXpedition). He has received his license
and will use the callsign 3D2JV. Seb will be active from the QTH
of Tony, 3D2AG, located in the capital city of Suva, on the island
of Viti Levu (OC-016, WLOTA L-0055, Grid Loc. RH91), Fiji. He plans
to be QRV on 160-6 metres, mainly on SSB and FM on 10 metres, and
possibly some Digital modes. Seb also plans to participate to the
2011 CQWW DX SSB Contest (29-30 October) while there. If it is
possible he may go to Rotuma (OC-060) by plane, if it is not too
expensive. He would like to operate a few days from there. The
equipment to be used will be an Yaesu FT-450, 5 band Spiderbeam,
and three vertical antennas for the 160/80/40 metre bands (possibly
a K9AY for reception). QSL via his home callsign, direct or bureau.

** K4L from St George Island and qrv HF & 50 MHz **

Members of the Kennehoochee ARC (W4BTI) will be active as K4L
from St George Island (NA-085) and lighthouse on 5-9 October.
They plan to operate CW, SSB, PSK and RTTY on 160-6 metres.
An OQRS will be activated at the conclusion of the operation
(details on qrz.com). Traditional direct requests should be sent
to The Kennehoochee Amateur Radio Club, P.O.Box 1245, Marietta,
GA 30060, USA. SOURCE: 425 DX News

** PJ2 - Curacao - qrv HF & 50 MHz **

Andy, DK5ON (EPC #11731, DMC #03870), will be active as PJ2/DK5ON
from the island of Curacao (IOTA SA-099, WLOTA 0942, Grid Loc. FK52)
from 12-30 March, 2012. Plans are to be QRV on 40-6m SSB, RTTY, PSK
and CW. Andy will be using TS 480 SAT at 100W, 10/15/20/40 Dipole
WARC 12/17, +Buddipole,+Buddystick, +Long Wire. QSL via home call,
driect or bureau. No eQSL! Website: www.qrz.com/db/DK5ON
SOURCE: dx-world.net and ICPO

** XU, CAMBODIA, qrv HF and 50 MHz **

Hiroo,JA2EZD, is active again as XU7SSB and XU7AAA working in SSB
on 17m-6m until the mid of October. QSL via homecall.
SOURCE: DXNL 1748 - Oct 5, 2011

** TUVALU (RI91OL) DXpedition qrv HF and 50 MHz Activity **

With the "Pacific DXers" postponing their DXpedition to Nauru, the
group has reorganzied their first DXpedition to Tuvalu to take place
between November 11th and December 8th. Callsign will be T2T.
Operators mentioned are Eddie/VK4AN, Bill/VK4FW, Eric/VK4NEF,
Tim/NL8F, Jay/K4ZLE and Julian/W5SL. Activity will be on all HF
bands, 160-6 meters using CW, SSB, RTTY and PSK31. They expect to
have at least 3 stations on the air with a dedicated station set
up on 6 meters running in an interrupted beacon mode. QSL Manager
is the Pacific DXers, or by the Bureau via VK4FW. Bureau requests
are also accepted by E-mail to eliminate sending your QSL via the
Bureau (saves time!). PLEASE NOTE: VK4FW is the current QSL Manager
for Pacific DXers: Bill Horner, 13 McConnell Rd, Maidenwell, QLD
4615, Australia --or-- via E-mail: QSL-Mgr@pacific-dxers.com If an
InterNet connection (doubtful) can be established during the
operation an online log will be updated on a regular basis,
otherwise it will be uploaded as soon as they retrn home. LoTW and
eQSL will be uploaded within 12 months after the operation finishes
For more details and updates, visit:
http://c21.pacific-dxers.com/T2T.html
Please note: Operators K4ZLE, VK4AN, VK4FW, VK4NEF and W5SL will
operate from Fiji prior to Tuvalu between October 26th and November
9th. SOURCE: Ohio/Penn DX Bulletin #1029

** T32C Bulletin #7 (Press Release) **

We have now been operating for four days and have passed the 50,000
QSO milestone. There is still almost 3 weeks to go, so those who are
still needing us on various bands and modes have many opportunities
still to come. This bulletin is by way of a summary of what has been

done and what is planned.
Bear in mind that this has turned out to be something of an unplanned Field Day style operation, and we now have no expectations of our container of equipment arriving while we are here on Christmas Island Instead, the team hand carried just over one metric tonne of equipment (poles, cables, radio gear, computers, etc) to the island We are extremely grateful to all those who loaned equipment at short notice to help enable the expedition to take place and be successful Inevitably we have had teething problems, as we have a variety of amplifiers, Microham routers, etc. where we would, ideally, like to have standard equipment and interfaces. Fortunately the transceivers are consistent as Yaesu came to our rescue with the loan of ten FT-450D radios at very short notice.
Antenna-wise, we have two-element vertical dipole arrays by the sea for 20 through 10, quarter-wave verticals with elevated radials for 30 and 40, a quarter wave vertical with ground radials for 80 and a 15m high T antenna with ground radials for 160. We also have two Beverage receive antennas for 160 and now have additional vertical dipoles for 10, 15 and 20 to allow us to retask the low band stations as second stations on those bands when LF is closed. We are continually refining our antenna systems within the limits of the wire, poles and coax that we have here, though the second tranche of operators who arrive in a week's time will bring more.
We started our SSB operations at the weekend with an entry in the Oceania SSB contest in which we believe we have comprehensively beaten the previous contest records. We will not, however, be entering the CW leg as this would undoubtedly lead to a lot of unnecessary duplicate contacts as we will by then have been very active on CW on all bands.
There has been high demand for Christmas Island, especially on LF and also on 10 and 12 where, for many years, there has been little or no propagation. So far the sunspots have been helping those bands along, with 10m being our QSO leader to date. We have pretty much been working all comers to clear the decks so that we can begin to focus more on Europe where band openings are much more limited than to the US and Japan. We would appreciate cooperation from those two areas - US and Japanese stations should find plenty of opportunity to work us on all bands. We did have to delay starting our RTTY operations - our original plans would have allowed us to be on RTTY right from the start. The good news is that RTTY is now well under way on several bands. If 10m continues to play well, we may even show up on FM!
On 160, we made our first European contacts last night, Italy and Germany and at our sunset and Russia, Ukraine and Finland at our sunrise. Hopefully these openings will improve over the next week or two. 80m shows a similar pattern but with longer openings, but right now only our topband station has access to the Beverages.
We will continue to make regular updates on our website and Michael G7VJR will no doubt update Twitter while he is here (he leaves with the first group next week). The online log on ClubLog is getting a

very high hit rate, as expected - we are uploading logs twice a day
at 7am and 7pm local time here. The Internet connectivity from the
hotel is turning out to be better than we had anticipated (since
our site visit a year ago the hotel has installed a satellite
Internet), and not only does this make log uploading easier but
has meant that we have been able to follow everyone's feedback
better than expected - we are grateful for that and it feeds into
our daily team meetings. There is a feedback facility on the
t32c.com website, which is the best way to reach us.
Finally, for that small but enthusiastic group of 6m EMEers, we are
still hoping to give this mode a go in the second two weeks of the
expedition, but cannot at this time make any guarantees.

==> + ON THE AIR: 10 METERS IS HOT!

For the past few days, the solar flux has been hovering around 130.
While this is down from a peak of 190 -- the highest we've seen in
Solar Cycle 24 -- just 11 days ago, the higher HF bands are definitely
feeling the effect. Higher solar flux levels can mean higher sunspot
levels and this is good news for radio amateurs, especially
Technicians. The 10 meter band is the only HF band where Techs have
phone privileges. "Techs can get use their voice privileges from
28.300-28.500 MHz," explained W1AW Station Manager Joe Carcia, NJ1Q.
"If you don't have your own HF rig, find someone in your local radio
club who does or call your Elmer. Without a doubt, you don't want to
```

miss this opening. Who knows how long it will last or when it will come back? So get on the air while you can and experience the magic of 10 meters." The solar flux is predicted to hit 140 <http://www.swpc.noaa.gov/ftpdir/latest/45DF.txt> on October 12 and stay at that level for almost a week. Read more here <http://www.arrl.org/news/attention-techs-10-meters-is-hot>.

==> + WRC-12: EUROPEAN PROPOSAL FOR AMATEUR SECONDARY MF ALLOCATION CLEARS IMPORTANT HURDLE

In preparation for the 2012 World Radiocommunication Conference (WRC-12 <http://www.itu.int/ITU-R/index.asp?category=conferences&rlink=wrc-12&lang=en>), the CEPT Project Team C <http://www.cept.org/ecc/groups/ecc/cpg/cpg-pt-c> approved a draft European Common Proposal (ECP) for an 8 kHz-wide band between 472 and 480 kHz at its September meeting. The draft ECP will now go to CEPT's Conference Preparatory Group for formal ratification in November. This breakthrough -- at the 11th and final meeting of the project team -- occurred with the submission by the UK's Ofcom of an RSGB-drafted compromise ECP proposal that is also supported by France and Sweden.

Agenda Item 1.23 calls for WRC-12 delegations to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services. "While an 8 kHz allocation does not fully meet our objective of 15 kHz, having a European Common Proposal for an amateur allocation is a major step toward possibly achieving one at WRC-12," said ARRL Chief Executive Officer David Sumner, K1ZZ.

According to Colin Thomas, G3PSM, the prospect of an agreed CEPT position is good progress, representing a 48 country block vote going into next year's WRC-12. "It needs to be noted that the draft ECP comes with significant caveats to avoid interference to the primary user, as well as the existing secondary user services," he explained. "These are the maritime and aeronautical radionavigation services, respectively. As secondary users, we would also not be afforded any protection. It should be acknowledged that we have had support from a number of Region 1 IARU Member-Societies in getting to this position." Thomas is the CEPT Coordinator for this agenda item.

==> + EVERY RADIO AMATEUR KNOWS THAT SPECTRUM DEFENSE MATTERS

The second edition for 2011 of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- was recently released on the ARRL website. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can help protect these privileges by contributing generously to the 2011 ARRL Spectrum Defense Fund. Defending spectrum means protecting the way each of us chooses to enjoy

Amateur Radio. It is important to have VHF/UHF allocations when radio amateurs are called upon to provide support during communications emergencies. But Amateur Radio is primarily a personal radio service where licensees have great latitude to develop their skills, experiment to broaden their knowledge base, serve their communities and to simply have fun. Click here
<http://www.arrl.org/news/every-radio-amateur-knows-that-spectrum-defense-matters>
to read about some of the Spectrum Defense items featured in this issue of Spectrum Defense Matters.

==> + CHECK OUT THE NOVEMBER ISSUE OF QST

The November issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

Now that the colder months are here, thoughts turn to tinkering in the shack. If your radio doesn't come with digital signal processing capability, why not build a DSP speaker? DSP cuts out the unwanted noise and gives you only the signal you want to hear, adapting to changes in the signal's conditions. Allen Baker, KG4JJH, offers a schematic for a DSP speaker in his article "Build Your Own DSP Speaker." In designing a modern-day antenna, Dave Holdeman, N9XU, recalls a "plumber's delight" from his Novice days in his article "A 160 or 80 Meter Downspout Vertical." Build a self-contained multi-oscillator that allows for convenient and precise SSB transmitter adjustment after you read "A Four Tone SSB Test Generator" by Dave Lyndon, AK4AA.

If you have an Android smartphone, you probably have a couple of Amateur Radio-related apps on it. But how do you know which one is right for you? William F. Vartorella, KJ4ORX, presents a handy guide in "Android Apps for the Amateur." With so many insurance options available, it can get confusing when looking for the best coverage for your ham gear. In his article "Homeowners Insurance and Your Radio Gear," Ray Fallen, ND8L, discusses how to purchase insurance for your station.

ARRL Emergency Preparedness Manager Mike Corey, W5MPC, takes a look at the Yaesu FT-450D HF and 6 meter transceiver in this month's Product Review. He says that this rig "adds a standard internal antenna tuner, new CW filter bandwidths and several ergonomic upgrades to the original FT-450. These refinements make a popular, low-cost transceiver even better." ARRL Test Engineer Bob Allison, WB1GCM, checks out the Elecraft XG3 RF signal source: "The Elecraft XG3 is a compact, accurate signal source with a variety of uses in the Amateur Radio station or at the workbench."

Of course, there are the usual columns you know and expect in the November QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX,

Technical Correspondence, Vintage Radio and more. Look for your November issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please visit the ARRL web page <https://www.arrl.org/join>.

==> AT THE WORKBENCH: THE DEADLINE FOR THE THIRD ARRL HOMEBREW CHALLENGE IS APPROACHING

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members. Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more. The deadline for the Third Homebrew Challenge is Tuesday, November 1. Read more here <http://www.arrl.org/news/the-deadline-for-the-third-arrl-homebrew-challenge-is-approaching>.

==> + PUBLIC SERVICE: NOMINATIONS NOW OPEN FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

The George Hart Distinguished Service Award may be presented by the Board of Directors to the ARRL member whose service to the ARRL's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Read more here <http://www.arrl.org/news/nominations-now-open-for-the-george-hart-distinguished-service-award>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of September -- takes a look at how the ARRL briefed members of the White House staff on Amateur Radio's capabilities during emergencies, how the ARRL Lab is investigating power line noise, the upcoming Director elections in the ARRL's Atlantic, Delta and Midwest Divisions, the search for a new ARRL Treasurer, recognizing radio amateurs for technical excellence, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-38>.

==> + SECTION NEWS: NEW SECTION MANAGER APPOINTED IN NORTH TEXAS

Effective Wednesday, October 5, the ARRL North Texas Section has a new Section Manager. Jay Urish, W5GM, of Flower Mound, stepped down for personal reasons. He has served as North Texas Section Manager since

April 2009, and was re-elected to a second term in April 2011. Walt Mayfield, KE5SOO, of Krum, has been appointed the North Texas Section Manager, as of October 5, to fulfill the present term of office. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with West Gulf Division Director David Woolweaver, K5RAV. Mayfield has served as the North Texas Section Emergency Coordinator and is the president of the Denton County Amateur Radio Association. Mayfield's appointment continues through March 31, 2013.

==> COMMITTEE NOTES: CHANGES TO ARRL ETHICS AND ELECTIONS COMMITTEE

There is a change in the composition of the ARRL Ethics and Elections Committee. President Kay Craigie, N3KN, has accepted the resignation of Southeastern Division Director Greg Sarratt, W4OZK, from the committee, thanking him for his service as chairman for the past nine months. Roanoke Division Director Dennis Bodson, W4PWF, will serve on the committee for the remainder of the one-year term. Committee member Tom Frenaye, K1KI, Director of the New England Division, will serve as chairman. Pacific Division Director Bob Vallio, W6RGG, also serves on the committee. Sarratt will continue to serve as Director of the ARRL's Southeastern Division.

==> SOLAR UPDATE

Tad "I wish the Sun would hide its head <http://www.youtube.com/watch?v=SXrfQgbhVAw>" Cook, K7RA, reports: The sunspot excitement continues, with photos of the Sun showing more and more spots. The average daily sunspot numbers for the week were about the same as the previous week, increasing from 96.1 to 96.7, while the average daily solar flux dropped from 155.5 to 132.6. Our three month moving average of sunspot numbers puts us into activity levels last seen in mid-2004. The latest NOAA/USAF forecast shows solar flux at 125 on October 6-7, 130 on October 8-12, 125 on October 13 and 110 on October 14-16. The planetary A index prediction shows 18 for October 6, 10 on October 7-8, 8 on October 9 and 5 on October 10-27. Look for more information on the ARRL website on Friday, October 7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Yellowcard's October Nights <http://en.wikipedia.org/wiki/Yellowcard>.

==> + ARRL RECOGNIZES: ROBERT MILLER, KE6F , WINS SEPTEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for September is Robert Miller, KE6F , for his article "Yet Another Crystal Calibrator -- The YACC 1-2-3. " Congratulations Robert! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your

favorite article in the October issue today.

==> THIS WEEK ON THE RADIO

This week:

- October 7-9 -- YLRL DX/NA YL Anniversary Contest
- October 8 -- FISTS Fall Sprint; EU Autumn Sprint (CW)
- October 8-9 -- Arizona QSO Party; Pennsylvania QSO Party; Makrothen RTTY Contest; Oceania DX Contest (CW); Scandinavian Activity Contest (SSB)
- October 9 -- North American Sprint (RTTY); UBA ON Contest (CW)
- October 10 -- 10-10 International 10-10 Day Sprint
- October 12 -- NAQCC Straight Key/Bug Sprint; NAQCC-EU Monthly Sprint

Next week:

- October 15 -- Iowa QSO Party; Feld Hell Sprint
- October 15-16 -- New York QSO Party; 10-10 International Fall Contest (CW); JARTS WW RTTY Contest; CQ SA Contest (SSB); QRP ARCI Fall QSO Party; Worked All Germany Contest
- October 16 -- Asia-Pacific Fall Sprint (CW)
- October 16-17 -- Illinois QSO Party
- October 17 -- Run for the Bacon QRP Contest
- October 17-24 -- ARRL School Club Roundup

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- October 8-9 -- ARRL Florida State Convention <http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>, Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention <http://www.arrl.org/hamfests/connecticut-state-convention-1>, Wallingford, Connecticut
- October 14-16 -- ARRL Pacific Division Convention <http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>, Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention <http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>, Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention <http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention

<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-1>,
Palmetto, Florida

To find a convention or hamfest near you, click here

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

WIANEWS WEEK COMMENCING OCTOBER 9 2011.

ACMA Investigates Serious Interference on Amateur Bands

WIA DIRECTOR Trent Sampson VK4TI addresses members

MICROWAVE ACTIVITY DAYS COMING UP IN VK3/4/6

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING OCTOBER 09 2011.

VK3 Centenary goes on air

For the month of November 2011 the special call sign VK100ARV will be well
sought after and qualifies toward the Amateur Radio Centenary Award.

This year is the 100th anniversary of the Amateur Wireless Society of
Victoria, formed in 1911, quickly changing its name to the Wireless
Institute of Victoria, and today is known as Amateur Radio Victoria.

A special QSL card is on offer. On the front it features defining words
capturing the spirit of the founding of the organisation and on the back a
gallery of Presidents and the information panel.

The Award certificate has a montage of the organisation over the decades.

For Australian stations a total of 100 points are required and DX stations 25 points.

Both the QSL card and certificate are worth obtaining for display and will show the Centenary logo.

(Jim Linton VK3PC)

A WHITE pointer shark sighting last month is the first off the Rockingham coast in VK6 since a fatal attack resulted in a monitoring station being installed at Warnbro Sound.

Authorities issued a warning after a 5m great white was spotted near Kwinana Power Station, movement was picked-up by a Department of Fisheries tracking station, 600m off the coast of Port Kennedy Foreshore Park.

20 listening posts are placed along the metropolitan coastline to monitor shark activity.

Now this newer deterrent to sharks may not be as great as first thought!

The project receivers do not detect sharks, they can only detect acoustic transmitters that have been attached to sharks. The officials say they can only detect up to 120 sharks that have been tagged!

Let's hope those 120 are the only "hungry ones!"

Carter Edwards, Sunday night host on the "Super Radio Network" across Australia had as a guest Jeff JOHNSON VK4XJJ at the completion of Jeff's Walk Across Australia.

(Snippet of Carter/XJJ interview)

If you have any spare cash laying around please think about making a deposit into the NETS account.

VK Advanced three letter call signs commencing with the letter "O" now available.

Previously that block had not been used because of a fear of confusion between the letter "O" and the numeral "0".

More on http://www.wia.org.au

Greetings Fellows I am Trent VK4TI the newest addition to the WIA board - I am based on the Sunshine Coast of Queensland about 100km north of Brisbane.

My amateur radio activities have almost always revolved around contesting and that is where my main interest in board activities will lie - to that end I have joined VK6POP on the boards push to improve the lot of Australian contests.

Part of the campaign is to establish better log checking and submission provisions for the Contest managers as the board realise this is a very onerous task and one that can be implemented through software - we are hoping this may be ready for 2012.

I must thank the board for thinking of me as a director and wonder what I can do to repay them for the role. I also am totally delighted in the number of my friends who have joined the WIA after my appointment -

Regards

Trent VK4TI

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Technology has the effect of changing the interactions between people. The difference between walking, animal power and then machines such as trains saw a new mobility and knowledge of one's surrounds. The creation of written language, writing and the printing press changed the way information was spread.
Electronics enhanced the telegraph, telephone and we now have pocket computers called smart phones.

News and information, trivia and comment are available at a finger touch on a screen and the current generation of technology users take this for granted. Long gone is the pedal radio and the operator connected phone call.

It is becoming more apparent that the benefits of this new communications technology are less "Star Trek" and more adapting social standards to available technology. The growing use of instant comms demands exponential growth of infrastructure.

However, in the hobby domain we have a limited range of technologies with poor geographic distribution to serve the amateur population. Similarly the cost of hand held devices which will meld internment and telephone function is comparable with the brand name major smart phone.

For me, the question becomes will the potential radio hobbyist be able to forsake the sophistication of the commercial system with multiple apps, good available computing power and easy connectivity for the currently old and limited amateur radio service?

I'm Geoff Emery and that's what I think....how about you?

Next Meeting Monday 7:30pm October Ten at Brothers Rugby League Club Cairns.

More News from North Queensland

IEEE Northern Australia Section invites you to attend a seminar on
Wednesday 12th October, noon at James Cook University.

Peter Herbert Senior Inspector of Mines (Electrical), Mackay District will lecture on ELECTRICAL ENGINEERING IN THE MINING INDUSTRY

The talk features the speakers experiences with what can go wrong and resulting impacts.

For further information contact -
Assoc. Prof. Mohan Jacob, Chairman IEEE NA Section.

Mohan.Jacob@jcu.edu.au

Hello again from Doug Friend VK4OE from the Brisbane VHF Group.

Well, the microwave test and tune-up day on the 25th of last month was a real blast! A great day was had by all who were there and you can find pictures of the event on the VK-Logger Forum, plus the VK4ADC website.

Now, the previously described, out-in-the-field, microwave activity day is approaching on Sunday the 23rd of October. (We've altered the date to make way for JOTA.) The VHF Group is encouraging as many folk as possible to activate as many any of the bands above 1 GHz as possible.

Many folk will remember the great day that the first of these operating days was last year. We're hoping that this one will be even better!
Weather permitting, there will be stations active at elevated locations, or from their homes, from various places around South-East Queensland.
Detail of these locations will be given in a later broadcast.

Commencement time should be around 10:00 a.m. and initial liaison should be on the Group's VK4RBN repeater on 147 MHz or on SSB on 144.150 MHz
Things should last as long as the fun lasts - several hours for sure!

There is no competition happening on that day - the aim of the day is to provide an opportunity for microwave QSOs to be made, as well as for newer microwave operators to improve their operating technique. Issues like pointing of antennas and knowing what frequency to tune to sound simple but out in the field, they can make or break successful contacts.

Weather permitting, it should be another day of great fun. And, if you are not yet a microwave operator, you can still go to one of the test locations so see what's going on and to possible whet your appetite for the exciting area of amateur microwave construction and operating!

If you are coming or are interested, please feel free to contact me on 07 3391 5526 or by e-mail (QRZ correct). Members of the Group look forward to meeting whoever will come to the 2011 microwave activity day.

This has been Doug Friend, VK4OE, from the Brisbane VHF Group.

VK6

Just a reminder that the WA VHF Group 2011 Spring Scramble is just days away on Sunday 16 October 2011.

The aim of the scramble is to contact as many different stations as possible, on as many bands, 6 metres or 50MHz and above, as possible.

As the Spring scramble coincides with the JOTA weekend, JOTA stations are very much welcome and encouraged to take part in the contest...!

The scramble will run for 2 hours between 10.30am & 12.30pm local time or 0230 - 0430 UTC. The contest is divided into 2 intervals of 1 hour each (i.e.: 1030-1130 WST and 1130- 1230 WST) with repeat contacts allowed in the second interval.

Double points are awarded for contacts with portable & country stations.

The scramble is primarily for FUN and works on the honour system.

Suggested Frequencies for the Scramble are:

6M: 50.200 MHz(SSB); 52.525 MHz & 53.5 MHz(FM)
2M: 144.100 MHz(SSB); 146.500MHz(FM)
70CM: 432.100 MHz(SSB); 439.000MHz(FM)
23CM: 1296.100 MHz(SSB); 1294.000MHz(FM)

The Spring Scramble Rules and a suggested log sheet are attached and also have been published on the WA VHF Group website (www.wavhfgroup.org.au)

Details for submitting completed log sheets are included at the bottom of the rules. Closing date for logs to be submitted to the Scramble Coordinator Rob VK6LD is Monday 31 October 2011 and results will be available for the WA VHF Group November 2011 Meeting.

If anyone has any queries or questions, please don't hesitate to contact Rob VK6LD

DISCUSSION POINT

What use is an f-call?

I've now had my foundation license just over 200 days.

If I had a dollar for every time I was asked: "When are you upgrading your license?" I'd be able to retire, well, at least eat out.

I'm unsure about the sentiment.

I understand when it's asked from a place of encouragement and improvement but often times it appears cloaked in the notion that an f-call is merely a stepping stone to a "real license".

Allow me make some observations.

If I had an advanced license and I decided to engage in QRP, low power broadcasting, then I'd get accolades for my ability to get to another station on the smell of an oily rag. If I built a magnificent antenna from scratch I'd get enquiries about the design and suggestions on improvements. If I came up with a particularly nice design for a power supply, or a filter for a generator, or any number of contributions, I'd be welcomed into the ranks of a "real amateur", whatever that might mean.

You might have noticed that I could have skipped the notion of needing an advanced license, because in fact, all of this can be done with a foundation license.

You may think that I am having a go at those who snigger about the f-wit license. That's not for me to say. Instead I'm trusting that if you hold an f-call, that you gain confidence in your skills and privileges and that over time you too will become a (quote) "real amateur".

When I learnt to fly, I visualised a bubble around the aircraft. Inside the bubble is safe, outside is certain disaster. As you manipulate the controls you might move around inside the bubble, or make it larger or smaller. Initially the bubble seemed infinite in size, but as experience was gained

the bubble shrunk.

It may well be that my experience in Amateur Radio can be described as a bubble, though probably not in terms of safe-and-disaster.

When my skills in Amateur Radio improve and increase, I might determine that the bubble that restricts the foundation license stops me from exploring into fields that I'd like to investigate.

Until that time, I'm perfectly happy with
my f-call. I'm proud to have it, honoured to be a member of the Amateur Radio community and pleased to be able to explore this landscape.

I'm Onno vk6flab

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Following the recent IARU Region 1 conference in South Africa, members societies were urged to appoint a Youth Coordinator.

At the last Irish committee meeting, Ger McNamara EI4GXB was appointed to the role.

Ger is seeking ideas from members on how to best generate interest in Amateur Radio among young people

A great idea from region 1 that our own region, maybe WIA should consider.

Galileo competition for 9-11 year olds

The UK Space Agency has announced an EU Commission drawing competition for children aged 9-11.

The winning entry from each EU member country will have one of the Galileo global navigation satellites named after them.

Galileo is the European Union's global satellite navigation system.

The first two Galileo satellites are scheduled for launch on October 20 and are named Natalia and This after the children winning the competitions in Bulgaria and Belgium.

The competition is now open to other European Union member countries.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

ARRL BRIEFS WHITE HOUSE ON AMATEUR RADIO'S CAPABILITIES DURING EMERGENCIES

September 12, at the invitation of White House Cyber security Coordinator Howard Schmidt, W7HAS, the ARRL briefed several members of the National Security Staff on the capabilities of the Amateur Radio Service to communicate in emergencies.

"The White House is looking for ways that the great work of Amateur Radio operators can continue to support emergencies in the future with particular attention to increased use and dependency on Internet-based technologies," W7HASt said.

The ARRL presentation, conducted by Emergency Preparedness Manager Mike Corey, W5MPC along with President Kay Craigie, N3KN, and Chief Executive Officer David Sumner, K1ZZ focused on Amateur Radio's current and evolving capabilities to provide Internet messaging connectivity

International support for RSGB-proposed 472 to 480kHz amateur radio band

For several years the RSGB has been very actively involved in preparations for the 2012 World Radio Congress, or WRC-12.

The work centres on creating a European Common Proposal, or ECP, for a secondary amateur allocation in the band 415 to 526.5kHz. Society representatives have been working with one of CEPT's project teams to secure a positive outcome on this, the only amateur radio-related agenda item.

The CEPT project team has approved a draft ECP for an 8kHz-wide band between 472 and 480kHz. This draft ECP now goes to CEPT's Conference Preparatory Group for formal ratification in November.

This breakthrough, at the 11th and final meeting of the project team, occurred with the submission by Ofcom of an RSGB-drafted compromise ECP proposal. Whilst the 8kHz band differs from that agreed by CITEL, a similar regional grouping of countries to CEPT but in the Americas, there is a 6kHz overlap.

Of course there is still some way to go, but the prospect of an agreed CEPT position is good progress, representing a 48 country block vote going into next year's WRC-12.

NEWS FROM ARNEWSLINE USA

CQ PUBLISHING TO OFFER ALL MAGAZINES IN DIGITAL FORMAT

New York based hobby electronics publisher Richard Ross, K2MGA, has announced that his CQ Communications will launch multi-platform digital editions of all of its magazine titles before the end of 2011. These titles include CQ magazine, CQ VHF, Popular Communications and WorldRadio Online.

According to Editorial Director Rich Moseson, W2VU, the digital editions will supplement, not replace, current print editions, and will feature enhancements not possible in the print medium. Versions will be available for a variety of online and mobile platforms including PC, Mac, iPhone, iPad, Android 2.0 and higher.

Examples of features that will be possible in the digital world include live links to all World Wide Web addresses listed in each issue as well as supplemental content. This will include such additions as photo albums, audio and video files, software and more.

The digital editions of the CQ publications will be hosted by Zinio dot com. Zinio is one of the top names in the e-magazine publishing business. Moseson says that CQ's choosing of Zinio will assure that our magazines will always be able to take advantage of new technology when it becomes available.

The digital launch will begin in late October with the November issue of an enhanced, multi-platform, version of WorldRadio Online, which will again become a paid-subscription publication. This will be followed by the November CQ, which, appropriately, is the magazine's first annual Technology Special. The fall issue of CQ VHF and December issue of Popular Communications will round out the introductions.

Digital editions will be available by single copy and by subscription. Details will be in the near future in the magazines and on all CQ Communications websites. Moseson noted that many CQ book titles are already available in digital form on CD.

"THE FINAL LAUNCH" TEAM EFFORT CONTINUES

A follow up to a previous story about Special Event Station N4S that recently commemorated "The Final Launch" of America's Space Shuttle Program. This with the flight of Atlantis from the Kennedy Space Centre on mission STS-135.

It turns out that during its operation, N4S made 2,956 contacts world-wide and QSL requests are being processed. Several "QSL parties" by members of the North Brevard Amateur Radio Club are making progress in responding to all of those amateur radio operators requesting confirmation. More about this one is on-line at www.northbrevardamateurradioclub.com

The countdown has started on the Mediterraneo DX Club's DXpedition to Nepal. This operation is slated to begin on November 13th and run through the 25th. More information on this one is on-line at www.mdxc.org/nepal2011

COME AND JOIN US ON THE AIRWAVES - REVISITED

Now, the story of a music video about ham radio. It title is "Come and Join Us On The Airwaves" and it was written and performed by Andrew John Huddleston, OZ5E. Andrew, along with his wife Lissa Ladefoged, are country music devotees who live in Aarhus, Denmark, and are likely best known simply as The Ham Band. This, as a result of their 1994 CD of amateur radio related songs simply titled "Seek You."

About a decade ago, Andrew and Lissa produced a
ham radio video titled "Come And Join Us On the
Airwaves." The video features Andrew in a tuxedo
atop a 100 foot high tower and Lissa at the 60
foot level performing the song while un-corking a
bottle of Champaign. Unfortunately, when the
video was posted to YouTube, the technology of
the day did not do justice to the visual
content. Now with the advent of High Definition
video on the YouTube site, that has all changed:

OZ5E: "The original version of the video that we
uploaded to YouTube was actually quite good
quality. I would say medium quality. It was
viewed by about 18,000 people which I thought was quite impressive.

"And then the strangest thing happened. Some
other people; I think two or three other
individuals, have uploaded really low quality
versions of the video (with) the wrong aspect
ratio and rotten sound and these versions have
been viewed by no less than half a million
people. So we thought to put the High Definition
version out there so that people can see that our
(ham) radio station is a very, very pretty one."

Comparing the original posting to the new upload by Andrew using true 720p
high definition video is breathtaking. Especially when you look past the
singers on Andrew's tower and gaze at the splendour of the Danish countryside
where it was produced. It's so sharp and crystal clear that it's as close as
one can get to being there. You can experience the new Hi Definition
"Come And Join Us On The Airwaves" on YouTube.
Just use the shortcut of tinyurl.com/ham-song.

The groups website is in cyberspace at www.hamband.com

And less we forget to mention it, everyone seen on the tower was using safety
gear.

AK-47 first prize in Somali radio competition for kids

An Islamist-backed radio station in Somalia has awarded assault rifles and hand grenades to the winners of a children's Koran recital competition.

Radio Andalus, run by the al-Shabab rebel militia, said the first prize was an AK-47 and £450. The runner-up received an AK-47 and £320, while the child who came third received two F1 hand grenades and £250.

The three children also received religious books.

The Koran recital contest has been running for three years and in 2009, prizes included anti-tank mines, winners of that contest were between 17 and 20 year.

or E-mail qslmanagers@qsl.net

DL8KX and DD8ZJ will be active as 9H3KX from Gozo Island between 8th and 14th October. Their operation will be on the HF bands using CW and SSB. QSL via DL8KX either direct or via by the bureau.

(rsgb)

Just a reminder for the prefix hunters that station LM9L40Y will be on the air until the end of December. This call is operated by members of the LA9L radio club in Norway and is to celebrate the 40th anniversary of the club.

"DX Code of Conduct"
Audio by John VK2JJW

I will listen, and listen, and then listen again before calling.

I will only call if I can copy the DX station properly.

I will not trust the DX cluster and will be sure of the DX station's call sign before calling.

I will not interfere with the DX station nor anyone calling and will never tune up on the DX frequency or in the QSX slot.

I will wait for the DX station to end a contact before I call.

I will always send my full call sign.

I will call and then listen for a reasonable interval. I will not call continuously.

I will not transmit when the DX operator calls another call sign, not mine.

I will not transmit when the DX operator queries a call sign not like mine.

I will not transmit when the DX station requests geographic areas other than mine.

When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.

I will be thankful if and when I do make a contact.

I will respect my fellow radio amateurs and conduct myself so as to earn their respect.

ACMA Investigates Serious Interference on Amateur Bands

Mark Loney, Executive Manager, Operations Branch of the ACMA has advised the WIA that the Operations Branch has been investigating interference to the Mt. Cottrel and Mt. Macedon repeaters as a result of complaints made by radio amateurs.

As a result of those investigations the ACMA applied to the Melbourne Magistrates Court for the issue of a search warrant under the Radiocommunications Act 1992. The application was successful and the search warrant was executed on premises in metropolitan Melbourne Wednesday 14 Sep. with the assistance of Victoria Police.

Mr. Loney advises that as this is an ongoing investigation, the ACMA is unable to provide further details.

The WIA President, Michael Owen VK3KI says that the WIA welcomes these compliance activities affecting the amateur community.

Mr Loney points out that the successful prosecution of individuals charged with causing serious interference on amateur bands depends heavily on the

willingness of amateurs to give evidence and to provide evidentiary statements to ACMA compliance staff.

The WIA encourages all amateurs to support the ACMA investigations.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

Amateur Radio Newsline(tm) Report 1782 - October 7 2011

Amateur Radio Newsline report number 1782 with a release date of
Friday, October 7th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC unveils some new sky-high plans for
emergencies; Missouri hams called out when a communications cable is
cut; the ARRL breiefs the White House about the work of hams in
emergency communications and keep your eyes on the sky for two more
de-orbiting birds. Find out which ones on Amateur Radio Newsline(tm)
report number 1782 coming your way right now.

RESCUE RADIO: FCC STUDY ON FUTURE QUICK DEPLOYMENT EMCOMM RELEASED

The Federal Communications Commission is looking at ways to take
emergency communications to new heights. In this case we mean altitude
above mean sea level. Amateur Radio Newsline's Norm Seeley, KI7UP, has
the details:

--

The FCC has released a study detailing some possible steps to insure
reliable communications for first responders in times of natural or
man-made disaster or any form of communications crisis.

Technologies mentioned include small unmanned aerial vehicles that fly
to an altitude of 500 feet and support a single frequency band for
cellular services.

Also being looked at are weather balloons acting as repeaters to carry
multiple frequencies longer distances, high-altitude, long-distance
unmanned vehicles providing a greater payload at specific locations and
suitcase systems placed on low-flying aircraft to be used as repeaters.

The release outlines a few specifics on the potential uses of
Deployable Aerial Communications Architecture or DACA. The DACA could
be deployed within 12 to 18 hours following a disaster. Its minimum
goal would be to restore necessary lines of communication for a period
of 72 to 96 hours.

The release says that the system would restore cellular services for
wireless priority service, Government Emergency Telecommunications
Services, and 911 as well as public safety communications.

The paper notes the required cooperation of FEMA, the FAA and federal, state and local authorities on the coordination of spectrum usage and prevention of interference to and from a Deployable Aerial Communications Architecture system.

For the Amateur Radio Newsline, I'm, Norm Seeley, KI7UP, watching the developments in this emerging technology from Scottsdale, Arizona.

--

RESCUE: CUT TELECOM CABLE ACTIVATES ARES IN BENTON COUNTY MISSOURI

According to news reports, the Benton County Missouri Amateur Radio Emergency Services was called in to provide communications support early in September. This, after a cut telecommunications cable isolated the Johnson County 911 Center in the town of Warrensburg.

The Benton County hams worked with their counterparts in Johnson County quickly establishing reliable communications so that 911 calls could be handed off to Warrensburg officials for dispatch. About 15 calls were transferred and the amateur radio operators handled. At least one was of life-critical situation.

Radio amateurs remained on duty at their respective centers, until the local telephone company fixed the cable problem at 9:30 AM the next day, said Johnson County Emergency Management Director Gloria Michalski, who referred to the operators as "awesome."

The Benton County ARES group is made up of 14 active volunteers. Hey all donate their time, use their personal equipment and pay their own expenses to serve where needed. They often coordinate their efforts with the Emergency Management Center in Warsaw, Missouri. Yiu can read the entire story of this ham radio emergency response at tinyurl.com/missouri-ares-response. (W6RH, Benton County Enterprise)

**

ARRL BRIEFS WHITE HOUSE STAFF ON AMATEUR RADIO'S CAPABILITIES DURING EMERGENCIES

The ARRL has gone to Washington, once again. This time at the invitation of White House Cybersecurity Coordinator Howard A. Schmidt, W7HAS.

On September 12th, the ARRL briefed several members of the National Security Staff on the capabilities of the Amateur Radio Service to communicate in emergencies. According to Schmidt, the White House is looking for ways that the work of Amateur Radio operators can continue to support emergencies in the future with particular attention to increased use and dependency on Internet-based technologies.

The ARRL presentation was conducted by Emergency Preparedness Manager Mike Corey, W5MPC along with President Kay Craigie, N3KN, and Chief Executive Officer Dave Sumner, K1ZZ. It focused on Amateur Radio's current and evolving capabilities to provide Internet messaging connectivity. (ARRL)

**

WORLDBEAT: NETHERLANDS BECOMES PRO-ACCTIVE TO STOP NON CERTIFIED TRANSMITTERS FROM ENTERING THAT NATION

The Netherlands will soon be a rather unfriendly place for those wanting to bring non-certified radio transmitting gear into that nation.

According to Media Network, the Dutch Radiocommunications and the Dutch Customs Agencies have pledged to cooperate in tackling the trade of illegal broadcasting equipment in Europe. The goal of this collaboration is to stop at the border the import of transmitters that do not comply with European regulations.

Through cooperation with Customs the plan is to prevent these transmitters entering the Netherlands, or being marketed and used elsewhere in Europe. Once in Europe, there is freedom of movement of goods between European Union member states, so other countries are also working intensively with their respective customs authorities.

There is also a close watch on devices being sold on the Internet. The Dutch Radiocommunications Agency says that it is working with eBay and the nations domestic site Marktplaats to counter the trade of what it terms as hazardous transmitters. It also is cooperating with the supervisory authorities of other European Union member states, the United States and Canada in this area.

The agency says that this proactive approach is more effective than enforcement actions against retailers later when the transmitting devices already for sale. (Media Network, RadioMagazine.nl)

**

WORLDBEAT: GREECE'S NATIONAL SOCIETY GETS 5 MHZ PERMIT

The Greek Ministry of Communication has given authorization to the headquarters club station of the Greek national amateur radio society for use a single frequency in the 60 meter band. SZ1SV is being permitted to operate on 5398.5 kHz using SSB, CW and Digital with a maximum power of 100W PEP. The national society says that it hopes to have a beacon on this frequency soon.

The latest 60 meter amateur radio information world-wide can be found on-line in the 5 MHz Newsletters. Its in cyberspace at tinyurl.com/6fkhcmf (G4MWO, Southgate)

ENFORCEMENT: $15000 NAL REDUCED TO $450 FOR NEW ORLEANS AREA CB OPRERATOR

A New Orleans area CB operator has had a proposed $15,000 fine reduced to $450. This after appealing the initial Notice of Apparent Liability back to the FCC. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with more:

--

Last June 7th the FCC Enforcement Bureau's New Orleans Office issued the $15,000 Notice of Apparent Liability to one John Hays of Bourg, Louisiana..this for allegedly operating his Citizens Band transmitter without the requisite Commission authorization.

As discussed in detail in the NAL, the proposed fine was issued after it was determined that despite verbal and written warnings by agents of the New Orleans Office, Hays continued the unlicensed and overpowered operation of a CB transmitter attached to a linear amplifier from his place of residence.

In his response, Hays acknowledged to the FCC that this was a very serious matter and he had not taken it lightly. He also stated he had made the changes to his station to bring it into compliance with the Commission's rules.

At the same time Hays requested cancellation or reduction of the proposed forfeiture because he lives solely on social security benefits and as a result he could not afford to pay the proposed $15,000 fine. He also supplied the FCC with the required documentation to show that it would be a severe hardship to pay the full amount.

After reviewing Hays appeal, the FCC concluded that the forfeiture should be reduced to $450. This, it said, was an amount within the range determined by the regulatory agency to be affordable by Hays. And as the fictional Captain Luc Piccard of Star Trek - The Next Generation might say in a situation such as this, the FCC made it so.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, way out West in Los Angeles.

--

As you likely have guessed, Hays was given the customary 30 days to pay the now very much reduced fine. (FCC)

**

ENFORCEMENT: TEN INDONESIAN BROADCASTERS ORDERED OFF THE AIR DUE TO INTERFERENCE TO AIRCRAFT COMMUNICATIONS

Several non-government radio stations have been shut down in Indonesia. This due to safety concerns at two major airports. Amateur radio Newsline's Jim Damron, N8TMW, has the details:

--

Indonesia's Communications and Information Ministry, through the Batam office of the Satellite Orbit and Radio Frequency Monitoring Agency has banned 10 licensed private radio stations in the city of Batam. This, for impacting on flight safety at Changi Airport in Singapore and Hang Nadim Airport in Batam.

Agency head Muhammad Sopingi told The Jakarta Post that the ministry's Directorate General of Post and Telecommunications had received letters of complaint in June from the Singapore and Hang Nadim Airport flight authorities about a radio communication interruption between pilots and air traffic controllers. This was found to be caused by what the regulatory agency called the frequency synchronization problems caused by the radio stations in Batam. During takeoffs and landings, pilots often heard songs aired from radio stations rather than air traffic guidance from from controllers and making for a dangerous situation to life and property.

Sopingi told the newspaper that a study is being conducting on whether it is feasible for any or all of the stations to return to the air after the technical difficulties have been worked out.

I'm Jim Damdon, N8TMW, reporting.

--

According to Media Network, some 200 employees of the 10 stations have already lost their jobs as a result of the closures. (Media Network)

RESCUE RADIO: STORM ALERT XTREME TRAINING CLASS NOV. 12 IN BIRMINGHAM ALABAMA

If you are a ham radio operator in Alabama and involved in emergency communications, listen up. The annual ABC 33/40 storm spotter training known as Storm Alert Xtreme, is coming to the Birmingham Jefferson Civic Center on Saturday November 12th.

Brian Peters, WD4EPR, who has qualified over 6,000 Alabama storm spotters during his days with the National Weather Service, will be doing the instruction. All existing Skywatchers are asked to attend for their annual "re training", and anyone that wants to join the team needs to be there as well.

This severe weather training event is free, and there is no need to pre-register. Planners think that because of the massive tornado outbreak last April 27th that they may easily top their record turnout of last year.

Also, those who do attend will be given free entrance into the Alabama International Auto Show after the training at the same venue. The planners of Storm Alert Xtreme say that this is being made possible thanks to the Birmingham Automobile Dealers Association.

Again, the date for this free severe weather training class for residents of Alabama is Saturday, November 12th, at the Birmingham Jefferson Civic Center. Planners say that they hope to see you there. (WO4W via Facebook)

HAM HAPPENINGS: CQ ANNOUNCES ADDITIONAL PLAQUES FOR CQ DX MARATHON

An expansion in the number of the CQ Magazine-sponsored DX Marathon plaques to be awarded each year has been made public by that publication. Starting with the announcement of the 2011 Marathon results in the June 2012 issue, additional plaques will be awarded for top CW and top SSB scores, top single band scores, and top continental scores.

The CQ DX Marathon is a year-long activity encouraging DXing on the HF bands. Competition begins anew each January 1st. Details are available on the CQ magazine website at www.cq amateur-radio.com and on the DX Marathon at www.dxmarathon.com.

Also, an additional sponsor for top Digital Mode score is still being sought. Please contact DX Marathon Administrator John Sweeney, K9EL, via e-mail to k9el (at) dxmarathon (dot) com if you wish to sponsor this plaque. (CQ)

HAM HAPPENINGS: 2011 CQWW DX CONTEST WEBINAR OCTOBER 9

The Potomac Valley Radio Club will once again host an online webinar with the CQ World Wide DX Contest committee. This year's event is on Sunday, October 9th at 19:00 UTC and free and open to the entire contest community.

Taking part in this years webinar will be CQ World Wide DX Contest Director Bob Cox K3EST along with committee members John Dorr, K1AR and Doug Zwiebel, KR2Q. The three will provide an update on the 2011 CQ World Wide SSB and CW DX contests. A question and answer session will follow their presentation.

To register for this event please take your web browser to tinyurl.com/CQDX-2011-Webinar and fill out the on-line form. A link to the registration form is also available at www.pvrc.org. (K4ZW via QRZ.com)

HAM HAPPENINGS: ECWARC - AMBASSADORS OF CW

The United Kingdom's Essex CW Amateur Radio Club continues to try and connect with more members via local clubs. To this end Essex is looking to appoint so-called Ambassadors for the CW mode to as many clubs as possible to disseminate and gather news of interest to Morse operators.

The Essex CW Amateur Radio Club describes itself as a group for anyone with a passion for Morse Code. Although the founders were from Essex in Great Britain, members are welcome from anywhere in the United Kingdom and world-wide. More information is at the club website at www.essexcw.org.uk. You can also follow this group on Twitter with the I.D. of @ecwarc (RSGB, Southgate)

**

HAM HAPPENINGS: NEWSLINE AT PACIFICON - A HAM RADIO TOWN MEETING

And less we forget to mention, on Saturday, October 15th Amateur Radio Newsline will be hosting another of its popular Amateur Radio Town Meetings. This one is titled "A Peak Into the Future: Amateur Radio in the Year 2111." Scheduled guests include Nobel Laureate Joe Taylor K1JT, IARU Secretary Rod Stafford W6ROD, ARRL Washington attorney Chris Imlay W3KD and communications planner Dave Witkowski W6DTW. The session will take place from 1 to 3 p.m. Pacific time in Meeting Room D and E at the Marriott Santa Clara Hotel in Santa Clara, California. We hope to see you there. More is on-line at pacificon.org. (ARNewsline)

NAMES IN THE NEWS: RALPH HOGAN ELECTED NEW SBE PRESIDENT

Some names in the news. The Society of Broadcast Engineers has inducted new officers and honored its founder and first member John Battison. This, during the national membership meeting on Wednesday, September 28th in Columbus, Ohio.

SBE General Counsel Chris Imlay, W3KD, swore in Ralph Hogan as the organization's new president. Hogan replaces outgoing president Vinny Lopez who has served in that position the past two years.

The Society of Broadcast Engineers or SBE is a professional organization for engineers in broadcast radio and television. It also offers certification in various radio frequency and audio technology areas for its members.

Next year's SBE national meeting will be in Denver, Colorado. (RW, others)

**

NAMES IN THE NEWS: KI4DS ANNOUNCES NEW D-STAR NET FOR YOUNG HAMS

Nine year old Mikaila Williams, KI4DS, of Deltona, Florida, has announced the start-up of a new D-Star net for youngsters. The gathering, called the Kids in Amateur Radio Net will take place every Friday night at 9 P.M. Eastern time on D-Star Reflector 12C. The host organization is the California-based Pocket Autopatch Association better known as the Papa System.

Mikaila says that discussions on the net will be mainly about getting youth interested in amateur radio and getting them licensed. According to Mikaila, those young hams that do not have D-Star access will be able to check in via email to KI4DS (at) KidsInAmareurRaido (dot) net. She adds that the net will also be available to SWL's and others on Radioreference.com.

Her first net was to be held on October 7th and will be weekly thereafter. (KI4DS via e-mail)

REPEATER NEWS: VA3XPR - THE NEW VOICE OF DOWNTOWN TORONTO CANADA

Since repeaters tend to come and go, we do not usually report on their birth or demise unless they represent something special. And in the case of a new system in Canada, one could say that its license holder is pioneering a new aspect in ham radio relay communications.

On September 25th, a new voice with the call VA3XPR was added to the Amateur Radio community of downtown Toronto, Canada. What sets this repeater apart from others in the greater Toronto area is its unique purpose that might be best described a very local coverage system. While most system owners tend to find the highest spot and cover as many miles as is possible, Don Trynor, VA3HFT, decided to create a system with three simple objectives in mind. According to Trynor's posting on QRZ.com, these are to create a sense of community and promote diversity within the St. James Town and adjacent neighborhoods of Toronto; to act as a catalyst for education and learning promoting the growth of amateur radio; and to provide an alternate means of communications in the event of an emergency or natural disaster in the downtown Toronto area.

If you live in or near Toronto or are passing through, the VA3XPR repeater can be accessed on 441.950 with a positive offset and with a PL tone of 100.0 Hz. In addition to its excellent coverage area, it also provides its users with access to IRLP and Echolink for global

communications. For more information on the VA3XPR repeater, please visit www.qrz.com/db/va3xpr (VA3XFT, QRZ.com)

**

RADIO IN SPACE: ROSAT EXPECTED TO FALL FROM THE SKY IN NOVEMBER

The next major bird to fall from orbit will likely be the Roentgen X-Ray Observation Satellite better known by the acronym ROSAT.

At the start of its mission, ROSAT was in an elliptical orbit at distances of between 585 and 565 kilometres above the surface of the Earth. Since then, atmospheric drag has caused the satellite to lose altitude. Last June it was at a distance of only about 327 kilometres above the ground.

As was the case with UARS, The time and location of re-entry of ROSAT cannot be predicted precisely. Right now scientists and astronomers expect the X-ray satellite to re enter in early November. At present, this date can only be calculated to within plus or minus five weeks. This time slot of uncertainty will be reduced as the date of re-entry approaches. However, even one day before re-entry, the estimate will only be accurate to within plus/minus five hours.

ROSAT was an orbital X-Ray observatory making observations at that very high wavelength and radioing the data back to Earth. You can keep up with the latest information on its upcoming firey demise at tinyurl.com/another-falling-bird (KC6WFS, ROSAT Website)

**

HAM RADIO IN SPACE: AMSAT ISSUES ARRISAT-1 CHICKEN LITTLE CONTEST REMINDER

And not to be left out of the proverbial sky is falling arena, AMSAT says that it is still looking for entries in its latest Chicken Little Contest. This to calculate or guess when ARISSat-1 falls out of orbit.

According to AMSAT this is defined as the moment that the decaying orbit of ARISSat-1 it crosses an altitude of 78 kilometers. This is considered to be the point of no return back into space.

AMSAT has created three categories in its contest. First is a student category for Kindergarten through 8th grade. Next is a second student category for high school grades 9 through 12 while the third is for everyone else.

Submissions must contain the UTC date in the format of day, month, year, hours, minutes and seconds along with your personal contact information. Adults and individual students should include their name and amateur call sign, if they have the latter. Submissions are limited to one per person or group. The closest predictions in each category will be recognized for their achievement.

The ARISSat-1 Chicken Little Contest closes on October 15th at 23:59 UTC. Send your submissions by e-mail to chickenlittle (at) arissat1 (dot) org. (ANS)

**

ON THE AIR: CELEBRATING ARMENIA'S 20TH ANNIVERSARY OF INDEPENDENCE

To celebrate the 20th anniversary of the independence of Armenia, amateur radio special event stations there have been authorized to use the special prefix E-K-20. A special award is being offered to those working at least 20 QSO's or making 20 SWL loggings of these special event stations on allof whom will be operating on the various High Frequency bands including 30, 17 and 12 meters. Modes in used will be CW, SSB and Digital. QSLs for these special prefixes may be sent to: P.O.Box 22, Yerevan, Armenia 0002, or as directed on the air. An electronic version that you can print at home is available by sending a log extract of the contacts or reception reports to ek7dx (at) yahoo (dot) com. (Southgate)

**

DX

In down to Earth DX news, DL3OCH will be active as 5N7Q from Abuja, Nigeria, through October 15th. His operation will be on 40 through 10 meters using one of the largest fully rotatable short wave broadcast antennas in the world. It has a gain of over 20 dbi on all bands. Modes are CW and SSB. QSL via DF8DX.

Members of the Lufthansa Amateur Radio Club in cooperation with the Qatar Amateur Radio Society will be operational as A71DLH between October 22nd to the 29th. Their activity will be on all bands using CW, SSB and the Digi modes. QSLs via the DARC Bureau or their QSL Manager DL0LH.

W5JON will again be operating as V47JA from his vacation home located at Calypso Bay on St. Kitts, in the West Indies. This from October 10th until November 5th. John's His QTH is 300 feet from the Caribbean Sea in Grid: FK87. Activity will be on 80 through 6 meters including 60 meters running SSB only. Also listen out for him during the CQ World Wide SSB contest on October 29th and 30th. QSL to W5JON either direct or electronically using Logbook of the World.

F4FOO will be active as 5V7MA from Togo between December 19th and January 4th. Operations will be limited to his free time on 20 through 10 meters on SSB only. QSL via his home callsign.

Lastly, with the addition of the Republic of South Sudan to the DXCC list, CQ magazine has also added that nation as a qualifying entity for the 2011 DX Marathon. An updated score sheet dated 2011.4 and updated CQ Country Lists are now available on the DX Marathon web site at www.dxmarathon.com.

(Above from various DX news sources)

**

THAT FINAL ITEM: NASA SWIFT SPACECRAFT SEES STAR EATING BLACK HOLE

And finally this week, astronomers say that a monster sized black hole shredded a sun-like star, producing a strangely long-lasting flash of gamma rays that probably won't be seen again in a million years. Amateur Radio Newsline's Bill Pasternak, WA6ITF, takes it from here:

--

According Joshua Bloom of the University of California Berkeley, the inter-stellar happening was first seen on March 28th by NASA's Swift spacecraft, which is searching the universe for gamma ray bursts. This particular flash has lasted more than two months and is still going on as we go to air.

In a recent media interview, Bloom explained that this is definitely not the norm for gamma ray bursts. Those are energetic blasts that typically flare up and end in a matter of seconds even or milliseconds, and often the sign of the death throes of a collapsing star.

What makes this even stranger is that the black hole, located in the constellation Draco about 4 billion light years from Earth, was sitting quietly when a star about the mass of our Sun moved into range. Bloom noted that this was a black hole which was otherwise quiescent and suddenly had an impulsive feeding frenzy on this one star.

Thanks to the Swift spacecraft, data on this very rare space phenomenon which otherwise have gone un-noticed was discovered radioed back to Earth.

>From the newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, reporting

--

Researcher Bloom figures this type of inter-stellar encounter may happen once per black hole every one million years. (Science OnLine)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 9th October 2011

The news headlines:

* RSGB announces Extraordinary General Meeting

* 5MHz station in Greece

* ISS astronaut to join in Jamboree on the Air

The Society has announced that it will be convening an Extraordinary General Meeting on 19 November 2011. The meeting will allow members the opportunity to comment on proposals to address issues surrounding the governance of the Society. Full details will be in the November issue of RadCom, but the editorial from that issue has been pre-released and can be read on the RSGB website, www.rsgb.org.

After three years of negotiation the Radio Amateur Association of Greece has been given permission for its headquarters club station, SZ1SV, to use the channel centred on 5400kHz. SZ1SV is permitted to use 5398.5 to 5401.5kHz for SSB, CW and digital modes, with a maximum power of 100W. Since the permission is based upon propagation studies, the Greek association is planning to operate a beacon, somewhat similar to our own 5MHz chain, when the station is not being used for contacts. The RSGB has been working closely with Manos, SV1IW, President of the Radio Amateur Association of Greece, on their planned usage of this channel for beaconing, so that this can exist alongside our and others usage of the channel for QSOs. Plans for the beacon have yet to be finalised, but it will likely operate every 15 minutes, with an alternating CW and PSK31/PSK63 identifier. The beacon may be capable of being remotely switched as a further measure to minimise interference to other users of the channel.

This year's Jamboree On The Air takes place on 15 and 16 October. NA1SS, which is the International Space Station, is going to be on the air throughout the JOTA weekend. Astronaut Mike Fossum, KF5AQG, who is also a Scoutmaster, is going to be on the air during breaks from his work schedule. He should be available on most of the passes around the world. The uplink is 145.200MHz and the downlink is 145.800MHz, both plus and minus Doppler shift as the ISS passes overhead. Within this year's JOTA, an emergency communications exercise will take place on Saturday, 15 October in the afternoon, European time zone. This simulated emergency test will include the Headquarters station, HB9S, of the World Organization of the Scout Movement, which will be operated

by amateurs from five different countries.

The MM0RAI/P Rockall DXpedition was a success. The amateurs managed to land on the rock, IOTA reference EU-189, and set up the station. Operation started on 1 October at 1545UTC and they stopped transmitting on 2 October at 0652UTC. Online logs will be available soon. For more information, including photographs, check out the website at www.rockall.be.

India's latest amateur radio satellites, SRMSAT and JUGNU, are now at the Indian Space Research Organisation spaceport at Sriharikota, ready to launch on 12 October. VU2WMY says he used an AMSAT- UK FUNcube Dongle SDR to receive telemetry from SRMSAT and JUGNU during environmental tests. Bletchley Park Trust has been granted 4.6 million pounds from the Heritage Lottery Fund towards the regeneration of Bletchley Park. The investment will enable the restoration of iconic Codebreaking Huts 1, 3 and 6, and create a world-class visitor centre and exhibition in the currently derelict Block C as soon as £1.7 million in match funding has been raised. Not only will this development allow the conservation of buildings of highly significant heritage value, it will considerably improve the educational offering and visitor experience at Bletchley Park.

The next Advanced revision course run by the Chelmsford Amateur Radio Society starts on Thursday 27 October. This short revision course is aimed at those who have already studied at home or elsewhere. It will be held on Thursday evenings between 7 and 9pm at Danbury Village Hall from 27 October to 1 December. The exam will be held on Monday, 5 December. For more details on this or the other CARS training courses speak to Clive, G1EUC, on 01245 224 577.

Entries for the Lifeboat Amateur Radio Society's annual SOS Radio Week are now being accepted. SOS Radio Week 2012 is nine days of sponsored operating from 21 to 29 January. It is open to individuals, groups and clubs. Participants can operate from home, their club HQ, the local shopping centre, a Lifeboat Station, in fact anywhere they like. There's no minimum time you need to dedicate, just as much time as you can spare. All money raised goes to the RNLI. In the past two years, amateur radio operators taking part in SOS Radio Week have raised over £7,200. If you'd like to take part, please register on the website, www.sosradioweek.org.uk.

And now for the details of rallies and events for the coming week

Today, 9 October, the Autumn Militaria & Electronics & Radio Amateur Hangar Sale takes place at Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and admission is £2.50. There will be civil, military and vintage radio equipment plus vehicle spares and more. Contact Rod Siebert on 01270 623 353.

On Sunday 16 October the Blackwood and District ARS Rally takes place at Coleg Gwent, Risca Road, Cross Keys, NP11 7ZA. Doors open at 10.40

and admission is £2. There will be trade stands, special interest groups and a Bring & Buy. More details from Dave, GW4HBK on 01495 228 516.

The Hornsea Amateur Radio Club Rally takes place on 16 October at the Floral Hall, 7 The Esplanade, Hornsea, East Yorkshire, HU18 1NQ. Doors open at 10am. There will be trade stands, a Bring & Buy as well as special interest groups. Details from Rick, M0CZR by e-mail to R106221@aol.com.

Now for the news of special events

Bedford and District Amateur Radio Club will be operating GB4BMA from Broham Mill on National Apple Day, 16 October.

There will be many special event stations on the air for JOTA on 15 and 16 October. The October RadCom contains a list of over 20 special event stations that have issued for the event. And now the HF DX news compiled from 425 DX News and other sources

DJ7RJ will be operating as FR/DJ7RJ from Reunion Island, which is IOTA reference AF-016, until 26 October. He will operate CW and SSB on 160 to 10 metres, with a focus on the low bands, using a 500 watt amplifier into an inverted L antenna. QSL via his home callsign, direct or via the bureau.

IZ4AMS/P will be active from Tinetto Island, IOTA reference EU-083, from 9 to 10 October. He will be using the 80, 40 and 20 metre bands. QSL via his home callsign.

After just four days, the T32C DXpedition has passed the 50,000 QSO milestone. It has turned out to be something of an unplanned Field Day style operation and they now have no expectations of the container of equipment arriving while they are on Christmas Island. Instead, the team hand-carried just over one metric tonne of equipment to the island. They are extremely grateful to all those who loaned equipment at short notice to help enable the DXpedition to take place and be successful. They will continue to make regular updates on the website and Michael, G7VJR will no doubt update Twitter while he is there. The online log on ClubLog is getting a very high hit rate and they are uploading logs twice a day, at 7am and 7pm local time. More information at www.t32c.com.

Now the contest news

Tuesday 11 October sees the 432MHz UK Activity Contest take place from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The 80m Club Sprint takes place on 12 October from 1900 to 2030UTC. Using CW, the exchange is serial number and name.

The second 50MHz contest takes place on 16 October from 0900 to 1200UTC. Using all modes the exchange is signal report, serial number

and locator.

And now the solar factual data for the period from the 26th of September to the 2nd of October, compiled by Neil Clarke, G0CAS on the 3rd of October.

First, before a busy period to report, the latest smoothed monthly sunspot numbers. For December 2010, January and February 2011 they are 28.8, 31.0 and 33.4 respectively.

A couple of large groups dominated the solar disc during the period and were responsible for the eight M class solar flares that took place. Other groups were visible but were small and quiet. Numerous C class solar flares took place every day. Sudden ionospheric disturbances and coronal mass ejections accompanied some of the larger solar flares. Solar flux levels declined slightly from 148 units on the 26th to 131 units by the 2nd. The average was 138 units. The 90 day solar flux average on the 2nd was 112 units, that's four units up on last week. X-ray flux levels declined from C1.4 units on the 26th to B3.8 units by the 28th, though a small increase was made by the end of the period. The average was B5.6 units. Geomagnetic activity started at quiet levels on the 26th, but around midday a coronal mass ejection arrived and shortly after a major storm was in progress. Two of the 3 hourly Kp indices reached 8 later that day. The storm continued until the afternoon of the 29th. The only quiet days were the 30th and the 1st when the Ap index of 8 and 9 units were recorded respectively. The average was Ap 23 units. That's the highest weekly average since December 2006. Solar wind data from the ACE spacecraft saw solar wind speeds increase rapidly from 320 kilometres per second to 700 as the disturbance arrived on the 26th. Speeds then erratically declined to 420 kilometres per second by the 2nd. Particle densities reached 38 particles per cubic centimetre on the 26th, otherwise densities were low. Bz fluctuated between minus 30 and plus 28 nanoTeslas on the 26th and between minus and plus 5 nanoTeslas on the quietest day. MUFs dropped sharply &#65533; though, as suggested in last week's report, there were also periods when HF propagation was enhanced. Many auroral contacts were made on 6, 4 and 2 metres, at least as far south as the south coast.

And now the solar forecast. The present level of solar activity looks set to continue. Solar activity should be at least moderate on some days with a slight chance that activity could increase to high on the occasional day. Solar flux levels should be around the 120's. That figure is a guide and could be lower with a quiet Sun or higher with an active Sun. Geomagnetic activity should be at active levels today due to the effects of a coronal hole, but as in recent weeks a coronal mass ejection could arrive on any day this week. If, however, none arrive, then activity should be quiet for the rest of the week. MUFs during daylight hours at equal latitudes should be around 30MHz for the south and 27MHz for the north. Darkness hour lows should be around 10MHz. As always these figures are based on quiet geomagnetic levels and will be

somewhat lower if activity increases. Now a look at the predications for the low frequency bands to the T32C DXpedition to Christmas Island in the Pacific Ocean. Top Band will be very difficult to work but the best time will be around 0400 and 0630. The best time on 80 metres will between 0530 and 0630 but may be open an hour before and after that on the better days. Unlike Top Band and 80 metres, which will need the path in total darkness, 40 metres could be worked with a longer window for at least up to an hour after sunrise. The best times will be between 0400 and 0830 with a peak around 0530. All times are UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 9 October Midland Amateur Radio Society is at the RSGB Convention. Details from Norman, G8BHE, on 07808 078 003.

On Sunday 9 October South Birmingham Radio Society is at the RSGB Convention. Contact Don, on 01214 581 603.

On Monday 10 October Gloucester Amateur Radio & Electronics Society is holding a DF hunt. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 10 October South Birmingham Radio Society is painting the shack and doing other renovation work. Contact Don, on 01214 581 603.

On Monday 10 October Stratford Upon Avon District Radio Society is having a talk on transceiver remote control by Jon, G4URH. Contact G0CHO, on 01608 664 488.

On Monday 10 October Sutton Coldfield Amateur Radio Society is holding a general meeting with discussions and is on the air. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 11 October Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 11 October Forest of Dean Amateur Radio Group is having a talk on mobile phone forensics by Nick Gleed. Details on 01594 549110.

On Tuesday 11 October Loughborough & District Amateur Radio Club is holding its AGM, starting at 8pm prompt. More information from Chris,

G1ETZ, on 01509 504 319.

On Tuesday 11 October Mid-Warwickshire Amateur Radio Society is having a homebrew and construction evening. Details from Don, G4CYG, on 01926 424 465.

On Tuesday 11 October Worcester Radio Amateurs Association is holding an equipment and rig tune up night. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 12 October Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003. On Wednesday 12 October Telford & District Amateur Radio Society is looking at DIY measurements. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 13 October Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 13 October South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 14 October Coventry Amateur Radio Society is holding its AGM. Contact John, G8SEQ, on 07958 777 363.

On Friday 14 October South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Friday 14 October Worcester Radio Amateurs Association commences its weekend event for JOTA at Kinver Scout and Guide camp ground. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

NEWS FOR THE NORTH OF ENGLAND On Sunday 9 October Angel of the North Amateur Radio Club is holding an Advanced examination. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 10 October Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 10 October Bolton Wireless Club is having an activity night plus members' show and tell evening. For details, send an email to boltonwireless@gmail.com.

On Monday 10 October Sheffield Amateur Radio Club is having a talk on making your own equipment by Peter Day, G3PHO. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 10 October Thornton Cleveleys Amateur Radio Society is holding its AGM, starting at 8pm prompt. Details on the web at www.tcars.org.uk.

On Tuesday 11 October Chester & District Amateur Radio Society is holding a committee meeting. Details from Barbara Green on 07957 870 770.

On Tuesday 11 October Halifax & District Amateur Radio Society is having a club meeting. Contact Martin, M0GQB, on 01422 341 317.

On Wednesday 12 October Hambleton Amateur Radio Society (Northallerton) is having an operating night. More information from Tony Wilson, G3MAE, on 01609 881 530.

On Wednesday 12 October Hornsea Amateur Radio Club is taking part in the CW Sprint and preparing for the rally. Contact Gordon MacNaught, G3WOV, on 01377 240 573. On Thursday 13 October Ripon & District Amateur Radio Society is looking at VHF contesting. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 13 October South Manchester Radio and Computer Club is having a talk on contesting by Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Friday 14 October East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 15 October Denby Dale Radio Club commences its weekend event operating GB2WYS for Jamboree on the Air. Details from Richard, M0RBG, on 07976 220 126.

On Sunday 16 October Hornsea Amateur Radio Club is running the Hornsea Rally at Floral Hall. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

NEWS FOR NORTHERN IRELAND On Sunday 9 October Mid Ulster Amateur Radio Club is having its monthly meeting at 3pm. For more information send an email to cqmuarc@gmail.com.

On Monday 10 October Greenisland Electronics Amateur Radio Society is on the air on 2m. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND On Tuesday 11 October Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 11 October Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946 192.

On Wednesday 12 October Ayr Amateur Radio Group is having a talk on oil exploration in the Mediterranean Sea. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday 13 October Aberdeen Amateur Radio Society is having a talk on lighthouses by Geoff, MM5AHO. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 14 October Borders Amateur Radio Society is holding an EGM and AGM commencing at 8pm. More information from Danny, 2M0CDO, on 01890 882 850.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 10 October Coulsdon Amateur Transmitting Society is having a talk on radio in the Scouting movement by G6CJR and M0NDJ. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 10 October West Kent Amateur Radio Society is having a talk by Dave Green, G4OTV on the club's radio DXpedition to Ireland. Details from Keith, G4JED, via email to westkentars@googlemail.com. On Tuesday 11 October Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 11 October Harwell Amateur Radio Society is having a talk by Tim, G4VXE, on his world of VHF. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 12 October Chelmsford Amateur Radio Society is holding a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 12 October Chesham & District Amateur Radio Society is holding a members' forum and invites members to bring along their radio equipment. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 12 October Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Sprint CW contest and having an informal, construction and shack evening. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 12 October South Essex Amateur Radio Society is having a talk on power supplies by Philip, G8LHW. Details from Dave, G4UVJ, on 01268 697 978.

On Wednesday 12 October Southgate Amateur Radio Club is planning for 2012. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 12 October Worthing & District Amateur Radio Club is holding its AGM. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 13 October Bittern DX Group is having an informal club meeting at Pinewood Park Leisure Club, NR26 8TU. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 13 October Echelford Amateur Radio Society is having a talk on Bletchley Park by Brian Oakley. Contact John, G4GSC, on 01784 451 898.

On Thursday 13 October Lowestoft & District PYE Amateur Radio Club is holding its AGM at the Railway and Bowls Club. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 13 October Reading & District Amateur Radio Club is having a talk by Prof Colin Bayliss, G3WKZ on smart grids. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 13 October Shefford & District Amateur Radio Society is holding its autumn junk sale. Details from David, G8UOD, on 01234 742 757.

On Friday 14 October Cambridge & District Amateur Radio Club is having a discussion evening on test equipment, and invites members to bring theirs along. Contact Ron, G3KBR, on 01223 501 712.

On Friday 14 October Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239 371.

On Friday 14 October Radio Society of Harrow is having a talk on the RSGB by Dr Alison Johnson, G8ROG. More information from Linda, G7RJL, on 02083 868 586.

On Friday 14 October Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434. On Saturday 15 October Crystal Palace Radio and Electronics Club continues its Foundation training course. Contact Bob, G3OOU, on 01737 552 170.

On Saturday 15 October Loughton & Epping Forest Amateur Radio Society is running Jamboree on the Air station GB1HS for 1st Hainault Scout. Contact Marc Litchman, G0TOC, on 02085 021 645.

NEWS FOR THE SOUTH WEST On Monday 10 October Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday 11 October Mid Somerset Amateur Radio Club is holding its AGM. Contact Nick, M6NJB, on 01749 346 320.

On Tuesday 11 October Plymouth Radio Club is holding a Bring & Buy sale. Details from Chris, M0ZCP, on 07834 767 161.

By keeping this valuable item in your closet it remains unseen by others who love to see and appreciate it. The safest way to preserve such precious things is through framing.Soccer jersey framing keep your garments colourful, safe and visible to visitors. They enhance the elegance of your walls and are kept safe before your eyes.As conversation pieces,you can enjoy talking about them or just remembering the stories that go with them. http://jerseys-seller.com/

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 9 OCTOBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

OCTOBER 2011 RAE CANDIDATE EXAM NUMBERS RELEASED

7P8EME DX-PEDITION A GREAT SUCCESS

SARL MEMBERSHIP NOW 1 345

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

OCTOBER 2011 RAE CANDIDATE EXAM NUMBERS RELEASED

The SARL has released the Candidate Examination Numbers for the October Radio Amateur Examination, which will take place on 20th October 2011. The list can be obtained by visiting www.sarl.org.za and clicking on the link in the news item on SARL TODAY.

174 Candidates have entered for the examination including one visually handicapped person for whom special arrangements have been made. This is the largest number of candidates recorded in recent years.

Letters will be mailed to the candidates during the course of this weekend. Should there be any queries about an examination centre, please contact Mariska at the office at 011 675 2393.

7P8EME DX-PEDITION A GREAT SUCCESS

The 7P8EME DX-pedition was a great success. The team managed to make in total 320 QSO's. 274 QSO's on 2 metres EME, 23 QSO's on 70 cm EME, 18 QSO's on 23 cm EME and 5 QSO's on 6 metres EME, all using JT65. On HF (CW) a few DX contacts were made in between EME operations by Wynand, ZS6ARF, while some pleasant chats were conducted on 40 metres with

South African Radio amateurs by Pieter. ZS6PA.

The team would like to thank all sponsors, especially Dan, HB9CRQ, the South African Radio League, the South African Amateur Radio Development Trust Multisource Telecoms and all radio amateurs who supported the expedition. A full report will be published on the web during next week and in Radio ZS.

SARL MEMBERSHIP NOW 1 345

Last week the SARL membership stood at 1 345. Members who have not renewed will no longer have access to member facilities such as the QSL bureau, Radio ZS and the members' only section on the web, which includes access to the forum.

If you have not renewed your membership you can still do so by paying your subscription as soon as possible. If you have mislaid your invoice, please call Mariska on 011 675 2393 for details.

If you have never been a member of the SARL why not join now. By joining the SARL you are strengthening the voice of the SARL and the IARU in areas where it counts most. Details of how to join can be found on www.sarl.org.za.

SA AMSAT ISSUE FIRST CALL FOR PAPERS

SA AMSAT has issued the first call for papers for the 2012 Space Symposium to be held in Durban on Saturday 12 May 2012, at the University of KwaZulu-Natal. If you would like to present a paper, please send a brief synopsis to reach SA AMSAT by no later than 31 January 2012. The theme will be 50 years of OSCAR, celebrating the launch of the first amateur radio satellite on 12 December 1961.

SARL WEB SLOW PROGRESS

The team working on the SARL web is making progress but it is slow. Peter Hers, ZS6PHD, reports that there was a dramatic improvement on Friday by disabling some parts of the site, which are causing problems. He said that there is still a lot of work to identify problems at the detail level and to fix them. The SARL acknowledges the amount of effort that Peter and others, who are assisting him, are making in solving the problems.

AMATEUR RADIO FEATURED WELL AT THE IAC2011

Amateur Radio featured in several papers presented at the sixty second International Astronautical Congress held on African soil in Cape Town for the first time since the formation of the International Astronautical Federation in 1951.

Several papers highlighted Amateur Radio involvement in satellites and SETI. A paper by Dr Jakobus van Zyl and Johann Lochner, ZE6CBC, both engineers at SunSpace, covered a global geographical survey of received signal's strength in the VHF band. The data collected by SumbandilaSat,

S067, provides useful information for selecting future ground station locations for minimum interference. The study further gives an indication of frequencies to use for command and telemetry communication at existing ground stations. More details will be included in future SARL news and on Amateur Radio Today.

At the congress, the Department of Science and Technology announced that the department will support the launch of the single CubeSat built by the Cape Peninsula University of Technology. As covered in last week's SARLNEWS the CubeSat includes an HF beacon on 14,099 MHz which will have interesting applications in Amateur Radio. The article about the HF beacon is available on www.amsatsa.org.za.

SARL RESPONDS TO CAPE TOWN CITY RE ANTENNAS

The SARL has responded to the draft Telecommunications Infrastructure Policy for the City of Cape Town. During discussions the City's Environmental Agency confirmed that amateur radio antenna masts and structures are excluded from the Telecommunications Infrastructure Policy. The SARL has requested that the amateur radio exclusion statement be incorporated in the policy.

This does not mean that amateur radio antennas and structures are not regulated. These structures are still governed by the building regulations. However Amateur radio towers under 15 metres are exempt from environmental scoping as laid down in the environmental protection act.

"AMATEURRADIO IN AKSIE"

"Amateurradio in Aksie" is an Afrikaans news program aimed at Afrikaans speaking radio amateurs. The program will be compiled on a weekly basis and made available for download from www.amateurinaksie.co.za, on Monday mornings. While you are visiting the website also make an effort to sign the guest book.

Clubs and individuals are urged to download the program and even use it during club bulletins or even as a standalone news program. Everybody is welcome to give input to the program and we encourage people to do so via the website. We look forward to have as many listeners as possible.

CQ HOU KOERS

CQ Hou Koers, the Voortrekkers' annual radio communications day, takes place on Saturday the 15th of October from 08:30 until 12:00 CAT. Calling frequencies are 3 670, 7 085 and 14 240 kHz and local repeaters. Young people from across SA and Namibia will be active on the amateur bands. Please support them. The Voortrekkers are celebrating their 80th anniversary and the call signs ZS80VT and ZS6VTS will also be used.

Enquiries may be sent to Andries, ZS6VL, with email address andries.visagie@natref.com.

CLUB NEWS

The Centurion Radio Amateur Club will present a technical talk on the club's two meter repeater, frequency 145,775 MHz, commencing at 19:30.

Tonight will be a repeat of last week's discussion, which was cut short due to bad weather conditions.

The subject for the talk this evening is: "Feed lines as matching transformers" and it answers a question recently posed on the SARL forum, namely: "Can one match an antenna by altering the length of its feed line?" And of course there will also be a tongue in cheek amateur story!

This very interesting discussion will be presented by Pine, ZS6GST.

CONTEST NEWS

PEARS HF DX CONTEST

The aim of the PEARS HF DX Contest is to encourage Southern African radio amateurs to work DX. The contest will take place on Sunday 13 November 2011 starting at 12:00 and ending at 16:00 UTC with SSB activity on 20 and 15 metres. Participation can be as a Single Operator, Base or Field Station or as a Multi Operator, Base or Field station. Stations may use the maximum power permitted according to the regulations in the country of operation.

The exchange is your call sign and signal report and one point is earned with each QSO. A station may be contacted once on each contest band. Field stations must multiply their score by two and a further multiplier of two is available if the station uses a non-gain antenna with reference to a dipole. Then the score is multiplied by the number of countries contacted.

Should more than three logs be received per category, a certificate will be awarded to the winner in each category. Log sheets must be submitted by 30 November 2011 to PO Box 10402, Linton Grange, Port Elizabeth, 6015 or by e-mail to contest@peham.co.za.

This contest replaces the PEARS HF Contest that was scheduled for Sunday 4 December 2011.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity is expected to be at moderate to high levels. New sunspot 1 313 is crackling with C-class flares. There are currently nine numbered regions on the visible disk.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 70.

All the bands from 20 to 10 m will provide lots of fun with DX opportunities at various times of the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 October - CQ - Hou Koers. 15/16 October - Jamboree on the air. 20 October - Radio Amateur Examination. 30 October - Intechnet on proposed new license. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air. 13 November - Pears HF DX Competition 12:00 till 16:00 UTC. 30 November - Due date for submission of log sheets for the Pears HF DX Competition. 31 January 2012 - Due date for submission of proposed papers for the 2012 SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, Z6SBWN.

Thank you for listening, 73.
/EX

NZART Headquarters Infoline Issue 239

9 October 2011

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· FMTAG Notes

· From the VHF/UHF/SHF Contest Manager

· APRS iGate draft policy for NZART – (see below)

· Straight Key Night – Contest

· ARRL Humanitarian Award

· IARU – Scouts Jamboree on the air EMCOM Event.

· CQ magazine launches digital issues.

· Centenary on air VK100ARV

· News from around the Branches

· Housekeeping

Debby Says….Headquarters will be closed from Monday 10th until Tuesday 25th October as I will be away on some much needed R & R! Please contact a Councillor in your area if you need information urgently.

For those of you wanting to be in the draw for the Icom VHF Hand Held, you will need to ensure your 2012 subscriptions are paid by the end of November.
Talk soon…Debby ZL2DL

New member of FMTAG

FMTAG welcomes Terry, ZL4TAE, to the FMTAG team. He was appointed by NZART Council at its meeting on the 4th of October. Terry brings his extensive radio engineering and managerial skills to the FMTAG team.

Proposals

The Auckland VHF Group, Branch 66, has applied for a 850 repeater at North Head, located at TOPO50 BA32 616227. The repeater transmit

frequency will be 438.500 MHz and its receive frequency will be 433.500 MHz. An engineering investigation, in accordance with MED PIB38, confirms that there will be no interference to other stations.

There were no Final Recommendations to Council this month

Call Book Update

Time is running out for the inclusion of Repeater, Beacon and Link details in the forthcoming issue of Call Book.

As at the close of business on the 7th of October, FMTAG had not received information from the following Branches. The request for information was sent to the Branches in mid August, and can be re-sent if it has been lost or misplaced.

>From the VHF/UHF/SHF Contest Manager

Logs for the Microwave Contest (October 1st and 2nd).

The closing date for receipt of contest logs is next Sunday. Please send your logs to the address below.

Coming Contests

Field Day Contest - All bands 50 MHz and up. Saturday 3rd and Sunday 4th December.

DX Weekend Contest - All bands 50 MHz and up. First Saturday 4th and Sunday 5th February.

For both contests, the operating periods are 1700 to 2300 on the Saturday, and 0700 to 1300 on the Sunday, NZ local time.

All contest logs should be sent, to arrive within two weeks, to: zl2wa@clear.net.nz

with Contest Log in the subject line, or by post to:

Contest Manager, Wellington VHF Group, P.O. Box 12-259, Thorndon, Wellington

The contest rules are available at:
http://www.vhf.org.nz/VHF-UHF-SHF-ContestRules

Wellington VHF Group Website http://www.vhf.org.nz

Rules NZART Straight Key Night
Polish and lubricate that old morse key and enjoy an evening of old time radio fun. An activity night in which everyone can be a winner with a certificate to prove it.

When: First Sunday in November 2000-2200 NZST in two one-hour periods
Band: 80 m (3.5 MHz) only
Mode: CW sent with STRAIGHT KEY ie characters formed manually, no system of automatic dots, dashes or spacing permitted.
Divisions: 1. Vintage QRP, 2. Vintage QRO, 3. Open QRP, and 4. Open QRO.
Explanation: Vintage receivers and transmitters or transceivers using valves, no solid-state devices in the signal line permitted. QRP: 5 watts or less rf output.
Exchange:
1. RST,
2. QTH,

3. Operator’s name (one word),

4. Key used (e.g. ZC1, P&T),

5. TX type (eg ZC1, FT1000, homebrew), and

6. TX power (watts).

Except for DX stations (ie non ZL mainland) only RST, operators name, and QTH need be exchanged.

Scoring: ONE Point per QSO.

Stations may be worked once in each one-hour period, CW to CW only. All stations submitting logs MUST use a straight key throughout, but straight key stations may QSO stations using bugs, electronic keyers or keyboards.

Multipliers:
1. Vintage QRP multiply total points by 2,

2. Open QRP multiply total points by 1.5,

3. Vintage QRO multiply total points by 1.2, and

4. Open QRO multiply total points by 1.

Logs:
Suggest using standard NZART log pages (not contest log sheets).

Each log QSO entry to show of station worked:

1. Time (NZST or Z),

2. Callsign,

3. RST,

4. QTH,

5. Name,

6. Key type,

7. Tx type, and

8. Tx power.

Calculate total score then multiply by the appropriate multiplier to give total score claimed.

Logs to have associated data sheet giving entrant’s:

1. Name,

2. Callsign,

3. QTH,

4. Age (optional),

Full description of equipment used including:

5. Key,

6. Tx/rx,

7. Tx power, and

8. Antenna.

Send logs by mail by 30 November to:
Ken McCormack, ZL1AIH, 181 Ararimu Valley Road, Waimauku, AUCKLAND, or email

zl1aih@xtra.co.nz

All (including DX stations) who send a log will receive a certificate. Special certificates to top three in each division. Annotated certificates e.g. Best ZC1, Youngest/oldest op, etc., at manager's discretion. Any photos of operators and/or equipment gratefully received.

ARRL Invites Nominations For 2011 International Humanitarian Award

Nominations are open for the 2011 ARRL International Humanitarian Award

<http://www.arrl.org/international-humanitarian-award>. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

A committee appointed by the League's President recommends the award recipient(s) to the ARRL Board, which makes the final decision. The committee is now accepting nominations from Amateur Radio, governmental or other organizations that have benefited from extraordinary service rendered by an Amateur Radio operator or group.

Amateur Radio is one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, thereby spreading goodwill across political boundaries. The ARRL International Humanitarian Award recognizes Amateur Radio's unique role in international communication and the assistance amateurs regularly

provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army, a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references.

All nominations and supporting materials for the 2011 ARRL International Humanitarian Award must be submitted in writing in English to ARRL International Humanitarian Award, 225 Main St, Newington, CT 06111 USA.

Nomination submissions are due by December 31, 2011. In the event that no nominations are received, the committee itself may determine a recipient or decide to make no award.

The winner of the ARRL International Humanitarian Award receives an engraved plaque and a profile in QST and other ARRL venues.

Scouts Jamboree on the Air EMCOM Event

Hans Zimmermann F5VKP and F/HB9AQS, the IARU International Coordinator for Emergency Communications sent me the following information about an EMCOM component of this years JOTA event:

Within this year's JOTA, an emergency communications exercise will take place on Saturday, 15 October in the afternoon (European time zone). This simulated emergency test will include the Headquarters station, HB9S, of the World Organization of the Scout Movement (WOSM), which will be operated by hams from 5 different countries.

WOSM has now published the details for the event on its web site:

http://scout.org/en/information_events/events/jota/the_54th_jota_2011 with numerous links to related documents of IARU and other sources.

This year's JOTA theme offers an excellent opportunity to raise the awareness for the role of the Amateur Radio Service in disaster situations.

For more information, the JOTA organizer, Richard Middelkoop, can be reached at RMiddelkoop@scout.org.

CQ Communications to launch digital editions of all magazines

First issue to be released October 2011
CQ Communications, Inc., will launch multi-platform digital editions of all of its magazine titles before the end of 2011, Publisher Richard Ross, K2MGA, announced today. Those titles include CQ Amateur Radio (CQ magazine), CQ VHF, Popular Communications and WorldRadio Online. Many CQ book titles are already available in digital form on CD.

The digital editions will supplement, not replace, current print editions, and will feature enhancements not possible in the print medium. Versions will be available for a variety of online and mobile platforms*.
Examples of features that will be possible in the digital editions include live links to all World Wide Web addresses listed in each issue, as well as supplemental content, such as photo albums, audio and video files, software and more.

The digital launch will begin in late October with the November issue of an enhanced, multi-platform, version of WorldRadio Online, which will

again become a paid-subscription publication; followed by November CQ, which, appropriately, is the magazine's first annual Technology Special. The fall issue of CQ VHF and the December issue of Popular Communications will round out the introductions. Digital editions will be available by single copy and by subscription. Details will be in the near future in the magazines and on all CQ Communications websites. (*Initially, digital editions will be compatible with the following platforms: PC, Mac, iPhone, iPad, Android 2.0 and higher.)

Centenary on air
For the month of November 2011 the special callsign VK100ARV will be well
sought after and qualifies toward the Amateur Radio Centenary Award. For images visit QRZ.COM.

This year is the 100th anniversary of the Amateur Wireless Society of Victoria,
formed in 1911, quickly changing its name to the Wireless Institute of Victoria,
and today is known as Amateur Radio Victoria.

A special QSL card has been printed. The front features defining words capturing the
spirit of the founding of the organisation and a gallery of Presidents. and
the information
The Award certificate has a montage of the organisation over the decades.
Both are worth obtaining for display and will show the Centenary logo.

News from around the Branches

Lower Hutt Branch 18 intend to run JOTA over a longer period each day than in previous years - the aim is to contact more overseas JOTA stations. Jota weekend 12 – 15 October.

It is also planned to have one of the school radio educational kits available in the Club

Rooms, at Philip Evans Reserve.

North Shore Branch 29 is looking for Mobile operators for the Silver Fern 7 day marathon car rally to be held in the 2nd week of November 2012. Portable HF for 80m and 60m on-site communication and VHF equipment for mobile operation is essential. Fuel and accommodation will be provided. Further details can be obtained from Warren Harris ZL2AJ warren@zl2aj.com.

Whangarei Branch 28 in their September newsletter has an interesting article on “How to use the Internet Radio Linking Project (IRLP)”. For those of you wanting to know more about this, I suggest you make contact with Jeff ZL1TOB from Whangarei branch.

Hawkes Bay Amateur Radio Club is holding a training weekend on the 5th and 6th of November. Anyone who would like to gain their GAOC and callsign please contact Lee Jennings at leejen@paradise.net.nz for more info.

Christchurch Amateur Radio Club Branch 05 is hosting a radio technology day RadioTek on Sunday 13th November, open to all persons interested in radio technology or amateur radio.

More details can be found on the web www.radiotek.org.nz or contact Rory Deans rory1@xtra.co.nz.

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Nov/December issue of Break-In-closes on 10 November 2011.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 03 November 2011 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use the Call Book address. All other material can go to e-mail:
zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on SUNDAY 30th October 2011 and Next HQ-Infoline e-mailed on SUNDAY 23rd October 2011.

****

APRS iGate policy for NZART (DRAFT)

Introduction

This discussion paper is designed to set out recommended procedures for licencing and configuring iGates for use on the APRS network in New Zealand. Such papers would be applied only as a gentlemen’s agreement. Adhering to them would be to the benefit of all amateur radio and APRS operators in the country.

Definitions

APRS is an RF based tactical information system using AX.25 packet radio on 144.575.

APRS-IS is an internet network making APRS data available to web based browsers.

iGate is an RF to Internet or Internet to RF connection, usually (but not always) made up of a PC connected to the internet and a radio.

IS>RF – APRS data propagating from the internet to Radio Frequencies

RF>IS APRS data propagating from Radio Frequencies to the Internet

144.575 is the nationally recognised APRS frequency

Digipeater – A simplex store and forward AX.25 packet repeater. For the purpose of this document they receive and transmit on 144.575 unless otherwise stated.

Tracker – A unit comprising of a radio (on 144.575), a GPS, and some circuitry (also refered to as a tracker) connecting the 2 together. Such trackers beacon out position information from the mobile station, so other users can see where trackers are located on a map.

Licences. As per the amateur GuRL, all non attended transmitters with in the amateur spectrum require a licence. (eg Repeaters, Beacons and Links). iGates not located at an amateur radio operators address is considered a non attended station, and thus would require a licence to be applied for, granted and paid for.

Consultation Process

Consultation has been had with APRS users around the counrty via the email ZLAPRS reflector, directly with APRS users via email, and by attending the Te Puke June meeting discussing issues with APRS users from Rotorua, Tauranga, Hamilton and Te Puke.

iGate configurations.

1) Receive Only. There is no issue with RF>IS traffic. As this is receive only (RF) this requires no licence. However it can create issues in the APRS network in the case of messages. Messages received by such receive only nodes will not be returned, as the APRS network sends replies via the same node, however will not be able to do so if such nodes can not transmit.

2) iGates that receive 144.575 data, but transmit messages only, overcome this problem. But as they are now fitted with an active transmitter they may require a licence.

3) iGates that receive and transmit all tactical information from ZL. This can create congestion as this information takes time to transmit and can make the APRS frequency congested with data, making it difficult for local traffic (mobile beacons etc) to find airtime to access the network. This is even more of an issue with hidden transmitters. Digipeaters are located on hilltops, and can hear more than what local stations can hear. Thus the mobile tracker may presume the air is clear when infact the digipeater is busy hearing iGate traffic. Packets will be lost. These iGates are known as ZL wide iGates.

4) iGates do the same as above but restrict the information they transmit by the way of a filter. Thus other than transmitting ZL wide traffic they may only transmit packets heard within a certain radius (say 200km). This limits the amount of traffic they will transmit. It should be noted that if an iGate hears packets on the air, it will not consider retransmitting them. This limits the amount of traffic such iGates will transmit to an acceptable level.

5) ZL wide iGates have their power set low enough so they are just heard by the nearest digipeater. This means that mobile trackers should overcome the igates signal into the digipeater to be heard. It does limit the useful transmitting range of the iGate station.

6) Another option suggested has been to use an alternate frequency to transmit IS>RF traffic ZL wide. This has been experimented with on 432.575 (70cm equiv of 144.575). A message only iGate is still required on 144.575 for full functionality, with the addition of being able to receive ZL wide traffic on an alternate frequency. This is useful for APRS users that have no internet connection at home, without degrading or congesting 144.575.

iGates 1-5 are on 144.575. igate 6 may be on any other frequency.

iGates at home. Most of the iGates in operation in New Zealand are currently located at a licenced amateur radio operators home address. They are assumed to be covered by the amateur GuRL. Thus there is no licence process to go through. It is however expected that iGate operators would look favourably to operating within NZART recommendations.

Interference. Stations (whether licenced or GuRL’d) causing interference may be open to an interference complaint lodged against that station.

Recommendations for NZART policy adoption.

iGates fitting option 2, 4 or 5 should be granted licence if one is requested, with the appropriate restrictions denoted on the licence.

iGates fitting option 3 should be declined, requesting that the applicant adjust their methods to fit option 2, 4 or 5.

iGates fitting option 6 should be granted, providing that the licence frequency chosen fits other band plan and interference mitigation criteria.

iGates not requiring a licence should still fit into option 1, 2, 4, 5 or 6 to be safe from interference complaints. iGate type 3 owners should be encouraged to migrate to an alternate option for the benefit of amateur radio and APRS.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 9th October 2011

With Deepest Sympathy

IRTS wish to extend their deepest sympathy to Tom McGrath, EI7HT, on the death of his wife Deirdre.

Suaimhneas s�ora� d� hanam.

Echo Ireland

IRTS apologises to members for the delay in producing the current issue of Echo Ireland due to unforeseen circumstances and members should have their copies within the next two weeks.

Mid Ulster Amateur Radio Club

With the appointment of the 2011/12 committee under the chairmanship of Martin, Mi0 YMF, the Mid Ulster Club have again committed to a busy schedule promoting amateur radio through education and awareness.

The next course is for the Foundation License and will be held in Portadown, over the Friday evening of the 28th and Saturday 29th October. Registration details and forms are all as listed on the Club's website, www.muarc.com

A further Foundation course is planned for the end of November with the traditional Intermediate course pencilled in for 12 Wednesday evenings from January through to March 2012. Again, the details are posted on the website.

All courses are open to non members with a special welcome extended to existing Mi6 operators wishing to upgrade to 2i0. All course candidates will have the opportunity to benefit from the successful teaching programme and to enjoy the traditional Mid Ulster Club's hospitality.

North Cork Radio Group

Lisa, EI9GSB, writes to tells us that the North Cork Radio Group would like to wish Edwin, Jer and Chris the best of luck in the forthcoming HAREC exam on 14th October. We know all that study will pay off and we look forward to hearing you on the air. We also wish the other candidates taking the exam good luck and hope to hear some new call signs on the bands.

Exhibition Station at Cork Institute of Technology

Cork Radio Club members will be operating from the CIT campus in Bishopstown, Cork on Tuesday 11 October as part of an initiative to introduce CIT students to amateur radio. Ingo Ei2KF, Tim Ei2KA and Gene Ei6KF (AL7GQ) will operate club call Ei5CRC from the main entrance at CIT from 11am to 3pm. Depending on access for antennas, bands will be 20m, 30m, and possibly 17m, 15m, and 2m on the Cork Repeater. Modes will be phone and CW. The aim is to introduce students to amateur radio and encourage the formation of a student amateur radio society at CIT. Cork Radio Club plans to provide encouragement and support for any interested students. All amateurs are welcome to pay a visit to the station on the day, and particularly club members are welcome since students may later see a familiar face. Location is Rossa Avenue just off Model Farm Road.

South Dublin Radio Club

At the first meeting in October, members of South Dublin Radio Club and visitors were treated to a demonstration and presentation on satellite television. Daniel EI9FHB, along with Charlie EI2EM, showed how equipment originally designed for broadcast satellite television reception can easily be adapted for use in Amateur Television experiments. Daniel spoke also about the current and planned ATV repeaters.

For those more used to operating on HF, using 40 metre dipoles or Yagi arrays, the diminutive antennas used for 10 Gigahertz Amateur Television were quite remarkable.

East Kiribati (T32) DXpedition

The T32C DXpedition to Christmas Island has been on the air for the past two weeks, although it is only in the past week that the main group of operators have been up and running. The group is still without the planned Yagi antennas and is instead using vertical dipole arrays and ground plane antennas; they now have no expectations of the container with the original equipment arriving while they are on the island.

To date, North American and Japanese stations have been dominating the log: at the time of writing, there are more than 60,000 QSOs in the

log, of which just 11,000 are with European stations. As of now there are 30 EI and 12 GI stations in the log, with 15 metres and 17 metres being the best bands for propagation between T32 and EI/GI.

The group plans to operate until 26th October, so we can hope that propagation between T32 and Ireland improves between now and then!

Limerick Radio Club

Limerick Radio club have changed their club meeting night to Wednesday night going forward. The next meeting will be on Wednesday 12 October. Full details can be found on www.limerickradioclub.ie

---

DX News

DL5YWM is scheduled to be active from the DXCC entity of San Andres and Providencia until 13 October. He will use the callsign HK0/DL5YWM and plans to be on all bands 40-6m.

Another Caribbean activation is W5JON using the call V47JA from St Kitts and Nevis during the period 10 October- 5 November. QSLs go via the home call.

A group of Ukrainian and Russian operators are going to Tahiti from 16-19 October where they will put the call TX3T on the air.

Many of you will have worked Bodo DL3OCH when he was active during 2009 as 5N0OCH from Nigeria. The good news is that not only has he received a new German callsign DF8DX but he is back in Nigeria until mid-October with the new call 5N7Q. He is there to carry out maintenance on a local broadcast station and will have the opportunity to make use of the antennas there for his amateur transmissions.

World's youngest nation joins ITU

The International Telecommunication Union has announced that the world's newest country, South Sudan, has joined the ITU to become the Union's 193rd Member State, effective from 3 October 2011.

Centenary VK100ARV goes on air

For the month of November 2011 the special callsign VK100ARV will be well sought after and qualifies toward the Amateur Radio Centenary Award. For images visit QRZ.COM

This year is the 100th anniversary of the Amateur Wireless Society of Victoria, Australia, formed in 1911, quickly changing its name to the Wireless Institute of Victoria, and today is known as Amateur Radio Victoria.

High Solar Flux

Steve, G0KYA has recently published his UK HF propagation prediction charts for October. In recent times solar flux has been high, however it has since calmed down a little. With Solar flux index high, there is evidence that 10metres is opening up. Visit Steves' blog on http://www.g0kya.blogspot.com/

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-October, through Sunday, 9th-October there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND. Operators Gert/ZS6AYU and Hannes/ZS6BZP will once again be active as 3DA0GF (CW) and 3DA0HC (SSB), respectively (if the licences can be obtained in time), from the Hawane Resort near Mbabane, during the weekend of October 21-24th. Activity will probably be on 40-10 meters

including the 30/17/12 meters and will alternate operations between CW and SSB (If possible, simultaneous operation). QSL only direct to their home callsign. CW QSOs to ZS6AYU and SSB QSOs to ZS6BZP. QSL address can be found on QRZ.com.

3D2R, ROTUMA (QRT). The 3D2R team went QRT 9 hours earlier than planned on October 5th. According to the 3D2R Web page (edited): "Our Team is greatly satisfied about our outstanding score, 60,000 QSOs for 6 days.
We are pleased to announce that the new donated Amateur Radio Station (3D2RI) at the Rotuma High School began operation today, Oct. 6, 2011.
We kindly ask amateur radio stations world-wide to make a QSO with the members from the radio club -- slowly and with passion. Members of our team made the following donations to the Rotuma amateur radio club:
- TS 570 SG transceiver, Hrane YT1AD
- New A3S Tri-band Antenna with tower, Hrane and 3D2R Team members
- New 200 RG-8X Cable, Hrane and 3D2R Team members
- Switching Power supply 25A/13.8VDC, Paul - N6PSE
- Laptop Computer HP, Aleksey - UA4HOX
- Headphones Heil HC-4 with foot switch, Krassy - K1LZ
- 1,500.00 USDs Cash for School Projects, David K3LP
- 2,000 QSL cards 3D2RI was donated by Atilano - PY5EG
- Equipment for satellite Internet with one year subscription
will be donated by Atilano - PY5EG
Once again, thank you for each contact and the pleasure that you have brought from 3D2R activity. The completed 3D2R LOG will be uploaded next week." QSL via YT1AD, direct or by the Bureau. Online log is available at: http://www.qslnet.de/member/yt3w/yt1ad/logsearch.php
For more details and updates, see the 3D2R Web page at: http://www.yt1ad.info/3d2r/index.html

4X, ISRAEL. David, N6HD, will be active as 4X/N6HD from Israel between October 23rd and November 3rd. Activity will be on 160-10 meters using CW and SSB. QSL via his home callsign or LoTW.

9H, MALTA (Reminder). Just a reminder that operators Tommy/DL8KX and Andy/DD8ZJ will be active as 9H3KX from Gozo Island (EU-023, MIA MM-004, WLOTA 0046) between now and October 14th. Activity will be on the HF bands using CW and SSB. QSL via DL8KX, by the Bureau or direct.

9H, MALTA (EU-023). A German team of operators will be active as 9H9OB from Malta between October 14-22nd. Operators mentioned are Torsten/DG0OHD, Rich/DK8YY, Hans/DL1AOB, Dieter/DL1AWD, Ingolf/DL4JS, Olaf/DL5AOL, Jens-Uwe/DL8ALU and Konstantin/DO5KO. Activity will be on the HF bands using CW, SSB and the Digital modes, as well as on 2 meters CW/SSB, and an entry in the Worked All Germany Contest (WAG - October 15-16th). QSL via DH7WW, by the Bureau or direct.

9L, SIERRA LEONE. Dr. Karl-Heinz Ilg, DK2WV, will once again be active from here and lead another team of operators consisting of Jan/DJ8NK, Andy/DL5CW, Andreas/DL9USA and Heye/DJ9RR. They will be active as 9L0W from Banana Island (AF-037) between November 22nd and December 4th.

Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. Suggested frequencies are:
CW - 1826, 3506, 7006, 10106, 14006, 18076, 21006, 24896 and 28006 kHz
SSB - 3776, 14186, 18136, 21186, 24936 and 28486 kHz
RTTY/PSK - 7046, 10146, 14086, 18096, 21086, 24916 and 28086 kHz
Also, watch the IOTA frequencies. Operations will also include participation in the CQWW DX CW Contest. QSL via DK2WV. For more details and update, visit: http://www.mdxc.org/9l0w

9TH AAW. The first teams and individuals are already lining up to be active in the 9th Antarctic Activity Week (AAW) which will take place February 20-26th. This is an all bands, all modes world-wide event celebrating the international scientific work in Antarctica. Certificates may be obtained from the WAP using the QSLs from the WAP Reference Numbered stations worked. For more details, see:
http://www.waponline.it/Default.aspx?tabid3

A6, UNITED ARAB EMIRATES. Members of the South East Europe Contest Club have cancelled their A61K operation in the CQWW DX SSB Contest. They can not operate without TRA (Telecom) licence.....

B7, CHINA. A Chinese team of operators will activate B7P from Foshan City (WW. Grid OL63NA), nearby Guangzhou City, during the CQWW DX SSB Contest (October 29-30th) as a Multi-Multi entry. All QSLs will be sent via Bureau. For direct cards, please QSL via their manager BD7IXG.

CY0, SABLE ISLAND (Reminder). Look for Alan, VE1AWW, to be active again as VE1AWW/CY0 until the end of the year. Activity will be limited to his spare time using just a vertical and dipole. On his QRZ.com page, Alan states, "The rig is a Kenwood TS-690S with the AT running a maximum of 100W through a Hy-gain AV-18VS vertical on top of a 30 ft tower or a triband 160/80/40 inverted Vee (CY0 only)." He usually works mainly SSB. Alan is a government employee at the Sable Island station. QSL via his home callsign.

CY0, SABLE ISLAND. Randy, N0TG, has announced that he is going back to Sable Island in a second DXpedition, July 2012. Complete details have not been released yet. Watch for more details and updates on:
http://www.cy0dxpedition.com

D4, CAPE VERDE. Italian operators Fabio/I4UFH, Cortes/IZ4DPV, Luca/IK2NCJ, Carlo/IK1HJS, Fiorenza/IZ8FWN, Dario/IZ4UEZ and Gianfranco/IT9SPB will be active as D4C between October 10-30th. Their activity will include the CQWW DX SSB Contest (October 29-30th) as a Multi-? entry. QSL via IZ4DPV. For the latest information, check the D4C Web page at: http://www.d4c.cc

D4, CAPE VERDE. Achim, DL1DAW, will be active as D44TZN from Sal Island (AF-086) between October 12-18th. Activity will be holiday style on 80-10 meters using CW, SSB and RTTY. He will also be in the Worked All Germany Contest (WAG) (October 15-16th) to provide a multiplier. QSL via his home callsign.

EA9, CEUTA AND MELILLA. A group of Spanish operators will be active as EE9Z during the CQWW DX SSB Contest (October 29-30th) as Multi-? entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jorge/EA9LZ, Julio/EA7JB, Al/EA7JR, Juan/EC7DX, Enrique/EA9GW, Jorge/EA9LZ and possibly others.

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (TBD) entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at: http://www.ey8mm.com

H40, TEMOTU PROVINCE (Reminder). By the time you read this, Jacek, SP5DRH, will once again try to activate Pigeon Island (OC-065), Reef Islands, in the Temotu Province between October 8-21st. Operation last year had to be cancelled due to "dramatic plane delay" that destroyed Jacek's/SP5DRH and Jerzy's/SP3BQ plans. Jacek's main target will be Europe on 160m, some 80m is planned too. Operations will be mainly CW, and RTTY on 15/17 meters. QSL via SP7DQR ONLY. For more details and updates, watch: http://www.sp5drh.com/h40

HQ2, HONDURAS. Dan, HR2DMR, will be active as HQ2W during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/QRP entry. QSL via HR2DMR (QRZ.com) or LoTW.

HU, EL SALVADOR (Update). Mario, YS1GMV, and a team of operators will be active as HU1YS from "Club de Radioaficionados de El Salvador" (C.R.A.S.) in San Salvador during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. Operators mentioned are Jose/YS1MS, Federico/YS1FEA, Francisco/YS1FAF, Mario/YS1MAE, Mario/YS1TG, Florencio/YS1ZC, Mario/YS1GMV and possible others to be confirmed. QSL via EA5GL. ADDED NOTE: Mario, YS1GMV, informs OPDX that he has the 1987-88-89 HU1YS logs, also all the YS1YS and YS0YS logs, and of course the YS1GMV, HU1GMV and HU0WDX logs since 1972.

IOTA NEWS.....
EU-061. Operators Bj&#65533;rn/LA5UKA and Trond/LA9VDA were active as LA6Q from Spjaeroy Island this past weekend (October 7-9th). QSL via LA9VDA.

EU-120. Operators Kev/M0TNX and Martin/M3POG will once again activate Hilbre Island as GB2HI. After their successful activation of Hilbre Island in May this year, the duo has received another permit to be on the air and hope to be on the evening of Friday, October 21st, through the morning of Sunday the 23rd. Activity will be on 160-10 meters using CW, SSB and RTTY. Since their activity will be taking place in the autumn, a special emphasis will be placed on the lower bands. Operations on 160m and 80m will be run on alternate sunrise and sunset. QSL via M0OXO. They will also upload to LoTW and E-QSL twice daily as long as there is an internet connection. For more details and updates, watch: http://www.gb2hi.co.uk

EU-189. (MS0INT Postponed) The June 2012 MS0INT, Isle of Rockall DXpedition has been postponed for another year. The team's decision was not made easily considering their planning and organizational aspects were going extremely well. They believed that the recent activation by the MM0RAI/p Belgian team made Rockall a less attractive target. For more details about the postponement see: http://www.eu189.com

NA-078. Manuel/XE2HUQ will be active as XF1M from Santa Margarita sometime in December. Specific dates are not announced. Activity will be on 80/40/20/17/15/12/10 meters using SSB only. QSL via XE2HUQ.

NA-089. Operators Dragan/K0AP, Hector/AD6D/XE2K and Mike/AB5EB will be active as homecall/5 from Grand Island (aka Half Moon Island) possibly starting as early as 2300z, October 14th, and stay until October 16th. The operation will be dependent on good weather. Activity will be on 40-10 meters using CW and SBB, with 2 stations using a 3 element beam and vertical antennas. QSL via their home callsigns.

NA-165. Operators Manuel/XE2HUQ, Saul/XE2HQI and Jose/XE2HVF will be active as XF1C from Coronados Island between November 7-12th. Activity will be on 80/40/20/17/15/12/10 meters using CW and SSB. QSL via XE2HUQ.

NA-240. NEW IOTA! Rick, K6VVA, is currently making plans for another Alaskan IOTA next year, this time to the Bethel County IOTA Group. The group contains Kwigluk and Pingurbek Islands. The operation depends on a few final details and WX, but is planned for June 22-24th, 2012. For more details and updates, watch the following Web and Twitter pages:
http://www.k6vva.com/iota/na240
http://twitter.com/#!/k6vva

JUST A REMINDER! The DX Magazine's "2011 Most Wanted DX Survey" will be coming to an end. The deadline is October 15th. The survey is available at: http://www.dxpub.com/dx_survey2011.html
Please remember that South Sudan is not on the form this time. Although there was an operation from there this year (ST0R), it is not expected that the confirmations will be available before the October 15th deadline for it to be included in this survey.

KG6, GUAM (OC-026). Joel, KG6DX, will once again be active as KG6DX in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

MM0RAI/p (EU-189) QSL POLICY (dated October 6th). Marc, ON6CC, reports: "The log has been uploaded to LoTW. All individual sponsors (both 2009 and 2011) will get a 'free' direct QSL card via mail, no need to send a SASE to our manager! (provided you worked us of course). Make sure your address is correct on QRZ.COM! Bureau cards will be put in the QSLing system in November. Members of the GDXF and MDXC will have their cards a little sooner. The QSL card has to be designed and printed so sit back and wait. If the online log does not show your callsign send an e-mail to ON4ATW. An update will be posted on this Website http://www.rockall.be
to let you know when the cards arrive from the printer."

NEW QSL MANAGER. Pedro, EA5GL, announced that he is now the new QSL Manager for A61M. This is due to the postal problems A61M has been receiving. If someone has sent a QSL and has not had a replay, A61M apologizes and states he is sorry but please send a QSL to his new manager because he has not received anything. You are free to contact Mohammad by E-mail for updates or check QSOs list. His E-mail address is on QRZ.com.

NEEDS SOME HELP. It is official, Alex, PY2SEX, needs some information about Cologne (Koln), Germany, and/or any HAM Radio operators because he is moving there. He can be reached via his E-mail address at: py2sex@gmail.com

ST0R QSL STATUS. Antonio, EA5RM, informs OPDX on October 9th, that the "ST0R QSLs arrived from printer five days ago and the first batch of cards were mailed. Donors's QSL and cards requested through OQRS will be the first going out."

QSL TC2X via QSL Manager TA1HZ, either direct to POB 73, Karakoy 34421, Istanbul, TURKEY, address or via TA QSL Bureau. Activity this past weekend was during the Scandinavian Activity Contest.

QSL RECEIVED VIA LoTW: 4W6A, 9L5MS, EA4EQD, F1MWV, FP/G4EAG, FP/M0BLF, G0ORC, GW0TKX, GW4BKG, GW5O, HK1MW, JO3JIS, JS1NDM, JS3CTQ, JW8AJA, LU2FE, LX/PA3EWP, NL7G, OK1TN, OK6DJ, OM5MF, OX3R, RA3CQ, RW3XZ, SM5IZS, SQ5STS, TF3IRA, TF3Y, UA3KW, VK7ZX, YV6BFE and WH2X

QSLS RECEIVED VIA MAIL: 3B8FQ, CS2W, GB5TI, RI1FJ, ST0R, UA2F, VE1OMI, VK6DXI, VK0KEV and VP9NI

QSLS RECEIVED VIA THE BUREAU: ST2R

T2, TUVALU (T2T Press Press). Bill, VK4FW, sent out the following press release on October 6th: "Today I received some disturbing emails being circulated from an EU operator. So before this all gets out of hand, I want to set the record straight. The operators and equipment are ready to go. The entire team will be concentrating in getting as many individual callsigns in the log especially from EU and AF where Tuvulu is wanted the most. Logs WILL be uploaded to LOTW and EQSL within 12 months of the DX-pedition. QSL Manager is VK4FW. I am personally disgusted that persons who have nil to do with this DXpedition have seen fit to try to interfere and cause major problems." For more details and updates, watch: http://www.t2t.pacific-dxers.com

T32, CHRISTMAS ISLAND. The Five Star DXers Association (FSDXA) group continues to be very active as T32C from Kiritimati (Christmas Island) until October 26th. As of 0704z, October 9th, the T32C operation has made 91639/QSOs with 25386 Unique Callsigns (36971/SSB, 49979/CW and 4689/RTTY). Logs will be uploaded to ClubLog <www.clublog.org/charts/?c&#65533;2C&a&#65533;bed >
on a daily basis, and any news posted will be on the T32C website. For more details/updates, visit their Web page at: http://www.t32c.com

T32, EAST KIRIBATI. Dave, VO1AU, will be active as T32AU from Kiritimati Island (aka Christmas Island, OC-024) during January 2012. Specific dates were
not provided. QSL via VO1MX only for the 2012 operation.

T6, AFGHANISTAN. Les, WB8LES, Defense Contractor pilot who is stationed in FOB (Forward Operation Base) Shank, Loghar Province, Afghanistan, is expected to be active as T6LB soon. He was sent an ICOM 706 and some other parts for building antennas this past week. Les will be posting updates and the times and frequencies (for 40/20 meters) on QRZ.com for those who need a T6 confirmation.

T7, SAN MARINO. Ivo, 9A3A/E73A, will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via T70A, by the Bureau. Also via LoTW.

TA, TURKEY. Hartwig, DL7BC, will once again be active as TA2/DL7BC during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign.

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQWW DX SSB Contest (October 29-30th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TX5, MARQUESAS ISLANDS (Update to OPDX.1030/Reminder). The international team of operators will start making their way to Hatiheu, Nuku Hiva (OC-027) sometime this week to be active between October 19th and November 1st. The whole team should be in the Pacific area (Tahiti) on October 15th. For more details, visit the TX7M Web page at: http://www.tx7m.com

WP3, PUERTO RICO (NA-099). Alfredo, WP3C, will be active during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. His activity will also count for the WLOTA as LH-2802. QSL via W3HNK, direct preferred, but Bureau is OK. Visit his web page at: http://www.wp3c.qth.com

XV2, VIETNAM. YL operators Do/HL1KDW and Kyoko/JR3MVF will be active as XV2KDW and XV2YL, respectively from Ho Chi Minh City until October 12th. Activity will be on 20/15 meters. QSL via their home callsign.

XU7 & XV2, CAMBODIA AND VIETNAM. Mal, VK6LC, will be on a "DX Vacation". He is expected to be in Cambodia (XU7) between November 5-20th; callsign was not provided, and he did not mention if he will operate. From XU7, he will then return once again to Vietnam and will be active as XV2LC from Vung Tau between December 2-8th. He states that this will be a dedicated 30 day "Culture Tour" of Cambodia (XU7) in November and Vung Tau, Vietnam, in December (on route for 7 days in October, he will be in 9M2 Malaysia). Activity will be on 20/17/12 meters using CW and SSB. QSL via his home callsign, only direct. He does NOT use the QSL Bureau.

ZD8, ASCENSION ISLAND. Operators Allan/W6HGF/ZD8F and Tom/K7ZZ/ZD8ZZ will be active from Garden Cottage on top of Green Mountain on Ascension Island (AF-003) sometime in early November for two weeks. Look for Allan to focus on RTTY, while Tom will provide the CW operations. QSL via their home callsigns direct only or LoTW. More details will be forthcoming.

ZS7, ANTARCTICA. Gerard, ZS6KX, is currently active as ZS6KX/ZS7 (until he receives his ZS7KX callsign) from the SANAE 4 Base, Vesleskarvet, Queen Maude Land (AA ZS-03, WAP ZAF-03, WFF ZSFF-026), until February 2012. Activity is mainly on 20 meters SSB (check around 14175 at 1400z), and when weather permits.

OJ0, MARKET REEF (Press Release - FINAL RUN AT MARKET REEF LIGHTHOUSE):
Helsinki - October 10, 2011
The following report came from Martti, OH2BH / OJ0X.
--- 73 Jarmo OH2BN

Monday morning, October 10th
OJ0X: FINAL RUN AT MARKET REEF LIGHTHOUSE

When OJ0X was set to be active for four weeks with a string of operators,
some targets were outlined. With a target of 50.000 QSOs, it was estimated
that some specials could be done with an always changing propagation. These
were RTTY and higher bands, such as 10M and 12M, still needed by most. Also
a huge effort was put into low-band antennas by Dieter, DL3DXX and Ilmo,
OH2BO. Yes, the 50K mark was passed, and you can look at the results at
<http://www.clublog.org/charts/?c=0X> with some of the latest logs still
to be uploaded. Thanks are due to Nigel, G3TXF; Carsten, DL6LAU and Pertti,
OH2PM for their efforts. They all missed Market Reef because of weather
related schedule issues.

The always popular QRZ.COM callsign database was augmented with an OJ0X
record, with the website normally attracting people as a matter of course.
The added OJ0X feature became quite popular, now in a different way, with
a total of more than 100.000 visits registered. Thanks are due to Mario,
9H5QB and Vlad, UA6JD who did a superb job. See their labor of love at
<http://www.qrz.com/db/OJ0X>

It was also decided to integrate a humorous segment into the website in
the shape of four fictitious monks living in harmony with the DXpedition
in a remote outpost. While it was hopefully entertaining, it also unveiled
some mysteries always looming on the horizon during a DXpedition. Just go
and visit the lonely monks at <http://www.qrz.com/db/OJ0X#mnk>

By way of contrast, the four solitary monks had two wonderful ladies helping to make all the practicalities work, in addition to the more than 50.000 QSOs. While we thank the Finnish Lighthouse Society (FLS) for their overall cooperation, we would also like to recognize Teija Sj�holm and Liisa Oksanen as great companions and hope that they will not suffer the Stockholm Syndrome for Zero X-ray. For all the press releases and Monk's Diary, Jarmo, OH2BN provided great help, being at the end of a very sporadic data connection.

As our ordeal has now come to an end with an again worsening weather, we hope that our skillful captain, Mats Sj�str�m will take us off the island
first thing Tuesday morning. Fun as it was, our adventure now comes to a conclusion. But the good news is that Harri, OH6VM/OJ0VM will come to Market Reef for a one-month stay as the renovated lighthouse needs to be looked after and kept dry. Harri will use the two stations and antennas that we may have to leave behind since our group is scheduled to be taken off by a small outboard boat. See daily FLS reporting at <http://www.majakkaseura.fi/fin/market/marketin_paivakirja_2011/> where the OJ0X group is covered extensively.

And, if everything jells, we may send out another small team to activate Market Reef for the first time in the CQWW SSB contest in a few weeks while hopefully taking our equipment out before the sea starts to freeze over. It is hoped that OJ0-land will be kept as another target location also in 2012 for those who want to experience DXotica at its best. We would like thank FLS chairman Pekka Vaisanen and the FLS Market Reef chair lady, Angela Eriksson, for their great cooperation.

Finally, these expeditions would not happen without those thousands of individuals who give us a reason to go to rare places and hopefully provide an enjoyable show on our Broadway -- the radio waves.

The year 2011 soon comes to an end, and it is time to salute our friends and dear ones -- specifically our families that continue to live through these wonderful adventures. In my personal case, for the past 50 years.

To OJ0X operators DH7SA, DL3DXX, DL5CW, SP5XVY, OH1TV, OH2BAD, OH2BO, OH5BM, OH1ND, SM0W and SM6U, I say thanks for a job well done.

Martti Laine, OH2BH
Radio Arcala

P.S. We are still on Market Reef and will keep two stations on until Monday evening European time. Hopefully not any longer.

Ohio/Penn DX Special Bulletin No. 1031.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1031.2
BID: $OPDX.1031.2
October 10, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and G3XTT for the following DX information.

T32C PRESS RELEASE (Bulletin 8): "With two weeks still to go, T32C now has over 100k QSOs in the log, including 22k with Europe (and 23k with Asia), our target area. As the JA and US pile-ups continue to diminish, we hope the percentage of EU will increase. However, the decline in solar activity since we first started has not helped. That said, we are on track to set at least a few new records.

We have been increasingly active on RTTY, with 6.5k QSOs now on that mode and increasing rapidly. The demand for RTTY, as all DXpeditions have discovered in recent years, seems to be never ending.

We continue to cover as many band/mode openings as we can, with the equipment we carried here - we are well aware that the situation would have been better had our container of equipment arrived, as we would have had the opportunity to install a greater variety of antennas, and would have had linears at all operating positions. Nevertheless, we feel justified in pressing ahead with the expedition - 100k QSOs in 9 days, Field Day style, can't be bad! That said, it has been a constant battle to keep everything working - an antenna party a week into our operation found lots of saltwater corrosion in connections and coax and guys that were badly abraded, just as one example. We are currently able to operate two stations simultaneously on 10, 15 and 20 and are looking at being able to do the same on 12 and 17 to make the most of the main band openings, but with limited coaxial cable (it's heavy to hand carry!) we are having trouble achieving the antenna separation we ideally need.

There is a team changeover tomorrow (Wednesday our time), when 11 operators leave and another 11 arrive, with 16 remaining for the whole period. The incoming team are bringing a couple more FT-450D radios and one more amplifier, as well as some other useful items. We stopped operations for a couple of hours yesterday evening our time for a party to wish the

outgoing operators well.

It's not all work, work, work here on Christmas. Apart from last night's "Christmas Party" (which was, naturally, attended by Santa himself), a couple of groups' have been deep-sea fishing when not on operating duty, with great success. The local people that we have met in our travels have been, without exception, friendly and helpful. It's a fascinating location, with some equally fascinating history (some of which appears on our website).

Don G3XTT
T32C Publicity Officer"

DXNL 1749 - Oct 12, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

D4, CAPE VERDE, AF-086
Achim,DL1DAW, is going to spend his holidays with XYL and HAM radio
on Sal Island (AF-086) from Oct 12-18. He will be QRV as D44TZN in
SSB, CW and RTTY on 80-10m using 100 watts and a simple wire antenna.
His focus will be on the WAG contest and "holiday style" during the
rest of the time. QSL via homecall sowie LoTW, see alos QRZ.com.

An Italian team including I4UFH, IZ4DPV, IK2NCJ, IK1HJS, IZ8FWN,
IZ4UEZ and IT9SPB is active as D4C from Oct 10-30.
QSL via IZ4DPV (direct) or CT1ESV (bureau).

F, FRANCE
Sergio,F/IZ4BBF, member of the MO-DX-IT (MOdena-DX-Italian-Team), will
be QRV from Sainte Marguerite Island (EU-058, DIFM ME020, MIA MF-028)
from Oct 13-16. Listen for him in CW and SSB on the usual IOTA QRGs
on 40m-10m funken. QSL via homecall.
See also QRZ.com and http://www.MODXIT.it

FO/M, MARQUESAS ISLANDS
R3FA, UT5UY, UR5MID, FO5QB, US7UX, RU3UR, US0KW, UU4JMG, UX0LL, RK7A
and UA7A will be QRV from Tahiti and the Marquesas Islands signing:
TX3T (Oct 16-19, Nov 1-4, QTH: Papeete, Tahiti OC-046)
TX7M (Oct 19-Nov 1, QTH: Hatiheu, Nuku Hiva, OC-027, Marquesas Islands)
TX5A (Oct 28-30, CQWW SSB, QTH: Hatiheu, Nuku Hiva, OC-027, Marquesas)
The team wants to focus on the lowbands and Europe.
Online QSL requests are possible at: http://www.tx7m.com/qsl.php
Direct QSLs via RZ3EC, the log will be uploaded to the LoTW as well.

OA, PERU
Hans,OA/OE3NHW, is QRV again until March 2012. Rig: TS-480HX,
Spider Beam and G5RV (16m). QSL via homecall.

Juergen,OA4/DJ2VO, is working in CW on 40m-10m (maybe also 80m) using
100 watts and a vertical until the end of October. QSL via homecall.

UR, UKRAINE
The special event stations EM15UCRF (UT3UZ), EM15E (UR5EDX),
EM15H (UR7HAJ), EM15I (UT5IM), EM15J (UU0JX), EM15L (UR5LO),
EM15M (UR3MP), EM15PA (US9PA), EM15Q (UR4QX), EM15R (UT5RX),
EN15J (UU5JW), EN15L (UT5LO) and EO15L (UX1LA) are celebrating
15 years of the Ukrainian State Centre of Radio Frequencies (UCRF)
from Oct 12-19. QSLs via homecalls.

The special event station EM800BZB (WCA: UR-00119, UCFA: TE-006) is
activated during the festivities of the 800 anniversary of Zbarazh city
from Oct 14-16. QSL via UY5BC (direct: Box 80, Ternopil 46001, Ukraine)

ZK1, SOUTH COOK ISLANDS, OC-013
N7OU will be active as E51NOU from South Cook (OC-013) between Oct 17
and Nov 7. QSL via homecall.

ZK2, NIUE, OC-040
Chris,GM3WOJ/GM2V, is expected to show up as ZK2V from Niue (OC-040)
starting around Oct 15. He will take part in the CQ WWDX CW Contest
in November as well. Chris hopes to become active from a new QTH in
about two months to minimize the local QRN on 160m and 80m.
Keith,GM4YXI/GM5X, will join him for the first two weeks of the
DXpedition and also the CQ WWDX SSB Contest (Oct 29/30) in the SOABHP
class signing ZK2X. QSLs via N3SL, bureau, direct and LoTW.
Their website is: http://www.zk2v.com

ZS7, ANTARCTICA, AN-016
Gerard,ZS6KX, is now working as ZS7KX (not ZS6KX/7 anymore) from
Queen Maud Land in SSB on 14.175 MHz around 1400 UTC. He will stay
until February 2012 and wants to put up also an antenna for 18 MHz.

JOTA/JOTI
The scouts are meeting again for the Jamboree On The Air and the
Jamboree On The Internet on Oct 15-16. For more information see:
http://www.scout.org/en/information_events/events/jota/the_54th_jota_2011

SOUTHEAST ASIA DXPEDITIONS
Charles,HS0ZCW, is willing to help with DXpeditions starting from
Bangkok. The new airport has a lot of connections and Bangkok plenty
of good and cheap hotels. There are hundreds of electronic shops in
the area of Bon Mhor. They don't sell yagis for below 10m. All Yaesu
radios can be sold for export but jhave to be ordered in advance.

ITU: The ITU has accepted South Sudan as the 193rd member on Oct 3.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 15: Whitestick Day Contest
Oct 15/16: South America SSB Contest
Oct 15/16: JARTS WW RTTY Contest
Oct 15/16: QRP ARCI QSO Party
Oct 15/16: WAG Contest
Oct 16: Asia Pacific Sprint Contest
Oct 15/16: Polish BPSK63 WW Contest
Oct 29/30: CQ WWDX Contest, SSB
Nov 26/27: CQ WWDX Contest, CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-004, EA6, Balearic Islands: Mike,EA6/DL4ABO, wants to become active from
Mallorca (WLOTA: 1902) from Oct 19-24. He plans to work mainly in CW
on 30m with his FT-817 (QRP). QSL via DL4ABO.

EU-023, 9H, Malta group: Eight German HAMs (DG0OHD, DK8YY, DL1AOB, DL1AWD,
DL4JS, DL5AOL, DL8ALU and DO5KO) will show up as 9H9OB from Malta
from Oct 14-22. Operation is planned in SSB, CW and digital modes
on HF and 2m inlcuding the WAG Contest. QSL via DH7WW (bureau/direct).

EU-110, 9A, Istra group: Ampelio,9A/IK3JBP, Calogero,9A/IW3ILP,
Silverio,9A/IK3IUL, and Giacomo,9A/IZ3DBA, will be active in SSB and CW
on 80m-10m from Porer Island from Oct 14-16. QSLs via homecalls.

NA-089, W5, Louisiana State East group: Dragan,K0AP/5, Hector,AD6D/5, and
Mike,AB5EB/5, are going to hit the airwaves from Grand Island with two
stations, 3ele yagi and verticals in SSB/CW on 10m-40m from Oct 14-16.
QSLs via homecalls (bureau/direct).

CEPT proposes frequency allocation for amateur radio on medium wave
---
A small allocation of about 15 kHz in parts of the 500 kHz band to the amateur radio service on a secondary basis - this proposal has been made by a project team of about 50 representatives of European governments and other stakeholders in preparation for the next World Radiocommunication Conference WRC12. They followed an invitation of the Federal Network Agency in Germany and met by the end of September in Mainz. The discussion led to a compromise in the size of the amateur radio band, namely 480 kHz - 472 kHz, with a maximum power of 5 W EIRP. Apart from Colin Thomas,G3PSM, representing the IARU Region 1 and John Gould,G3WKL, for the British Amateur Radio Association RSGB, were Peter Frey,HB9MQM, and Ulrich Mueller,DK4VW, DARC representative for frequency management, each member of the Swiss or German delegation. Nine administrations have declared their willingness to support the results of the discussion as a joint European proposal at the last meeting of the CEPT's WRC Conference Preparatory Group in November 2011 in Bucharest. It is likely that other governments may join this result of the meeting Mainz, so that the CEPT on behalf of all its members could go to the WRC12 taking place in Geneva in Jan/Feb 2012.

Many thanks for contributing to this issue of the DXNL are going to:

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
03 - 09 October 2011

Solar activity was low. Isolated to occasional C-class flares
occurred on each day of the period. Regions 1302 (N13, L=280,
class/area Fkc/1070 on 28 September), 1305 (N12, L=248, class/area
Chi/250 on 03 October), and 1313 (S15, L=117, class/area Dai/180 on
06 October) were the principal flare producers during the period.
The largest flare of the period was a C9/Sf at 05/1242 UTC from
Region 1313. No earth-directed CMEs were observed during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit reached
high levels during 03 - 05 October. Normal to moderate levels were
observed during 06 - 09 October.

Geomagnetic field activity was at quiet to unsettled levels during
03 - 04 October. Activity increased to quiet to minor storm levels
on 05 October following a geomagnetic sudden impulse at 05/0742 UTC
(19 nT, Boulder USGS magnetometer), with major storm levels observed
at high latitudes, due to multiple CME passages at Earth. Activity
decreased to quiet to unsettled levels during 06 - 08 October. An
increase to quiet to (briefly) active levels occurred on 09 October
associated with a solar sector boundary change.

Forecast of Solar and Geomagnetic Activity
12 October - 07 November 2011

Solar activity is expected to be at very low to low levels during 12
- 17 October, with a slight chance for moderate levels. An increase
to low levels is expected during 18 - 23 October, with a chance for
moderate levels and a slight chance for high levels; due to the
returns of old Regions 1302 and 1305 on 18 October and 20 October,
respectively.

No proton events are expected at geosynchronous orbit. There will be a slight chance for a proton event at geosynchronous orbit during 18 - 31 October due to the return of old Region 1302.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during 12 - 27 October. Flux levels are expected to increase to moderate to high levels during 28 October - 01 November in response to coronal hole high-speed stream (CH HSS) effects. Flux levels are expected to decrease to normal to moderate levels during 02 - 07 November.

Geomagnetic field activity is expected to be at quiet levels during most of the period. However, quiet to unsettled levels are expected during 15 - 17 October, 28 - 30 October, and 03 - 05 November due to CH HSS effects.

977. The ARRL Contest Update for October 12, 2011

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

October 12, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- High and Low - Fall VHF+ Sprints and Stew Perry Warmup

- Big Windy - New York and Illinois QSO Parties
- Looking Up Down Under
- BBC Radio 4 Bottled Up
- CQ WW 2011 Webinar Available
- 2011 June VHF Extended Results Coming Real Soon
- Waterproofing the Broadcast Way
- Break Out the Clubs

NEW HF OPERATORS - THINGS TO DO

The largest phone contest of the year - CQ World Wide SSB
<http://www.cqww.com/> - is right around the corner. It's the biggest
sporting event the rest of the world has never heard of with 30,000 or
more individual participants! Before filling your log with DX, the ARRL
School Club Roundup <http://www.arrl.org/school-club-roundup-scr> and
Jamboree On the Air <http://www.arrl.org/jamboree-on-the-air-jota> are
great ways to make contact with our younger operators - give them a
call!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

The editor is blissfully unaware of any sins of commission or omission
in the last issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Oct 15-16
```

- ARRL School Club Roundup (Oct 17-21)
- NAQCC Monthly QRP Sprint--CW (Oct 12)
- CWops Monthly Mini-CWT Test (Oct 12)
- Great Pumpkin Sprint--Digital
- Arucaria VHF Contest
- JARTS WW RTTY Contest
- 10-10 Fall CW QSO Party
- QRP ARCI Fall QSO Party--CW
- Iowa QSO Party
- New York QSO Party
- Worked All Germany
- Asia-Pacific Sprint--CW
- Illinois QSO Party
- Spooky Feld-Hell Sprint
- Run For the Bacon--CW (Oct 17)

Oct 22-23

- ARRL EME Contest
- Fall VHF Sprints (902+ MHz)
- FOC QSO Party--CW
- Scandinavian YLRA Contest
- Stew Perry Warmup Contest--CW
- W/VE Islands QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Happy birthday to the legendary Parkes radio telescope antenna - thanks for 50 years of service <http://www.cio.com.au/article/402613/australia_celebrates_50_years_dish_/?fp=16> as of 31 October! Seen in the movie, "The Dish" (highly recommended - Ed.), the antenna was a crucial element in the early years of the United States' manned space program. 64 meters across, the facility is located in New South Wales, Australia, not far from its namesake town.

Your Noise is My Command <http://research.microsoft.com/en-us/um/redmond/groups/cue/publications/chi2011_rfgestures_cohn.pdf> is a paper on using the body as a sense antenna for touch-type control explores the electromagnetic environment of the typical home. It makes for very interesting reading as to how the RF "fog" can be used as the basis for control by using gestures. No word on what happens when strong local contest-style RF is about but perhaps our emissions could eventually change from bugs to features! (Thanks, Brian K1BRF)

Eminently less approachable than the BBC's programmes, the Russian Short Wave Radio Enigma <http://www.wired.com/magazine/2011/09/ff_uvb76/> was featured in a recent Wired magazine story. The station, on 4625 kHz LSB if you're interested, transmits what are thought to be messages to a far-flung espionage empire.

"Ham's Eye View
<http://www.eetimes.com/electronics-blogs/4228868/-A-Hams-Eye-View>" -
a blog on ham radio-related topics - has been inaugurated for the
electrical and electronic engineering magazine EDN in their website's
Planet Analog section. The author is WRTC 2014 chair and perennial
inhabitant of Top Ten contest results, Doug Grant, K1DG.

George VE3ERP is retiring from maintaining his HAMCALC
<http://www.cq-amateur-radio.com/cq_ham_calc/cq_ham_calc.html> package
of calculators for radio problems. Updating the literally dozens of
small utilities to run with current operating systems may be under way
by other volunteers but for now development will stop at the current
version, 129. We thank George for his years of service (the package was
first released in 1995) and the valuable contribution to ham radio!

In between the great openings on the high bands, a contest that is
running 24/7 is just over your heads. The ARISSat-1
<http://www.arissat1.org/> satellite has a lot of orbits left before it
hits the skids, so to speak, but if you have a good prediction for the
date of its demise, you should enter the ARISSat Chicken Little Contest
<http://www.amsat.org/amsat-new/ARISSat/ARISSatContest> which ends on
Oct 15th, possibly along with ARISSat-1. While it's still whirling
around up there, ARISSat-1 is transmitting the call signs of famous
hams via CW on 145.92 MHz. Copy those call signs and enter the CW
contest with information as shown at the satellite's website. This
might be especially fun for student teams! (Thanks, AMSAT
<http://www.amsat.org/> bulletin ANS-282)

Tiny San Marino, T7, is one of the world's smallest DXCC entities.
(Quick! What are the other two nano-entities within the borders of
Italy. Answers below...) This NY Times story
<http://www.nytimes.com/2011/10/11/sports/soccer/san-marino-soccer-team-plays-on-despite-l
ittle-shot-at-winning-or-scoring.html>
provides some interesting background on one of our favorite
multipliers. (Thanks, Brian N9ADG)

Citigroup researchers might want to listen to 20 meters during the
upcoming CQ WW SSB contest before deciding there might not be a
spectrum shortage
<http://www.networkworld.com/news/2011/093011-citigroup-questions-if-us-spectrum-251472.ht
ml>.
There seems to be quite a bit of spectrum that was purchased
speculatively but is as yet unused.

If you want to give a little emphasis in an email without coming across
as shouting, here's a suggestion: Place asterisks around what you want
to be noticed - for example, *notice this* instead of NOTICE THIS. Many
browsers, wikis, and other text-display software will display text
between asterisks in bold font. This lets you get your point across
more politely. Of course, if you really WANT to shout, the CAPS LOCK
key is just a pinky away.

If you are looking for Jamboree On the Air stations this weekend, here's a link <http://www.scouting.org/jota.aspx> to the Boy Scouts of America information page that includes an updated list of stations registered for JOTA activity.

Web Site of the Week - Long may it wave...but not much longer. The transmissions of BBC's station Radio 4 <http://www.guardian.co.uk/media/2011/oct/09/bbc-radio4-long-wave-goodbye> on 198 kHz emanate from a pair of meter-high "valves" that are irreplaceable. Once the remaining store of the big bottles is gone, the broadcasts may well go dark. On the air since 1926 and serving areas out of range of FM stations, transmission moved to 200 kHz in 1934 and then to 198 kHz where it can be found today. (Thanks, Tomas NW7US)

WORD TO THE WISE

Acrostic - The last issue's wonderings about "hamonyms" made from the letters of a call sign prodded Paul WB2ABD to respond, "I believe those are called "acrostics <http://en.wikipedia.org/wiki/Acrostic>"." That's as close as I've seen - perhaps we should call them "hamcrostics".

==> SIGHTS AND SOUNDS

Last week's webinar, "CQ WW Update 2011" hosted by K3EST, KR2Q, and K1AR is now available on the Potomac Valley Radio Club's <http://www.pvrc.org/> website under the "Recorded Webinars" link. (Thanks, Ken K4ZW)

The recent Pacific NW VHF Society convention was held in scenic Bend, Oregon and well-documented in this Picasa photo album <https://picasaweb.google.com/105873817851394269500/PNWVHS2011?authuser=0&feat=directlink> .
Check out the double-rainbow-sunrise picture! Other pictures put faces behind familiar call signs from the Northwest - good job, host committee! (Thanks, Barry WA7KVC)

If you think you might want to see what the rocket sees, here's a terrific video from within Derek Deville's Qu8k <http://www.youtube.com/watch?v=rvDqoxMUroA&feature=share> ("quake") as it ascends from the floor of the Nevada desert to 121,000 feet in a few seconds - an attempt to claim the Carmack Prize <http://blog.crashspace.org/2011/03/the-carmack-prize/>. This would definitely be in the High Power category!

==> RESULTS AND RECORDS

The extended version of the 2011 ARRL June VHF QSO Party results - an excellent piece by Rick K1DS - will be online <http://www.arrl.org/contest-results-articles> in a day or two for your reading enjoyment! There is a very nice adventureroverama by Steve N2CEI and Sandra K4SME, as well. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Chris 9A5K has developed new contest log processing software for the latest EU Spring Sprint contests. The results for CW <http://www.hamradio.hr/eusprint/en/index.php?pageid=4&contestid=12&showmode=final> and Phone <http://www.hamradio.hr/eusprint/en/index.php?pageid=4&contestid=13&showmode=final> are now online. (Thanks to the EU Sprint Committee)

Those two entities are: 1A0 (Sov. Order of the Knights of Malta) and the Vatican (HV).

OPERATING TIP

Pat WW9R contributes this tip for computer logging - "I find it helpful to run a strip of masking tape above the Function keys and mark what each one does. Then, in the heat of the battle or when you get really tired, you can find all the messages! I fill all available CW messages with something like "73""GL" "?" "AGN" and the individual parts of the exchange; sometimes a slowed-down version of the exchange so I don't need to touch the CW speed setting."

==> TECHNICAL TOPICS AND INFORMATION

Howie WA4PSC posted this extended set of instructions that describe the broadcast industry standard for weatherproofing coaxial cable connections. Adapt to your own circumstances.

When sealed correctly in the following manner the weatherproofing will last for years and withstand just about any weather. When cut open for service, the mated connected pair will be dry and shiny. This is the broadcast industry standard - others may have different methods that work well for them so the usual caveats apply. Since ham radio is a hobby, there is less financial pressure to make installations bulletproof but if the weatherproofing fails atop a tower in the dead of winter, you will rue the day you didn't do the job right.

1) Arrange the cable so that it can form a drip loop near the connector. Keeping water away from the connector is important. Support the cable at or near the drip loop to reduce flexing at the connector which can cause weatherproofing failure.

2) Thoroughly clean the connector body/cable/antenna connector body where the weatherproofing will be applied. Adhesion is greatly degraded by dust or grease.

3) Lay down a flat, non-wrinkled single layer of 3/4" Scotch electrical tape extending several inches out on the cable jacket and/or antenna connector and covering the mated connector bodies. This provides a clean surface for the self-fusing butyl tape layer and protects the connectors from the butyl adhesive. Some recommend flipping the initial layer upside-down over the connector to keep adhesive residue off of the connector bodies but in my experience this is a non-issue if quality tape is used, such as Scotch 33+ or 88+.

4) Apply a layer of self-fusing butyl tape, stopping an inch from each end of the initial layer. This is the main waterproofing layer, so it is important to keep the butyl warm and thoroughly massage it into a homogenous mass around the the connector assembly. In the winter, keep the rolls of tape and butyl inside your jacket or your arm pit until use. It is also important to press it into grooves and attempt to mold the outside surface of the butyl into as smooth a cylinder as possible. If this is not done, the top layer of tape will not lay flat and allow moisture ingress as well as allow the butyl to be exposed to the weather. Make the transition from the cylindrical mass of butyl to the cable as smooth as possible.

5) On top of the butyl, wrap several layers of 2" wide electrical tape extending past the bottom layer of tape on both ends of the connector assembly. Use low tension to ensure the type is wrinkle-free and flat against the butyl and cable/antenna body. Do NOT wrap the tape tightly; when the assembly heats up in the sun the tension exerted by the tape will begin to extrude the butyl between the tape layers. The final 6" of outer tape should be applied with very little tension so as not to put shear on the usupported adhesive. The end of the tape must be cut, not torn, so there is no distortion or residual stress in the tape. Wrap the final turns carefully, do NOT get dust, dirt, finger or other greases on the adhesive and make sure the end of the tape lands flat and with zero tension. If it pulls up for any reason, the "flag" it forms will catch the wind and eventually compromise the assembly.

I have settled on using Andrew #221213 weatherproofing kits which cost less than $20 each, include quality Scotch tape and can weatherproof one 3" Heliax, two 1-5/8" Heliax, four 7/8" Heliax or at least six or more 1/2" UHF/N connectors with each kit (they claim 12). I have had other tower riggers say that the Wireless Solutions WK-U kit also works well. Either kit contains materials which pass MIL-STD-1344A, Method 1002 for weather resistance.

Occasionally "aneurysms" develop in the weatherproofing from trapped air bubbles caused by pressure from the inside of the cable when using UHF connectors which are not pressure tight. This pressure is caused by thermal cycling and air expansion. According to Andrews, placing gel weatherproofing compound in connectors is also not recommended as it can soften the gaskets in connector bodies, as well as be forced under expansion through the tape and contribute to degradation of the weatherproofing.

It is common for ham antenna installs to feature multiple connectors close together where you cannot wrap tape successfully. In those cases, the dual-layer hot-melt-lined heat-shrink is often used. Getting this technique right may take some experimentation. The biggest problem with the use of adhesive-lined heat-shrink in this application is that the polymer used for the melting liner becomes quite rigid at low temperatures and may release from cable jackets when mechanically stressed by cable movement. The vinyl/butyl tape solution in general will not. In either case, adequately supporting the cable close to the

connection will greatly help the longevity of the connection.

==> CONVERSATION

Break Out the Clubs

As the fall contest season gets into full roar, don't miss the opportunity to get your club members involved, especially those who are generally on the sidelines. There is nothing like a club challenge or mini-contest or even a set of hand-labeled whisk brooms to encourage those new to radiosport to give it a try. The new ARRL Sweepstakes Contest Manager, Larry K5OT has some words of wisdom for clubs - pass it on!

73, Ward N0AX

Clubs are always looking for operating events and opportunities that excite and motivate their members to be active, especially on HF. This year's ARRL November Sweepstakes <http://www.arrl.org/sweepstakes> certainly fits the bill and - for the first time in years - the bands will have plenty to offer Technician license-holders, too! Sweepstakes - or "Sweeps" among friends - is a contest in which modest stations can do very, very well. There's no need for giant towers and antennas or legal-limit amplifiers - a backyard dipole or vertical and a "barefoot" HF rig will do just fine. In fact, SS is one contest in which antennas can be too high!

Because Sweepstakes brings out so many US and Canadian operators, it is very popular for friendly "contests within a contest" between clubs and between club members. A club contest to work the most sections, make Worked All States, or ring up the highest score is a nice way to wrap up the season with awards being presented at the year-end meeting. Many clubs have a friendly competition with other nearby clubs for local bragging rights. Even small clubs can get into the action on a national scale in the Local category of the ARRL Affiliated Club Competion <http://www.arrl.org/general-contest-information>.

College clubs <http://collegearc.org/> can participate in two ways. The first is to submit a score in the School Club category of the main competition. With its 30-hour time limit, the shared-operating nature of the category fits right in with the busy fall semester. Give the Phone weekend (Nov 19-20) a try before heading home for Thanksgiving break! The second is to participate in the Collegiate Championship <http://www.collegiatechampionship.org/>, sponsored by Ken Harker, WM5R. Ken has compiled a long list of yearly winners <http://www.collegiatechampionship.org/conferences/> for each of the NCAA Division I Conferences - has your school's club participated? The website is currently being updated with the 2010 scores and we need some help sorting out the current conference assignment for the record-holders - any volunteers? Finally, for a relaxed "practice" opportunity, try the ARRL's School Club Roundup <http://www.arrl.org/school-club-roundup> from Oct 17-21.

Did we mention the opportunities for Technician licensees? Techs have a large chunk of 10 meters available to them on both Phone (28.3-28.5 MHz) and CW (28.0-28.2) but in recent years, there hasn't been much activity due to quiet solar conditions. Lately, the solar flux has been kicking up to 120 and higher, meaning that 10 meters opens up coast-to-coast and beyond! If your club's Techs have been wondering what all the fuss is about 10 meters, be sure to encourage their activity during Sweeps. Perhaps one of those intra-club challenges we were talking about?

If you'd like to know more about Sweepstakes, download the Sweepstakes Operating Guide <http://www.arrl.org/sweepstakes> - there are simple explanations of the rules and a list of resource articles and websites to help you get the most from your Sweepstakes weekend. Maybe you'll even bring home the coveted "Clean Sweep" coffee mug!

CQ Sweeps!

73, Larry Hammel K5OT

==> CONTESTS

12 October through 25 October

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

NAQCC Monthly QRP Sprint--CW, from Oct 12, 0030Z to Oct 12, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Oct 12, 1300Z, see website. Bands (MHz): 3.5-14.Multiple operating periods, twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Great Pumpkin Sprint--Digital, from Oct 15, 8 PM to Oct 16, 2 AM. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: Nov 15. Rules <http://www.podxs070.com/>

JARTS WW RTTY Contest--Digital, from Oct 15, 0000Z to Oct 16, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and age (YL may send '00'). Logs due: Nov 30. Rules <http://www.jarts.jp/>

10-10 Fall CW QSO Party--CW, from Oct 15, 0001Z to Oct 16, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Oct 31. Rules <http://www.ten-ten.org/>

QRP ARCI Fall QSO Party--CW, from Oct 15, 1200Z to Oct 16, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, QRP ARCI number or pwr. Logs

due: Nov 16. Rules <http://www.qrparci.org/>

Iowa QSO Party--Phone,CW,Digital, from Oct 15, 1400Z to Oct 15, 2300Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T) and IA county, state/prov, or "DX". Logs due: Nov 15. Rules <http://www.wa0dx.org/>

New York QSO Party--Phone,CW,Digital, from Oct 15, 1400Z to Oct 16, 0200Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.820, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.825, 7.200, 14.290, 21.350, 28.400. Exchange: RS(T), NY county, state/prov, or "DX". Logs due: 14 days. Rules <http://www.nyqp.org/>

Worked All Germany--Phone,CW, from Oct 15, 1500Z to Oct 16, 1459Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial or DOK code. Logs due: 14 days. Rules <http://www.darc.de/referate/dx/contest/wag>

Asia-Pacific Sprint--CW, from Oct 16, 0000Z to Oct 16, 0200Z. Bands (MHz): 14-21. Exchange: RST and serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

Illinois QSO Party--Phone,CW, from Oct 16, 1700Z to Oct 17, 0100Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and IL county or S/P/C. Logs due: Nov 17. Rules <http://www.w9awe.org/>

Spooky Feld-Hell Sprint--Digital, from Oct 16, 2000Z to Oct 16, 2200Z. Bands (MHz): 3.5-7,21-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 2 weeks. Rules <http://www.feldhellclub.org/>

Run For the Bacon--CW, from Oct 17, 0200Z to Oct 17, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

School Club Roundup--Phone,CW,Digital, from Oct 17, 1300Z to Oct 21, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, class and S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup-scr>

FOC QSO Party--CW, from Oct 22, 0000Z to Oct 22, 2359Z. Bands (MHz): 1.8-28. Exchange: RST, name, and FOC number if member. Logs due: 7 days. Rules <http://www.g4foc.org/>

Scandinavian YLRA Contest--Phone,CW,Digital, from Oct 22, 1000Z to Oct 23, 1000Z. Bands (MHz): 3.5-28. Frequencies: See website. Exchange: RS(T) and "88" (YLs) or "73" (OMs). Logs due: Nov 30. Rules <http://www.sylra.is/>

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-10-13
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** Info QSL's for C37MS expedition **

Finaly I received last weekend the QSL's for C37MS expedition this
summer from the printshop. First letters with cards are send today
for all I received direct. If you need a card direct, please send it
soon to me, with SASE so I can handle this. Address is OK in QRZ.com
Within one month all other cards will be send to the QSL buro. Best
73's, Chris, PA2CHR PS: Did you vote for 'best MS-expedition 2011'
already...?? SOURCE: tnx to Chris, PA2CHR direct to MMMonVHF
Best Expedition of the Year (TROPHY 2011) will be worked out at end
of the year again (http://www.mmmonvhf.de/trophy.php), ed. DL8EBW

7P8EME (Lesotho) was qrv from KG30VI on VHF (EME and MS)

LATEST NEWS by Pine, ZS6OB, dated 2011-10-12: Hi gentlemen
Thanks again to all for a great time - without your participation
it would not have been possible It is possible that there maybe one
or two duplicates still. If there is any station that I may have
missed I still have the all text file available to go back to and
verify. By the way Gabriel VQ Log works like a charm dear friend...

** Info about TS5SN Activity **

I speaked with manager IZ1BZV Giorgio, a friend on my city, confirm that not is active on 2011 , autority on Congo not renewed licence, no qso , no log on 2011, him hope on next year, if not possible, look for new country activity. 73 Mario I1ANP. SOURCE: tnx to Mario, I1ANP direct to MMMonVHF

** K7BV CM94/95 & CM86/87 Update **
Tomorrow morning's operation on the CM94/95 line will occur one hour later than originally planned. CM86/87 should be right on schedule for 1300z. This meteor scatter operations will hopefully give a few need MS grids to those in need. I expect to be on Ping Jockey and ON4KST in case anyone wants to try ISCAT long haul or even SSB/CW if digital modes in not in your bag of tricks. See you then. Please do drop me a note if you do expect to be watching for me so I can be sure to watch for YOU. SOURCE: Dennis K7BV

** 9H, Malta (IOTA EU-023) in the air on HF and 144 MHz **

9H9OB will be the call of the team around DG0OHD Torsten, DK8YY Rich, DL1AOB Hans, DL1AWD Dieter, DL4JS Ingolf, DL5AOL Olaf,

DL8ALU Jens-Uwe and DO5KO Konstantin. They will try to be qrv
from 14. till 22. Oktober on the HF-bands in SSB, CW and digital
mode and on 2 m in SSB and CW. A participation in the WAG-Contest
is planned. QSL via DH7WW - buro or direct.
SOURCE: tnx to Ulrich, DH7WW direct to MMMonVHF

** Cocos Keeling Is., VK9C qrv HF and 6m **
Lot, DJ7ZG and Babs, DL7AFS (www.qsl.net/dl7afs/) will be active
as VK9CX from the Cocos (Keeling) Islands (OC-003) from 19 October
to 9 November. They plan to operate RTTY, PSK and SSB on 80-6 m.
QSL via DL7AFS. Fwd: [425ENG] 425 DX News #1066

** MALPELO 2012 **
The Malpelo 2012 DXpedition's team now consists of 18 operators
representing eight countries. Two members of the team will travel
to Malpelo for a reconnaissance visit in late October. The purpose
is to check out possible operating sites and make final decisions
on the type and placement of antennas, as they want to try to have
antennas oriented for all parts of the DX world. Every effort is
being made to extend the length of time available for operating.
It appears that they can get to the island one day earlier and may
have the option of staying a few extra days. The current plan has
the team QRV on or about 23 January for 12-14 days. Operations are
planned on 160 through 6 metres on CW, SSB and one digital mode.
N2OO and the SJDXA will handle QSL duties. The Malpelo team is
paying all their transportation expenses to/from Colombia and
putting up about one-half of all the DXpedition costs. To cover
the reminder of our expenses, contributions are being sought
from DX Foundations, DX Clubs and individual DXers. You may
contribute directly to DXARC (Colombia), K4UEE (North America),
DJ9ZB (Europe) or JA1ELY (Asia/JA). See www.hk0na.com for further
information on how you can help...

==> + US AMATEURS NOW 700,000 STRONG!

As the third quarter of 2011 came to a close, ARRL VEC Manager Maria
Somma, AB1FM, began calculating the number of licensed Amateur Radio
operators in the US, as well as the number of new licensees. "At the
end of September, I saw that the number of hams in the US was high,"
she said. "When I started comparing that number with other years, I
found that it was an all-time high." For the first time, there are more
than 700,000 radio amateurs in the US.

"When looking at the three current license classes -- Technician,
General and Amateur Extra -- these numbers are impressive," Somma
explained. "The number of Technicians peaked in March 2011 at 342,572,
while in September 2011, we saw both Generals and Extras peak at
159,861 and 125,661, respectively. As new Technicians earn their
Amateur Radio licenses, and current Technician licensees move on to
General and Generals upgrade to Extra, this can cause up-and-down
```

fluctuations for these totals." Read more here
<http://www.arrl.org/news/us-amateurs-now-700-000-strong>.

==> + ON THE AIR: ISS TO BE ON THE AIR FOR JOTA THIS WEEKEND

If you are planning on participating in this weekend's Jamboree On
the Air (JOTA
<http://www.arrl.org/news/scouts-to-take-to-the-airwaves-for-the-54th-jambore
e-on-the-air>),
take note: Astronaut Mike Fossum, KF5AQG, is planning to participate in
JOTA from the International Space Station, using the call sign NA1SS.
According to the AMSAT website
<http://www.amsat.org/amsat-new/index.php>, Fossum's schedule is
somewhat flexible on the weekends, but he will not be available for
every pass. The typical crew work periods are 0800-1930 UTC, but they
are sometimes available a bit later. When available, Fossum will be
operating on the standard ISS frequencies. In the US and elsewhere in
IARU Regions 2 and 3, the uplink is 144.49 MHz. In Region 1, the uplink
is 145.200 MHz. The worldwide downlink for NA1SS is 145.800 MHz.

==> GET READY FOR THE 6TH ANNUAL ARRL ON-LINE AUCTION

The Sixth Annual ARRL On-Line Auction <http://www.arrl.org/auction>
will be open for preview at 10 AM (EDT) on Friday, October 14, and will
open for bidding at 10 AM (EDT) on Wednesday, October 19. According to
Advertising Manager and ARRL On-Line Auction Coordinator Deb Jahnke,
K1DAJ, there is a large assortment of ARRL Product Review items,
including a Yaesu FT-DX5000D HF and 6 meter transceiver, an Ameritron
ALS-1300 HF power amplifier, a Ten-Tec 599AT Eagle HF and 6 meter
transceiver, a Kenwood TS-590S HF and 6 meter transceiver and an
Elecraft P3 panadapter, as well as a wide assortment of books,
including ARRL Handbooks from the 1920s and 1930s. "If you are
interested in some great bargains and some great fun, you really need
to check this out," she said. Jahnke also encouraged visitors to visit
the site to pre-register and scope out those "must-have" items. The
2011 ARRL On-Line Auction runs through 11:59 PM (EDT) October 26.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 TEAM ANNOUNCES MORSE CODE
CONTEST

ARISSat-1 -- the latest Amateur Radio satellite -- began its
education-based mission after deployment from the International Space
Station in August 2011. The ARISSat-1 mission is to provide a variety
of information through its many broadcast modes promoting STEM-based
education initiatives in the classroom. In an effort to help realize
this mission, the ARRISSat-1 Team is sponsoring a CW contest.

To participate, listeners need to copy and submit any six of the more
than 200 call signs transmitted during ARISSat-1's multiple satellite
passes. These call signs represent those radio amateurs who have made
significant contributions to the ARISS program or Amateur Radio as a
whole. They have been digitally stored on board ARISSat-1 and are being

transmitted in rotation using Morse code at 145.92 MHz. The call signs can be heard between the RS01S CW identification and the CW telemetry in the repeated code transmission sequence. Read more here <http://www.arrl.org/news/arissat-1-team-announces-morse-code-contest>.

==> + AMATEUR RADIO IN SPACE: AMSAT TO CELEBRATE 50 YEARS IN SPACE AT ANNUAL SPACE SYMPOSIUM

The AMSAT 2011 AMSAT Space Symposium will be held November 4-6 in San Jose, California. This year's Symposium coincides with the celebration of the 50th anniversary of OSCAR 1, the first Amateur Radio satellite. The Symposium will feature presentations on amateur satellites, operating techniques, news and plans from the amateur satellite world, as well as an AMSAT General Meeting and a meeting of AMSAT's Board of Directors.

While the final schedule is still being worked out, AMSAT has announced that Lance Ginner, K6GSJ, will be the speaker at the banquet. Ginner helped build and develop OSCAR 1 and OSCAR 2. His involvement with Amateur Radio spacecraft continued with OSCAR 3, OSCAR 4, OSCAR 5 (the first for the newly formed Radio Amateur Satellite Corporation in 1970), OSCAR 6, OSCAR 7 and OSCAR 8.

ARRL Laboratory Test Engineer Bob Allison, WB1GCM, will also be speaking at the Symposium, accompanied by a prototype of OSCAR 1. With help from Ginner and other AMSAT members, Allison and W1AW Station Manager Joe Carcia, NJ1Q, refurbished the prototype, one of three made by Project OSCAR. One of the satellites went into orbit in 1961, one is on display at the Smithsonian Air and Space Museum in Washington, DC and the other, until recently, was sitting in a display case in the downstairs hallway at ARRL Headquarters. Read more here <http://www.arrl.org/news/amsat-to-celebrate-50-years-in-space-at-annual-spac e-symposium>.

==> + ARRL MARKS 28TH YEAR OF HOSTING USTTI ARAC COURSE

Students from Ghana, Uganda and Trinidad and Tobago attended the United States Telecommunications Training Institute (USTTI <http://ustti.org/>) Amateur Radio Administration Course (ARAC <http://ustti.org/courses/display.php3?CourseID=332>) at ARRL Headquarters October 3-7. ARRL Chief Technology Officer Brennan Price, N4QX, coordinated the session and led the course. ARRL Assistant to the Chief Executive Officer and Meeting Planner Lisa Kustosik, KA1UFZ, coordinated ARRL's participation with USTTI. According to Price, the students work in their respective government telecommunications offices dealing with telecommunications and Amateur Radio testing, licensing and monitoring. Read more here <http://www.arrl.org/news/arrl-marks-28th-year-of-hosting-ustti-arac-course>.

==> PUBLIC SERVICE: NOMINATIONS NOW OPEN FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

The George Hart Distinguished Service Award may be presented by the Board of Directors to the ARRL member whose service to the ARRL's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Read more here <http://www.arrl.org/news/nominations-now-open-for-the-george-hart-distinguished-service-award>.

==> SOLAR UPDATE

Tad "Let the Sun run down right behind the hill <http://www.youtube.com/watch?v=0Sky37vMiFY>" Cook, K7RA, reports: Strong solar activity continues. Check here <http://spaceweather.com/> for daily images of the Sun, and you'll see it is full of spots. You can also use the archive feature to view the position of sunspots for previous days. The average daily sunspot number for the week (95.4) was about the same as last week (96.7) and the week before (96.1). The number hasn't stayed steady though, with a low of 82 and a high of 126 over the past two weeks. You can check here <http://www.swpc.noaa.gov/ftpmenu/forecasts/SRS.html> for daily updates showing which numbered groups appeared and faded away, along with a relative area for each. The latest forecast from USAF/NOAA has the solar flux at 135 on October 13-15, 130 on October 16-19, and 125 on October 20 through November 2. Predicted planetary A index is 5 on October 13-14, 8 on October 15-17, 5 on October 18-27 and 8 on October 28-30. Click here <http://www.youtube.com/watch?v=25b1SJxnYPQ> for a video of the Sun showing flares and other activity over several days, with audio from Thomas Ashcraft's receiver in New Mexico, where he records radio noise from our nearby star. Remember that the video and the audio are not synced in real time. Look for more information on the ARRL website on Friday, October 14. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by James Taylor's October Road <http://www.youtube.com/watch?v=0Sky37vMiFY>.

==> THIS WEEK ON THE RADIO

This week:

- October 15 -- Iowa QSO Party; Feld Hell Sprint
- October 15-16 -- Jamboree On the Air (local time); New York QSO Party; 10-10 International Fall Contest (CW); JARTS WW RTTY Contest; CQ SA Contest (SSB); QRP ARCI Fall QSO Party; Worked All Germany Contest
- October 16 -- Asia-Pacific Fall Sprint (CW)
- October 16-17 -- Illinois QSO Party
- October 17 -- Run for the Bacon QRP Contest
- October 17-21 -- ARRL School Club Roundup <http://www.arrl.org/school-club-roundup>

Next week:

- October 22 -- FOC QSO Party, Microwave Fall Sprint (local time)
- October 22-23 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
Stew Perry Topband Challenge; W/VE Islands QSO Party; SYLRA Contest
- October 26 -- SKCC Sprint
- October 26-27 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- October 14-16 -- ARRL Pacific Division Convention
<http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>,
Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>,
Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention
<http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-1>,
Palmetto, Florida

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1783 - October 14 2011

Amateur Radio Newsline report number 1783 with a release date of Friday, October 14th, 2011 to follow in 5-4-3-2-1.

The following is a QST. The FCC takes on the on-line peddlers of cellpgone and other radio jamming devices, Thailand's telecommunications committee donates a repeater to hams helping in flood relief efforts, more on Greece's national society get use of 60 meters and a tribute to a historic radio station in Nashville, Tennessee. All this and more on Amateur Radio Newsline(tm) report number 1783 coming your way right now.

**

ENFORCEMENT: TWENTY ONLINE RETAILERS OF ILLEGAL JAMMING DEVICES TARGETED IN OMNIBUS ENFORCEMENT ACTION

If you sell things that jam the airwaves, watch out. The FCC is out to get you. We have more in this report.

--

The FCC's Enforcement Bureau has issued 20 enforcement actions against online retailers in 12 states. This for illegally marketing more than 200 uniquely-described models of cell phone, GPS, Wi-Fi and similar signal jamming devices.

According to the FCC, these devices have the capacity to prevent, block, or otherwise interfere with authorized radio communications in violation of section 302(b) of the Communications Act and sections 2.803 and 15.201(b) of the Commission's rules. The Enforcement Bureau's actions are intended to warn retailers and potential purchasers that marketing, selling, or using signal jamming devices in the U.S. is illegal and that the FCC will vigorously prosecute these violations.

In the Omnibus Citation and Order, the Bureau directed each online retailer to take immediate steps to cease marketing signal jamming devices to consumers in the United States and its territories. Such steps include removing the illegal signal jamming devices from online display, expressly excluding consumers in the United States as potential customers, and declining to sell signal jamming devices or complete any sales transaction to consumers in the United States.

The FCC also ordered the online retailers to provide information about their signal jammer suppliers, distribution channels, and sales including the manufacturer of each illegal signal jamming device, the websites that the online retailer has used to market the devices in the United States or its territories, and the corrective actions the online retailer has taken or will take to comply with federal law prohibiting the marketing and sale of jamming devices.

Because these enforcement actions were taken against retailers who are not otherwise regulated by the Commission, the Communications Act requires the Commission to first issue a "citation" describing the violation and warning against future misconduct. The Omnibus Citation and Order emphasized that a second violation could lead to monetary penalties of $16,000 to $112,500 per sale per day of unauthorized radio jamming gear.

For the amateur radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom, in Los Angeles.

--

It will be interesting to see how many of those on-line sellers dinged by the FCC actually stop selling these types of jamming devices. (FCC)

**

RESCUE RADIO: THAILAND'S NBTC DONATES HAM REPEATER TO ASSIST IN FLOOD RELIEF COMMUNICATIONS

The Bangkok Post reports that Thailand's newly formed National Broadcasting and Telecommunications Commission, better known by its initials NBTC has donated an amateur radio repeater for use in flood relief communications.

The NBTC met on Monday, October 10th and first on the agenda was how to help with the flood crisis relief. Speaking at the meeting, its chairman said it was urgent that telecommunications be improved in flood hit areas. For that reason the commission was donating a repeater to the Amateur Radio Operators Group of Ayutthaya to help reinforce its members radio signals to cover a wider area.

The NBTC's Deputy Chairman added that the commission would continue to help fortify amateur radio networks. Also that it would assign community radio stations to keep the people informed of the flood situation. He closed his remarks by stating that amateur radio operators can be of much help when the country is in crisis.

You can read more about this story on-line at tinyurl.com/flood-crisis-repeater (Southgate, Bangkok Post)

**

RESTRUCTURING: GREECE'S NATIONAL SOCIETY GETS 5 MHZ FOLLOW-UP

And a follow up to our story last week concerning Greece's national amateur radio society receiving permission to use a single frequency in the 5 MHz band. R-S-G-B News Reader Jeremy Boot, G4NJH, has the latest on this still emerging story:

--

After three years of negotiation the Radio Amateur Association of Greece has been given permission for its headquarters club station, SZ1SV, to use the channel centered on 5400kHz. SZ1SV is permitted to use 5398.5 to 5401.5kHz for SSB, CW and digital modes, with a maximum power of 100W.

Since the permission is based upon propagation studies, the Greek association is planning to operate a beacon, somewhat similar to our own 5MHz chain, when the station is not being used for contacts.

The RSGB has been working closely with Manos, SV1IW, President of the Radio Amateur Association of Greece, on their planned usage of this channel for beaconing, so that this can exist alongside others usage of the channel for QSOs. Plans for the beacon have yet to be finalised, but it will likely operate every 15 minutes, with an alternating CW and PSK31/PSK63 identifier.

I'm Jeramy Boot, and you are listening to the amateur Radio Newsline.

--

There's also late word that the proposed beacon may be capable of being remotely switched on and off. This as a further measure to minimize interference to other users of that valuable 60 meter channel. (GB2RS)

**

RESTRUCTURING: WORLDS YOUNGEST NATION ACCEPTED INTO THE ITU

The International Telecommunication Union has announced that the world's newest country, the South Sudan, has joined that world telecommunications governing body. It became the I-T-U's 193rd member state, effective from this past October 3rd. (IRTS)

**

RADIO POLITICS: WORLD ECONOMIC RECESSION TAKES PORTUGUESE REPEATERS OFF THE AIR

Several of Portugal's amateur radio repeaters appear to be the latest casualties of the current world economic crisis. In a message to Southgate News, Miguel Andrade, CT1ETL says that all the repeaters and Echolink nodes located near of Spanish border are off line.

Andrade says that the reason for the blackout is related to the lack of financial support in order to keep these devices working. In other words, the funds are not there at the moment to maintain these systems for their user base.

CT1ETL notes that Jaime Pinheiro, CT2GPZ, is the technical manager for some of these systems. He is reportedly trying to develop partnerships and sponsors to bring the systems back on the air.

So far it is still not possible to predict the date if or when some or all might return to normal operation. As we go to air, art least five of Portugal's amateur radio repeater systems on 2 meters and 70 centimeters are down for the count. (CT1ETL, Southgate)

ENFORCEMENT: AUSTRALIA'S ACMA GOES AFTER ALLEGED VK REPEATER JAMMER

A yet to be identified man down-under has found himself the subject of allegations of rules violations and seizure of equipment by the Australian Communications and Media Authority or ACMA. This, following a recent visit to his home.

The raid, in Melbourne's west, follows a prolonged investigation into interference being experienced by hams on two repeater systems. The regulatory authority successfully applied under for a search warrant issued through the Melbourne Magistrates Court.

The ACMA has gone quiet since the raid on September 14, while its investigation in ongoing. A court hearing is yet to be set. What is to be alleged are breaches of the Australian Radiocommunications Act 1992.

In recent months the ACMA has stepped up its enforcement activities against personal communications rules violators. Last June the agency reported how it invoked search warrants and prosecuted two people in Melbourne who used encrypted communications for their own communications. At that time the ACMA found seven radios programmed on the channel suffering interference worth $5000. These were surrendered to it during the court hearing. One offender with an amateur radio entry level Foundation License had it suspended for three months. (VK3PC)

**

ENFORCEMENT: LAPD INTERNET UNIT HOPES TO CURB FLASH ROBS

The Los Angeles Police Department's newly created Internet Unit wants to head off any potential instant robberies or so called "flash robs." These are similar to law abiding "flash mobs" that are organized via social networking sites to perform acts of entertainment, dancing or other artistic expression. Only the "flash robs" bring together groups

of people who will gather at a department store or other place of business and grab what they can carry away.

By using public domain search engines like Google and other sites along with tips from the general public the Internet Unit hopes to determine if there is a risk of criminal activity. According to the LAPD, social media is evolving and this department is trying to evolve with the technology. (Published news reports)

**

RADIO RULES: THE LIGHTSQUARED VS. GPS SAGA - ROUND 5 OR 6

It's the Washington saga that never seems to end. Of coarse we are talking about LightSquared vs. the Global Positioning Industry over concerns over interference between Lightsquared's proposed national system and users of the Global Positioning System in spectrum adjacent to it. And now there's word that Lightsquared may take legal action if it is denied permission by the FCC to build out its planned network.

Jeffrey Carlisle is LightSquared's Vice President of Regulatory Affairs and Public Policy. In a teleconference with reporters on Monday, October 3rd Carlisle said that if it is impossible to get a decision on this that allows his company to move forward that LightSquared will then have to insist on our legal rights.

The FCC has said it that it will not permit LightSquared to operate the proposed network unless it can prove the interference problems to GPS users have been solved. Many vendors and users of Global Positioning System equipment have lobbied the FCC to keep LightSquared from running its network in assigned spectrum adjacent to that used by GPS devices. Global Positioning System users claim that the LightSquared network would degrade service to them because signal levels would be far greater than the satellite transmissions used for GPS.

For its part, LightSquared claims that any problem would be the result of the GPS product suppliers that knew as far back as 2001 that there would be a terrestrial mobile network operating in frequencies adjacent to their devices. The company believes that the problem exists only because of the lack of adjacent channel filtering in current GPS reception equipment and that it's the GPS industry's responsibility to find a cure.

LightSquared's Carlisle did not elaborate on what action the company might take, however he believes that the FCC's basic rules on interference cannot be used to protect the GPS receivers in this particular instance. He also noted that his company is trying to work with the GPS industry to solve the problem by allowing the FCC to approve the network.

Meantime some legal analysts are wondering whom it is that LightSquared might file its litigation against. No matter if it's the GPS industry, the FCC or both, any law suit could wind up going on for years with

appeals and counter appeals being filed. By then, it's possible that newer technology could have come along making any current day proposal obsolete. (Technology Today, BroadbandReports, various other published news reports)

**

NET ACCESS: COMCAST OFFERS $9.95 A MONTH BROADBAND TO LOW INCOME FAMILIES

Comcast, the nation's largest cable operator, is trying to bring broadband Internet to the less fortunate. This with a new program that the company says is aimed at reducing the digital divide between high and low income communities in Internet accessibility and digital literacy.

Called "Internet Essentials," the company says low income families will now be able to obtain a fast Internet connection for $9.95 per month. To be eligible, families must have an income of less than $25,000 and a child who qualifies for the free school lunch program. Because Internet access doesn't do much good without a computer, Comcast is also offering coupons that will allow these families to buy a basic personal computer for about $150.

According to Comcaast, this is not a short term promotional deal. According to a company spokesperson, it is a permanent price as long as the child remains in the free lunch program. It also says that those who qualify will not have to purchase any other Comcast service.

The big question now is whether low income families will avail themselves of this budged priced Internet access program. John Horrigan worked with the FCC on its National Broadband Plan. He says that in surveys, non Internet users say that while price is a big barrier, they also cited other reasons. These include digital skills and lack of awareness of relevant content online as other reasons that the Internet is not of interest.

Horrigan, who currently serves with the Internet awareness group TechNet says Comcast will have to do more than drop the price. It will also have to offer additional support services, so that these families become sustainable broadband adopters. More on this story is on-line at www.internetessentials.com. (Comcast, PC World, EdWeek, others)

**

HAM HAPPENINGS: SA AMSAT ISSUE FIRST CALL FOR SPACE SYMPOSIUM PAPERS

South Africa AMSAT has issued the first call for papers for the 2012 Space Symposium to be held in Durban next May 12th at the University of KwaZulu-Natal. If you would like to present a paper, please send a brief synopsis to reach SA AMSAT by no later than January 31st 2012. The theme will be 50 years of OSCAR which celebrates the launch of the first amateur radio satellite on December 12th, 1961. (SARL)

**

HISTORIC NOTES: PHOTOGRAPHY IN SPACE - THE HASSELBLAD ON-ORBIT

Although the astronauts now use digital cameras the Hasselblad camera was the film camera standard for much of the space program's history. And because of this an astronaut's photography manual developed by Hasselblad for NASA astronauts to learn to get the most out of the camera.

This 40-page color booklet is considered to be a really solid photography guide, with great information on lenses, exposure settings, and camera technique. Any photographer could get some use out of it, but if you happen to be up in space, you'll have everything you need to get that perfect shot. Anyone in space or on the ground can access it in .pdf format at tinyurl.com/4dupx8s. (ANS, UniverseToday)

**

NAMES IN THE NEWS: LEW MCFADIN W5DID INTERVIEWED BY DX COFFEE

Some names in the news. First up this week is Lou McFadin, W5DID, who is best known in ham radio as the engineer behind designing and flight qualifying the ham radio gear on the space shuttle flights and then aboard the ISS. Well Lou's life and career is the feature article in the current issue of DX Coffee. There you will find an interview Lou that which traces his 30 years of involvement in space with projects at NASA and AMSAT.

W5DID worked for NASA from 1967 to 1995 on projects ranging from Apollo moon landings to Lunar Orbit Experiments, the Apollo Soyuz program, the Shuttle, and the ISS. His work literally helped man conquer the frontier of space. For the entire story of Lou's Amazing three decades with NASA, simply take your web browser to tinyurl.com/W5DID-in-space. (ANS)

**

NAMES IN THE NEWS: FRANK GREENE NAMED NEW RAC OFFIUCE ADMINISTRATOR

Radio Amateurs of Canada says that it has recruited Frank Greene as its new Office Administrator. Green comes to the Canadian national amateur radio society with an extensive management and business background. This includes such specialized areas as sales and marketing, accounting and administration, human resources, staff coordination, facilities management, and project management. He has also participated in several consulting assignments from capacity planning to disaster contingency preparation. (RAC)

**

NAMES IN THE NEWS: WALT MAYFIELD KE5SOO APPOINTED AS NORTH TESAS SM

And as of Wednesday, October 5th, the ARRL North Texas Section has a new Section Manager in the person of Walt Mayfield, KE5SOO.

According to an ARRL press release, Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with West Gulf Division Director David Woolweaver, K5RAV.

The release noted that Mayfield has served as the North Texas Section Emergency Coordinator and is the president of the Denton County Amateur Radio Association. He replaces Jay Urish, W5GM, who has stepped down as Section Manager for personal reasons. Mayfield's appointment continues through March 31, 2013. (ARRL)

**

NAMES IN THE NEWS: QSLS SOLICITED FOR 90 YEAR OLD HAM

And a note from Tad Cook, K7RA, says that his fathers cousin Bill Kingsley, W7UVU, is 90 years old and in hospice care. Cook says that Kingsley had a career in the US Navy and was also licensed as F0GKL and F7ER in years past.

K7RA says that W7UVU was active on the High Frequency bands until recently, and has been a licensed ham for nearly 3/4 of a century.

Cook says that he would really appreciate it if amateur radio operators would send him their QSL card with a short greeting. You can send your cards to Bill Kingsley, W7UVU, 65 W. 30th. Ave., Apartment 524, Eugene, Oregon 97405-3373.

K7RA adds a big thank you in advance to anyone who responds. (K7RA)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: ULTRASONIC BATTERY CHARGING

The day when we don't have to plug in our consumer electronics is getting close. This according to a claim a from new startup firm named uBeam that has developed what it terms as a safe way of beaming power to charge your batter operated devices.

Rather than using inductive charging, which has a very short effective range and usually requires that the charger and device be in close proximity to each other, uBeam uses an ultrasonic transducer to convert power from your wall socket into inaudible sound energy. On the device

side, there's a battery adapter that converts the sound energy back into power to charge your batteries.

The ultrasonic frequency used is well above the range that can be heard by humans or dogs. More is on-line at www.ubeam.com (VK7WI news)

**

WORLDBEAT: RADIO/TV MARTI VS. CUBA ON AUTO TEXTING

Cuba alleges that the United States operated Radio and Television Marti is violating that nations laws. This is because the broadcaster may disrupt Cuba's cellular text-messaging structure with a computerized system that can send up to 24,000 text messages a week to cell phones on the island.

Developed for mass marketing campaigns, the system makes it almost impossible to block the texts because the computer makes them look as though each individual message was sent from a different telephone number.

The stations director is Carlos Garc&#65533;a-Perez. He says that Radio and Television Marti is using the text messages to deliver the same kind of news and information that the US government-run stations already broadcast to the island. (Media Network)

**

WORLDBEAT: BBC TO CUTBACK MEDIUM WAVE AND LOOSE LONG WAVE OPERATIONS

The British Broadcasting Corporation says that its that Medium Wave broadcasts will be cut back and the Radio 4 Long Wave transmissions will eventually cease. According to the BBC, there will be reductions in medium-wave transmissions for local radio in England where coverage replicates FM. There will also be no reinvestment in long wave, which will lead to the end of Radio 4 operations eventually going away.

The changes are in part the result of a restructuring of the BBC which is also planning to cut 2,000 jobs and radically change programming in order to cut 20% from its budget over the next five years. More on this is on-line at tinyurl.com/BBC-Longwave-cutbacks. (BBC)

**

HAM RADIO IN SPACE: HELP SOUGHT IN TRACKING UPCOMING LAUNCH OF AUBIESAT-1

Help in tracking the upcoming launch of the AubieSat-1 ham radio satellite is being sought by Professor Jean-Marie P Wersinger, KI4YAU, who is Professor Emeritus and Director of Auburn University Student Space Program in Alabama.

AubieSat is scheduled for launch at 9:52 UTC on October 25th from Vandenberg Air Force Base in California. AS-1 is designed to transmit

with a power of about 800 milliwatts on a frequency of 437.475 MHz, plus or minus Doppler correction. The beacon signal, along with telemetry, will be sent using continuous wave Morse code at 20 words per minute. Additional telemetry from the on board science experiment will use CW transmissions up to 60 WPM.

Professor Wersinger says that based on the pre-launch orbital data provided by NASA, AubieSat-1 will activate after deployment at 12:21 UTC. At that time the sub-satellite point will be at 34.52 degrees South latitude and 1.52 degrees West longitude over the South Atlantic Ocean. An Echolink conference group is planned to begin one-half hour prior to launch and continue until about 30 minutes after confirmation of the first receipt of signals from the satellite.

AubieSat-1 is an undergraduate built CubeSat satellite developed by Auburn University. Reception reports go by e-mail to wersijp (at) auburn (dot) edu and tam0013 (at) auburn (dot) edu. (KI4YAU, ANS)

**

ON THE AIR: VK100RAV CELEBRATES 100 YEARS OF HAM RADIO IN AUSTRALIA'S VICTORIA STATE

On the air, listen out for the special Australian VK100ARV during the month of November. This will likely be a well sought after call and qualifies toward the Australian Amateur Radio Centenary Award.

By way of background, 2011 is the 100th anniversary of the Amateur Wireless Society of Victoria, that was formed in 1911. It quickly changed its name to the Wireless Institute of Victoria, and today is known as Amateur Radio Victoria. VK100ARV will be operational to commemorate that founding event. (VK3PC)

**

ON THE AIR: LM9L40Y CELEBRATES 40 YEARS OF THE LA9L RADIO CLUB

A reminder for the prefix hunters that the special event albeit somewhat complicated call LM9L-40Y will be on the air until the end of December. This station is being operated by members of the LA9L Radio Club in Norway and is to celebrate the 40th anniversary of the founding of that organization. (WIA News)

**

ON THE AIR: ROCKALL OPERATION DEEMED A SUCCESS

And the recent MM0RAI/P Rockall DXpedition is being considered as being a major success. The team managed to land on the rock and set up the station. Operation started on October 1st at 15:45 UTC and ended on October 2nd at 06: 52 UTC. Online logs will be available shortly. For more information, including photographs, check out www.rockall.be. (Southgate)

**

DX

In DX, HB9IQB has been granted a license by the Palestinian Ministry of Telecommunications and Technology in Ramallah. He plans to be active as E-44-P-M starting at 0001 U-T-C on December 16th, or possibly a few hours earlier. The log for his operation will be uploaded onto the Logbook of The World soon after he goes QRT. For more details, QSL details and updates, please visit tinyurl.com/4yc9st8 on the World-Wide-Web.

N6HD will be active portable 4-Xray from Israel between October 23rd and November 3rd. His operation will be on 160 through 10 meters using CW and SSB. QSL via his home callsign or electronically using Logbook of the World.

JK1KSB will take to the airwaves as 8Q7SO from Mirihi Island Resort in the Maldives between October 28th and November 3rd. Activity will be holiday style on 80 through 10 meters using CW, RTTY, SSB and PSK31. QSL via JK1KSB, either via the bureau or to the address on QRZ.com.

AJ9C will be operational from Nicaragua as YN2CC starting on November 24th and continuing to December 5th. He will be active on 160-10 m CW , SSB and RTTY. He plans to take part in the CQ World Wide DX CW Contest November 26th and 27th as well. QSL electronically using Logbook of the World.

G3RWF will be active as 5X1NH from Uganda starting November 23rd for three weeks. His on the air time will have an emphasis on low bands using a new amplifier. QSL via his home callsign.

Lastly, An international team of operators will be active from Hatiheu, Nuku Hiva in the Marquesas Islands between October 19th and November 1st. Activity will be on all bands and modes including an entry in the CQWW DX SSB Contest from October 29th to the 30th. Operations will be on 160 through 10 meters including the 30, 17 and12 meter bands on CW, SSB and RTTY. QSL and other information is on-line at www.tx7m.com.

THAT FINAL ITEM: THE HISTORIC RED AND WHITE DIAMOND TOWER IN NASHVILLE TENNESSEE

And finally this week, a big happy birthday to radio station the that's likely best known in technical circles as the home of one of the last of the famed Blaw-Knox diamond shaped towers in the world, and to county music aficionados as the radio birthplace of that genre of music. Of coarse we are talking about radio station WSM in Nashville, Tennessee and Amateur Radio Newsline's Norm Seeley, KI6UP, has the details:

--

At 8 o'clock in the evening of October 5, 1925, some 300 people gathered at the corner of 7th and Union Street in Nashville, Tennessee to hear the first broadcast of WSM-AM. Since then, the station has literally putting Nashville on the map as the home of country music.

In a press interview, WSM operations manager Joe Limardi said that the early stages of broadcast country was on that day when the Grand Ole Opry was born on the station back in 1925. Also. that the phrase "Music City U.S.A." was first used by WSM announcer David Cobb in 1950. Today it is Nashville's world-wide nickname.

Limbardi says that the station has evolved over the past 8 and a half decades that it has been on the air. Todays Internet technology brings WSM to listeners around the globe. According to one report, more people listen to the station on-line, than do over the air in Nashville proper. Limbardi says that's the reason why the station put the effort behind being heard on line, and being heard on your apps on smartphones.

There is so much history associated with WSM-AM. Each person who works at the station is well aware of the people who was there before them. But they also know to be a viable, profitable radio station WSM needs more than history on its side. That is why technology is so important to mission of the station.

Limardi says that those new web listeners will allow WSM-AM to be around for another 86 years, adding that the digital age has made it possible for WSM to reach a much larger audience than in years past.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to Wikipedia dot com, WSM's red and white diamond-shaped Blaw-Knox antenna tower has a story unto its own and is one of the area's landmarks. When it was built in 1932, the then 878-foot tower was the tallest antenna structure in North America. Its height was reduced to 808 feet in 1939. It is now one of the oldest operating broadcast towers in the United States and is listed as a National Engineering Landmark and this past March 15th it was added to the National Register of Historic Places. As an aside to this story, the Mississippi amateur radio operator's license plate features a diamond Blaw-Knox tower with lightning bolts shooting from the top. A classy ham plate indeed. (RW, Wikipedia, other sources)

WIANEWS WEEK COMMENCING OCTOBER 16 2011.

Hello I'm Bob Vk6POP the JOTA JOTI Coordinator for Scouts Australia.

This JOTA JOTI edition of the news comes to you from the Peter Hughes
Scout Communication Centre in Perth.

The team this week is myself VK6POP Bob, Onno VK6FLAB, Miles VK6MAB,
Davis VK6FAME, Barb VK6FPAX, Jeff Barb's OM, and Flynn VK6FFFF and if
that doesn't fox you, nothing will.

This week we'll hear about zombies in a Scout camp, pirates in Australia,
crystal sets in the Illawarra, and the Governor General's going to talk to us.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING OCTOBER 16 2011.

SILENT KEY

Ian VK1BG writes.. "I have today been advised by his wife, Lesley, that
Keith Malcolm, VK1KM, passed away suddenly at his home Thursday Oct 13th.

This news came as a dreadful shock, and I am sure that
we will all be saddened by it.

Over many years, Keith has been a major advocate for the
WIA and Amateur Radio in both national and international
forums, and became very well known for his efforts.

He will be sorely missed by his many friends.

Keith is survived by his wife and three adult children."

Saturday October 15 at 1pm Local time Australia's Governor-General,
Her Excellency Ms Quentin Bryce AC addressed the Guides and Scouts of
Australia in her opening address for JOTA 2011

In the welcome to this, the 54th Jamboree On the Air and 15th Jamboree On The
Internet Her Excellency mentioned how we've had our share of natural disasters
in Australia recently with bushfires, floods, cyclones and other storms.
And globally, we've come together following the devastating earthquakes and
tsunami in Japan and the awful series of earthquakes and aftershocks in
Christchurch, New Zealand.
She went on to say

"In some countries, Scouts and Guides contribute directly to the relief
effort after a disaster strikes, working in first aid posts, helping with
cooking and serving food, or providing accommodation in tents that they erected.

Often these are poorer countries with fewer resources to call on, so people
in organizations such as Guides and Scouts are called on to help those in need."

In this the JOTA weekend we hope you make new friends and catch up with some old ones.

Pirate Radio Station Stomped On By VK Authorities

The Australian Communications and Media Authority has stomped on a pirate
radio station that was operating from Chadstone, Melbourne operating on
1485kHz AM could be heard for up to 10km, and had been broadcasting for
about a week, mainly in the evenings, music from MyMP, an outfit which
broadcasts mainly middle-of-the-road music via DAB+ digital radio.

"Following a complaint," ACMA reports gravely, "inspectors from ACMA's Field
Operations Section used advanced direction-finding equipment to pinpoint the
exact location of the transmitter"- and closed it down.

Zombie attack during Scouting Radio Jamboree

Coral Gables Florida USA has one of the oldest Boy Scout troops in that nation.

This weekend Troop 7 are working with First Responders, public safety
communications professionals and amateur radio operators to earn their
radio merit badges as part of scouting's world-wide Jamboree on the Air.

"If there are Zombies around, we definitely think that the police and fire
departments should be involved," said Dan Deveson, an assistant scoutmaster
with the troop. "We wanted to find a way that the boys could learn how the
pros use their radios, and few things are so important to a 12-year-old as
thwarting Zombie attacks."

The troop are broadcasting Zombie Action Reports around the world using amateur radio equipment provided by licensed radio operator volunteers.

"In case of hurricanes, or Zombies, amateur radio operators often work with public safety professionals to provide community support. That's exactly the sort of activity that modern scouting is all about," said Deveson.

HAMS ACROSS AUSTRALIA.

Police Roundup http://www.vicpolicenews.com.au/

Jean Fisher VK3VIP writing in the ALARA Newsletter told of an RFI problem with a difference.

August saw her in Bass Strait on board the yacht Coomera sailing from Melbourne, down Port Phillip Bay and round to Hastings in Westernport Bay.

Some radio action on VHF whilst under way but operations on HF did cause a few problems when the hi-tech toilet system flushed each time the transmitter was fired up!

Ken Fuller VK4KF has requested to retire from his position on the Queensland Advisory Committee.

The WIA Board has appointed Alan Shannon VK4SN for the balance of Ken's term.

Once again, amateur radio is indebted to Ken for his commitment to the Institute and its activities.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Long established on the amateur radio calendar is the Jamboree of the Air, now run in conjunction with the Jamboree on the Internet. This activity brings youth together via the capability of technology to share experience locally and globally.

Whether it is one amateur or a club contribution, there are the necessary preparations to undertake. Site, activities to be supported and equipment readiness all have to be addressed. This is the age of the touch screen and instant messaging and as interesting as CW and SSTV can be to the aficionados

we need to be both practical and up to date.

To this end, a discussion with the Scout Leaders who will be attending and a look at the various badge requirements may give some insight into appropriate presentations of the amateur radio activity.

Remember that glint in the eye when enthusiasm bursts through. We can all have it but it is good to share our enthusiasm with others. Members of the scouting movement are especially welcome during JOTA.

If you hear a voice in your mind saying "do your best" then remember the correct response is still to "do our best".

I'm Geoff Emery and that's what I think....how about you?

(REPORT IN AUDIO ONLY AGAIN THIS WEEK)

Ipswich & District Radio Club P.O. Box 250
Ipswich Qld 4305 www.vk4wip.com
vk4wip@wia.org.au

This is Allan VK4FABR with a round-up of news from the Ipswich and District Radio Club.

While this first item is a few weeks old, we wanted to let you know that back in August the club's Sandy Cape DX'pediton was a great success. The only serious lesson learnt from the weekend was that sleep is over-rated and entirely optional when there are many stations to be worked. The club would also like to thank the sponsors for their terrific support - Ipswich City Council and VK4ICE Communications.

The design of the VI4FI QSL card is now complete and can be viewed at the official website www.sandycape2011.com

An easy to remember schedule for club meetings has been introduced.

Business meetings are now on the fourth Monday each month, and social meetings the second Monday of each month. Both start at 7.30pm at the club's headquarters - 10 Deebing Street on Denmark Hill.

The club social meetings always uncover a few yarns and war stories over a cuppa, and often see the renewal of old friendships. Members, guests and visitors are very welcome.

Thoughts will be turning to Christmas soon and once again the IDRC will be holding its annual Christmas gathering at Banjo's Bar & Function Centre in Bell Street.

Reserve this date now -Saturday November 5, 2011.

Start time is 11am with a 2 course meal and finishing up around 2:30pm.

Cost is $20 per person, payable by October 31st.

Please confirm your attendance, number of persons plus payment to either
Derek VK4MIA or Paul VK4FPDW prior to the 31st.

Reporting from Ipswich, I'm Allan, VK4FABR.

ILLAWARRA VK2

This JOTA weekend some of you may be interested in a building competition
taking place and you do NOT need yet be a fully qualified Ham Operator.

Jeff VK4ZPP is here with the details.

The Illawarra Amateur Radio Society currently has a construction competition
running that is open to amateur radio operators within VK.

There are prizes to be allocated in two categories.

Entry is easy, just build a crystal set.

Judging will be based on some simple rules:-

The crystal set must work i.e. receive a transmitted signal.
The crystal set can receive either commercial, broadcast or amateur signals.
No external power other than the received signal can be used.
Additional points will be gained by utilizing recycled parts, or home made components.
Additional points will be gained for Innovative design, and unique concepts.
The finished article does not need to be aesthetically pleasing.
Testing will be carried out at Industry World Centre, Wollongong 8/11/2011
(Between 19:30 - 22:00 Hrs).
The judge's decision will be final.

The judging of the contest will be at the IARS November meeting.

The Crystal set will need to be bought to the meeting on this evening,
alternatively they can be posted to the Secretary Illawarra amateur radio
society, by the meeting date which is 8th November 2011. Correct postage and
packaging cost must be included if you require the project to be returned
after the competition. Note that this project is a receive only
construction, so it is therefore open to all license classes in VK.

Why not put together a club entry?

Old hands, why not take a newer member of the hobby under your wing and show
them how construction was done when you first discovered radio.

Results and awards will be presented at the December 2011 meeting.

The two entry categories are:-

Category 1:- Financial members of the IARS
First Prize :- 2 metre Handheld radio

Second Prize:- Quality Screwdriver Set
Third Prize:- Lightweight Headphone Set

Numerous consolation prizes such as mouse mats, baseball caps

Category 2:- All other VK Hams
First Prize:- 2 metre Handheld Radio
Second Prize:- Quality Screwdriver Set
Third Prize:- Lightweight Headphone Set

Details are available on the Illawarra amateur Radio Society's web site
http://www.iars.org.au or email the secretary vk2vvv@wia.org.au

NZART Straight Key Night

Polish and lubricate that old morse key and enjoy an evening of old time
radio fun. An activity night in which everyone can be a winner with a
certificate to prove it.

When? first Sunday in November 2000-2200 NZST in two one-hour periods
Band? 3.5 MHz only

Mode? CW sent with STRAIGHT KEY ie characters formed manually, no system of
automatic dots, dashes or spacing permitted.

Check out the nzart website for details.

Send logs by mail by 30 November to:
Ken McCormack, ZL1AIH

181 Ararimu Valley Road Waimauku, AUCKLAND,

or email zl1aih@xtra.co.nz

All (including DX stations) who send a log will receive a certificate.

Congratulations to those who did well in the Alara Contest!

Catherine, VK 4 GH, is the top overall winner. As Lesley VK5LOL rightly points out a "sterling effort."

Mavis, VK3KS, the top CW certificate she has been contesting since the earliest days of the contest.

Gerald, VK2HBG, is the top VK OM.

Jamming of GPS in Scotland suspended

The BBC report that jamming of global positioning signals (GPS) during Europe's largest military exercise has been suspended, following complaints from fishermen.

The Royal Navy issued warnings in September and October that GPS in parts of Scotland would be disrupted during Exercise Joint Warrior.

But Western Isles fishermen said the first they knew was when their equipment went offline last Friday week.

Read the full BBC report at
http://www.bbc.co.uk/news/uk-scotland-highlands-islands-15242835

VI6CHOGM

To celebrate the Commonwealth Heads of Government Meeting taking place in Perth later this month, the Scout Members Amateur Radio Team are operating for 72 hours with the special call sign, VI6CHOGM.

We'll be operating on most bands using voice, slow scan TV and psk31 during this time, and we have designed a special QSL card for the occasion. As well as camping on site for the duration of the event, we are also selling soft drink and food to the hungry onlookers who will be dropping by.

We're calling on VK6 amateurs to help us with manning the station, and all other stations in making contact with us. We look forward to hearing you answer our call.

It all takes place from shortly after midnight on Friday 29th October, to just before midnight on Sunday 30th October local time.

More information about the activity, including our online logbook, can be found at www.vi6chogm.com

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

At the workbench and ICNIRPcalc Field Strength Software available.

Often Radio Amateurs suffer expensive restrictions on their antennas.

So, ICNIRPcalc was written to assist in assessments.

The program performs RF-Exposure calculations for amateur radio stations based on information from the International Commission on Non-Ionizing Radiation Protection.

In the IARU EMC WG meeting in 2007 the author of a program that German Society DARC USED, QuickWatt, was asked to circulate it - if possible - in the English language.

Since nowhere else in the world has limits for pacemakers QuickWatt was modified for ICNIRP limits only and translated into English. This international version is now called IcnirpCalc.

Download ICNIRPcalc V1.01 from the IARU Region 1 website
www.iaru-r1.org/index.php?option=com_remository&Itemid=173&func=fileinfo&id=410

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

DAWN PATROL NET - 30 YEARS OF OPERATING BY LEITH MARTIN VK2EA

Leith has been NCS of the early morning 0630 Dawn Patrol Net on 3605 KHz, Monday - Friday.

He has had occasional assistance by others when he has been ill or absent but otherwise continuous.

Congratulations and thanks Leith for your dedicated service to keep the frequencies active, a great turn up at 0630L, Wednesday 19 Oct is wanted to give Leith a 30 year thank you.

Special invitation!

Why not use your portable station experience next month to activate a Victorian National Park?

There are 40 within easy reach by car from all regional centres.

Amateur Radio Victoria welcomes all to take part in the November 18-20 focus on them under the Keith Roget Memorial National Parks Award.

The extended weekend is part of the 100th birthday celebration by the state-wide organisation. Full rules can be found under Awards on their website.

www.amateurradio.com.au

In Melbourne are those at Organ Pipes, Kinglake, Dandenong Ranges, Yarra Ranges and Churchill.

Parks can be visited from Geelong, Ballarat, Bendigo, Warrnambool, Horsham, Mildura, North East, North Central, Latrobe Valley and EastGippsland.

All inquiries to the Award Manager, Tony Hambling VK3VTH via email vk3vth@amateurradio.com

7P8EME DX-PEDITION A GREAT SUCCESS

The team managed to make in total 320 QSO's.

274 QSO's on 2 metres EME,
23 QSO's on 70 cm EME,
18 QSO's on 23 cm EME
5 QSO's on 6 metres EME, all using JT65.

Many of you will have worked Bodo DL3OCH when he was active during 2009 as 5N0OCH from Nigeria.

The good news is that not only has he received a new German callsign, DF8DX but he is back in Nigeria until mid-October with the new call 5N7Q. He is there to carry out maintenance on a local broadcast station and will have the opportunity to make use of the antennas there for his amateur transmissions. (IRTS)

KickSat - a personal spacecraft of your own in space

The website KickSat.org has been launched to give hundreds of people the
opportunity to sponsor a small spacecraft they can call their own that
will be launched into space.

KickSat.org is a spare time project run by Zac Manchester, an aerospace
engineering graduate student at Cornell University, to launch a
CubeSat filled with hundreds of "Sprite ChipSat proof of concept
spacecraft" that he has developed into low earth orbit to demonstrate their viability.

Donors who donate $300 or more will be able to call one of the Sprite
spacecraft their own, name it and specify a short message that it will transmit.

Groups and clubs can sponsor small fleets of Sprites.

The transmissions of the small spacecraft will be able to be received by
amateur radio operators around the world with the appropriate equipment.

Thailand's NBTC donates Amateur Radio repeater for flood communications

Bangkok Post reports that Thailand's NBTC has donated an amateur radio
repeater for use in flood relief communications.

The National Broadcasting and Telecommunications Commission (NBTC) met and
on the agenda was how to help with flood crisis relief.

Speaking before the first meeting of the commission since the royal command was issued endorsing the appointment of its 11 members, the NBTC chairman said it was urgent that telecommunications be improved in flood-hit areas.

He said the NBTC gave a repeater to the Amateur Radio Operators Group of Ayutthaya to help strengthen its radio signal to cover a wider area.

Amateur radio operators can be of much help when the country is in crisis, he said.

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

WHATS BEHIND THE GREEN ZONE?

Certainly NOT "Freedom Radio" any longer.

After some 8 years of broadcasting from Baghdad "Porky Pig" uttered those immortal words "that's all folks" and the Coalitions radio station in Iraq went silent.

With the troops leaving that land replacing VOF will be European Satellite shows on the local radio.

BBC Radio 4 long wave, which transmits on the 198 kilohertz frequency, relies on ageing transmitter equipment that uses a pair of valves - no longer manufactured - to function.

The valves, at Droitwitch in Worcestershire, are so rare that engineers say there are fewer than 10 in the world, and the BBC has been forced to buy up the entire global supply. Each lasts anywhere between one and 10 years and when one of the last two blows the service will go quiet.

Mark Thompson, Director-General of the BBC, has signalled the beginning of the end for the 198 long-wave service, which is still used by 90,000 homes in Britain to receive Radio 4 in areas where short-range FM does not penetrate. (netnews)

That just about wraps us up for this week. By the time you're hearing this news some 500,000 Scouts and Guides worldwide will have, or will be about to, participate in Jamboree On The Air and Jamboree On The Internet.

It is through the generosity of Amateurs, and their passion for their hobby, that JOTA is possible. On behalf of all 500,000 of us, just a minute while I read the names out, I heartily thank everyone who has supported JOTA and JOTI this weekend.

I certainly hope the Scouts and Guides kept the coffee flowing, and fed you eagerly.

The event closes at midnight local time today (Sunday) however for the eager ones among you, there will be Scouts and Guides on air until the Americas go to bed.

73 and a big thank you from Scouts and Guides everywhere

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

GB2RS NEWS

Sunday 16th October 2011

The news headlines:

* RSGB pre-releases RadCom pages

* 2012 Bath Buildathon announced

* Talks on possible 5MHz extension

In advance of the Extraordinary General Meeting announced last week, the RSGB has pre-released the RSGB Matters section of the November RadCom. The pages set out the background to the EGM and are being sent by email to all affiliated clubs. The Society encourages all Members to read the information and help shape the future of the RSGB. RadCom is being printed this weekend and is due to be delivered to UK members by next Monday, 24 October.

The date of the 5th Bath Buildathon has been confirmed as Saturday, 7 January 2012. For those that are not familiar with the concept, the basic idea is for a group of radio enthusiasts to lock themselves in a room for a day and build a radio project under the watchful eye of a few experienced mentors. These events are ideal for intermediate students or other licensed amateurs who have never raised solder smoke in anger before. This year the event will cost £60 to include a 20m SSB superhet receiver kit, room hire, tea and coffee, etc. The Bath Buildathon Crew will be providing all tools and test equipment required and no previous experience is needed, just a bucket load of enthusiasm! Booking forms for the Buildathon are available by email from G0FUW@tiscali.co.uk or by post from G0FUW, who is QTHR in the Yearbook and on QRZ.com.

Following their meeting with the Ministry of Defence earlier in the month, Ofcom has been in touch with the RSGB to discuss harmonisation improvements to the 5MHz Experiment. Whilst MoD is not in a position to release a continuous tuning band like that available to some other countries, they have agreed to consider some additional bandwidth for access by UK NoV holders. We will bring you any further news as it develops.

Amateur satellites SRMSAT and Jugnu were successfully launched by an Indian rocket from Sriharikota in the early hours of Wednesday 12 October. The satellites are in near-equatorial orbit and cannot be received in the UK, but will be providing useful science for the Indian

university teams that built the CubeSats. The SRMSAT web page is at http://srmsat.in.

The RSGB Convention that took place in Milton Keynes over the weekend of the 7-9 October was the largest in the event's history. The five streams of lectures were well attended and there was standing room only in some lecture rooms.

Following the creation of a Youth Co-ordinator portfolio during the Region 1 General Conference at Sun City in August, the Region 1 Executive Committee has appointed Lisa Leenders, PA2LS, to the role. Lisa will be working with the Youth Co-ordinators from the various member societies to promote amateur radio amongst young people in Region 1. Lisa's contact details will be made available under the Youth section of the IARY Region 1 web site, www.iaru-r1.org. Lilford District Scouts in Leigh, near Wigan, are looking for a volunteer Foundation tutor who could run a course sometime between mid-November and February. Whilst the Scouts cannot offer any payment beyond limited assistance with transport costs, they do have a well-equipped venue and plenty of enthusiasm. Ideally, they would like to have some new Foundation licensees in time for the next JOTA. If you can help, please contact Carl Thorp, 2E0LVO, via email to carl.thorp@1stastleyscouts.org.uk.

Long-standing software developer George Murphy, VE3ERP, has hung up his keyboard and is retiring from further development on HAMCALC. For those who are unfamiliar with the software, HAMCALC is a collection of useful calculators for amateur radio use, widely used throughout the amateur community. The latest version of HAMCALC can be downloaded at www.cq-amateur-radio.com.

And now for the details of rallies and events for the coming week

Today, Sunday 16 October, the Blackwood and District ARS Rally takes place at Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. There are trade stands, a Bring and Buy and special interest groups. The rally opens at 10.30 and costs £2. Talk in is on S22. Contact Dave, GW4HBK, on 01495 228 516.

Also Today, Sunday 16 October, the Hornsea Amateur Radio Club rally is at Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ. Opening at 10.30, there are trade stands, a Bring and Buy, RSGB bookstall and special interest groups including RAFARS. Details from Rick, M0CZR, by email to R106221@aol.com.

The Galashiels and District ARS radio rally takes place on Sunday 23 October at The Volunteer Hall, St Johns Street, Galashiels, Scottish Borders TD1 3JX. Opening time is 11.30, admission is £2.50 and there are trade stands, a Bring and Buy and other attractions. Details from Jim, GM7LUN on 01896 850 245.

The Callington Amateur Radio Society Rally is on Sunday 23 October at Callington Community College, Launceston Road,Callington, Cornwall PL17 7DR. The opening time is 10am, admission is £2 10am, £2, and there are trade stands, a Bring and Buy and other attractions. Contact John, G4PBN, on 01822 835 834.

Now for the news of special events

As this is JOTA weekend, there are numerous Scout special event stations on the air. The October RadCom contains a list of over 20 special event stations that have issued for the event.

And now the HF DX news compiled from 425 DX News and other sources

The T32C DXpedition is going strong from Christmas Island. On 10 October the team announced they had broken the 100,000 QSO barrier. The team hopes to set a few new records before the end of the event. There is still time to work the DXpedition, which is covering as many band and mode slots as it can with the limited equipment at its disposal.

Now the contest news

Today, Sunday 16 October, the Second 50MHz Contest takes place from 0900-1200. Operation is all mode on the 50MHz band and the exchange is RST, serial number and locator. Tuesday 18 October sees the UHF UKAC from 1900-2130. Operation is all mode on 23cm; RST, serial number and locator form the exchange.

And now the solar factual data for the period from the 3rd to the 9th of October, compiled by Neil Clarke, G0CAS on the 10th of October.

Several sunspot groups were visible every day with up to eight on the 4th and the 5th. Most groups were small and inactive but several produced C class solar flares every day. Solar activity was low every day. Most flares were small and were not associated with sudden ionospheric disturbances or coronal mass ejections. Solar flux levels declined from 130 units on the 4th to 118 by the 8th. The average was 124. The 90 day solar flux average on the 9th was 114 units, that's two units up on the previous week. X-ray flux levels varied little and the average was B4.1 units. Geomagnetic activity was quiet every day except for the 5th which increased to an Ap index of 20 units in response to a glancing blow from a coronal mass ejection that departed the Sun on the 2nd. A small coronal hole disturbance arrived on the 9th when the Ap index was 13 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 480 kilometres per second to 290 by the end of the period. Particle densities were around the 20 particles per cubic centimetre for a three day period starting from the 5th. Bz varied between minus 5 and plus 3 nanoTeslas on the quietest day and between minus 10 and plus 11 nanoTeslas on the 5th. On the 20th several UK operators and a number of continental stations, enjoyed an unexpected opening to West Africa on 50MHz. 28MHz was also in excellent shape on a couple of afternoons, with MUFs at times well over 30MHz and low-power beacons as far as the West Coast of North America being copied across much of Europe.

And now the solar forecast. This week the more activity side of the Sun is expected to return into view. Solar activity may not be as high as the last rotation but moderate levels could take place on some days. Solar flux levels are expected to be in the 120's for most of the week. With no coronal holes expected during the coming week, geomagnetic activity is expected to be at quiet levels. Only a coronal mass ejection heading our way will increase activity and there maybe a slight chance for this to happen. MUFs during daylight hours at equal latitudes should be around 30MHz for the south and 27MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 0800 and 1300 hours. The long path should be open around 0800 and again at 2100 hours, but the MUFs will be around 21MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 17 October Gloucester Amateur Radio & Electronics Society is having a VHF operating and workshop evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 17 October South Birmingham Radio Society is holding a committee meting. Contact Don, on 01214 581 603.

On Monday 17 October Welland Valley Amateur Radio Society is having a beginners guide to working satellites and data modes such as PSK31. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 18 October Derby & District Amateur Radio Society is discussing technical topics. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 18 October Loughborough & District Amateur Radio Club is having a talk on power supplies by Andrew, G7SEG. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 19 October Midland Amateur Radio Society Club is holding its AGM and presenting awards. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 19 October South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 19 October Telford & District Amateur Radio Society is working on its winter projects. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 20 October Cheltenham Amateur Radio Association is holding a silent key sale. Contact Derek Thom, G3NKS, on 01242 241 099.

On Thursday 20 October Salop Amateur Radio Society is holding its pre-AGM meeting. Details on the club website at www.salop-ars.org.uk.

On Thursday 20 October Solihull Amateur Radio Society is holding its AGM. Details from P T Gaskin, G8AYY, on 01216 287 383.

On Thursday 20 October South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603. On Friday 21 October Coventry Amateur Radio Society is having a quiz night. Contact John, G8SEQ, on 07958 777 363.

On Friday 21 October South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

NEWS FOR THE NORTH OF ENGLAND On Monday 17 October Angel of the North Amateur Radio Club is having a talk. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 17 October Sheffield Amateur Radio Club is having an awards and trophies presentation evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 17 October Thornton Cleveleys Amateur Radio Society is having an address by the new chairman. Details on the web at www.tcars.org.uk.

On Tuesday 18 October Chester & District Amateur Radio Society is having a talk on vintage radio by GW8N. Details from Barbara Green on 07957 870 770.

On Tuesday 18 October Halifax & District Amateur Radio Society is finalising its programme of events for the next year, continuing its Intermediate and Foundation training courses and testing the new aerial. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 18 October Stockport Radio Society is having a presentation on stereo players by John Shufflebotham. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 19 October Denby Dale Radio Club is holding its AGM. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 19 October Hornsea Amateur Radio Club is having a washup meeting after the rally. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 20 October Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 20 October South Manchester Radio and Computer Club is having a talk on The Great Train Robbery by Doug, G8ILW. Details from Ron, G3SVW, on 01619 693 999.

On Friday 21 October East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 18 October Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946 192.

On Wednesday 19 October Lothians Radio Society is having a surplus equipment sale at St Fillan's Church Hall, Buckstone Drive, Edinburgh EH10 6PH, from 7.30PM onwards. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 20 October Aberdeen Amateur Radio Society is on the air. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 21 October Cockenzie & Port Seton Amateur Radio Club is having a DVD night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 17 October Burnham Beeches Radio Club starts its construction project. Contact Dave, G4XDU, on 01628 625 720.

On Monday 17 October East Kent Radio Society is having a holiday photos evening. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 17 October Felixstowe & District Amateur Radio Society is having a talk on amateur radio use of the Clansman radio system by Iain, G0OZS. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 17 October Surrey Radio Contact Club is having a fix it, advice, chin wag and move it on evening. Contact John, G3MCX, on 02086 883 322.

On Tuesday 18 October Bromley & District Amateur Radio Society is holding its construction contest. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 18 October Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 18 October Verulam Amateur Radio Club is having a talk on antennas and VSWR by David, G4HHJ. Details from Tony, 2EOWAP, on 01727 853 087.

On Wednesday 19 October Chesham & District Amateur Radio Society is having a talk on aerial design principles by Roger, G3MEH. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 19 October Worthing & District Amateur Radio Club is having a talk on the history of light bulbs John Narborough. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 20 October Colchester Radio Amateurs is holding its AGM. More information from Kevan, 2E0WMG, on 07766 543 784. On Thursday 20 October Cray Valley Radio Society Club is hosting a Buildathon, run by Richard, G8ITB. This meeting will be a hands-on building session comprising of two categories, simple and experimental, where members will begin to construct a project from one of the categories. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 20 October Horndean & District Amateur Radio Club is holding its AGM. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 20 October Horsham Amateur Radio Club is having a social evening at The White Horse, Maplehurst. Details are on the web at www.harc.org.uk.

On Thursday 20 October Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 20 October Sutton & Cheam Radio Society is having a talk on noise eliminating products by Graham Somerville of bhi. More information from John, G0BWV, on 02086 449 945.

On Friday 21 October Loughton & Epping Forest Amateur Radio Society is having a Fish-'n'-chips night. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday 21 October Mid-Sussex Amateur Radio Society is holding its AGM. Contact Peter, G4AKG, on 01444 239 371.

On Friday 21 October Wey Valley Amateur Radio Group is having a talk by Roger Western, G3SXW on the Balkans Bonanza. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 22 October Crystal Palace Radio and Electronics Club is holding a Foundation exam. Contact Bob, G3OOU, on 01737 552 170.

On Saturday 22 October Hastings Electronics and Radio Club is having an auction of used & surplus equipment at Holy Redeemer Church Hall, Upper Church Road. Doors open 9am for the auction at 10.15. Details from Gordon, on 01424 431 909.

NEWS FOR THE SOUTH WEST On Monday 17 October Appledore & District Amateur Radio Club is having a talk on QSLing by Don, G0RQL. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Tuesday 18 October West Devon Radio Club is looking at constructing and testing homebrew wire antennas and baluns. Further information from Jules Cuddy, M1AGY, on 01752 291 588.

On Wednesday 19 October Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 19 October Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends. On Thursday 20 October Cornish Radio Amateur Club is holding an workshop evening at Gweal an Top school. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 20 October South Bristol Amateur Radio Club is planning for 2012. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 20 October Swindon & District Amateur Radio Club is having a talk on the British Forces Broadcasting Service by Phil, M0PBZ. Contact Den, M0ACM, on 07810 317 750.

On Thursday 20 October Yeovil Amateur Radio Club is having a talk on life after the Foundation Licence by G3ICO. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 21 October North Bristol Amateur Radio Club is holding a skittles night. More information from Dick on 01454 218 362.

On Friday 21 October Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 22 October Isle of Wight Radio Society will be celebrating its 53rd birthday. It will also be opening its new radio shacks at the club premises, Haylands farm, Salters Road, Haylands, Ryde, PO33 3HU. The shack opening will take place at 3pm. Contact Peter, 2E1PHW on 07515 155 214.

NEWS FOR WALES On Monday 17 October Dragon Amateur Radio Club is visiting Moelfre Lifeboat Station. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 18 October Wrexham Amateur Radio Society is having a talk by a guest speaker. More information from Patrick, 2W0HUU, on 07947 701 927.

983. Heartland Chapter American Red Cross Deployment for Missouri River Flooding

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-15 06:38:50 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110620130408.C97E82056E@bmail.arrl.org>
Source record: 3973
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

We have been contacted by Bob McCoy, NBØB, who is acting as a disaster response volunteer with the American Red Cross (ARC). He is currently working on contingency plans in the event that ARC needs additional communications support for the Missouri River flooding deployment. It now appears that volunteers may be needed to implement communications support for positions staffed by ARC volunteers. This situation could exist for an extended period as the Missouri River flooding will last for the next few months.

This type of situation usually requires an initial response, expansion of the initial response to fill needed positions, and then a recurring need for replacement personnel as the situation continues.

Bob has been in contact with the Nebraska and Iowa ARRL Section Managers and SECs. It is expected that the first counties to be involved are Sarpy, Douglas, and Washington. Bob will be working this with the emergency coordinators of those counties.

We are letting you know about this as a “heads-up.” There are no specific requests for support at this time. We will keep you informed of the situation. If and when a request comes in, the response will be coordinated with county Emergency Coordinators.

73, Jon KAØJGG, Nebraska Section Emergency Coordinator (SEC)

ARRL Nebraska Section
Section Manager: Arthur I Zygielbaum, K0AIZ

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1031.3
BID: $OPDX.1031.3
October 15, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and G3XTT for the following DX information.

T32C PRESS RELEASE (Bulletin 9): "With just over one week to go the QSO total has now passed our total from 3B7C four years ago, with about 140,000 contacts in the log. QSO numbers don't reflect the whole story, of course, as we have wanted all along to focus on Europe and on the edge bands. The good news is that European QSO numbers are now well over 20k and growing fast, especially as propagation has picked up again in recent days. Low band openings to Europe have been variable – some days are excellent, some very disappointing. But we will hang in there (see below).

The second tranche of 11 operators arrived on the island earlier this week, to replace the 11 who had left. 16 operators are there for the whole 4 weeks. Several of those who left had the opportunity to operate from the KH6BB station on the USS Missouri in Pearl Harbour while transiting Hawaii on the way home. We thank Bill KH6OO, one of the volunteer guides on the Missouri, for making this possible and for giving us an excellent tour of the ship, which is well worth a visit.

The remainder of this bulletin sets out to answer some of the questions we are being asked. Many of the answers can, in any case, be found on our website or on the ClubLog website, but you may find this summary of interest.

I AM NOT IN THE LOG?

We are, as we have said before, unable to deal with your log queries while the expedition is in progress. The best solution, if you are not in the log, is to work us again. We will deal with queries during the QSLing process.

That said, one issue has arisen which may affect a handful of contacts. It is very difficult to achieve a good RF earth on T32 as the ground is fine,

dry coral. As a result, we occasionally get RF into places where it shouldn't be (despite lots of ferrites!) and this has occasionally taken out the link from radio to PC, which has affected the frequency logging. As a result some QSOs have been assigned to the wrong band. If you think you might be affected, please let us know (correct band and logged band) so that we can investigate and correct.

WHEN ARE YOU ON LF FOR EUROPE?

We have been asked to be more precise about our 80/160m scheduling at European sunrise. Starting on Friday 14 October, we will operate CW on 80m for two days at European sunrise, then we will operate 1 day on SSB. The pattern will be repeated, so CW days will be 14, 15, 17, 18, 20, 21, 23, 24 October. SSB days will be 16, 19, 22, 25 October. On 160m we are always on CW from our sunset to Western European sunrise.

CLUBLOG

T32C has generated a big increase in interest in ClubLog, but not everyone is aware of the full range of facilities it offers. Of particular interest is the propagation data, which is based on actual log data rather than forecasts. You can pull up graphs for your own country, your CQ zone, etc.

You may also not be aware that if you hover the mouse over the green tick showing your QSO, you will see who the operator was at the T32C end.

As regards the league tables, be aware that if you make multiple QSOs on a given band/mode slot, this pushes you below others who have the same number of slots but without such multiple QSOs. This is a consequence of the algorithm used within ClubLog for the league tables.

OTHER BANDS AND MODES

As we have said before, we do not anticipate any PSK operation – for DXCC this counts exactly the same as RTTY, where we are well on course to set a new record. Neither will we be on 60m – we did not ask for permission for this band, so it is not included in our licence. We may, though, do some 10m FM operation towards the end of the expedition. As far as RTTY schedules are concerned, RTTY operation is largely at the discretion of the scheduled operator – some T32C operators are more comfortable than others with RTTY operation.

Don G3XTT
T32C Publicity Officer"

SARL NEWS - SUNDAY 16 OCTOBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

THE ORIGINAL OSCAR 1 RECONSTRUCTED

AN ADVANCED LICENCE - AN INTERESTING DEBATE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

THE ORIGINAL OSCAR 1 RECONSTRUCTED

The AMSATNA 2011 Space Symposium will be held on Friday, November 4-6 in San Jose, California. This year's Symposium coincides with the celebration of the 50th anniversary of OSCAR 1, the first Amateur Radio satellite. The Symposium will feature presentations on amateur satellites, operating techniques, news and plans from the amateur satellite world, as well as an AMSAT General Meeting and a meeting of AMSAT's Board of Directors.

While the final schedule is still being worked out, AMSAT has announced that Lance Ginner, K6GSJ, will be the speaker at the banquet. Ginner helped build and develop OSCAR 1 and OSCAR 2. His involvement with Amateur Radio spacecraft continued with OSCAR 3, OSCAR 4, OSCAR 5 (the first for the newly formed Radio Amateur Satellite Corporation in 1970), OSCAR 6, OSCAR 7 and OSCAR 8.

ARRL Laboratory Test Engineer Bob Allison, WB1GCM, will also be speaking at the Symposium, accompanied by a refurbished prototype of OSCAR 1. With help from Ginner and other AMSAT members, Allison and W1AW Station Manager Joe Carcia, NJ1Q, refurbished the prototype. They began tinkering with the satellite, one of three made by Project OSCAR. One of the satellites went up into space in 1961, one is on display at

the Smithsonian Air and Space Museum in Washington, DC and the other, until recently, was sitting in a display case in the downstairs hallway at ARRL Headquarters.

"We really wanted to make this work again," Allison said. "So we looked in the February 1962 issue of QST that was dedicated to OSCAR I, the first-ever Amateur Radio satellite to go into orbit. But the schematic we published didn't quite mesh up with what we were seeing when we opened up the satellite we had here at Headquarters."

According to Carcia and Allison, this could be that back in the days of the Cold War and the space race, the US military did not want the correct schematic falling into improper hands. "I tried for days, tracing components on the board and it just wasn't working," Carcia said. "So I called up Lance Ginner, one of the original Project OSCAR people. He kind of laughed and said that he didn't think they would do that, but you never know."

After much trial and error, Carcia finally got OSCAR I to transmit a signal on 145 MHz, just as the original satellite did. Since specific technical literature on the satellite was unavailable, information taken from 1962 QST and CQ articles assisted in the reconstruction of the transmitter in the ARRL unit. Much care was given to salvage the original components, although time had taken its toll on most of the circuitry. As such, although the transmitter functions, the actual keying of the transmitter is performed using a PIC beacon keyer. Power is supplied using a standard wall-cube providing 12 V DC.

For more information on the AMSAT Space Symposium, including how to register online, please visit the AMSAT Space Symposium web page at www.amsat.org.

AN ADVANCED LICENCE - AN INTERESTING DEBATE

At the RTA symposium held in last month, the question "If South Africa gets an advanced licence what should it look like?" was actively discussed by chairmen and representative of several Gauteng clubs and delegates present at the RTA. The consensus was yes, the SARL should pursue this issue with ICASA at the Amateur Radio Symposium planned for ICASA staff in February 2012. The discussion concluded that such a license should support two main objectives: to involve more radio amateurs in technology and to stimulate competition amongst radio amateurs in all aspects of the hobby. What the requirements are for such a licence had a wide range of responses and undoubtedly will still be debated for some time. There was a fair amount of agreement that it should be experimentally based and not an academic examination.

An Edited (irrelevant discussion outside the subject removed) version of the debate is available on the web. The SARL will hold an Intecnet on the subject on Sunday 30 October 2011 at 19:30. Clubs who did not link their local repeaters to the teleconference bridge are invited to start making arrangements.

SARL WEBSITE UPDATE

Peter Hers, ZS6PHD, reports that the major current problem appears to arise where a single fault occurs and the transaction is terminated before it can correctly perform all housekeeping. This in turn prevents further transactions from executing, resulting in the "ASP 0113" timeouts experienced. The system then takes some time to recover.

Current work is focused on stabilising the system, and this will take priority over any other changes, improvements and fixes to previously existing faults. Good progress has been made in ensuring that the server is correctly set up to support our web site. Certain sections of the site (Swopshop, QSL system) have been temporarily disabled to reduce the number of faults which impact on the web site availability. These will be restored as soon as availability has been improved.

As users will have noted, when it is operating correctly, the response from the website is excellent. The processor can easily cope with the load, and typically runs at less than 5% utilization. Bandwidth is ample and is not a constraint at any time. We are tracking site availability in various ways.

Peter has set up a special email address to log problems. If you find an unusual problem PLEASE email this to sarlweb@peterhers.co.za. I do scan the forum from time to time, to check that it is working correctly, and in case any odd behaviour is reported, but please do not rely on the forum to communicate problems. There is very little value in continually reporting "ASP 0113" timeouts - we are fully aware of these via system logging. At this stage we are not considering major changes, such as a move to PHP scripting, or ASP.NET. The costs of this would be prohibitive to the SARL.

Finally, please remember that every one working on the SARL web are volunteers, and have jobs, families and other responsibilities, and also like to play amateur radio, so all work is carried out in whatever time becomes available!

CONTEST NEWS

The last SARL QRP Sprint for the year is taking place on the 22nd October 2011. The rules can be found in the "Blue Book". This is a good opportunity to test your mobile or QRP rig. Lets have some fun on the 22nd October.

SARL 80 m Club Contest.

The fifth leg of this contest took place on Wednesday 28 September with RTTY and PSK activity. The committee received six logs representing three clubs.

1st West Rand ARC, 33 points and 4 logs 2nd Sandton ARC, 9 points and 1 log 3rd Antique Wireless Association, 6 points and 1 log

After this fifth leg, the overall results are:

1st West Rand ARC, 324 points and 24 logs 2nd Antique Wireless Association, 61 points and 7 logs 3rd Bloemfontein RAC, 39 points and 2 logs 4th Northern Cape ARC, 29 points and 2 logs 5th Sasolburg ARC, 26 points and 1 log 6th Sandton ARC, 18 points and 2 logs 7th Port Elizabeth ARS, 17 points and 1 log

The last contest in the series is a CW contest on Wednesday 30 November.

2011 SARL VHF/UHF Results for September leg

The following stats can be gained from the logs received. 5 Logs were received, 3 stations operated analogue only, 1 station analogue & digital whilst 1 operated digital only. On the analogue side there were 82 stations on 2 m, 6 stations on 4 m, 26 stations on 6 m, 34 stations on 70 cm and 2 on 23 cm. On the digital side, there were 6 stations working FSK441 on 6 m and 2 stations working FSK441 on 4 m.

The results are as follows:- Digital Contest 1st - Andre Botes,ZS2ACP, 44 785 points 2nd - Derek Gravett, ZS5Y, 19 954 points

Analogue Contest 1st - West Rand ARC, ZS6WR, 48 070 points 2nd - Sasolburg ARK, ZS4SRK, 31 225 points 3rd - Magalies ARK, ZS6MRK, 12 879 points

Longest distance worked (km) 6 m - analogue, 171 - digital, 1181 4 m - analogue, 78 - digital, 1181 2 m - analogue, 368 - digital, 460 70 cm - analogue, 135 23 cm - analogue, 8

Overall results from both legs (March & September) Analogue 1st - West Rand ARC, ZS6WR, 48 070 points 2nd - Sasolburg ARK, ZS6SRK, 31 225 points 3rd - Magalies ARK, ZS6MRK, 12 879 points

Digital 1st - Andre Botes, ZS2ACP, 183 641 points 2nd - Derek Gravett, ZS5Y, 163 177 points 3rd - Pierre van Deventer, ZS6A, 113 758 points

The full results have been posted on the forum. The results will also appear in the HF Happenings.

The "Lucky Draw" winner is ZS2ACP, Andre Botes.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that solar activity remains low, but the quiet is unlikely to last with so many sunspots turning towards Earth. A new spot group emerged and was numbered Region 1 320. There are currently ten numbered regions, several producing C-class events.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 80.

All the bands from 20 to 10 m will provide lots of fun with DX opportunities at varies times of the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15/16 October - Jamboree on the air. 20 October - RA Examamjnation. 22 October - Last QRP-sprint for 2011. 30 October - Intechnet on proposed advanced license. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air. 4/6 November - AMSAT NA Space Symposium in San Jose California. 13 November - Pears HF Competition 12:00 till 16:00 UTC. 19/20 November - SARL Field day competition. 20 November - CW leg of 80m Club competition. 27 November - Digital Competition. 30 November - last day to send logs for Pears HF DX-expedition. 31 January 2012 - closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz (250 kW and was 17 750 kHz). There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 (100 kW and was 3 230 kHz). Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, Z6SBWN.

Thank you for listening, 73.
/EX

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, NJ1Q & ARRL DX, K3IRV, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5GN, N5ZO, KH6BZF, K8GI, K8YSE, W8GEX (60m News), W8IZC, AT International, BA4DW, DL1SBF, DK8JB & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, HA0HW, I1JQJ/IK1ADH & 425 DX News, LU1ARG, OE1WHC, OH2YY, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VE3ZZ, VU2CDP and YV5SSF for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-October, through Sunday, 16th-October there were 229 countries active. Countries available: 3A, 3B8, 3D2, 3D2/R, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2M, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2R, ROTUMA. The Rotuma High School Amateur Radio Station, 3D2RI, was heard active this past week on 20 meters SSB (14253 kHz). Operators have been Dennis and Joshia. QSL via KH6CG. The 3D2R Team donated the equipment for the station. For more details, see 3D2RI on QRZ.com.

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

3XY, GUINEA (Reminder). Look for operators Georg/DK7LX, Wolf/DL4WK, Sigi/DL7DF, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI to be active as 3XY1D this week from Guinea between October 18th and November 1st. Activity will be on 160-6 meters using CW, SSB and the Digital modes. They plan to have several stations on the air using 5 transceivers (4 x K2, 1 x IC7000), 4 x kW linears, 2 x 18m Lowband Verticals, a 2 element vertical for 40m, a 2 elemet vertical for 30m, a vertical R7 for 40/30/20/17/15/12/10m, 2 Spiderbeams for 20/17/15/12/10m, a 5 element Yagi for 6m and some Beverage antennas. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or by the Bureau. For more details and updates, visit: http://www.dl7df.com/3xy1d/index.html

4C, MEXICO (Special Event). Members of the Club de Radio Experimentadores de Occidente (XE1TD) and in conjunction with the Federaci&#65533;n Mexicana de Radio Experimentadores (FMRE) will activate special event station 4C1JPG between now and October 30th. Activity is to celebrate the 2011 and XVI Pan American Games in Guadalajara. Activity will be on 160-6 meters using CW, SSB, RTTY, PSK and the Satellites. QSL via LoTW, by the Bureau or direct to XE1GZU: Luis Zepeda Hernandez, P.O. Box 5-273, Guadalajara, Jalisco 45042, Mexico.

6W7, SENEGAL. Francis, F6BLP, will once again be active as 6W7SK from Mbour between January 20th and February 3rd, 2012. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit: http://www.f6blp.org/index.php?langue&#65533;&contenu&#65533;me.php

8P, BARBADOS. Tom, W2SC, will once again be active as 8P5A during the CQWW DX SSB Contest (October 29-30th) as Single-Op/All-Band/High-Power entry. QSL via NN1N or LoTW.

8Q, MALDIVES (Update to OPDX.1017). Cesare, I0WDX, will be active as 8Q7CC from Furanafushi Island (AS-013), North Male Atoll, Maldives, between November 2-12th. QSL via his home callsign direct only. A Web page is now active at: http://www.dxcoffee.com/8q7cc

9U, BURUNDI. Francesco, IV3TMM, will be active as 9U3TMM from Bujumbura (WW Loc. KI46QP) between December 28th and January 4th (2012). Activity will be on the HF bands using SSB and RTTY. PLEASE NOTE: All QSL cards will be sent through the Italian Bureau. More details are forthcoming.

A5, BHUTAN. Operators Just/LA9DL and Erling/LA6VM will be active from Bhutan using the callsigns A52DL and A52VM, respectively, between November 3-13th. Activity will be on 80-10 meters using IC-7000s and amps. Look for the callsign A52DL to be mainly on PSK and SSB, while A52VM will be mostly on CW. QSL via their home callsigns.

A7, QATAR. Members of the Qatar Amateur Radio Society are heading for the beach again for a Multi-Operator/Multi-Transmitter entry in the CQWW DX SSB Contest (October 29-30th). This year the A73A team will include operators from nearly all the Gulf Cooperation Council (GCC) countries. Operators mentioned are Ali/A71BX, Rashid/A71AD, Abdulla/A71CV, Khalid/ A71CO, Mohammad/A71EL, Saif/A71AM, Suli/7Z1SJ, Faisal/9K2RR, Hamad/9K2HN, Ibrahim/A61ZX, Farid/A41MX, Don/N1DG, Dave/K5GN and Tobias/DH1TW. The Field-Day style setup will begin the weekend before the contest, so look for A73A from then until sunrise, after the contest is when it all comes down. Activity on the 30/17/12m bands are not planned - the objective is the contest. QSL via EA7FTR.

BA, CHINA (IOTA Op!). David, BA4DW, informs OPDX readers that he has been activating the Chinese IOTA islands for 13 years. The first as BA4DW/5 from IOTA AS-137 back in year 1999. He will now activate his 16th IOTA group, the last of the mainland China's coastal IOTAs, as BA4DW/7 from IOTA AS-139, Weizhou Island in the Guangxi Autonomous Region Group between October 21-24th. His equipment will be a TS-50 and wire dipole antennas. QSL via his home callsign direct.

C2 & CE0Y, NAURU AND EASTER ISLAND. Look for Joe, LA5UF, to be active from Nauru (C2) as C21UF between October 17-24th, and Easter Island (CE0Y) as CE0Y/LA5UF between November 3-11th. Activity from both locations will be on CW and PSK31. QSL via his home callsign.

CN, MOROCCO. Operators Ahmed/CN8WK, Saaid/CN8WW, Stefano/IK2QEI, Matteo/ IK2SGC, Flavio/IV3TMV, Maurizio/IV3ZXQ, Tine/S50A and Andy/YO3JR will be active as CN3A from Safi during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via LoTW or via IV3ZXQ. Visit their Web page at: http://www.facebook.com/pages/CN3A/112969535390789

D2, ANGOLA. Vylery, UA0QV, has renewed his D2QV license to operate from Vila Catoca, Province Lunda Sul-Saurimo, Angola, until July 8th, 2112. Activity will be on 40/20/17/15/12/10 meters using CW, SSB and RTTY. He will use ICOM 756 PRO 2 into a 40m dipole and a 2 element QUAD for the other bands. If possible he wants to erect an antenna for 80 meters. This past week he has been very active on 12/10 meters CW and SSB. QSL via UT0EA, by the Bureau or direct. QSL also via LoTW.

DL, GERMANY. Operators Yoshi/JK2VOC and Takashi/JA2BNN will be active as DL/homecall between October 26th and November 1st. They plan to be in the CQWW DX SSB Contest (October 29-30th). QSL via their home callsigns.

DXCC NEWS (2011 Yearly Deadline Rapidly Approaching). Bill Moore, NC1L, Awards Branch Manager, reports: "This is a reminder that the deadline for the DXCC Annual List (for the 2011 DXCC Yearbook) and the Honor Roll listing (scheduled to be published in August 2012 QST) is rapidly approaching. In order to appear in these listings, upon qualification, you must have your 2011 submission into DXCC by December 31, 2011. As always, all mail postmarked by December 31st will be OK for these listings." To see the qualifications to appear in the listings, see details under (2011 Yearly Deadline Rapidly Approaching) on the ARRL's "Awards Blog" at: http://www.arrl.org/awards-blog

E5, SOUTH COOK ISLANDS. "Wild Bill", WB6BFG, is expected to be active sometime during October as E51BFG from Rarotonga Island (OC-013, WFF E5FF-002). Activity will be on the HF bands. QSL via LoTW or via his home callsign. "The Daily DX" reports that Bill is part of a Multi-Op team from California to be an entry in the CQWW SSB DX Contest (October 29-30th). No other details are available.

E5, SOUTH COOK ISLANDS. Just a reminder that Bill, N7OU, will be active as E51NOU from Rarotonga Island (OC-013, WFF E5FF-002) between October 17th and November 7th. Activity will be limited to his spare time as work allows on 80-10 meters CW only. QSL via N7OU. He is expected to head to Manihiki Atoll (OC-014), North Cook Islands, after the Rarotonga operation between November 8-22nd.

E7, BOSNIA-HERZEGOVINA. Operators Richard/9A1TT, Chris/9A5K, Ranko/E70R, Vlado/E70T, Sanjin/E71DX, Vedo/E72U, Radomir/E74IW, Zoran/E76C, Robert/ E77E, Braco/E77DX, E77WM and Bill/F5SNJ will be active as E7DX during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via E77E.

EA6, BALEARIC ISLANDS. A Hungarian team will be active as EA6/homecall from the Balearic Islands between November 1-8th. Operators mentioned are Laci/HA7PL, Csaba/HA6PJ, Zsolt/HA6PS and Alex/HA7JJS. Their main goal is to take part in the HA QRP Contest (80m cw only) using the Radio Technika Szerkestosege callsign, EA6/HA5RT, but the operators will also work 80-10 meters using CW and SSB. QSL info is as follows:
EA6/HA5RT - eQSL or direct to home callsign
EA6/HA6PJ - eQSL or direct to home callsign
EA6/HA6PS - eQSL or direct to home callsign
EA6/HA7JJS - to home callsign, by the Bureau or direct
EA6/HA7PL - to home callsign, by the Bureau or direct

FS & PJ7, SAINT MARTIN AND SINT MAARTEN. Jean-Pierre, F5AHO, will be active from Saint Martin (NA-105) and Sint Maarten (NA-105, WLOTA 0711) between November 17-30th, as FS/F5AHO and PJ7/F5AHO, respectively. He will also activate Tintamarre Island (NA-199) during the weekend as FS/F5AHO/P. Activity will be mostly on 20/17 meters using SSB, RTTY and PSK31. QSL via F5AHO, direct or by the French Bureau.

FY, FRENCH GUIANA. Herve, F5HRY, will be active as FY/F5HRY from FY5KE's QTH during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/ Single-Band (10m) entry. Listen for QSL instructions.

FY, FRENCH GUIANA. Marc, F1HAR, will be active as FY5KE during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (15m) entry. QSL via FY5KE, by the Bureau or direct.

H40, TEMOTU PROVINCE. German operators Peter/DG1FK and Sigi/DK9FN will once again return to Temotu Province for a third time and be active as H40FK (PSK/RTTY) and H40FN (CW), respectively. Activity will again be from Lata Motel on Nendo Island (OC-100) between February 7-20th, 2012. Operations will probably be on 160-6 meters depending on the band conditions. QSL H40FN via HA8DD, and H40FK via DG1FK.

HP, PANAMA. Rene, HP1DCP, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Low-Power entry. QSL via HP1DCP.

IOTA NEWS.....
EU-174. Operators Peter/HA5OV (J48OV) and Laci/YU7CM (J48CM) will be active from Thassos Island, Greece, between October 26th and November 2nd. Activity will include the CQWW DX SSB Contest (October 29-30th) with J48OV as a Single-Op/Single-Band (40m) entry, and J48CM as a Single-Op/Single-Band (80m) entry. QSL via their home callsigns. Also, look for them to be active November 1-2nd in the HA QRP (80m, CW only) contest.

EU-189. (ROCKALL) The Documentary Archives Radio Communications compiled a comprehensive Rockall Web page - from early plans in the mid-60's (with hinter to unpublished documents) to MM0RAI/P, including an interview with Patrick, ON4HIL, one of the operators. See: http://www.dokufunk.org/rockall

NA-240. NEW IOTA/DATE CHANGE! Rick, K6VVA, is currently making plans for another Alaskan IOTA next year, this time to the Bethel County IOTA Group. The group contains Kwigluk and Pingurbek Islands. The operation depends on a few final details and WX. The dates of the operation have been changed to accommodate those going to Friedrichshafen, so the dates are now June 28-30th, 2012 (not June 22-24th, 2012, as first announced). For more details and updates, watch the following Web and Twitter pages: http://www.k6vva.com/iota/na240 http://twitter.com/#!/k6vva

OC-128. Hiro, JJ5GMJ, will once again be active as DU1/JJ5GMJ from Palawan Island, Philippines, during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power/Assisted entry. QSL via LoTW, also via JH5RXS(direct) is "OK".

JW, SVALBARD. Operators Hans/LA5HPA, Njaal/LA3XTA and Peter/LA7QIA/JW7QIA will be active as JW5E from the club station in Longyearbyen on Spitsbergen Island (EU-026) during the CQWW DX SSB Contest (October 29-30th) as a Multi/Single entry. Njaal has only had his ham license for 10 months, and this will be his first SSB contest. We hope our fellow contesters will treat him nicely :-) .....

L90, ARGENTINA (Special Event). Fernando, LU1ARG, Secretary of the Radio
Club Argentino (RCA - <www.lu4aa.org>), informs that the RCA will be
active as L90AA starting October 21st through the end of the month.
Activity is to celebrate the 90th anniversary of the RCA founded in
1921. The RCA is one of the oldest amateur radio associations in the
world, and was also one of the founders of the IARU in 1925. Look for
operations to be on all bands using CW, SSB and the Digital modes. QSL
via LU4AA, direct or by the Bureau.

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX
SSB Contest (October 29-30th), but as a Single-Op/All-Band/High-Power
entry. Operator will be Tomi/OH6EI. QSL via W0MM.

PJ2, CURACAO. Some of the members of the Caribbean Contesting Consortium
(CCC) will once again activate Signal Point Station on Curacao (SA-099,
WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 29-30th)
as a Multi-Multi entry. Operators mentioned are Geoff/W0CG (PJ2DX),
Wayne/K8LEE, Joe/W9JUV, Daniel/N1ZZ, Gus/W1BV, Adam/W1ASB, Don/VA7AB and
David/VA7DXC. QSL PJ2T via W3HNK or LoTW. Look for the above operators
to be active before/after the contest as PJ2/homecall or their own PJ2
callsign.

PU5, BRAZIL. Look for 13 year old Eduardo, PU5FJR, to be active in his
first CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band
(10m)/Low-Power entry. QSL via PP5JR (his father).

AT0ULH QSL STATUS. QSL Manager Deepak, VU2CDP, announced this past week that "the QSL cards have been printed and few direct requests have been answered over the last weekend. The rest would continue to be answered during the coming weekends." Bureau requests can be sent via E-mail to him at "vu2cdp [at] yahoo [dot] co [dot] in" to speed up the turn-around time. Bureau cards will be sent out as part of his annual dispatch to the VU Bureau in December.

QSL HO1X and HP1/DJ2ST via DK2KT only. Activity was from Panama by Swen, DJ2ST. The callsign HO1X was used during the WAG Contest (This past weekend) from Contadora Island (NA-072), and HP1/DJ2ST was used outside the contest.

ST0R QSL STATUS. Antonio, EA5RM, informs that he will have mailed more than 26,000 QSOs by Monday, October 17th. He states that the pile of QSL cards are still too high, but expects to finish with the donors and OQRS cards before he leaves home to go to Andorra and participate in the CQWW DX SSB Contest (October 29-30th) with the C37N team of URA, URE and REF operators (see QRZ.com or go to http://www.gdgdxc.net/c37n).

VK0TH QSL STATUS. QSL Manager Masa, JE1LET, reports that the Macquarie Island QSL cards for VK0TH are now being prepared. It will take some weeks before the cards are sent. Please do not rush your requests for the card. Requesting later, and giving him some time, will be greatly appreciated.

QSL YW3Y via YV5AJ (No EURO-BUREAU). Members of the Radio Club Venezolano activated "Mysterious Cold Mountain" (Grid FK50MJ, 1,100 MASL) in the Yaracuy State this past week (October 12-16th). The expedition team was composed of YY5CHJ, YY5DCV, YY5WG, YY5CWM, YY5FRD, YV5NEA, YV5HUJ, YV5LI, YV5JBI, YV5SSF, YV5KQA, YV5JF and YV8ER. Activity was on 160-6 meters using CW, SSB, Satellite and the Digital modes.

QSL RECEIVED VIA LoTW: 9M6YBG, BD4CQ, DU3/N0QM, DV1/JO7KMB, EV1R, H7DX, HA1AD, IF9ZWA, J39BS, JS8AJA, JW8AJA, KH2/N2NL, KL7RRC, LU5FZ, OH0Z, RA3XDX, RI1ANC, RZ6LY, UN3GX, UT3UA, UT7UJ, UT7UV, VE2GHI, XE2VAS, YN2GA, YO9HP and YS3CW

QSLS RECEIVED VIA MAIL: 3Y0E, 5N7M, 9K2HN, EZ75R, HH3/N3BNA, OJ1ABOA, OX6YL, RI1FJ, SM/OH2FFP, ST0R, T6MO, T6TL, XX9LT, ZC4MIS and ZS8T

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

S9, SAO TOME AND PRINCIPE (Update/Delayed). Operators Matt/K0KKO and Ed/K0GUV will be active from Ilheu das Rolas (AF-023), Sao Tome, using the callsigns of S92DX, S9CW and S9SX, between March 16-23rd (not October 21-27th, as first announced). Activity will be on the HF bands and 6 meters. They plan to have two 6 meter stations on the air (50.105/SSB and 50.105.7/CW). They also plan to use EME. No other details were provided. For updates, watch: http://www.k0kko.net/pb/wp_5bd6e10c/wp_5bd6e10c.html

T32, CHRISTMAS ISLAND. With more than a week to go, the Five Star DXers Association (FSDXA) group continues to be very active as T32C from Kiritimati (Christmas Island) until October 26th. As of 0702z, October

16th, the T32C operation has made 148669/QSOs with 36835 Unique Callsigns (61194/SSB, 75155/CW, 12259/RTTY and 61/FM). Logs will be uploaded to ClubLog <www.clublog.org/charts/?c&#65533;2C&a&#65533;bed> on a daily basis, and any news posted will be on the T32C website. For more details/updates, visit their Web page at: http://www.t32c.com

T6, AFGHANISTAN (Update). Les, WB8LES, Defense Contractor pilot who is stationed in FOB (Forward Operation Base) Shank, Loghar Province, announced T6LB is on the air from Afghanistan. He states that he was surprised about the pile-up on the air, and he is trying hard to get as many of you in the log as possible. Les is expected to be on the air every day starting at around 1300z until November 2nd. He mentions, "I am going to work 14310 kHz and up. The noise level here is about 6db constant. Hopefully, I can make some adjustments to the antenna location to improve that. 40 meters and 17 meters are to follow." Les will be posting updates and the times and frequencies (for 40/20 meters) on QRZ.com for those who need a T6 confirmation. He is expected to be there until November 7th. QSL via WB8LES.

T8, PALAU. Operators Nob/JA1KSO (T88NB), Hiroshi/JH1WXT (T88XT) and Tsuyako/JR1WMO (T88WL) will be active from the Palau Pacific Resort on Arakebesang Island (Koror Island) between October 29th and November 2nd. Look for them to sign as T8AA in the CQWW DX SSB Contest (October 29-30th). QSL via JH1WXT.

TX5, MARQUESAS ISLANDS (Update to OPDX.1030/Reminder). An international team of operators will be active as TX7M from Hatiheu, Nuku Hiva (OC-027) this week between October 19th and November 1st. They plan to be active on 160-10 meters (including 30/17/12m) using CW, SSB and RTTY, with 4 stations on at the same time on different bands and modes. Suggested TX frequencies are:
CW: 1831.7, 3527.7, 7027.7, 10107.7, 14027.7, 18077.7, 21027.7, 24897.7, 28027.7 and 50106 kHz
SSB: 1840.7, 3797.7, 7077.7, 14197.7, 18167.7, 21297.7, 24987.7, 28497.7 and 50130 kHz
RTTY: 1840.7, 3585, 7038, 10132, 14082, 18097.7, 21082, 24922 and 28082 kHz
The RX frequencies (usually announced by the operator) are available at: http://www.tx7m.com/plans.php
For more details, visit the TX7M Web page at: http://www.tx7m.com
Currently the team is active as TX3T from Papeete, Tahiti (OC-046), until the 19th.

V4, ST. KITTS (NA-104). Andy, N2NT, will be active as V47NT from the QTH of V47KP during the CQWW DX CW Contest (November 26-27th) as a Single-Op/ All-Band/High-Power entry. QSL via W2RQ.

VC2, CANADA. Operators Noel/VE2BR and Gregg/VE3ZZ will once again operate as a Multi-Single entry in the CQWW SSB DX Contest (October 29-30th) using the special callsign VC2Z. QTH will be Mercier, Quebec (Zone 5, Grid Loc FN35ch). QSL to VE2BR direct or by the Bureau.

VK9C, COCOS (KEELING) ISLANDS. Just a reminder that Lot/DJ7ZG and Babs/ DL7AFS will be active as VK9CX between October 19th and November 9th. Activity will be on 80-6 meters using SSB, RTTY and PSK. QSL via DL7AFS.

VK9X & VK9C, CHRISTMAS AND COCOS (KEELING) ISLANDS. Pekka, OH2YY, will be active as VK9XM from Christmas Island (OC-002) on November 4th, and then again between November 8-11th. He will also be active as VK9CM from Cocos (Keeling) Island (OC-003) between November 5-7th. Activity will be on 40-10 meters SSB only. Pekka states, "I'm going to use a 200w trans-ceiver but the antenna set-up is still under consideration." QSL via his home callsign, direct or by the SRAL QSL Bureau. His direct address is: Pekka Ahlqvist, Vapaalanpolku 8B, 01650 Vantaa, Finland.

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. Activity will be on 160-10 meters. QSL via VU2PAI direct (QRZ.com address). Please do not send green stamps. IRCs are "OK".

ZA20, ALBANIA. Operators Steve/HA0DU, Joe/HA0LC, Imi/HA0MK, Laci/HA0NAR and Fatos/ZA1G will active using the special callsign ZA20QA from Vlore between October 25th and November 1st. Activity is to celebrate the 20th anniversary of the 1991 ZA1QA DXpedition by Jani/HA0NNN and Gyozi/HA0MM. Operations will be on 160-2 meters using CW, SSB and RTTY. They will also participate in CQWW DX SSB Contest (October 29-30th). QSL via HA0NAR.

ZD8, ASCENSION ISLAND. Marko, N5ZO, will be active as ZD8O from Ascension Island (AF-003) during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via OH0XX. Marko informed OPDX that he will be there by October 20th and will leave on November 1st. He states that he will operate some CW and SSB prior to contest probably starting the weekend preceding the contest. Activity will be on all HF bands, but not on the 30/17/12 meter bands. He states, "I'm not going there for a DXpedition, and my main focus will be on preparing for the contest, but I will operate a bit here and there before the event to test out equipment and antennas, but I will not operate hours and hours during the week preceding the contest. After the contest I don't expect to turn the radio on."

ZD8, ASCENSION ISLAND (Update). Operators Al/W6HGF/ZD8F and Tom/K7ZZ/ZD8ZZ will be active from Garden Cottage on top of Green Mountain on Ascension Island (AF-003) between November 8-22nd. Look for Al to focus on RTTY, while Tom will provide the CW operations. Both operators will operate SSB at times, and there may be some 6 meter opening opportunities. QSL via their home callsigns direct only or LoTW. It appears that there is no internet available for them on the mountain.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 16th October 2011

IRTS AGM and Rally 2012

The IRTS AGM and Rally will take place April 21st and April 22nd 2012. Dundalk Amateur Radio Society ,EI7DAR, will host the event at the Fairways Hotel, Dundalk. Amateur Radio Clubs requiring a table/stand at the event is requested to contact Dundalk Amateur Radio Society on www.ei7dar.com. All enquiries are welcome.

Foyle and District Amateur Radio Rally

The Foyle and District Amateur Radio Club Rally takes place November 6th 2011 at the White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA. Doors open at 12 noon. The usual traders will be present and IRTS will have a stand also on display. Further details from www.mn0aku.co.uk .

Limerick Radio Club

Limerick Radio Club have started their club meetings for the current season. We had a very good turnout of members and started with a talk on the recent IARU conference by Ger EI4GXB. The club repeater which developed a fault in the last few weeks has been repaired by Simon EI7ALB and is now QRV. Tom EI5CA will conduct CW classes for club members on Tuesday nights at 7.30pm at the Tait Business Centre, Dominic Street. Limerick.

Shannon Basin Radio Club

The Shannon Basin Radio Club will be having a meeting on Friday the 28th October in Hannons Hotel, Roscommon at 20:30. All members are asked to attend and non-members are welcome. Please see www.shannonbasinradioclub.com for details.

EI8GNB /at/ CQ WW DX SSB Contest

David EI8GNB will be part of the PJ2T team for the upcoming CQ WW DX SSB Contest, 29th-30th October. David currently resides in Canada using the call VA7DXC, but as an Irish national uses his EI call when abroad. In the days running up to the contest keep an ear out for PJ2/EI8GNB from Curacao.

EI8GQB aka ON4EI

Benneshill October 24th-31st 2011

Oliver will again be QRV from Ireland near Fethard (IO62EL) on top of Benneshill (170m ASL) with his Irish callsign EI8GQB. He will enter the CQ WW DX SSB CONTEST as SOAB Low Power Non Assisted (October 29-30).

During the week before the contest Oliver will set up 5 antennas to support SO2R operation. Reference frequency is 7.100 MHz +/- QRM.

Equipment: -18m top loaded vertical monopole for 160-80m bands + 32 radials. -2 Spiderbeam antennas for 20/15/10m bands. -200m long beverage East-West. -3 elements East-West bi-directional inverted V beam for 40m band. -Rigs are Elecraft K3 & Kenwood TS2000.

Olivier will hold a daily blog on www.qrz.com/db/EI8GQB

DX News

A group of amateurs from Germany and Poland will be active from Guinea in West Africa from 18 October until 1 November. The callsign in use will be 3XY1D and they will be found on all bands 160-6m. The QSL Manager is DL7DF

Following on from the TX3T activity mentioned last week the team will travel on to the Marquesas Islands from 19 October to 1 November where the callsign TX7M will be used. During the CQ WW DX SSB Contest on 29-30 October the call will change to TX5A. The Marquesas Islands are quite a rare DXCC entity so this is a good chance to log it.

A not too common prefix for the island of Malta will be aired by a group of German operators when they sign 9H9OP during the period 14-22 October. QSL Manager is DH7WW.

The well-known husband and wife team of DXers Lot DJ7ZG and Babs DL7AFS will be on the Cocos Keeling Islands from 19 October until 9 November using the callsign VK9CX. They will operate on all bands 80-6m.

East Kiribati (T32) DXpedition

The T32C DXpedition now has over 120,000 QSOs in the log. Over the past week, propagation to Europe has improved somewhat; there are now more than 50 EI stations and 20 GI stations in the log. So far, top band has

eluded most Irish stations - at the time of writing, Dick GI3OQR is the only Irish station with a 160 metre QSO in the T32C log.

There is still plenty of time to work T32C; the group plans to be on the air for another 10 days.

CEPT proposes frequency allocation for amateur radio

A small allocation of about 15 kHz in parts of the 500 kHz band to the amateur radio service on a secondary basis - this proposal has been made by a project team of about 50 representatives of European governments and other stakeholders in preparation for the next World Radiocommunication Conference WRC12. They followed an invitation of the Federal Network Agency in Germany and met by the end of September in Mainz. The discussion led to a compromise in the size of the amateur radio band, namely 480 kHz - 472 kHz, with a maximum power of 5 W EIRP.

30th anniversary of UoSAT-1 (OSCAR-9)

On October 6, 1981 the United Kingdom's first Amateur Radio Satellite UoSAT-OSCAR-9 was launched. Surrey Satellite Technology Limited (SSTL) celebrated the 30th anniversary of the launch of Surrey's first satellite, UoSAT-1. Launched into orbit on 6th October 1981, UoSAT-1 was designed and built by a team from the University of Surrey led by SSTL founder Sir Martin Sweeting, G3YJO.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ohio/Penn DX Special Bulletin No. 1032.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1032.1
BID: $OPDX.1032.1
October 17, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and IZ8CCW for the following DX information.

NEPAL 2011 PRESS RELEASE # 6

"In less than one month, 9N7MD, the dxpedition organized by the Mediterraneo Dx Club, in Nepal from 13rd to November 25th, will be on air. Recently we have had new great arrivals and now our complete team, with so many well know and experienced guys, is the following:

IZ8CCW - Team Leader, Gabriele, I2VGW - Team Co-Leader, Ziv 4Z4OQ, Bernard F9IE, Luis XE1L, Tony IZ2ESV, Pino I8YGZ, Fabrizio IZ2KXC, Dov 4Z4DX, Marco CE6TBN, Henri F1HRE, Michel, F5EOT, Alberto, IV3BSY, Marco IZ2GNQ, Sergio IZ3NXC, Eric ON7RN, Guillermo XQ3SA, Adhi YB3MM

The whole team is very motivated and so determine to hardly work 24/24 hours each day to give to the greatest number possible of dxers, from all over the world, the greatest number possible of new ones bads/modes. If, as all of us wish, the internet connection will allow it, on our official web-site <http://www.mdxc.org/nepal2011/> , we'll keep on touch every day with the dxer community and we'll update our log in real time. During our permanence in Nepal we kindly ask you to send any question only to our two pilots IZ8BGY (for Europa and Asia), N1DG (for USA).

The OQRS system is ready and it will be soon online, and, in few days, you can find and tested the logsearch engine. We'd like just to remind you that any help and donations will be very very appreciated because all the starting cost are now increasing. Please don't miss also the unique target of 9N Trophy, an opportunity to win nice prizes, that will be also a way to have a good time together.

We suggested you to spend a minute, time to time, visiting our web site <http://www.mdxc.org/nepal2011/> to stay tune and to insert your comments, suggestions, etc.

We are waiting for you on air
73's de 9N7MD team"

# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
10 - 16 October 2011

Solar activity was low. Activity for the period consisted of
numerous C-class flares. The primary contributors were Region 1319
(N11, L=051, class/area Eki/280 on 16 October) and 1314 (N25, L=056,
class/area Cho/370 on 12 October). The background solar flux levels
and sunspot numbers stayed elevated throughout the week due to the
number of active regions on the disk, but most of these were stable
and were not flare productive.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
background levels throughout the period.

The geomagnetic field was mostly quiet during the week. A brief
substorm interval was observed at high latitudes early on 12
October. There was a modest increase to quiet to unsettled levels
with some isolated active periods at high latitudes on 15-16
October. Solar wind observations from the ACE spacecraft indicated
an increase in solar wind velocity on 15-16 October which had
signatures consistent with a coronal hole driven high speed solar
wind stream.

Forecast of Solar and Geomagnetic Activity
19 October - 14 November 2011

Solar activity is expected to be predominantly low with a chance for
an isolated M-class event for 19 October - 01 November due to the
number of active regions as well as the return of old Region 1302
(N12, L=280, class/area Fkc/1300 on 24 September), which produced
two X-class flares and numerious M-class flares during its previous
disk transit. Though initially very active, old Region 1302 decayed
and became much less flare productive by the time it exited the
solar disk on 05 October. As of the issue date of this report (18
October) old Region 1302 was just beginning to rotate onto the solar
```

disk and appears to be a likely source for occasional C-class flares and may pose a slight threat for M-class flares. Solar activity is expected to decline to very low to low levels for the remainder of the interval from 02-14 November. As always during this time of the cycle there is also a chance for unexpected flux emergence which could elevate solar activity levels.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at background levels for most of the outlook interval with the exception of 28 October - 01 November when an increase to high levels is expected due to recurrence.

Geomagnetic field activity is expected to be quiet for 19-27 October, generally unsettled for 28-30 October, quiet for 31 October - 02 November, unsettled for 03-05 November, quiet for 06-10 November, unsettled for 11-13 November, and quiet for 14 November. The increases to unsettled levels are expected due to recurrence from coronal hole driven high speed solar wind streams.

[Version fran&#65533;aise suit]

Radio Talk 2011 is a new event being sponsored by the West Island Amateur Radio
Club. Radio is many things to the many individuals who make up the Amateur Radio
Community.

Radio of all types is being reinvented in these modern times. It is a tool for
communications, a means of entertainment, and a source of information.
Radio Talk 2011 will be a day of presentations, demonstrations, and discussions about
radio.

For this first edition of the event, sessions will be held in English. Future events will be
augmented with French sessions depending on demand and interest.
Confirmed presenters are:

Pr&#65533;sentateurs Confirm&#65533;s :
Morrie Portnoff VE2BWS:
Field Day&#65533; A Newbie&#65533;s Experience
Jimmy Howard VE2JWH:
Microwave or Laser Communications
Roger Coud&#65533; VE2DBE:
Evaluation of VHF+ Radio Links using Radio Mobile software
Sheldon Harvey VE2SHW:
Radio in the 21st Century
Leo Nikkinen VE2SI:
TBA/&#65533; venir
Cliff Tooher VA2UTC: Blogging and Amateur Radio
Confirmed displays:
Expositions confirm&#65533;s :
Montreal Solder Spot will display their 2m JPole and Powerpole projects
Dave Cheney will display five or six of his antique radios (working order).
Contact / info
Venez Participer samedi 26 novembre &#65533; :
Join us Saturday, November 26 at:
Lakeside Heights Baptist Church
275 Braebrook
Pointe-Claire H9R 1W1
Doors open 9h - Admission $5 - 16 and under are free

==> ARRL BRIEFS WHITE HOUSE STAFF ON AMATEUR RADIO'S CAPABILITIES
DURING EMERGENCIES

On September 12, at the invitation of White House Cybersecurity
Coordinator Howard A. Schmidt, W7HAS, the ARRL briefed several members
of the National Security Staff on the capabilities of the Amateur Radio
Service to communicate in emergencies. "The White House is looking for
ways that the great work of Amateur Radio operators can continue to
support emergencies in the future with particular attention to
increased use and dependency on Internet-based technologies," Schmidt
said. The ARRL presentation, conducted by Emergency Preparedness
Manager Mike Corey, W5MPC -- along with President Kay Craigie, N3KN,
and Chief Executive Officer David Sumner, K1ZZ -- focused on Amateur
Radio's current and evolving capabilities to provide Internet messaging
```

connectivity. - ARRL Letter

==> CALIFORNIA HOSPITAL ARES GROUP POSTER ACCEPTED AT DISASTER CONFERENCE

The Hospital Disaster Support Communications System of Orange County, California (HDSCS) was honored to have its poster presentation, "Volunteer Amateur Radio Communications in Hospital Emergencies: A Proven Resource," accepted and presented at the recent California Hospital Association Disaster Planning Conference <http://www.calhospital.org/public/disaster-planning-conference-agenda-announced> in Sacramento. Click here <http://www.calhospitalprepare.org/CHCMhandout> for more information on the presentation by HDSCS member and Certified Hospital Communicator Dave West, KI6EPI. West is also the Disaster Coordinator for College Hospital in Costa Mesa, California and has been involved with two other hospitals over the 31 years of HDSCS supporting facilities in Orange County. He was a major supporter of HDSCS before ever becoming an Amateur Radio operator in 2006. -- April Moell, WA6OPS <emcom4hosp@aol.com>, ARES District Emergency Coordinator, Hospital Disaster Support Communications System <www.hdscs.org>, Orange County, California

==> ARES/NTS STUDY: ECAC SUBMITS INTERIM REPORT

ARES and the National Traffic System exist as the ARRL's implementation of the basic principle stated in 97.1(a), "Recognition and enhancement of the value of the amateur service to the public as a voluntary non-commercial communication service, particularly with respect to providing emergency communications." The Emergency Communications Advisory Committee (ECAC) was tasked by the ARRL Board of Directors' Programs and Services Committee to recommend improvements to ARES® and NTS so that the amateur service can better serve the public in providing emergency communications. Assigned study topics include, but are not limited to, ARES and NTS objectives and organizational structures; integration between ARES and NTS; training, certification, and credentialing; and relationships with served agencies.

ECAC Chairman Dale Williams, WA8EFK, has filed an interim progress report with the PSC, and reported that the panel of ECAC members from across the country "began this challenging assignment immediately. Knowing that both ARES and NTS operations across the country are based in strong legacies, proven methodologies and expertise, our initial effort was to capture field opinions of the current status of both organizations." "Our immediate goal is to determine how ARES and NTS are viewed by those directly involved," Williams said. "We need to understand the good features of both groups, where we are in terms of capabilities, where we should be, what shortcomings we face, and how we can best make any needed changes."

Williams reported that over a period of 60 days, "we prepared survey questions to be introduced to the leadership of both groups. Using two

independent teams, we developed an extensive series of questions for the field organization. These were evaluated and combined to form the basis of our planned surveys. To minimize the potential for rumor and innuendo to negatively affect the surveys, we sent advanced copies of both to the NTS leadership for their review and to Section Managers for forwarding to their individual SECs for their viewing. This also afforded the opportunity for the field leadership to offer input and suggestions about the prepared questions and their format. We accepted the field replies and incorporated several changes to the surveys."

Williams found that "our initial information effort outlined above resulted in early feedback that indicates there may be a need for major paradigm shifts in expectations, organizational structures and how we train the general ham population for handling traffic in an emergency. We know initially that both ARES and NTS are wildly different across the country. Some units function very well, some are quite dysfunctional. We intend to discover why the differences exist and how the Best Practices of the successful groups can be translated into successes for problem groups."

The final version of the survey forms was accepted by the ECAC at a September 14 conference call and the ECAC is now preparing to release the surveys to the field, NTS Managers, and SM/SECs.

Williams concluded that "plans call for a thorough review of the reported data, the building of a report matrix, completion of any necessary follow-up work and then the results analysis. Our next report should contain the analysis and an outline of the project projections."

It must be emphasized that nothing has been decided and only information is being sought at this time by the ECAC, which exists solely as an advisory committee to make recommendations to the League's Board of Directors.

What is the NTS?

The National Traffic System (NTS) is a structure that allows for rapid movement of message traffic from origin to destination and training amateur operators to handle written traffic and participate in directed nets. These two objectives are the underlying foundations of the NTS. It's a system that operates daily, even continuously with advanced digital links.

The NTS consists of operators who usually participate for one or two periods a week, and some who are active daily. The National Traffic System is an organized effort to handle traffic in accordance with a plan that is easily understood, and employs modern methods of network traffic handling.

NTS is not intended as a deterrent or competition for the many independently-organized traffic networks. When necessitated by overload or lack of outlet for traffic, the facilities of such networks can function as alternate traffic routings where this is indicated in the

best interest of efficient message relay and/or delivery.

One of the most important features of NTS is the system concept. No NTS net is an independent entity that can conduct its activities without concern for or consideration of other NTS nets. Each net performs its function and only its function in the overall organization. If nets fail to perform their functions or perform functions intended for other nets, the overall system may be adversely affected. Nets may sometimes find it necessary to adopt temporary measures to ensure the movement of traffic, however. - ARRL Public Service Communications Manual

The best way to get to know the National Traffic System is to hook up with a local NTS traffic net in your area where messages (Radiograms) are entered and others are accepted for delivery by mail or phone. Local clubs, repeater groups, and ARES operators are all good sources for local info on NTS activity. -- K1CE

==> AFTER ACTION REPORTS

No communication effort is complete until an After Action Review has been conducted and the After Action Report drafted. The AAR is the best way for us to conduct a candid self-assessment of our performance during an event. The U.S. Agency for International Development has published an excellent guide on after action reviews. That guide offers this definition of an AAR: "An after-action review (AAR) is a professional discussion of an event, that focuses on performance standards and enables development professionals and colleagues with similar or shared interests to discover for themselves what happened, why it happened, and how to sustain strengths and improve on weaknesses. The AAR tool affords leaders, staff, and partners an opportunity to gain maximum benefit from every program, activity, or task."

It goes on to say that an AAR provides:

• Candid insights into specific strengths and weaknesses from various perspectives

• Feedback and insight critical to improved performance

• Details often lacking in evaluation reports alone

The guide also describes the AAR as "...the basis for learning from our successes and failures. A good manager or leader does not learn in a vacuum: the people involved in an activity--those closest to it--are the ones best poised to identify the learning it offers. No one, regardless of how skilled or experienced they are, will see as much as those who actually carry out the events, program, or activity. The AAR is the keystone of the process of learning from successes and failures.

Feedback compares the actual output of a process with the intended outcome. By focusing on the desired outcome and by describing specific observations, teams can identify strengths and weaknesses and together

decide how to improve performance. This shared learning improves team proficiency and promotes bonding, collegiality, and group cohesion.

Though not a cure-all for all issues or problems, the AAR provides a starting point for improvements to future activities. Because AAR participants actively discover what happened and why, they can learn and remember more than they would from a critique or formal evaluation. A critique only gives one viewpoint and frequently provides little opportunity for discussion of events by participants. Other observations and comments may not be encouraged. The climate of a critique, focusing on what is wrong, often prevents candid discussion and stifles opportunities for learning and team building."

In short, every participant should have input into the AAR since everyone's experience was different during the event. One very useful format for an AAR is to ask and answer the following questions:

• What did we expect to happen?

• What actually happened?

• What went well and why?

• What can be improved?

With these simple questions we can quickly focus on what our communications plan anticipated (our expectations) versus the reality of what happened during the event and then identify the pluses and minuses of both our plan and performance. This can all be done in a way that focuses on facts and not on personalities. If possible, a debriefing held immediately after the event can be a convenient way to get all participants' impressions while still fresh in their minds. Even if a debriefing is used it can still be beneficial to allow for written comments within a few days after team members have had a chance to reflect on the event. It can be helpful to circulate the draft AAR for comments and suggestion before the final version is released.

The AAR is useful for both the communications team as well as the event planners. Those "lessons learned" are invaluable for the planners and the future communication unit leaders. Remember, we can never be sure who is going to be filling those roles for future events so we cannot simply rely on someone's recollection of what was done and how well things went in past years. A written communications plan and an AAR are the best tools for providing both continuity and improvement from year to year. Although the communications team's AAR is intended to specifically address its plans and performance, most event organizers will also appreciate constructive comments and suggestions regarding the overall event. -- Jim Aylward, KC8PD, EC, Portage County ARES, Ohio

==> ARES® DOCKET

Walker County, Texas -- On two occasions this month, ARES coordinated through the local 440 MHz machine to have ice and water brought to the

Incident Command of a wild land fire. I have to commend all of our first responders during this serious time. They have given maximum efforts to protect life and property locally. This applies to all of the state. - Joe Connell, KB5DTS, PIO, Huntsville, Texas

Portage County, Ohio -- ARES of Portage County (Ohio) held a Public Service Communications Basic Skills class on August 30 with more than 35 in attendance. We were very pleased with the attendance. A handout has been made available to the other counties in our ARES district for their use. Copies available to readers also at kc8pd@portcars.org <http://webmail.cfl.rr.com/do/mail/message/mailto?to=kc8pd%40portcars.org>. -- Jim Aylward, KC8PD, EC, Portage County, Ohio

==> ARRL PARTNERS' ROUNDUP

American Red Cross

Here is an online orientation <http://www.redcross.org/portal/site/en/menuitem.d229a5f06620c6052b1ecfbf43181aa0/?vgnextoid=fa5f2b0d3232b110VgnVCM10000089f0870aRCRD#orientation> for volunteers serving the American Red Cross. Read a concise history <http://www.redcross.org/portal/site/en/menuitem.86f46a12f382290517a8f210b80f78a0/?vgnextoid=271a2aebdaadb110VgnVCM10000089f0870aRCRD&vgnextfmt=default> of the venerable organization. Get to know who you are serving as ARES emcomm operators.

FEMA

The Federal Emergency Management Agency (FEMA) is encouraging participation in the Great California ShakeOut earthquake drill, October 20 at 10:20 AM Pacific Time. FEMA hosted a webinar on the ShakeOut that helped participants understand what the ShakeOut is and how to participate. A recording of the webinar will be available in their webinar library <http://citizencorps.gov/news/webcasts.shtm>.

The ShakeOut provides a tangible way to participate <http://www.shakeout.org/howtoparticipate/> in preparedness by focusing on the potentially life-saving actions of "Drop, Cover, and Hold On" during and immediately after an earthquake. The recent earthquake on the East Coast shows that earthquakes can happen practically anytime, anywhere, so FEMA is encouraging participation even if you don't live in California. To join, go to www.ShakeOut.org/register <http://www.shakeout.org/register> and pledge your family, school, business, or organization's participation in the drill. It's free to sign up.

Readers may remember the Great Central U.S. ShakeOut <http://blog.fema.gov/2011/05/not-too-late-to-drop-cover-hold-on.html> from earlier this year, where over 3 million people across 11 states practiced earthquake safety. Here's a look at the upcoming ShakeOut events: October 20, 2011: California <http://www.fema.gov/goodbye/goodbye.jsp?url=http://www.shakeout.org/>, Oregon

<http://www.fema.gov/goodbye/goodbye.jsp?url=http://www.shakeout.org/oregon/>,
Nevada

==> LETTERS

Center of Activity Frequencies

Thanks for the mention of the global SET exercises in the last issue,
and the center of activity frequencies for emergency communications.
These centers of activity were established by IARU-promulgated
gentlemen's agreements, and are not well understood by the amateur
community at large. The IARU has advocated that contesting and other
such activity be curtailed on or adjacent to them. All amateurs should
be aware of these frequencies, and be cognizant of the fact that often
stations requiring emergency assistance are not high powered stations
with great antenna systems. Often they are mobiles, portables operating
from the bush with a simple wire antenna or on a sailboat. I hope
readers will learn about the CoA frequencies and help educate their
fellow amateurs. Remember that the next person aided on one of these
frequencies could be you. There are frequencies in each of the HF
amateur allocations worldwide. Remember that ARRL is an IARU member,
and IARU has taken the leadership in promoting this, but it needs our
help to get the word out. -- Richard Webb, NF5B, Chair, NTS Central
Area Staff [Webb is frequently an active net control on the 14.300 MHz
emergency nets.]

The Emergency Center of Activity (CoA) Frequencies are:

On 15 meters, 21.360 MHz

On 17 meters, 18.160 MHz

On 20 meters, 14.300 MHz

On 40 meters, 7060 kHz

On 80 meters, 3760 kHz

For more info, click here <http://www.iaru.org/emergency/CoA1.html> and
here <http://www.rientola.fi/oh3ag/garec/frq.html>. There is also a
wealth of information on international emergency telecommunications on

the IARU's Web site <http://www.iaru.org/emergency/>.

ARES/NTS

Regarding the article "ECAC Studying ARES/NTS Issues" and particularly this paragraph: "Williams said that there is a feeling that the "last mile relationship between traffic handlers and ARES members seems to be broken. Neither feels an affinity towards the other. NTSers in general don't join ARES and vice-versa, yet both groups have claims on abilities to handle traffic in an emergency. Fixing this may also be a goal of the committee."

I am not part of NTS because I don't have HF capability. My wife (KI4SBI) and I were able to pass traffic as the last mile on an NTS message once, but mostly we stick to two-meters on the local repeaters. Our primary radios are still 5W HTs, even in our vehicles.

If we didn't live in a deed-restricted community (we bought before we were licensed) we'd have HF at the house. Since we're stuck until the housing market improves, I installed my G5RV antenna at the county EOC to give some limited HF capability there. Even in the EOC ham shack, we barely have HF because the antenna yard is too small to deploy an inverted-V with widely spread legs.

My thought on the ARES and NTS separation is that the connection between HF and UHF/VHF users isn't what it needs to be. That's a function of equipment costs and differing interests within the larger ham radio hobby. I'll be interested to see what suggestions arise to help bridge the local versus HF groups. -- Allan West, WA4JD <wa4jd@cookie.org>, Gainesville, Florida [The writer and his wife are active in ARES/RACES and the CERT program through their local emergency management agency].

==> RED CROSS CLOSES HISTORIC ARLINGTON, VIRGINIA OFFICE

During September, the Red Cross closed its Arlington, Virginia Office. The Arlington County Amateur Radio Club had used the radio room there to support the Arlington Red Cross Chapter since 1977. It was from this radio room that George Saunders, KR4MU, operating the Club radio

station W4WVP maintained the only contact between the Arlington Red Cross Chapter and the Red Cross response at the Pentagon during the early hours of the 9/11 terrorist attack. -- James Hastings, K9AUC, Alexandria, Virginia

==> ARRL INVITES NOMINATIONS FOR 2011 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2011 ARRL International Humanitarian Award. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize those radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

As one of the few telecommunication services that allows people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army, a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references. - ARRL

==> NOMINATIONS OPEN FOR HART AWARD

The George Hart Distinguished Service Award -- established in 2009 -- may be presented by the Board of Directors to the ARRL member whose service to the ARRL's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Selection criteria include: Operating record with the National Traffic System, or Participation within the Amateur Radio Emergency Service, or Station appointments and/or leadership positions held within the Field Organization.

Nominations for the George Hart Distinguished Service Award shall be accepted from anyone and shall be submitted to the Membership and Volunteer Programs Manager at ARRL Headquarters by November 1. Nominations should document as thoroughly as possible the nominee's lifetime activities and achievements within the ARRL Field Organization. It is expected that nominated candidates will have 15 or more years of distinguished service. The Programs and Services Committee will serve as the Review Committee, with the Board of Directors making the final determination at its Annual Meeting in January. Recipients will be given an engraved plaque and cover letter, and will be profiled in QST.

Nominations for the 2012 George Hart Distinguished Service Award, including any related supporting material and letters of recommendation, may be e-mailed to ARRL Headquarters to the attention of ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N. Nominations and supporting materials must be received no later than November 1, 2011 to be considered.

==> WHY THE FEMA COURSES?

For many years, Amateur Radio has longed to be taken seriously by governmental authorities as a professional-quality resource in disaster response. Although there are areas of the country where achieving and

maintaining emergency management agencies' respect is still a struggle, Amateur Radio's service during 9/11 and the major hurricane disasters has brought us a new level of respect and new opportunities at the national level.

Being taken seriously as a resource comes with a price, however, that must be paid by individual volunteers, not in dollars but in precious personal time. When the federal government instituted the National Incident Management System (NIMS), it imposed a set of requirements on state and local emergency management agencies and their personnel. Affected personnel include not only paid employees of emergency management and related agencies but also volunteers such as those in volunteer fire companies, ARES, and RACES. If the emergency management agencies are to continue receiving federal funds, personnel must complete a number of FEMA training courses having to do with the Incident Command System (ICS) and NIMS. Individuals who do not complete the training will not be allowed to participate, even as volunteers.

These FEMA courses are free of charge, available on line or sometimes in person at emergency management offices, and not particularly difficult. The courses are useful in familiarizing volunteers with the principles of the Incident Command System and showing where communications fits into the ICS structure. These formal requirements are here to stay and more may follow. At the national level, Amateur Radio has earned the respect we always wanted, bringing us closer to the emergency management establishment. - excerpted from the ARRL National Emergency Response Planning Committee Report (2007)

Recommended Courses

♦ ARRL Introduction to Emergency Communication- <http://www.arrl.org/online-course-catalog>Course #: EC-001. This is a revision of the former Emergency Communications Basic/Level 1 course. This on-line course is designed to provide basic knowledge and tools for any emergency communications volunteer. Prerequisites: ICS-100 (IS-100.b <http://training.fema.gov/EMIWeb/IS/IS100b.asp>) (Introduction to the Incident Command System); and IS -700 <http://training.fema.gov/EMIWeb/IS/IS700a.asp> (National Incident Management System). Also recommended, but not required, are: IS-250 <http://training.fema.gov/EMIWeb/IS/is250.asp>, Emergency Support Function 15 (ESF15), External Affairs; and IS-288 <http://training.fema.gov/EMIWeb/IS/is288.asp>, The Role of Voluntary Agencies in Emergency Management. The course covers: The Framework: How You Fit In; The Networks for Messages; Message Handling; What Happens When Called; Operations & Logistics; Safety & Survival; and What to Expect in Large Disasters.

♦ Red Cross or AHA combined course in Adult CPR/First Aid/AED Basics <http://www.redcross.org/portal/site/en/menuitem.d8aaecf214c576bf971e4cfe43181aa0/?vgnextoid=aea70c45f663b110VgnVCM10000089f0870aRCRD&vgnextfmt=default>

♦ FEMA IS-100 (Introduction to Incident Command System)
<http://training.fema.gov/EMIWeb/IS/IS100b.asp>

♦ FEMA IS-700 (National Incident Management System)
<http://training.fema.gov/EMIWeb/IS/IS700a.asp>

==> ITU: WHAT IS THE TAMPERE CONVENTION?

When disaster strikes, communications links are often disrupted, yet for relief workers who arrive on the scene these links are essential. Victims of disasters are now able to benefit from faster and more effective rescue operations, thanks to the Tampere Convention on the Provision of Telecommunication Resources for Disaster Mitigation and Relief Operations. Before the Convention existed, the trans-border use of telecommunication equipment by humanitarian organizations was often impeded by regulatory barriers that made it difficult to import and rapidly deploy telecommunications equipment for emergency without prior consent of the local authorities. The treaty simplifies the use of life-saving telecommunication equipment.

The Tampere Convention calls on countries to facilitate the provision of prompt telecommunication assistance to mitigate the impact of a disaster, and covers both the installation and operation of reliable, flexible telecommunication services. Regulatory barriers that impede the use of telecommunication resources for disasters are waived. These barriers include the licensing requirements to use allocated frequencies, restrictions on the import of telecommunication equipment, as well as limitations on the movement of humanitarian teams.

The Convention describes the procedures for the request and provision of telecommunication assistance, recognizing the right of a country to direct, control and coordinate assistance provided under the Convention within its territory. It defines specific elements and aspects of the provision of telecommunication assistance, such as termination of assistance. It requires countries to make an inventory of the resources - both human and material - available for disaster mitigation and relief, and to develop a telecommunication action plan that identifies the steps necessary to deploy those resources.

The International Telecommunication Union <http://www.itu.int/en/Pages/default.aspx> (ITU) when requested will assist in fulfilling the objectives of the Tampere Convention. See also List of signatories to the Tampere Convention <http://www.itu.int/ITU-D/emergencytelecoms/List%20of%20Tampere%20signatories.doc>. Tampere Convention <http://www.reliefweb.int/telecoms/tampere/icet98-e.htm>. Press Release (2005) Tampere Convention on Emergency Telecommunications Comes Into Force <http://www.itu.int/newsroom/press_releases/2005/01.html>

==> TIPS: QUAKENET QSO 3.11

QuakeNet is in its third year of conducting emergency drills using Amateur Radio on 2-meter simplex. QuakeNet began with an idea at a meeting about emergency communications in September 2009 in San Diego,

California. With support and volunteers from the Amateur Radio Club of El Cajon, QuakeNet began simultaneously with the first ever California ShakeOut in 2009. This year QuakeNet is striving to be more valuable to more people, both Amateur Radio operators and anyone else interested in participating in the drill. This year there are three ways to participate: (1) Amateur Radio 2-meter Simplex and repeater; (2) Amateur Radio HF, and (3) Social networking- Twitter. http://quakenet.technetron.com/quake1/ <http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fquakenet.technetron.com%252Fquake1%252F>
-- Joseph Matterson, KI6TTF <ki6ttf@live.com>

==> K1CE FOR A FINAL

I am still looking for more action reports from the field, especially during the recent spate of wildfires in Texas and the Vermont ARES response to Hurricane Irene. Readers want to learn about what their colleagues did to provide emergency communications in these areas that sustained such damage and trauma. Please send me your reports, and I will do my best to see that the they see the light of day here in the ARES E-Letter, which now has a circulation of more than 35,000 subscribers. ARRL Field Organization officials: by providing these reports, you will also have the opportunity to give your troops on the ground some much deserved recognition for their efforts in a major national outlet. Thanks! See you next month, 73, Rick K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

WIANEWS WEEK COMMENCING OCTOBER 23 2011.

SILENT KEY VK1KM, WIA PRESIDENT MICHAEL OWEN VK3KI PAYS TRIBUTE. - WIA VP
PHIL WAITE VK2ASD IN THIS WEEKS DIRECTORS TALK.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING OCTOBER 23 2011.

SILENT KEY - VK1KM

Very many people in many countries were saddened by the sudden passing of
Keith Graham Malcolm VK1KM on Thursday, 13 October 2011.

Keith, was born on the 8th of December 1948.

Professionally he retired as Joint Director of the Communication Laboratory of
the Spectrum Management Agency, then to become a consultant to the Department
of Communications in relation to digital television broadcasting and television
black spots.

He attended many ITU meetings as a member of the Australian delegation, and
became widely known and respected.

Keith's interest in amateur radio started in the 1960's, in the very active
Melbourne VHF Group. He became the Group's President in the latter years of
the 1960's and his interest in VHF continued all his life.

As he wound down his professional life, he contributed a great deal to amateur radio, participating in the preparatory meetings and study group meetings for the World Radiocommunication Conferences on behalf of the WIA, and as a member of the Australian delegation to WRC-03 and WRC-07 representing the amateur services nominated by the WIA.

He provided valuable advice to IARU Region 3 in relation to its participation in the APT's APG, and valuable advice to the WIA in the standards area, particularly in relation to BPL and in relation to radiation exposure.

Keith was known for the ability to express complex concepts simply, and a rare skill with written language.

Keith was awarded the Ron Wilkinson Award in 2005.

The WIA and amateur radio is much poorer with the passing of Keith, an unassuming man of great knowledge and experience, who gave much through his representation and participation at the highest levels.

The funeral service for Keith was held in the Chapel of the Norwood Park Crematorium, Mitchell Friday.

(wia president michael owen vk3ki)

Starting next Friday, the Scout Members Amateur Radio Team will be working the special callsign VI6CHOGM for 72 hours straight from our club shack in Perth, Western Australia.

"To celebrate the occasion, 52 of the world's leaders, as well as her majesty the Queen are descending on Perth as well, under the guise of a Commonwealth Heads of Government Meeting.

VI6CHOGM will be operating on all bands, using digital modes, SSTV and voice. We'll even be doing our best to make contacts via satellite in the afternoon passes.

If you are in VK6, we'd love your help in manning the microphone or attending as an onlooker, and if you are in any other state, we'd appreciate the contact - keep an ear out for us next weekend from Friday 28th to Sunday 30th October,.

For more information, including our real time logbook, visit www.vi6chogm.com

I'm Miles, VK6MAB for VK1WIA National News."

Each day in November is a VK 100 ARV day

The roster for the special callsign VK100ARV to be part of the Amateur Radio Victoria Centenary has been made public.

Scout Radio & Electronics Unit will kick it off on Melbourne Cup Day. Fitting around the DATV and Digital SSTV slots is Keith Proctor VK3FT chasing DX.

The Western and Northern Amateur Radio Club is on for five days and the Sunraysia Radio Group for three.

Individuals include Joe Walsh VK3XH, Luke Steele VK3HJ, Peter Freeman VK3PF, Terry Murphy VK3UP and Tony Hambling VK3VTH.

Although each day is allocated some limited flexibility remains. To enjoy this once in a life opportunity contact the Award Manager Tony Hambling VK3VTH vk3vth@amateurradio.com.au

And the roster for November can be seen at www.amateurradio.com.au

(Jim Linton VK3PC)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA DIRECTORS SPOT THIS WEEK PHIL WAITE VK2DKN,

Hello Graham, hello listeners I'm Phil VK2ASD

I thought I'd say something this week about two of the initiatives that I'm involved in right now with the WIA and how they are progressing

The first one is the NSW Governments Planning Policy Review and in particular how it affects radio antennas in relation to antenna heights.

The WIA will be lodging its own submission to this review but it's very important that as many NSW amateurs as possible lodge their own independent submissions. Power is in numbers, and the greater number of people who lodge submissions the greater influence we are likely to have.

Details of how to lodge your submission can be found on the WIA website at www.wia.org.au

The second issue I want to talk about is how we are going in relation to emergency communications.

We now have a considerable number of radio amateurs who have been accredited as WIA Emergency Communications Operators. Those people who have been accredited will soon be receiving an identity card from the WIA office.

We are also establishing regional areas so the Emergency Communications Operators can be contacted if the need arises in their area. Each region will have a Regional Coordinator who will get to know the operators in their area, and who will also act as the first point of contact should we be requested to provide assistance.

The first task of the Regional Coordinators will be simply be to get to know the operators in their region and to give us feedback about the needs of local emergency and non-government organizations. I hope to be able to give you more information about this initiative shortly.

This is Phil Wait VK2ASD for the WIA.

HAMS ACROSS AUSTRALIA.

VK2

DAWN PATROL NET - 30 YEARS OF OPERATING BY LEITH MARTIN VK2EA

14 stalwarts logged into Leith's 30th anniversary Dawn Patrol net on Wednesday. Thanks to those who did and thanks to Leith from us all for his stirling service. We all look forward to having you around for some time to come.
(Summerland Amateur Radio Club)

Over next weekend October 29-30, the Port Stephens ARC will be hosting a Foundation Examination and Assessment weekend.

If anyone wishes to do an upgrade, they will also be happy to help you next weekend.

For more information or bookings, contact Leigh VK2KAL

vk2kal@wia.org.au.

Northern NSW and want to become a licensed Ham Operator?

The next Foundation weekend course in the area is planned for 29 & 30 October so contact Duncan VK2DLR to book a place on the course.

VK4 - QNEWS
Send your stories for news. SCRIPT to qnews@wia.org.au
send audio to http://www.wia.org.au/members/broadcast/upload/

get local audio news www.wiaq.com/ftp/vk4_qnews_64.mp3
get local news emailed qnews-vk-subscribe@yahoogroups.com

Welcome to QNews from VK4WIA.

I'm Geoff Emery, VK4ZPP, and I've been thinking.

Since the 100th anniversary of organised amateur radio, we have been making positive efforts to show our hobby to the public. Part of this campaign is to show the flag and, of course, give an opportunity to introduce new people to the hobby.

Around a large part of the world, we have just joined with the Scouting movement in Jamboree of the Air. Generally discussions are aimed at recruiting the scouts and guides. This usually doesn't include the leaders, many of whom are interested in the hobby as an adjunct to their scouting activities.

Remember that many scouts and guides enjoy gaining proficiency badges. Apart from the amateur radio operator's badge, there are also the communicator, technology, science and IT badges which can all have a direct relationship to amateur radio.

http://www.scouts.com.au/main.asp?iStoryID=15733697

Radio amateurs can offer assistance in attaining these badges and who knows maybe we will gain new fellow amateurs also.

I'm Geoff Emery and that is what I think....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

VK4 AREA SPECIAL INTEREST GROUPS --- VHF

As this broadcast goes to air, today is the day of the Brisbane VHF Group's Microwave Activity Day.

The aim of the activity day is to foster and promote use of the many bands we have available above 1GHz, as well as demonstrating the special fun and experiences there are in getting gear going for these bands, and operating on these frequencies.

Things will get going at 10:00 am with a roll call on 144.150 MHz SSB.

An eye will also be kept on the Group's 2 metre repeater on 147 MHz for any potential operators who may only have that talk back medium available.

In order to accommodate the wide variety of apabilities and gear that is around, different bands will will be focused on in different time slots:

10:00 to 10:30 for 1296 MHz

10:30 to 11:00 for 1296 and 2403 MHz

11:00 onwards for the higher bands, 3.4, 5.7, and 10.3 GHz.

Liason will always be on 144.150 MHz SSB or 147 MHz FM. The idea of using a VHF talk back channel or frequency is well established in microwave operating practice around the world.

Locations will be several in greater Brisbane as well as spread around South-East Queensland from Toowoomba to Stradbroke Island and from the Gold Coast Hinterland to the Sunshine Coast and possibly Hervey Bay.

A list of presently known operators and bands available will be accessible on the VK-Logger Forum under 'Brisbane Microwave Activity Day' in the 'Events, Field Days and Portable Operation' section.

So, if the idea of amateur radio on the microwave bands interests you, check out what's happening at a location near you by visiting, or just listening on air.

Get involved in this opportunity for microwave amateur radio activity in South East Queensland.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again from the Atherton Tablelands this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in a wet Far North Queensland.

TREC members met yesterday for a social get-together and show and tell, this was followed by a management committee meeting of the club. The meeting was well attended and planning has started for the 2012 club year.

TREC is also planning for the CQ World Wide DX contest that will held next weekend. This contest is one of the premier ham contests. We will be entering as a club and hope that the current solar conditions remain good. Members are looking forward to working some rare DX as this contest brings many ham stations out of the woodwork and onto the bands.

Planning is under way for the Spring VHF/UHF field day contest to be held on 26/27 November. TREC will be operating again from Hallorans Hill in Atherton QH22rr.

Well that's your lot for this week.

Once again don't forget to visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to QNEWS. Travel Well!

DISCUSSION POINT

What use is an f-call?

So, you've got your shiny new f-call license. Now what? Where do you go to get your kit, what do you buy, how much should you spend?

Let me start with the amount of money you should spend. It's your hobby, your wallet and your budget. You can get a radio for $20, or $2000, it all depends on how much you can afford. What I can tell you about money is that the radio is only one part of the purchase. If I look at my own set-up, less than 30% of what I spent went to the radio. My antenna represents nearly 40%, Power Supply comes in at 20%, the balance was spent on tools like a crimper and accessories like a remote microphone.

I must point out that this is for a set-up that can
work all bands.

The antenna part of the budget consists of two antennas, a ready-made one and an antenna tuner, squid-pole, mount and a home-made ground-plane and antenna wire.

I thought that it would be interesting to gather some statistics from other amateurs and I've put up a survey on the HARG site (under the F-troop section) at harg.org.au to gather some data on this to see if what I spent was as representative as I think it is.

Based on the results so-far, I spent less than the average on my radio and more on my antenna and as I suspected, I spent too much money on my power supply - the one I don't use very often, but I have two; batteries and 240V regulated, so we'll see how that turns out for me.

Feel free to fill in the survey and see how your spend compares to that of the average.

The purpose of me telling you all of this is to give you a sense of how much of your budget might be allocated to different parts. As one respondent to the survey said: "What budget?" Again, this is your hobby, your wallet and your decision. You can spend as much or as little as you want.

For me, I spent lots on my antenna because I figured I'd be broadcasting with 10 Watts, I'd better make sure it actually gets out. I already spend much time experimenting with other amateurs, their radios and antennas. I expect to do more of it.

Back to the topic at hand - what do you buy and where? The two are related.

I could spend the next hour telling you about all the places you should look, but that list is ever changing. A better way to do this is to talk to other amateurs and discuss this with them. There are many web-sites that have amateur radio reviews and opinions which will give you a guide as to where to look and where to avoid.

Personally, I purchased from several suppliers and used the eHam web-site as a guide to getting a range of views on a particular piece of kit. I'm not going to highlight any particular supplier, other than to say that I purchased all my kit, except for my crimping-tool, locally here in Australia. I chose my suppliers based on discussions I had with each of them, discussions I had with some of the amateurs I had met and I took my time.

I received my license in December, I started spending money in March - the time in between I spent doing research.

Finally, something that took me by surprise, when I bought my radio and antenna, I wasn't done spending money. I had to organise a power supply, wiring, fuses, connectors, coax cable, crimping tools, mounts, antenna hardware, multi-meter and things like a clipboard, a log-book and other paraphernalia.

What I'm saying is, 40% of my spend was on things other than the radio and the antenna. So leave some money in the kitty!

I'm Onno, vk6flab

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

World's youngest nation joins ITU

The International Telecommunication Union has announced that the world's newest country, South Sudan, has joined the ITU to become the Union's 193rd Member State, effective from 3 October 2011.

AMATEUR RADIO FEATURED WELL AT THE IAC2011

Amateur Radio featured in several papers presented at the 62nd International Astronautical Congress held in Cape Town.

Several papers highlighted Amateur Radio involvement in satellites and SETI.

One paper, covered a global geographical survey of received signal's strength in the VHF band, data collected by SumbandilaSat, S067, provides useful information for selecting future ground station locations for minimum interference.

The study further gives an indication of frequencies to use for command and telemetry communication at existing ground stations.

SARL RESPONDS TO CAPE TOWN CITY RE ANTENNAS

Still in South Africa and the SARL has responded to a draft Telecommunications Infrastructure Policy for the City of Cape Town. During discussions the City's Environmental Agency confirmed that amateur radio antenna masts and structures are excluded from the Telecommunications Infrastructure Policy.

The SARL has requested that the amateur radio exclusion statement be incorporated in the policy.

However Amateur radio towers under 15 metres are exempt from environmental scoping as laid down in the environmental protection act.

German debut for follow-my-leader radio system

Fairfax news are reporting on a technology that permits follow-my-leader operation of a pair of tractors, one of which would be unmanned.

Poised to debut at an upcoming show in Germany, European tractor giant Fendt says it allows two tractors connected by satellite navigation and radio communication to operate as one unit with the second, driverless machine replicating the tasks being performed by the leading tractor driver.

With the radios turned OFF both tractors work independently.

Bletchley Park wins lottery funds

Bletchley Park Trust has been granted 4.6 million pounds from the Heritage Lottery Fund towards the regeneration of Bletchley Park.

The investment will enable the restoration of iconic Codebreaking Huts 1, 3 and 6, and create a world-class visitor centre and exhibition in the currently derelict Block C as soon as £1.7 million in match funding has been raised.

Not only will this development allow the conservation of buildings of highly significant heritage value, it will considerably improve the educational offering and visitor experience at Bletchley Park, the home of World War 2 code breaking in the UK.

Careful of those spuds, they may explode!

A total of 144 phosphorate grenades ex world war 2 vintage were found in the garden of James Duncan MM0HDW who came across them while digging in preparation for a new radio transmitter.

The Caithness Courier said that the Second World War munitions were destroyed in a controlled "burn-off" by Northern Constabulary and the Highlands and Islands Fire and Rescue Service.

Grand-daughter of designer G4ZU gets amateur radio licence

Congratulations to newly-licensed amateur Sarah Sipple M6PSK, who obtained her Foundation licence in October 2011.

Sarah is the grand-daughter of renowned amateur radio operator Gordon ("Dick") Bird G4ZU.

Dick Bird, who sadly passed away in 2005, is best known in the amateur radio community for his innovative HF antenna designs, and is credited for the design of the Bow-and-Arrow Yagi, the Birdcage and the Minibeam. The popular multi-band "Spider beam" Yagi (sometimes referred to as the "Skypper"), is also based on a design by Dick Bird G4ZU.

Asked if she has any plans to create her own innovative antennas, Sarah said: "Don't expect to see any novel antenna designs from me just yet. I'm very pleased to be able to carry on the family tradition, and I still have a lot to discover about the world of amateur radio".

Sarah obtained her Foundation licence with the Chelmsford Amateur Radio Society, in Danbury (http://www.g0mwt.org.uk/). As well as being the granddaughter of G4ZU, Sarah is also married to an amateur, Pete Sipple 2E0PSL.

As well as being active on-air in the Essex area, Sarah will be helping out with the EssexHam.co.uk website, which aims to encourage others to take part in the hobby.

More on the story, plus picture, at
http://www.essexham.co.uk/news/sarah-m6psk-carries-on-family-tradition.html

California ham killed in shooting spree

The ARRL report that David Caouette, N6DAC, was killed in a shooting incident in Seal Beach, California

The ARRL say:
A gunman, apparently enraged over a custody dispute with his ex-wife, walked into a hair salon in Seal Beach, California on October 12.

Scott Evans Dekraai allegedly opened fire in the salon, killing eight people, including his ex-wife. David Caouette, N6DAC -- who was waiting outside the salon in his car -- was killed in the rampage. He was 64.

Read the full ARRL story at
http://www.arrl.org/news/california-ham-killed-in-shooting-spree

WEIRD AND WONDERFUL

Recently our weird and wonderful story of the radio prize in Somalia of Land Mines, grenades and AK47's as prizes drew some comment including news

of a weird n wonderful radio prize from Canada being offered by Ontario states Hot 89.9fm

WIN A BABY!

The station is offering $33,000 worth of fertility treatment to the most deserving listener struggling to conceive.

Their website shows a photo of the prize baby.. with the disclaimer, "Baby may not be exactly as shown".

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Oct 22 WIA Jack Files Contest

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

Hello Listeners I'm Peter Harding VK4OD the WIA RD Contest Manager with the final report for this year's RD Contest,

Well it is no surprise that VK6 took out the winning state,(yet again).

Statistics wise this I found a drop of 21% in the number of logs right across the country except for VK5 who increased by 5 logs over last year.

Points wise a total drop of 16% with VK6 actually increased by 21% over 2010 contest.

This year we received a log from P29 and 3 from ZL Land.

This week on the WIA Website I have placed a file in PDF format, showing the listings of all this year's RD Contest Logs.

The file shows all the available section that are available to enter, and who and what points were achieved in each area.

If you have any queries please Email me:- vk4od@wia.org.au and I will do my best to answer your question(s).

Antarctic Activity Week

The first teams and individuals are already lining up to be active in the 9th Antarctic Activity Week (AAW) which will take place February 20-26th.

This is an all bands, all modes, world-wide amateur radio event celebrating the international scientific work in Antarctica.

Certificates may be obtained from the WAP using the QSLs from the WAP Reference Numbered stations worked.

For more details, see:
http://www.waponline.it/Default.aspx?tabid=113

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

DXCC NEWS - 2011 yearly deadline rapidly approaching

Bill Moore, NC1L, Awards Branch Manager, reports:
"This is a reminder that the deadline for the DXCC Annual List (for the 2011 DXCC Yearbook) and the Honour Roll listing (scheduled to be published in August 2012 QST) is rapidly approaching.

"In order to appear in these listings, upon qualification, you must have your 2011 submission into DXCC by December 31, 2011. As always, all mail postmarked by December 31st will be OK for these listings."

To see the qualifications to appear in the listings, see details under (2011 Yearly Deadline Rapidly Approaching) on the ARRL's "Awards Blog" at:
http://www.arrl.org/awards-blog

Ann Renton Memorial Ladies Net this Tuesday

One of the friendliest radio nets in the north of VK4 land happens this Tuesday evening from 7-30pm on the Townsville UHF Repeater, the Ann Renton Memorial Ladies Net!

The net is open to young and old, YL or OM and is a golden opportunity for anyone who needs practice on-air to go onto the net as 2nd operator.

So join in to this Tuesday evenings net and let's see if the YLs can outnumber the OMs !

INTRUDER WATCH - ENFORCEMENT ZONE

28 MHz - a lost band?

The September edition of the International Amateur Radio Union Monitoring System (IARUMS) newsletter asks is 28 MHz a lost band ?

The newsletter says:

28 MHz - a lost band?

We found much CB-like traffic (AM, FM, SSB) between 28 and 29.7 MHz in September 2011. Origins: Europe, Brazil, Far East. Besides that we observed, that the band is still crowded of numerous CIS taxi-cabs in FM.

The conditions on the upper bands are raising, so we are able to recognize and realize the "apocalypse" on our exclusive band. Many authorities seem to be helpless or not interested in this disaster.

The International Amateur Radio Union Monitoring System (IARUMS) Region 1 September 2011 newsletter can be read at
http://www.iarums-r1.org/iarums/news2011/news1109.pdf

MEDIA WATCH

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

A look inside Amateur Radio magazine for This November.

A full run down of the IARU Region 3 ARDF Championships by Jack Bramham VK3WWW, who was the organiser with lots of competitors and helpers.

The amateur radio community has a golden opportunity available with the New South Wales Department of Planning looking to make radio mast laws more flexible.

In the column, VHF/UHF an expanding world, we are reminded of the spring field days on November the 26th and 27th, the first WIA DXCC on 2-metres digital and lots more.

Remembrance Day Contest Award winners are VK6 as Peter Harding VK4OD revealed the full results. The 31st ALARA Contest results are there too.

The VK3 Notes has a montage of things past as the Amateur Radio Victoria centenary rolls on.

We will have more next week. All part of a WIA membership service and Amateur Radio magazine is also at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

Latest from flood hit Thailand

The death toll from the most devastating flooding to hit Thailand in over 60 years following heavy rains since late July has now risen to almost 300.

Nearly three million people are said to have been affected by the floods and the disaster has caused serious damage to the country`s agriculture. Industries are in suspension such as motor vehicle firms Toyota, Sony and Honda along with Western Digital and many other factories to the north of Bangkok.
Damage so far has been assessed at more than 20 billion baht and 26 out of the country's 77 provinces are affected.
Bangkok is bracing for a large amount of run-off water that will coincide seasonal high tides making it harder for the flood waters to flow out to sea.

Amateur radio has been assisting with flood relief communications, helping victims in the affected areas.

In use by hams is the Radio Amateur Society of Thailand (RAST) club station callsign HS0AC and a special flood relief centre with the callsign HS0AB has been established at Bangkok's Don Mueang Airport.

Please be advised that Thai radio amateurs are standing by on 144.900 MHz, 145.000 MHz and 144.9375 MHz (VHF) as well as on frequencies of 7.063 and 7.060 MHz in the 40-metre HF band.

RAST is actively assisting in flood relief operations and the society is accepting donations by bank transfer to its Savings Account at the Krung Thai Bank (KTB), Pradipat Branch, Account Number 034-1-86101-4.

There is a video showing activities at the special flood relief amateur radio station at Don Mueang Airport (in Thai):
http://www.youtube.com/watch?v=1m84ZW1xH8s

RAST is also posting information about developments to its web site at www.qsl.net/rast

RAST would like to thank the IARU in advance for notifying member societies of this disaster and of the emergency frequencies being used to help flood victims in Thailand at this time.

Owing to the volume of water and continuing rainfall, this emergency is likely to continue for many more days and we will notify the IARU Region 3 once things return to normal.

Sincere 73,
Tony Waltham, HS0ZDX
The Radio Amateur Society of Thailand (RAST) under the Patronage of His Majesty the King.

Just a reminder that the Iowa State ARRL Convention and 34th Annual Hamboree is this Saturday, October 22, from 8:00 AM to 2:00 PM, in Sergeant Bluff, Iowa. The 3900 Club and the Siouxland Amateur Radio Association are sponsoring this event at the Sergeant Bluff Community Center, 903 Topaz Drive.

ARRL Chief Operating Officer, Harold Kramer, WJ1B will be the featured speaker. Midwest Division Director Cliff Ahrens K0CA, and Vice Director Rod Blocksome K0DAS will attend and give updates on the latest ARRL news. Interesting forums will include:

Joe Eisenberg K0NEB - "The Dayton Experience"
Darrel Swenson K0AWB - “QRP”
ARRL Chief Operating Officer Harold Kramer WJ1B - “Inside ARRL HQ”
Midwest Division Director Cliff Ahrens K0CA and Vice Director Rod Blocksome K0DAS - “ARRL Updates - Digital QST, Spectrum Defense, and Q&A” (Door Prizes!)
Rod Blocksome - "A Suitcase DX-pedition to Christmas Island"

There will be a large flea market arena, with commercial and individual vendors, VE testing, quality forums, DXCC card checking, door prizes, and the Siouxland area’s Starcomm Mobile emergency communications bus. Details at: http://3900club.com/mycustompage0034.htm.

Hope to see you in Sergeant Bluff this Saturday!

73, Cliff K0CA

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network and EA5RM for the following DX information.

ST0R QSL AND LOTW STATUS. Antonio, EA5RM, informs OPDX: "As you may know,
the distribution of ST0R QSL cards has begun. The Republic of South Sudan
was recently added to the DXCC entities list, so each QSO confirmed by
our manager will be the confirmation of a new one.
Because of this, the DXCC Desk has expressed the concern that they may
be overwhelmed by thousands of applications to credit the new entity.
Consequently, we have decided to make an exception, and upload to the
LOTW all the individual donor QSOs and OQRS ones, by 1st November.

ST0R TEAM"

http://www.dl0lh.de/index.php?option=com_content&view=article&id
W

A few members of the "Qatar Amateur Radio Society" are joining the
upcoming WWDX SSB Contest in the M/M category from the beach. The team
of A73A includes OMs from all countries of the Gulf Cooperation Council
(GCC): Ali,A71BX, Rashid,A71AD, Abdulla,A71CV, Saif,A71AM, Suli,7Z1SJ,
Khalid,A71CO, Mohammad,A71EL, Faisal,9K2RR, Hamad,9K2HN, Ibrahim,A61ZX,
Farid,A41MX, Don,N1DG, Dave,K5GN, and Tobias,DH1TW.
Their camp in fieldday style will start one week before the contest.
No operation will take place on 30m, 17m and 12m. QSL via EA7FTR.

BA, CHINA, AS-139
David,BA4DW, is activating Chinese IOTA islands for 13 years now.
He will be QRV as BA4DW/7 from his 16th IOTA group: Weizhou Island
in the Guangxi Autonomous Region group (IOTA AS-139) from Oct 21-24.
David is working with a TS-50 and dipoles. QSL via homecall.

C2, NAURU, OC-031
Joe,LA5UF, has been spotted as C21UF and is working from Nauru (OC-031)
mainly in CW and PSK31 from Oct 17-24. QSL via homecall.

C5, GAMBIA
A few members of the OM0C Contest Team are planning two DXpeditions to
Gambia using callsigns from former DXpeditions (C50C and C5A) from
Oct 21 till Nov 1 and from Nov 20-29. C5A will join both CQWW contests.
OPs: Rich,OK8WW/OM2TW, Jiri,OK1RI, Joe,OM5AW, Dan,OK1DIG, Vlada,OK1NY,
Norbert,OM6NM, Petr,OK1FFU, Jiri,OK1DO, Jan,OM2IB, and others.
QSLs via OM2FY. See also: http://www.om0c.com

D2, ANGOLA
Valery,UA0QV, has renewed his D2QV license and is working in CW, SSB
and RTTY on 40m/20m/17m/15m/12m/10m from Vila Catoca until Jul 8, 2012.
His equipment includes an ICOM 756 PRO 2, 40m dipole and a 2 ele Quad
for the other bands. If possible he wants to put up an antenna for 80m
as well. QSL via UT0EA, LoTW.

F, FRANCE
The Radio Club Havrais (F8KHN) will activate the special call TM2TJV
during the "Transat Jacques Vabre", a yacht race that follows the
historic coffee trading route between Le Havre (France) and
Puerto Limon (Costa Rica) from Oct 24-30.

F5IL, F5IRC, F5THW, F5UBH and F5UPO will use the special callsign
TM5HT in CW, SSB, RTTY and PSK31 on 80m-10m from Houat Island (EU-048)
from Oct 28-30. QSL via F5THW.

FP, ST PIERRE ET MIQUELON, NA-032
Eric,FP/KV1J, and Jack,FP/KV1E, will show up from Miquelon Island
(NA-032, DIFO FP-002, WLOTA 1417) between Oct 25 and Nov 1. They will
work mainly in SSB and RTTY and less in CW and PSK31 on 160-10m plus 6m
if the band opens. FP/KV1J will join the WWDX SSB Contest as SOAB HP.

QSLs via homecall, LoTW. More information can be found online at:
http://www.kv1j.com/fp/october11.html

HB0, LIECHTENSTEIN
Mek,HB0/SP7VC, will be QRV from Liechtenstein in SSB on 160m-10m incl.
WARC bands and maybe also on 6m from Oct 25-31. He is using an IC-746,
HEX beam, R7 vertical, Inverted-L for 160m and 80m, 3 ele yagi for 6m,
Alpha 76A and an amplifier for 6m. He plans to join the WWDX SSB.
QSL via homecall, LoTW.

HR, HONDURAS
Rick,HR9/AI5P, wants to work holiday style from Roatan Island (NA-057)
between Oct 22 and Nov 5. QSL via homecall, also via bureau.

KH2, GUAM, OC-027
Masanori,JA1OZK, will sign KH2KY von Guam (OC-027) on all HF bands
from Oct 22-29. QSL via homecall.

LU, ARGENTINA
The special event station L90AA is celebrating the 90th anniversary of
the Radio Club Argentino (RCA) from Oct 21-31. The RCA is one of the
oldest amateur radio clubs in the world and was a founding member of
the IARU in 1925. Congratulations! QSL via LU4AA.

PJ4, BONAIRE, SA-006
Members of the South East Europe Contest Club (SEECC) are going to
visit Bonaire (SA-006, WLOTA L 1279) for the WWDX SSB Contest from
Oct 25 until Nov 1. The OPs Romeo,S52RU, Dale,N3BNA, Maurizio,IV3ZXQ,
Marko,YT2T, Zvonko,Z35W, Fabrizio,IW3SQY, Acim,YU1YV, and Noah,K2NG,
are working in CW, SSB and RTTY on 160m/80m/40m/20m/15m/10m/6m.
Their QSL manager is YU1YV. More details and updates can be found at:
http://www.seecc.org/PJ4_EXPEDITION/index.html

PJ5, SINT EUSTATIUS, NA-145
Wlodek,PJ5/SP6EQZ, and Janusz,PJ5/SP6IXF, plan to become active from
St Eustatius (NA-145) in CW/SSB/RTTY on 60m-10m from Oct 19 till Nov 4.
They will have also two amp's with verticals, wires and a Spiderbeam.
QSLs via homecalls. See also: http://www.clublog.org

PJ7, SINT MAARTEN, NA-105
Jan,DJ8NK, Paul,F6EXV, Kan,JA1BK, and Rich,K2WR, will show up with two
stations (in peak hours even 3) in CW, SSB and RTTY on 80m-10m from
Sint Maarten (NA-105) between Oct 26 and Nov 9. Their main callsign
will be PJ7X (QSL via F6EXV). Other calls are PJ7J (80m, QSL via JA1BK)
and PJ7NK (digital modes, QSL via DJ8NK). They plan to take part in the
WWDX SSB Contest as well and their logs will be uploaded to the LoTW.
See also: http://www.pj7-2011.org

VK9/C, COCOS KEELING ISLANDS, OC-003
DJ7ZG and DL7AFS will be QRV as VK9CX (WFF: VKFF-577) from Oct 19 until
Nov 9. QSL via DL7AFS.

ZA, ALBANIA
Steve,HA0DU, Joe,HA0LC, Imi,HA0MK, Laci,HA0NAR, and Fatos,ZA1G, will
activate the special callsign ZA20QA in CW, SSB and RTTY on 160m-2m
from Vlore from Oct 25 until Nov 1, including the CQ WWDX SSB Contest.
Their callsign remembers the leaders of the ZA1QA teams of 1991: HA0NNN
and HA0MM. QSL via HA0NAR.

ZF, CAYMAN ISLANDS, NA-016
OE2SNL, OE2WNL and OE2ATN will show up as ZF2OE from Oct 21 till Nov 2.
QSL via OE2WNL, bureau ok!

WFF INFO
5BFF-002: Members of the Pafos Radio Clubs plan to become active as
5B4PRC/p from Lara Bay on the Akamas peninsula (Loc: KM64dw) on Oct 20
from 0500-1400 UTC. QSL via 5B4AHO (bureau/direct).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 22/23: Scandinavian YL Contest
Oct 29/30: CQ WWDX Contest, SSB
Nov 26/27: CQ WWDX Contest, CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Members of the Teide DX Group will be QRV from
the lighthouse Faro de Buenavista del Norte (ARLHS CAI-004, WLOTA 1276,
FEA D-2833) in SSB, CW and digitl modes on all HF/VHF/UHF bands on
Oct 22/23. QSL's are not necessary since each QSO will be confirmed
via bureau automatically. If you need a direct QSL send it via EA8NQ.
More information is available at: http://www.qrz.com/db/eg8fbn

AF-014, CT3, Madeira archipelago: Carsten,CT9/DL5OCR, Bertrand,CT9/DF3FS,
Uwe,CT9/DL8OBF, Tom,CT9/DL1QW, Norbert,CT9/DJ7JC, Harald,CT9/DL2SAX,
Helmut,CT9/DF7ZS, and Modesto,CT9/EC8AFM, will be QRV from the island
of Madeira (WLOTA 0053) from Oct 25-30. They will use the callsign CR3L
during the upcoming CQWW SSB Contest. QSL via DJ6QT (bureau/direct).

AS-100, 4X, Israel group: Members of the Holyland DX Group are planning to
activate Akhziv Island (WFF 4XFF-001) as 4X5A on Oct 21/22, 1200 UTC.
They want to work with two stations and verticals in SSB/CW on 40m-10m.
QSL via 4Z5LA (bureau/direct).

EU-001, SV5, Dodecanese: Martin,ON4PO, will be QRV as J45PO in SSB and some
PSK31 on the HF bands from Oct 23 until Nov 3. Nick,J45MD, will focus
on the digital modes. Together they will sign SX5P in the upcoming
CQ WWDX SSB Contest (M/M HP). QSL via ON4PO.

EU-004, EA6, Balearic Islands: Adrian,EA6/AA5UK, is spending his holidays on Ibiza (WLOTA 0958, DIE E-023, MIA MB-003) from Oct 20 until Nov 3. He wants to work "holiday style" in SSB and digital modes on 80m–10m including the WWDX SSB Contest (SOAB/LP). Adrian works with 100 watts und wire antennas. QSL via AA5UK (bureau/direct/L).

EU-114, GU/MU, Guernsey group: The team of PA6Z will be active in SSB and CW on all HF bands signing MU/PA9M (WLOTA: 0013) from Oct 23-30. Depending on the propagation they plan to work with up to seven station 24 hours a day. QSL via PA9M (bureau/direct).
Check also their website: http://www.pa6z.nl/guernsey_2011

EU-120, G/M, English Coastal Islands: Kev,M0TNX, and Martin,M3POG, are planning another DXpedition to the Hilbre Islands. They plan to show up as GB2HI on 160m-10m (SSB/CW/RTTY) from Oct 21-23 (depending on the weather and the propagation). QSL via M0OXO (bureau/direct/L).

EU-189, GM/MM, Isle of Rockall: The team of MS0INT announced that they have postponed their DXpedition to Rockall (EU-189) to 2012. The documentation archive FUNK has compiled a comprehensive documentation about Rockall - from the first plans in 1965 (with new documents not published yet) to MM0RAI/p, including an interview with Patrick,ON4HIL:
http://www.dokufunk.org/rockall

IOTA-Marathon - Funding for operations from rare IOTA groups: Calling on everybody by the IOTA manager G3KMA: "With the 50th anniversary IOTA Marathon starting in January it would be great if we could get together a list of organisations who would be prepared in principle to help fund operations from the rarer IOTA groups during this two year period. Without lots of operations from this tier of IOTA groups the marathon will not achieve the success it deserves. For this purpose we have decided that "rarer IOTA groups" means groups worked by less than 33% of record-holders at the start of day 1 of the operation. Would DX funding bodies and individuals who are prepared to contribute to this two year IOTA initiative please let me know on g3kma@dsl.pipex.com The intention is that grants would be made directly by contributors to the operation involved as is current usual practice, not through the IOTA Committee. However if we get a good response, we will consider providing some additional funding from a source of funds available to the IOTA Committee."

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-10-21
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** MMMonVHF VHF-DATABASE Issue 4.00 **

Dear VHF-DATABASE-friends,

a year is over again and we will be able to spread around a new
issue of the VHF-DATABASE. From now on we decide to spread it to
every User of MMMonVHF in the download area, free of any fee!
(of course if you wants to support MMMonVHF you are welcome - in
this case please do contact Guido, DL8EBW... thank you in advance)

All necessary details you be able to find at our MMMonVHF FORUM at:
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=3

So you are welcome to implement the Base into standard spreadsheet
programs as well as into the VQLog (EA6VQ Logbook program), UCX-Log
(written by DL7UCX) and the contest programs OHTest (written by
OH6HFX) and TUCNAK (written by OK1ZIA).

Please login at your account at MMMonVHF and goto "Downloads" :
http://www.mmmonvhf.de/download.php If you are log in, here you be
able to find all "free of charge" downloads and from today on, as
well the "big MMMonVHF VHF-DATABASE" - enjoy it
The VHF-DATABASE of MMMonVHF and as well all the three different
MS-DATABASES are DAILY(!) available and refreshed from now on!

We stop distributing the DATABASE for the DXClusterï¿½s because
we have had only low requests in the past years! Sorry for that!

SOURCE: Guido, DL8EBW, on behalf of the MMMonVHF Team

** AVHFC (Araucaria VHF Contest) in 50 MHz and 144 MHz **

On the next October 22 - 23 we will have the AVHFC (Araucaria VHF Contest) in 50 MHz and 144 MHz. We hoping enjoy the same opportunities of F2 openings on 6 meters and very strong TEP on 2 meters as observed on the latest days. NP2X recently made QSOs with PY3 - PP5 - PY5 with single Yagi horizontal polarization and 100 Watts at 144 MHz. Similar for YV, FM and WP4 stations working LUs and CXs. For more informations about AVHC, check http://www.avhfc.com For South American VHF activity, visit http://www.vhfdx.org SOURCE: Flavio, PY2ZX direct to Sixitalia

---

** 7P8 QSL activities... **

Good afternoon gentlemen, I am very sorry to announce the following: We are experiencing theft of money ie $,EU & IRC' s included with the QSL cards sent for the 7P8EME expedition - I suspect that we do not get envelopes with QSL cards in when the postal people suspect that there are any money or IRC' s inside. Please seriously consider to rather sent your postage in $,or EU via Paypal to: pienaarja"at"gmail.com or send IRC's in separate mail - however it will be more cost effective to rather send via Paypal with your call sign as identification rather than paying postage for two letters.
1.Please also send me an e mail when you have sent me a QSL card for 7P8EME with the mailing date as a check log for me.
2. Please do not send any money via the postal service and please use envelopes that glue together properly and cannot be opened without destroying the seal.
3. Please do not write any call signs on the envelope.
4. Use envelopes that does not show the content when held up against a light
5. DO NOT SEND ANY DONATION MONEY IN THE POSTAL SERVICES
SOURCE: tnx to Pine, ZS6OB direct to MMMonVHF

** MMMonVHF NEWSLETTER and REPLIES **

Please remember, NOT to reply to our newsletter email address. This email address is not used for normal receiptions and postings will be handled as bounced emails and automatically be deleted. For any replies please do use our contact form...

** 3D2, FIJI (Possibly Rotuma [3D2/R]) NOT qrv **

LATEST NEWS by Seb, F8IJV, dated 2011-10-15: Sorry this activity
has been postponed, and replaced by a second activity from Senegal
as 6V7Q for 3 weeks, from october 22 to November 11. 73 Seb
Seb F8IJV/3D2JV/6V7Q direct to MMMonVHF

** ZA20, ALBANIA Activity on HF & VHF **

Operators Steve/HA0DU, Joe/HA0LC, Imi/HA0MK, Laci/HA0NAR and
Fatos/ZA1G will active using the special callsign ZA20QA from
Vlore between October 25th and November 1st. Activity is to
celebrate the 20th anniversary of the 1991 ZA1QA DXpedition
by Jani/HA0NNN and Gyozi/HA0MM. Operations will be on 160-2 meters
using CW, SSB and RTTY. They will also participate in CQWW DX
SSB Contest (October 29-30th). QSL via HA0NAR.
Source: Ohio/Penn DX Bulletin #1032

** DX Operation: Ascension Island **

ZD8, ASCENSION ISLAND (Update). Operators Al/W6HGF/ZD8F and
Tom/K7ZZ/ZD8ZZ will be active from Garden Cottage on top of Green
Mountain on Ascension Island (AF-003) between November 8-22nd. Look
for Al to focus on RTTY, while Tom will provide the CW operations.
Both operators will operate SSB at times, and there may be some 6 m
opening opportunities. QSL via their home callsigns direct only or
LoTW. It appears that there is no internet available for them on
the mountain. SOURCE: Ohio/Penn DX Bulletin #1032

** S9, SAO TOME AND PRINCIPE (Update/Delayed) **

Operators Matt/K0KKO and Ed/K0GUV will be active from Ilheu das
Rolas (AF-023), Sao Tome, using the callsigns of S92DX, S9CW and

S9SX, between March 16-23rd (not October 21-27th, as first announced). Activity will be on the HF bands and 6 meters. They plan to have two 6 meter stations on the air (50.105/SSB and 50.105.7/CW). They also plan to use EME. No other details were provided. For updates, watch:

** THE K5N GRID ACTIVATION GROUP PLANS FOR 2012 **

Hello to everyone interested in Grids and grid chasing on 6M. Below is our group's plans for the coming year. We wanted to make this announcement now in order to allow everyone to be ready for us in June. We emphasize again that things might change, but we hope that will not happen. I just got back from a physical reconnaissance of the area down there. I spent about 4 days and drove about 1800 miles--looking at and evaluating various places in the Big Bend area. It was a long trip..... Hopefully, we will be able to get to DL88 and the other location all OK. We want to "clean up" a lot of the grids down in that area. We are planning all 4 Wheel Drive vehicles, good antennas, and QRO power(only art time in DL88). Please look for us this summer in these highly sought after grids. Thanks.

THE K5N GRID ACTIVATION GROUP PLANS FOR 2012

Hello everyone interested in FFMA or Grid chasing. The K5N Grid Activation Group(aka the K5N Group) is working on our plans for 2012 After getting wiped out in 2011, we are planning again. We want to mount DXpeditions that will benefit as many stations as possible. We want to let everyone to know what grids we intend to activate and when we intend to do that. We are looking at June 19th through June 26th--that is a few days before Field Day and includes the FD weekend We are planning a DXpedition divided into two groups. These two groups will be in the field at the same time, located in different grids, using different frequencies, and different calls. Here is the basic plan. Please understand that these plans are subject to

change. Each group will consist of 4 operators, an antenna vehicle, and a support vehicle. Here is a possible timetable:
June 19 Drive to the Big Bend area
June 20 Drive to final location and begin setup.
If setup goes well, we might operate some this night.
June 21 Operate
JUne 22 Operate
June 23 Operate--Field Day(1/2 day)
June 24 Operate--Field Day(1/2 day)
June 25 Tear down and begin the drive out
June 26 Finish drive home
GROUP 1--DL88. Obviously, this is the really hard one. In a fit of stupidity, we are going to try this one again. We will be using a big 4 x 4 pickup truck with a short tower mounted on a rack. The total height of the antenna will be approximately 20ft above the ground (remember that Talley2 is about another 15ft above the surrounding terrain). The antenna will be 2 x 6M5X mounted side by side as H-pol with full AZ and EL. We will operate Es whenever we can, most probably using 100W of power. We will operate some MS at favorable times, but it is unlikely that we will run all night long. Our call in DL88 will be K5N. When EME conditions are favorable, we will operate EME with 1000W out. This is going to be difficult, because the Park will not allow a generator in DL88. That means that we will have to run QRO off batteries. We will be doing a lot of battery charging. My plan is to use one set of very large batteries for EME while we are charging another set of batteries for normal operations.
The EME operation is to help those that are located just outside the normal single hop limit, but too close for double hop. By posting our plans now, it also enables anyone that wants this extremely rare grid to get their 6M EME station in order. You know what we will have, so it will behoove you to make sure that you have enough on your end to make the trip....i.e. more goo and more aluminum.
GROUP 2--Activate a Second Location. We want to choose this Second Location to maximize the value to the FFMA community. Listed in order of preference, our choices appear to be:
A)The Grid Line DL79-DL89. I have found a possible place to set up on the DL79-DL89 grid line. There is a nice location right on the DL79-DL89 line in the Big Bend Ranch State Park.
B)DL79 only. There are several places that we can set up in DL79 All are along US67 north of Presidio, TX. NOTE: As soon as the Second Location is finalized, we will let everyone know.
Group 2 CAN have a generator, so they will be running QRO at all times. This will make things a lot easier. We may run an 8877 for 6m or one of M2's KW solid state amps. The antenna will be a 6M5X. The call used by Group 2 will be N5K. Again this year, Joey-W5KFT has consented to be our QSL Manager. Please send ALL QSL cards to him with an SASE, not to the traveling members. The traveling members will not have blank cards to send out. NO SASE to Joey means NO QSL card. We are willing to listen to "Intelligent"

suggestions concerning our plans. The K5N Group will decide what
suggestions are "Intelligent" and which ones will go to the bit
bucket. Please send any suggestions to me directly--k5qe (at)
sabinenet.com. The K5N Grid Activation Group is hoping for a great
year in 2012. Not only for ourselves, but for all the other groups
that are planning on activating the various grids around the
country. GL to us all!!! 73 de the K5N Grid Activation Group

Amateur Radio Newsline(tm) Report 1784 - October 21 2011

Amateur Radio Newsline report number 1784 with a release date of
Friday, October 21st, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham is killed in a mass murder at a beauty salon in Seal Beach, California; ham radio responds to massive flooding in Thailand; the C-E-P-T will propose a new 500 kHz band at WRC 2012 and radio helps to discover an invisible planet. Find out the details are on Amateur Radio Newsline(tm) report number 1784 coming your way right now.

(Billboard Cart Here)

**

CRIME: HAM KILLED IN SEAL BEACH CA. MASS MURDER

A Seal Beach, California, ham was the innocent victim of a mass murderer. On Wednesday, October 12th, Scott Dekraai is alleged to have opened fire in a hair styling salon where his ex-wife was a stylist. She and eight others were killed in the rampage. One of those was David Caouette, N6DAC, who was sitting in his vehicle near-by as the gunman made his escape and shot him for no apparent reason. Amateur Radio Newsline's Joe Moell K0OV has what is known so far.

--

N6DAC probably didn't know Scott Dekraii. He was simply in the wrong place at the wrong time. The unfortunate 64-year-old father of three had stopped for lunch at a Seal Beach diner and was sitting in his Land Rover in the parking lot when Dekraii came out of the hair salon and opened fire on him.

David was a ham who loved off-roading in his Land Rover with a group of fellow hams. They remember him as a mellow guy who was always ready to blaze a trail and always ready to help others. In the Orange County Register, Ed Testa KI6OJV tells the story of how David stopped to help a fellow driver whose vehicle was disabled by a snapped Rod. N6DAC spent four hours figuring how to get that new friend back on the road.

A memorial and tribute to N6DAC took place on October 17 at the diner where he died, with many of his friends in attendance.

>From Orange County, California this is Joe Moell, K0OV, for Amateur Radio Newsline.

--

The 41-year-old Dekraai was scheduled to enter a plea on October 15th to eight counts of capital felony murder and one count of attempted murder. But the arraignment was postponed until November 29th after his lawyer asked for time to assemble a legal team. Prosecutors say they will seek the death penalty for Dekraai. Meantime some local Los Angeles area news reports say that the alleged gunman may have suffered from Bi-Polar Disorder and could plead not guilty by reason of temporary insanity. (K0OV, other published news reports)

**

RADIO LAW: CEPT TO PROPOSE NEW 500 KHZ AMATEUR BAND AT WRC 2012

According to a bulletin issued by the Irish Radio Transmitting Society, a small allocation of about 15 kHz in parts of the 500 kHz band for the amateur radio service will be proposed at the next World Radiocommunications Conference to be held in 2012. This, as a proposal by the European Conference of Postal and Telecommunications Administrations, better known as the initials CRPT.

According to the Irish Radio Transmitting Society bulletin, this proposal has been made by a project team of about 50 representatives of European governments and other stakeholders in preparation for WRC12. The decision to proceed followed an invitation of the Federal Network Agency in Germany for a meeting that was held at the end of September in Mainz. The discussions there led to a compromise in the size of the amateur radio band, namely 480 kHz to 472 kHz, with a maximum effective radiated power of five watts. If approved, this allocation would be on a secondary basis to any and all current users. (Southgate)

**

RESCUE RADIO: HAMS IN THAILAND RESPOND AS FLOODS HIT THAT NATION

Hams in Thailand are now first line emergency responders. This as massive flooding rages across parts of that nation. Amateur Radio Newsline's Norm Seeley, KI7UP, has the latest:

--

The death toll from the most devastating flooding to hit Thailand in over 60 years has now risen to near 300. This, following monsoon rains that have swept across that nation since late July.

Amateur radio has been assisting with flood relief communications by helping victims in the affected areas. As we go to air, Thai hams are using the Radio Amateur Society of Thailand club station HS0AC and have also set up shop at a special flood relief centre at Bangkok's Don Mueang Airport operating as HS0AB. Take a listen:

--

Actual Thai emergency communications audio.

--

Locally, Thai hams are operating on VHF on 144.900, 144.9375 and145.000 MHz. World-wide, Thai emergency flood relief operations are on 7.063 and 7.060 MHz in the 40 meter band. If you happen to hear what sounds to be emergency communications on those two frequencies it is best to remain clear of them.

So far, nearly three million people in 26 out of the country's 77 provinces are said to have been affected by the disaster that has caused serious damage to that countrys agriculture and industries. Damage so far has been assessed at more than 20 billon baht or 6 million United States dollars. Meantime the city of Bangkok is bracing for a large amount of run-off water that is about to reach the it and which will coincide with seasonal high tides that will make it harder for the flood waters to flow out to sea. And with the volume of water and continuing rainfall, this emergency, and ham radio first response efforts are both likely to continue for days if not weeks to come.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, following this story from Scottsdale, Arizona.

--

A video showing activities at the special flood relief amateur radio station at Don Mueang Airport is on line at tinyurl.com/Thai-flood-hams. Also, United States hams are being asked to refer all inquires from local or national media to ARRL Media and Public Relations Manager Allen Pitts, W1AGP. Allen is in contact with those handling relief operations in Thailand and will have the most accurate information. His e-mail is w1agp (at) arrl (dot) org. (HS0ZDX, VK3PC, RAST, ARRL)

RESCUE RADIO: VK HAMS ASSIST IN HUNT FOR AIRCRAFT MISSING 30 YEARS

A group of amateur radio operators from Sydney, Australia, recently took part in a multi-agency search and rescue exercise in a remote area of New South Wales. This, to help in the continuing search for a small plane that is believed to have crashed some 30 years ago with its pilot and four passengers on board.

The single engine Cessna aircraft had the tail identification of VH-MDX. It had had taken off from Queensland for a flight to to Sydney's Bankstown airport when its pilot identified as Michael Hutchins radioed that he was experiencing severe turbulence. Also that the plane had been hit by lightning and he could no longer determine its orientation. To make matters worse, the wings were icing up and despite his best efforts, the Cessna was losing altitude. The aircraft then disappeared from radar and all communications ceased a few minutes later.

For thirty years since the accident, teams of volunteers have returned to the area to walk and climb their way through every piece of unsearched landscape in the hope that somebody will discover a piece of wreckage or spot something that helps to ends the riddle of VH-MDX. The regions that have been searched are marked off on a large map, so further unsearched areas can be checked the following year.

For the safety of the volunteer searchers, each of the six teams carried one vhf or uhf handheld radio and a portable 2-way High Frequency transceiver. Packed in a rainproof canvas box, the H-F sets included a short wire antenna that would work using skywave or N-V-I-S propagation. This, to contact any of several radio command posts set up and manned by WICEN of New South Wales. WICEN is a volunteer organization of licensed Australian amateur radio operators who donate some of their time and expertise to emergency communications to benefit the community much the same way that ARES members do here in the United States. Other groups helping with the search this year included the Bushwalkers Wilderness Rescue Squad, the New South Wales Police Rescue Squad, the New South Wales Volunteer Rescue Association and several others.

At the time of its disappearance the Cessna's four passengers were New South Wales Police Inspector Ken Price, who was traveling with Noel Wildash, Phillip Pembroke and Rhett Bosler. Search aircraft sent to the general area could find no sign of wreckage, and there was no smoke or fire to guide them. Several intensive land searches were also lunched but to date, no wreckage of the plane and the remains of its five occupants have been found. At airtime, the search is expected to resume sometime next year. (Adapted from walkietalkietwowayradios.com)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WA4B repeater serving Miami, Florida.

(5 sec pause here)

**

HAM RADIO NUMBERS: 700,000 HAMS IN THE USA

Figures released by the American Radio Relay League say that the number of United States hams now stands at a record high number of 700,000. According to ARRL V-E-C Manager Maria Somma, AB1FM, the number of Technicians peaked in March 2011 at 342,572, while September 2011 saw both Generals and Extras each peak respectively in their number of license holders.

In issuing her report Somma noted that as new Technicians earn their amateur radio licenses, and current Technician licensees move on to General and Generals upgrade to Extra, this can cause up-and-down

fluctuations for the totals. None the less, Somma says that for the first time, there are more than 700,000 radio amateurs in the United States. (ARRL)

**

RADIO SCIENCE: LOW FREQUENCY GRANT ISSUED TO K4LCD AS WF2XXQ

The FCC has issued an Experimental License grant to Juan Granados, K4LCD, to operate on 130 kHz and 500 kHz with the callsign WF2XXQ. The permit is valid until October 1, 2016 and is tied to the ongoing Very Low Frequency Amateur Radio Experiment. More is on-line at tinyurl.com/4235u7s (FCC)

**

ENFORCEMENT: ANOTHER UNLICENSED FLORIDA BROADCASTER DINGED WITH $10000 NAL

Posting information about his unlicensed station on the Internet could cost its alleged owner and operator $10,000. This after the FCC issues a Notice of Apparent Liability in that amount to one Neal Davis who the regulatory agency says operated such a transmitter from an a commercial property in the city of Ft. Lauderdale.

The case goes back to earlier this year. On January 21st, March 8th and March 10th agents from the FCC's Enforcement Bureau's Miami Office T-hunted the source of radio transmissions on 96.1 MHz to a location in Fort Lauderdale, Florida. While monitoring the station on March 10th, agents heard a male voice identify himself as "Shawty Pimp." On the same date, the Fort Lauderdale Police Department executed a search warrant at the commercial property and found Mr. Davis operating what it described as Disc Jockey equipment.

After the location was secured, agents from the Miami Office inspected the premises and found an unlicensed radio transmitter displaying 96.10 MHz. They also observed a Facebook page for "Nintysixonefm Realsideradio" on a laptop and an envelope addressed to Neal Davis near the equipment.

An agent from the Miami Office subsequently found information on the Internet advertising 96.1 FM, including a phone number that the FCC office previously heard broadcast on 96.1 MHz and information for a Disk Jockey that goes by "Djshawtypimp." Mr. Davis was identified by the agents as D J "Shawty Pimp" by comparing a photograph found on-line to that on Davis's Florida driver's license.

On October 17th, the FCC issued the $10,000 NAL to Neal Davis based on the information and documentation that it discovered during its investigation. Davis was given the customary 30 days to pay the proposed fine or to file an appeal. (FCC)

ENFORCEMENT: FCC ORDERS DETROIT FM TRANSLATOR OFF THE AIR

The FCC has ordered Radio Power, Inc. to take translator W284BQ in Detroit off the air. This due to unresolved interference to co-channel WIOT(FM), in Toledo, Ohio.

WIOT licensee Citicasters identified nearly 30 complaints from listeners within the station's protected contour describing difficulties in receiving the station in their cars and homes. In July, the FCC gave Radio Power 30 days to resolve all the interference complaints or suspend operation. Radio Power did try to resolve the interference, including modifying the antenna to suppress radiation to the south.

Nevada-based Radio Power, Inc. offered those listeners a smartphone with an iHeartRadio application installed, enabling the listeners to receive WIOT programming over the Internet. However the phones require a paid data plan to run iHeartRadio which WIOT considered to make this an unworkable solution and did not solve the interference.

For its part Radio Power disagreed. It argued that the use of a smartphone improves the reception of WIOT and eliminates the interference.

But it was the FCC that had the final word. In its order released on October 17th, the regulatory agency said that providing a smartphone to complaining listeners does not solve over the air interference. Also that Radio Power's attempted remedy does not fulfill its obligation to suspend operations until the interference has been eliminated.

The FCC's order to take W284BQ off the air is effective immediately. More is on-line at tinyurl.com/translator-interference-fcc. (RW, FCC)

RADIO SAFETY: LARGE FINE PROPOSED IN INDIANA TOWER ACCIDENT

The Occupational Safety and Health Administration has proposed a $91,500 fine for tower company ERI. This for alleged safety violations in connection with two tower related fatalities.

As Indiana's Lafayette Journal and Courier reported, two men fell some 340 feet and died in April while helping to build a 500-foot tower for the WASK Radio Group. Now, in its initial findings, the Occupational Safety and Health Administration says the men were exposed to fall hazards while riding the pole connected to the jump line of the gin pole. A gin pole is a vertical assembly used in the construction of towers to assist in raising and lowering such a structure.

The Occupational Safety and Health Administration also claims the two workers were not provided with adequate fall protection when accessing the man-basket and that load limits were not properly marked on some of the crew's equipment.

In reply, ERI President Tom Silliman said that some of OSHA's initial findings were incorrect and claims that the report is being revised. He added he could not comment until final determinations have been made.

According to the initial findings, the proposed fines can be appealed. (B&C)

WORLDBEAT: US TESTS TO BE HELD IN COSTA RICA OCTOBER 28

An ARRL Volunteer Examination Coordinator exam team will be holding an examination session in Costa Rica for United States amateur radio licenses. The tests will be administered on Friday, October 28th at 9:00 a.m. local time in the city of La Guacima, Alajuela.

The fee for the exam is $14, which is the same as on U.S. soil. It entitles the applicant to take exams and receive credit for as many test elements as he or she can pass that day. This includes those elements required for higher grades of license.

This may be the last opportunity to take a United States exam this year anywhere in Central America. Those interested should contact Carlos Diez, TI5KD, via e-mail to ti5kd10 (at) gmail (dot) com as soon as possible to make arrangements and to reserve a seat. (Via e-mail)

**

WORLDBEAT: AMATEUR RADIO FEATURED AT IAC2011

Amateur Radio was featured in several papers presented at the 62nd International Astronautical Congress held in Cape Town South Africa. This, for the first time since the formation of the International Astronautical Federation way back in 1951.

Several papers highlighted Amateur Radio involvement in satellites and in the search for extraterrestrial intelligence. A paper by Dr. Jakobus van Zyl and Johann Lochner, ZE6CBC, both engineers at SunSpace, covered a global geographical survey of received signal's strength in the VHF band.

Another report was on the data collected by the South African SumbandilaSat that had provided useful information for selecting future ground station locations for minimum interference. The study also gives an indication of frequencies to use for command and telemetry communication at existing ground stations. (SARL)

NAMES IN THE NEWS: NR6AV NAMED 2011 DISTRICT COMMUNICATIONS OFFICER OF THE YEAR

Some names in the news. First our congratulations to Ray Avesian, NR6AV, who has been named as the 2011 District Communications Officer of the Year at the Los Angeles County Disaster Communications Service Semi-Annual Meeting. In selecting him for the honor it was noted that

Avesian has worked diligently to bring the Disaster Communications Service program at Temple Station District 5 closer, and using his experience as a successful coach, to build a team of dedicated amateur radio operators.

The Temple Station Disaster Communications Service District 5 serves a very large portion of Southern California's San Gabriel Valley. This includes the communities of Temple City, Rosemead, Bradbury, Duarte, South El Monte, and the unincorporated areas of Monrovia, Arcadia, South San Gabriel, East Pasadena.

The Meeting honoring NR6AV was held at the Los Angeles County Sheriff's Department Sherman Block Headquarters Building in Monterey Park, California. (KE6VRL)

WITH NEWSLINE: FACEBOOK AND YAHOOGROUPS - WE ARE THERE FOR YOU

And while we do not talk about it much on these newscasts, as we go to air this week the Amateur Radio Page on Facebook has garnered some 717 friends. And we just want to pause for a moment to thank James Pastorfield, KB7TBT, of Lavonia, Georgia, who stepped up just after we created the page and offered to maintain us for us.

Like everyone else in our Amateur Radio Newsline family, James is a volunteer. In this case one of those very special people that makes it possible for us to have an active presence on one very special aspect of social networking on the World-Wide-Web.

If you are on Facebook but are not a follower of the Amateur Radio Newsline page, we invite you to join us. Just use the search bar on Facebook to locate us and join in. We would love to have you with us over there.

Also, for those wanting home computer delivery of the text version of these weekly newscasts, we invite you once again to join the Amateur Radio Newsline group on Yahoogroups. You can also use the site to find archived scripts going all the way back to the year 2001. Just use the standard Yahoogroups sign up procedure to obtain a yahoogroups account then locate and join the group called ARNewsline.

Either way, we hope to continue to serve you in cyberspace as well as on the air. (ARNewsline(tm))

CHANGING OF THE GUARD: TELECOMMUNICATIONS LEADER ROBERT GALVIN OF MOTOROLA - SK

One of the greatest leaders in the world of telecommunications has left the scene. This with the passing of Robert Galvin, the man generally credited as putting the name Motorola on the map. Chris Boone, WB5ITT, has the story of this industry giant who affected lives world-wide:

--

Robert W. Galvin, who took the reins of Motorola from his father and built a family-run business that pioneered Depression era car radios and wartime walkie-talkies into a global maker of color television sets, cellphones and other ubiquities of the electronic age has died.

>From his days as a stockroom apprentice in 1940 to the midlife pressures of the executive suite and his retirement-in-name-only as chairman in 1990, Mr. Galvin spent his working life with Motorola, leaving it only for military service in World War II. By the time he stepped down, he had transformed the company from a moderately successful postwar enterprise into a high-tech international giant in a fast-changing, highly competitive business.

In the three decades after Mr. Galvin took control in the late 1950s, annual sales leaped to $10.8 billion from $290 million. Motorola, based in Schaumburg, Ill., built factories, hired thousands of workers, expanded its products and set high standards for innovation.

Galvin was the force behind a company that forged trends in radio, television and integrated circuits for computers and other products.

Robert William Galvin was born in Marshfield, Wis., on Oct. 9, 1922, the only child of Paul and Lillian Guinan Galvin. He grew up in Chicago, where his father and uncle had founded the Galvin Manufacturing Corporation in 1928. The company had begun by making battery eliminators. Devices to plug radios into electrical systems in homes and cars. Radios were originally battery-operated. By 1940, Galvin Manufacturing had evolved into America's premier maker of car radios and two-way radios, called Handie-Talkies which became a Motorola trademark. After World War 2 broke out they became walkie-talkies, and the Army bought $10 million worth. Galvin also prospered in government contracts for radar systems.

In 1947, the company changed its name to Motorola, a fusion of motor and Victrola. It also set up a profit-sharing plan for employees - one of the first in the country to do so. During the Korean War, Motorola made mobile radio equipment and began to develop microwave-relay communications systems.

Mr. Galvin became president in 1956 and took over day-to-day operations from his father, who was chairman and chief executive until his death

in 1959. Robert succeeded him in both posts, and in the 1960s embarked on new paths: guided missile designs, space communications, radios for ships and aircraft, components and integrated circuits for TV sets, car ignitions and hundreds of other products. Motorola produced the first hand-held mobile phone in 1973 and later dominated the cellphone hardware business.

Mr. Galvin gave up Motorola's chairmanship in 1990, but continued for more than a decade to serve on its board and advise his son, Christopher, who succeeded him in 1997.

At airtime, it was not known weather Robert Galvin had been an amateur radio operator. According to both the QRZ and FCC databases, there was no issued amateur radio license for Robert W. Galvin who was truly one of the pioneers of two-way and telecommunications products throughout the world.

Reporting from sunny but dry South-East Texas in Beaumont, I'm Chris Boone, WB5ITT, for the Amateur Radio Newsline.

--

As an aside, it should be noted that reporter Chris Boone, WB5ITT, is also the oldest Newsline bulletin station in Texas and also moderates the largest remail list dedicated to commercial Land Mobile Radio on the Internet. LMR at Yahoogroups.com ..normal subscribing commands for yahoogroups apply or they can find the list at groups.yahoo.com/group/LMR. (WB5ITT, other published news reports)

WORLDBEAT: YAHOOGROUP FORMED TO DISCUSS THE RSGB'S FUTURE

Concern over the Radio Society of Great Britain's accountability and the way it's been conducting itself recently appears to have prompted a new discussion group on Yahoo Groups from White Rose Radio. On its opening page the group says that the site is open to all radio amateurs and interested parties in relation to the RSGB proposals on its proposed reorganization of its governing body.

The White Rose Radio group claims that its purpose is to maintain the RSGB as a democratic, accountable membership organization. It also suggests that the RSGB is in reality a business whose singular purpose is to defend and protect the privileges enjoyed by radio amateurs within the UK.

Recently, the RSGB announced plans to hold what it called an Extraordinary Membership Meeting to discuss and vote on changes that would effectively remove most of its current Board of Directors and replace them with experts in various fields of corporate governance. At the same time its looking at various methods to enter a period of what might be best termed as fiscal economic measures to help it weather the current world economic climate.

You can follow the discussion on line by joining the new discussion group at groups.yahoo.com/group/whiteroseradiouk. (Southgate)

HAM RADIO IN SPACE: UOSAT 1 LIFE CELEBRATED

Surrey Satellite Technology Limited has celebrated the 30th anniversary of the orbiting of Surrey's first satellite, UOSAT-1. Launched into orbit on October 6th 1981, UOSAT-1 was designed and built by a team from the University of Surrey led by its founder Sir Martin Sweeting, G3YJO.

UOSAT-1 was also known as UOSAT-OSCAR 9. It was a scientific and educational Low-Earth Orbit satellite containing many experiments and beacons but no amateur transponders. The satellite remained fully operational until it re-entered October 13, 1989 from a decaying orbit after nine years of service on-orbit. (ANS)

ON THE AIR: CELEBRATING THE XIV PAN AMERICAN GAMES

Members of Mexico's Club de Radio Experimentadores de Occidente in conjunction with the Federaci&#65533;n Mexicana de Radio Experimentadores will activate special event station 4C1JPG between now and October 30th. This operation is to the 2011 and XVI Pan American Games in Guadalajara. Activity will be on 160 through 6 meters using CW, SSB, RTTY, PSK and the Satellites. QSL via Logbook of the World, by the bureau or direct to XE1GZU. (Via e-mail)

**

DX

In DX, listen out for a team of German and Polish operators to be signing 3XY1D from Guinea between October 18th and November 1st. Operation will be on 160 through 6 meters using CW, SSB and the Digital modes. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or via the bureau.

F5HRY will be active stroke FY from French Guiana during the CQ World Wide DX SSB Contest on October 29th and the 30th . This, as a Single Operator Single Band 10 meter only entry. QSL as directed on the air.

LA5UF will be on the air from Nauru as C21UF through October 24th and Easter Island as CE0Y/LA5UF between November 3rd and the 11th. Activity from both locations will be on CW and PSK31. QSL only via his home callsign.

Lastly, F6BLP will be active from Senegal as 6W7SK between January 20th and February 3rd, 2012. His operation will be holiday style operating mainly CW. Logs will be uploaded to Logbook of the World and to eQSL. Send your QSL to F6BLP, direct or via the bureau.

(Above from various DX news sources)

THAT FINAL ITEM: NASA KEPLER SPACE PROBE DISCOVERS INVISIBLE PLANET

An invisible planet, which has not yet been seen by eye has been discovered by scientists using NASA's Kepler spacecraft. The discovery was possible thanks to a companion of the unseen planet. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

According to astronomers, the planet named Kepler-19c really cannot be seen, but it makes itself known by the way it influences other planets through its gravitational force.

The invisible planet has tugged at its partner the visible Kepler-19b planet, slowing it down and then speeding it up in its transition.

The Kepler space probe locates planets by looking for a star that dims slightly as a planet transits the star, passing across the star's face from the space probes point of view. Transits give one crucial piece of information regarding the planet's physical size. The greater the dip in light, the larger the planet relative to its star. However, the planet and star must line up exactly for Kepler to see a transit.

The visible Kepler-19b has a diameter of 18,000 miles, making it slightly more than twice the size of Earth. It reportedly transits its star every 9 days and 7 hours. It orbits the star at a distance of 8.4 million miles, where it is heated to a temperature of about 900 degrees Fahrenheit.

The invisible planet named Kepler-19c has multiple personalities that are consistent with the data found according to Daniel Fabrycky of the University of California at Santa Cruz. Fabrycky says that it could be a rocky planet on a circular 5 day orbit, or a gas-giant planet on an oblong 100 day orbit.

Currently the astronomers know very little about the new planets. The Kepler spacecraft will continue to monitor and radio information back to Earth regarding the twin Kepler-19's throughout its mission. This in hope of gathering more information about the invisible Kepler-19c.

For the Amateur Radio Newsline, I'm Bill Pasaternak, WA6ITF, quite visible in the Newsroom in the City of Angels.

--

It should be noted that years ago astronomers discovered the planet Neptune in the same way. While tracking Uranus they noticed that its orbit didn't match predictions. That led to the later proven theory that a more distant planet might be nudging Uranus and calculated its expected location. (IB Times, Space.com)

GB2RS NEWS

Sunday 23rd October 2011

The news headlines:

* New web discussion board on RSGB's future

* Amateurs provide Thai emergency communications

* RSGB Intruder Watch activity on 28MHz

The November RadCom is now in the post and should be with UK members by Monday 24 October. This edition contains details of the proposals to be discussed at the Extraordinary General Meeting on 19 November at the NEC in Birmingham. Members are encouraged to read the proposals carefully. The Society has opened a web-based discussion group to encourage debate and questions about the Board's proposals. This facility can be accessed at www.rsgb.org/EGM. The Board encourages all RSGB members to vote on the proposals, either in person at the EGM, via the internet, or by post. Full details of how to vote are on page 14 of the November RadCom.

Amateurs in Thailand are providing essential communication links during that country's devastating floods. The Radio Amateur Society of Thailand club station HS0AC has been very busy, as has HS0AB at a special flood relief centre at Don Mueang airport in Bangkok. Thai amateurs are using 7.060 to 7.063MHz, plus local working on the 2m band.

Following the improvement in propagation on 28MHz, it appears that there are many illegal users of this band using low power FM channelised rigs to operate taxi services. Signals mainly seem to come from the western part of Russia. Following discussions with the Ofcom monitoring station at Baldock, information regarding these intrusions is being gathered by RSGB Intruder Watch. The information will be used to support a complaint to the Russian authorities in an attempt to clear this nuisance from what should be an exclusive amateur band.

Due to Tony Horton, G0LKG stepping down as 2E series QSL manager after 12 years, there is now a vacancy for a replacement. The 2E series is one of the top three QSL groups, with about 40,000 cards per year. This volunteer position is ideal for someone with time available and who is keen to make a difference. If you're interested, up for a challenge and want to help, contact the QSL Bureau by email to qsl@rsgb.org.uk.

A number of Portuguese repeaters are believed to be off the air due to funding issues. There is speculation that they may be amateur radio's first direct casualties of the economic downturn. The keepers are reportedly trying to develop sponsorship relationships to generate funding, but it is not currently possible to predict when the devices will be back on the air.

The international Telecommunications Union has announced that the world's newest country, South Sudan, has joined the ITU. It became the Union's 193rd member state earlier this month. South Sudan has only been independent since 9 July 2011, but joining the ITU demonstrates the country's commitment to adhere to the International Radio Regulations. Pioneering British satellite Prospero was launched from Australia on 28 October 1971. It remains in orbit, and a team from the Mullard Space Science Laboratory are planning to re-establish contact, in time for its 40th birthday this Friday, 28 October. Transmissions from the satellite were still being heard in 2006, but it is not known whether the 137.560MHz transmitter is still functional. More details can be found online at www.tinyurl.com/gb2rs-prospero.

The Society is receiving reports of a new wave of very plausible-sounding emails that try to obtain money by deception. The emails appear to be from a fellow amateur, often someone known to you. The usual pattern is to claim that the person has been mugged while on holiday abroad, has lost everything, and needs a sum of money in order to settle their hotel bill and pay for a new flight home. The amount requested is usually quite specific, for example 2650 euros. If you do receive an email of this type, it is recommended you make careful checks on its truthfulness before parting with any money. It is often the case that the alleged mugging victim is safe and well at home, but that their email system has been hijacked by the fraudsters &#65533; so check by telephone, not email.

AMSAT South Africa has issued the first call for papers for the 2012 Space Symposium to be held in Durban next May 12th at the University of KwaZulu-Natal. If you would like to present a paper, please send a brief synopsis to reach SA AMSAT by no later than 31 January 2012. The theme will be 50 years of OSCAR, celebrating the launch of the first amateur radio satellite on 12 December 1961.

Professor Jean-Marie P Wersinger, KI4YAU is asking for help in tracking the forthcoming amateur radio satellite AubieSat-1. The satellite is due to be launched from Vandenberg Air Force Base on Tuesday 25 October, and will transmit around 800mW on 437.475MHz. The beacon signal is sent as 20 words per minute CW, along with telemetry at up to 60wpm. It is likely to be active from around 1221UTC, at which time the satellite is expected to be over the South Atlantic, but no further orbit information has currently been released.

And now for the details of rallies and events for the coming week

Today, Sunday 23 October, the Galashiels and District ARS radio rally takes place at The Volunteer Hall, St Johns Street, Galashiels,

Scottish Borders TD1 3JX. Admission is £2.50 and the main opening time is 11.30. There is a Bring and Buy, trade stands, catering and a prize draw. Details from Jim, GM7LUN on 01896 850 245 or mail@gm7lun.co.uk.

Also today, the Callington Amateur Radio Society Rally is at Callington Community College, Launceston Road, Callington, Cornwall PL17 7DR. Opening at 10am, admission is £2 and attractions include trade stands, a Bring & Buy, catering and a prize draw. Contact John, G4PBN, 01822 835 834, or email lumley85- cars@yahoo.co.uk.

On 29 and 30 October the North Wales Rally is at John Bright School. Llandudno LL301LF from 10am. There will be trade stands, a Bring and Buy, catering and disabled facilities. Contact John, G4PBN, on 01822 835 834. Sunday 30 October sees the Holsworthy Amateur Rally at Holsworthy Community College, Victoria Hill, Holsworthy EX22 6JD. Details from Roger Williams, on 07773 983 691.

Now for the news of special events

The White River Light Station in Whitehall, Michigan will be on the air as W8L on Sunday 23 October. The event is sponsored by the Muskegon Area Amateur Radio Council and the station will be operating on 40 to 10m, SSB and CW.

On Sunday 23 October Leiston Amateur Radio Club will be operating GB2LSM on HF from the Long Shop Museum in Leiston, Suffolk.

And now the HF DX news compiled from 425 DX News and other sources

The third annual North American Summits On The Air activation takes place next weekend, 22 and 23 October. Typical operating frequencies are 7.040, 7.032, 10.116, 14.060, 14.062, 14.282, 14.285 and 14.342MHz.

G3RWF will be active as 5X1NH from Uganda for three weeks, starting on 23 November. He will concentrate on the low bands. QSL via his home callsign.

DK7PE will be active as TL0CW from the Central African Republic from 26 October to 3 November. QSL via his home call.

OS1T will be active as PJ4J on Bonaire Island from 27 October to 9 November 2011. The focus will be on RTTY, SSB and the WARC bands, but other bands may also be used depending on the propagation.

4X/N6HD will be operating from Israel until 3 November. He will be on 160 to 10m using CW and SSB. QSL via his home callsign or Logbook of the World.

JK1KSB will be on the air as 8Q7SO from Mirihi Island Resort in the Maldives between 28 October and 3 November. Activity will be holiday style on 80 to 10m using CW, RTTY, SSB and PSK31. QSL via JK1KSB, either via the bureau or to the address on QRZ.com.

Now the contest news

On 25 October the 50MHz and SHF UKAC contests take place from 1900UTC until 2130UTC. Operating on 6m and 13cm to 3cm respectively, the exchange is RST, serial number and locator.

Thursday 27 October sees the 80m Club Sprint from 1900UTC until 2030UTC. Operating on 3.5MHz SSB, the exchange is serial number and name. Next weekend, 29 & 30 October, it's the CQWW DX SSB contest, running from 0000UTC until 2359UTC. Use SSB on all contest bands from 3.5-28MHz and exchange RST plus Zone, which is 14 for the UK.

And now the solar factual data for the period from the 10th to the 16th of October, compiled by Neil Clarke, G0CAS, on the 17th of October

There was no shortage of sunspot groups this week with up to ten visible on most days. Several regions produced occasional C class solar flares but one group that increased in size and magnetic complexity every day produced numerous C class flares every day later in the period. No M or X class solar flares took place. Solar flux levels increased from 126 units on the 10th to 151 by the 16th. The average was 136 units. The 90 day solar flux average on the 16th was 118, that's four units up on last week. X-ray flux levels increased from B3 units to B8.6 by the 16th. The average was B4.9 units. Geomagnetic activity was quiet with the Ap index in single figures every day. The most disturbed day was the 15th with an Ap index of 8 units. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second to 490 by the 15th. Particle densities were very low, with only one particle per cubic centimetre on the 12th. Even for the rest of the period densities remained in single figures. Bz never varied more than minus 9 and plus 8 nanoTeslas during the period. The combination of the increase in solar flux levels, low geomagnetic activity and seasonal improvement made for good propagation across the HF range, right up to 28MHz, where all continents and the T32C DXpedition were workable.

And now the solar forecast. This week the more active side of the Sun is expected to be looking our way. Solar activity should be low every day, there is a good chance that activity could increase on some days. Solar flux levels are expected to be in the 120's for most of the week. Geomagnetic activity should start at quiet levels but by next weekend a small coronal hole disturbance could increase activity slightly. MUFs during daylight hours at equal latitudes should be around 30MHz, or slightly higher particularly in the south. Darkness hour lows are expected to be about 11MHz. One of the largest HF contests of the year takes place next weekend, that's the CQ SSB worldwide contest. HF propagation is looking good with openings to all continents on all the higher bands including 28MHz. Hopefully, the coronal hole disturbance will have little effect but maybe the Sunday will be the better of the two days.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 25 October Bromsgrove & District Amateur Radio Club is making plans for the shack. Contact Chris, M0BQE on 01905 776 869.

On Monday 25 October Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

SARL NEWS - SUNDAY 23 OCTOBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

AN ADVANCED LICENSE - JOIN THE DEBATE NEXT SUNDAY

SPECTRUM REGULATOR WHEELS SEEM SLOW EVERYWHERE

NOMINATIONS FOR THE SARL COUNCIL ARE INVITED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

AN ADVANCED LICENSE - JOIN THE DEBATE NEXT SUNDAY

According to SARL Forum watchers there has been a heavy debate on the general forum around the proposal to investigate the possibility of an advanced amateur radio license.

The debate started after the SARL posted the audio recording made at the recent Radio Technology in Action symposium held at the National Amateur Radio Centre. In forum postings there are various views, some positive, some indifferent and some totally against. There are also postings making incorrect assumptions such as that the merging of the ZR and ZS licenses had degraded the ZS license.

The reason for ICASA's decision to do away with the ZR license has been explained on several SARL News Bulletins and was the subject of a discussion at this year's annual general meeting. The overriding reason for ICASA's decision was to comply with the CEPT agreement which had been suspended because, since the discontinuation of Morse as a requirement by the ITU for an amateur radio license in the ITU radio regulation, CEPT also changed the condition which then made the ZS license unacceptable due to the Morse requirement for the ZS license.

When South Africa had both the ZR and ZS, under the modified CEPT regulation a ZR license holder would thus qualify for operating in CEPT countries but a ZS license holder would not.

Both the ZR and ZS call sign ranges will remain and both are class A licenses with identical privileges and both are fully CEPT compliant.

You are invited to join the on-the-air debate on Sunday 30 October starting at 19:30.

An Edited version (irrelevant discussion outside the subject removed) of the debate is available on the web from the SARL TODAY news item on the home pages.

Clubs are invited to link their local repeater to the teleconference bridge. Send requests to artoday@sarl.org.za before 28 October.

SPECTRUM REGULATOR WHEELS SEEM SLOW EVERYWHERE

It seems that one thing that spectrum regulators have in common is that their wheels move slowly, often very slowly. At the recent ARRL Executive meeting the ARRL Legal adviser told the meeting that more than three years have passed since the US Court of Appeals for the District of Columbia Circuit found that the FCC violated the Administrative Procedure Act when it adopted rules governing broadband over power line (PLT in South Africa) systems. General Counsel Imlay told the EC that the FCC is "long overdue" in releasing a Report and Order to correct the deficiencies in its BPL regulations. According to Imlay, a draft Report and Order is reportedly circulating among the Commissioners, but is not expected to be adopted soon. Imlay also pointed out that FCC is also lax in bringing enforcement action against operating BPL systems that have been shown to be operating in violation of the existing rules. Members of the EC agreed that it is time to request another round of meetings with the FCC Commissioners or their senior staff to press these issues.

The situation is very similar in South Africa where several issues pertaining to PLT and the radio regulations remain unresolved. This week SARL has asked ICASA for an update of when the correction to the regulations affecting amateur radio will be published in the Government Gazette.

NOMINATIONS FOR THE SARL COUNCIL ARE INVITED

This is the first notice for nomination for Councillors for the SARL. Although nominations close on 31 January 2012, it is advisable to make nominations before the onset of the festive season. SARL members in good standing may nominate a member for Council. The nomination must be seconded by another member and include a brief summary of the nominee's amateur radio CV and the acceptance by the nominee that he or she, if elected, is prepared to serve on the SARL Council. It will also be helpful if, in consultation with the nominee, it can be indicated in which capacity the nominee would like to make a contribution to the

SARL and Amateur Radio for example treasurer, secretary, HF, contest or VHF manager to mention a few positions.

Motions for the SARL's 2012 AGM should also be submitted before 31 January 2012.

144 MHz ACROSS THE ATLANTIC OCEAN

A number of Brazilian VHF amateurs have shown great interest in working amateurs on the west coast of South Africa, especially around Cape Town, during Tropo Ducting on 144 MHz. They are: PU1BRA! Werther, PY2ANE Orlando, PY2CAC, Wagner, PY2ZX, Flavio and PY5LF, Luciano. PY1ZV is running a test beacon on 144,070 MHz CW with a horizontally polarized Yagi aimed across the Atlantic Ocean. Naz, ZS1NAZ, has kindly offered to run a Trans-Atlantic CW beacon from his QTH on a frequency of 144,435 MHz radiating 2 500 Watt ERP, and beaming to the east coast of Brazil.

The current 144 MHz two-way world record on Tropo Ducting stands at 4 754 km set up across the Pacific, while 144 MHz signals have been heard in Europe up to 6 600 km on the Ros mode. Contacts have been logged between the east coast of South Africa and Reunion Island on both 144 MHz and 432 MHz, all mode. All this indicate that at least digital or CW contacts on 144 MHz could be possible across the Atlantic Ocean during favourable Hepburn Tropospheric Ducting Forecasts.

Hopefully this will inspire some keen VHF amateurs in the Cape Town area to take up the challenge, and buy or build high gain Yagis for this project. Radio history will be made when a new world record is established on 144 MHz over this sea path of 6 000 km.

SANAE BASE

Gerard de Jong, ZS6KX, is now active from Antarctica as ZS7KX. He is stationed at SANAE 4 Base, Vesleskarvet, Queen Maude Land, Antarctica. He can be heard on 14,175 MHz from 14:00 UTC, weather permitting. He will give a call every half hour until 15:30 UTC. Gerard will be at SANAE 4 until February 2012.

CLUB NEWS

Dates for the ZS6PTA Flea markets for 2012, which will start 08:00 CAT and which be held at the Pretoria Motor Club site in Silverton Pretoria, are as follows: 1) 3 March 2012 2) 2 June 2012 3) 1 September 2012 4) 8 December 2012

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity is picking up nicely with many sunspots facing the Earth. Sunspot 1 319 has a beta-gamma magnetic field that harbours energy for M-class flares.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 94.

All the bands from 20 to 10 m will provide lots of fun with DX opportunities at varies times of the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

30 October - Intechnet on proposed advanced license. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air. 4/6 November - AMSAT NA Space Symposium in San Jose California. 13 November - Pears HF Competition 12:00 till 16:00 UTC. 19/20 November - SARL Field day competition. 20 November - CW leg of 80 m Club competition. 27 November - Digital competition. 30 November - last day to send logs for Pears HF DX-expedition. 31 January 2012 - Last day for submission of nominations vir Council members and also for submission of motions for the 2012 SALL agm. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, Z6SBWN.

Thank you for listening, 73.

Mark suffers from a severe gender identity crisis.
One day he is "straight", the next day he is bisexual, and the next day he can't decide.
Our synopsis? ANY guy who has sex with another male is a homosexual. A faggot.
A Queer. A cocksucker.
And Gav? Mark has "outed" her as being equally as messed up as he is.
One day she is a Jew, another day she is a self-proclaimed Witch, and the day after that she is outside having conversations with rocks. She is, according to Mark, also a fellow bisexual...who'da ever guessed?

This pair of dysfunctional clowns belong together. What is it about the dregs of society traveling in the same circles?
Obviously, losers find fellow losers...

Debby says…as I have been away in Rarotonga for the past 8 days and am not officially due back to work until the 25th October, this issue of Info-line will be brief. My apologies if I have missed anything urgent that needs to be included in this issue, however I have only briefly scanned the 12 pages of e-mails that I have come back to.

Just a note from FMTAG…there are still a number of branches who have yet to submit their Repeater Trustee details to Doug ZL2TAR for inclusion and update of the next Call Book. Please forward to Doug urgently if your branch has not already done so. These branches are as follows:

03 Western Suburbs, 08 Eastern Southland, 22 Marlborough, 26 Nelson, 27 New Plymouth
30 Otago, 33 Rotorua, 35 South Otago, 48 Wanganui, 49 Westland, 56 Christchurch West
66 Auckland VHF, 67 Kawerau, 69 Kapiti, 85 Mercury Bay, 86 Suburban, 87 South Taranaki
88 Tauranga Emergency, REG Radio Electronics.

Talk soon…Debby ZL2DL

News from around the world

Thailand Floods QST, to all Radio Amateurs 15 October 2011

World-wide HF operators are kindly requested to QSY away from 7.060-7.063 at all times due to use by Thailand hams during the massive flood emergency affecting millions of people in North and Central Thailand.

Today, the emergency is on-going with huge areas flooded of from a half to two meters of water, some areas are deeper and a few spotty areas are mostly dry in the region. News estimates say that the flooding will continue for four to six more days, at its height, and subsidence will be over a month. Clean-up and rebuilding may extend more than a year.

The majority of flood radio traffic is being carried on the two meter band by scores of ham volunteers, some of which have had their own homes inundated. It is impossible to estimate how many ham radio operators' shacks are now affected, but the significant flooding covers huge swaths of the region as seen on
http://www.neighborhoodlink.com/Rural_Training_Center-Thailand/pages.

The Thai National Club Station, HS0AC, home of the Radio Amateur Society of Thailand, is threatened tomorrow and is under watch. Timely updates can be seen at http://www.qsl.net/rast in English.
Reported by HS0ZCW, Charly

>From NZART Intruder Watch Officer

With the high Solar activity - more and more intruders are becoming prevalent: We definitely need your support to identify and report intruders.

Audio samples assist along with bearings if possible.

If we do not act in a coordinated manner, we could see our bands being taken over by many intruders.
Complacency is not an option.
ZL1GWE

FMTAG NOTES FOR HQ INFOLINE – OCTOBER 23rd 2011

PROPOSALS

The Manawatu ARC, Branch 20, has applied for a 4575 APRS Digipeater at Mataroa, located at TOPO50 BK35 346016, with a transmit and receive frequency of 144.575 MHz.

ZL3BCC has applied for a simplex VOIP station at Innes Road, Christchurch, located at TOPO50 BX24 709.79 838.37. The transmit and receive frequency will be 432.700 MHz, in accordance with the bandplan. An engineering investigation, in accordance with MED PIB38, confirms that there will be no interference to other stations.

FINAL RECOMMENDATIONS TO COUNCIL.

None at this time.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1033
BID: $OPDX.1033
October 24, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, K1XM, NC1L, NJ1Q & ARRL DX, KA2AEV, K3IRV, KD3CQ, N3SL, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, K6JAT, KH6BZF, W6NV, AC7DX, K8GI, K8YSE, KU8E, W8GEX (60m News), N9GL, N0JK, AT International, DL1SBF, DL1ZU, DK8JB & The DX News Letter, DxCoffee.com, DX-World.Net, EA5RM, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3ZVW, I1HYW, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VE3DZ and VK4FW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th-October, through Sunday, 23rd-October there were 234 countries active. Countries available: 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/m, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T33, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9C, VP2E, VP2M, VP2V, VP8, VP9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2R, ROTUMA. The Rotuma High School Amateur Radio Station, 3D2RI, was heard active again this past week on 20/15 meters SSB. Their QSL Manager

Stan, KH6CG, reports on QRZ.com (under 3D2RI): "Dennis, who is 16 years old, reports that his operating group will be active on Tuesdays and Thursdays. His operating buddy will be a YL named Maggie. I spoke with Maggie today and she is a very well spoken young lady and is anxious to learn all about Ham radio and working DX. Joshua, who is 15 years old, will be active with his operating group on Wednesdays and Fridays. His operating partner will be a YL named Lesina. The school may allow operations on the weekends as well..... Look for 3D2RI starting around 0400z ON 15m SSB, on or near 21255 kHz until propagation fades, then they will QSY to 20m SSB on 14253 kHz (+/- QRM) until around 0600z when it is time for the students to head home. Hopefully they will be able to expand hours and add other bands and modes." Read more details and see some pictures on QRZ.com.

3XY, GUINEA. The 3XY1D team is now active until November 1st. Activity will be on 160-6 meters using CW, SSB and the Digital modes. As of 0738z, October 23rd, the 3XY1D operation has made 16984/QSOs (3316/SSB, 13443/CW, 77/PSK and 148/RTTY). Online logs are available at:
http://www.dl7df.com/3xy1d/index.html
QSL via DL7DF, direct or by the Bureau.

4L, GEORGIA. Operator Gia, 4L4WW, will be active as 4L0A from Obcha (Western Georgia) during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (40m)/High-Power entry. QSL via LoTW or via EA7FTR. He states, "PLEASE do not send QSL cards direct to him".

60M ACTIVITIES. The "60m DX Newsletter" reports that the following were recently on 60 meters: 3D2R, 9K2YM, A92IO, CU3AK, G0HNW, I2VRN, KH7HBK, LA9RY, OM1II, OZ1BCG, V47JA, VP9GE and YJ0VK. What to look for in the coming weeks: PJ7/K4UWH, PJ7/W4BUW and ZK2V.

6V, SENEGAL. Just a reminder that Seb, F8IJV, will once again be active as 6V7Q from Le Calao resort in Senegal between October 22nd and November 11th. Activity will be on 160-6 meters, operating mainly on SSB, possibly some Digital and CW too. He plans to take an Acom 1011 amplifier with him this time. Seb will also be active during the CQWW DX SSB Contest (October 29-30th). QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW.

6O, SOMALIA. Darko, J28AA/E70A, will be active as 6O0DX from Somalia between November 21-30th. He usually operates on CW, SSB and RTTY, and on 80-10 meters. QSL via K2PF or E77E.

6Y, JAMAICA. Paul, K1XM, will be active as 6Y9X from Jamaica (NA-097, WLOTA 0214) and plans to be in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry (possibly Assisted too, if there is a reliable InterNet connection). He will be there between October 25-30st. Activity outside the contest will be mostly CW, depending on what antenna repairs are needed and how long they take to fix. QSL via KQ1F.

8Q, MALDIVES. Members of the Russian "Ural Contest Group" (UCG) will be active as 8Q7DV during both the CQWW DX Contests (CW and SSB) as follows:

* Operator Vadim, R9DX, will operate the CQWW DX SSB Contest (October 29-30th) as a Single-Op entry. Activity outside of the contest will be on 160-6 meters using a Elecraft K3, Acom 2000 and vertical antennas.
* Operators Vadim/R9DX, Igor/UA9CDC, Vitaly/RN4WA, Igor/RA9CMO and Sergei/UA9CGA will operate during the CQWW DX CW Contest (November 26-27th) as a Multi-Op entry.
Activity outside of both contests will be mainly on 160/80 meters. However, they also plan to be active on 30/17/12/6 meters bands. QSL both operations via R9DX (ex-UA9CLB). Take a look at their previous operations at: http://radio-8q7dv.narod.ru

9H, MALTA. John, ZB2JK, will be active as 9H3JK from Malta (EU-023) between now and October 25th. His bands and modes of activity were not provided, but he will be active mainly portable using a YAESU FT-857 and an ATAS 120 (Automatic Tuning Antenna) into a mobile antenna. QSL via ZB2JK direct.

9V, SINGAPORE. Martin, F8UKP, a F6KOP member, will be working in Singapore (AS-019) for the next three years and will be active as 9V1RM. Activity will be limited to his spare time only. Operations will be on 40-10 meters using CW, SSB and PSK. Currently he is using a skyloop antenna using the maximum legal power in 9V-land (100 watts). He has the permission to set up a hexbeam antenna in the near future. QSL via LoTW or direct to the address on QRZ.com. There is a possibility to QSL by the Bureau in the future (Information will be given in due time).

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Moto/W1NDE, Danilo/AH0BM, Hajime/AH0BR, Naoyuki/NA8O, Makoto/W3FO and Hiroyuki/KW2X will be active as AH0BT during the CQWW DX SSB Contest (October 29-30th) as a Multi-2 entry. The team will try to be active on 160/17/12 meters after the contest (November 1-2nd). QSL via 7L1FPU, by the Bureau or direct (w/SAE and 2 USDs) to: Kuniyoshi NAKADA, PMR9292, 3-23-3, Minami-Oi, Shinagawa-ku, Tokyo, 140-0013, JAPAN.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, Ohta/JO1DFG, Miyazawa/JP7DKQ and Sato/JH7QXJ. QSL via JH7QXJ. ADDED NOTE: They suggest to listen to 7075-7100 kHz. QSL via JH7QXJ.

B3, CHINA. Members of the TianJin Contest Club (BY3CQ) and Ben/DL8UI will be active as B3C during the CQWW DX SSB Contest (October 29-30th). QSL via BA4EG.

C37, ANDORRA. An international team (and members of "Tifariti Gang") will take part in the CQWW DX SSB Contest (October 29-30th) as C37N from the URA official station located at Naturlandia, the Thematic Pyrenee mountains Ecologic Park. Operators mentioned are: Antonio/EA5RM (Team Leader), Joan/C31US, Salvador/C31CT, Belisario/C31KC, Josep/C31JM, Michel/C31MO, Marti/C31VM, Juan/EA1CJ, Carlos/EA1DVY, Alberto/EA1SA, Roberto/EA2RY, Manuel/EA7AJR, Vincent/F4BKV, Flo/F5CWU, Fabrizio/IN3ZNR, Jun/JH4RHF, Valery/RG8K, Dimitri/UY7CW/EA4CWW and Mike/UA9KGH. QSL C37N via

EA4URE: Spanish Amateur Radio Uni&#65533;n, P.O.Box: 220, E-28080 Madrid, Spain.
For more details and an online log, see: http://www.dxfriends.com/c37n

C5, THE GAMBIA. By the time you read this, the Czech-Slovak team (with 12 operators) should be active as C50C until November 1st, and again between November 20-28th. Their main aim is to participate in both parts of the CQWW DX Contests (SSB and CW) under the callsign C5A. QSL via Brani, OM2FY. The complete details can be found at: http://www.om0c.com

C6, BAHAMAS. Members of "Team Vertical" will be active as C6AAW from North Palmetto Point, Eleuthera, Bahamas, during the CQWW DX CW Contest (November 26-27th) as a Multi-Multi entry. QSL via WA4WTG. Operators mentioned are Gene/KB7Q, Fredrick/KE7X, Walter/N6XG, Jeffrey/N6XR, Mike/WA6O and Ken/K2KW. Operators will be there between November 18-28th. They will use their personal C6A callsigns outside of the contest. QSL via the operator's instructions.

DXCC NEWS (Special "paper application offer" procedure for ST0R QSLs -- please read carefully). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "The cards for the 2011 ST0R operation from the new DXCC entity of South Sudan are now being received by DXers around the world. With next year's publishing deadline for 2011 results fast approaching on 31 December, 2011, we will offer a special, reduced-price option for those DXCC participants who have already made at least one application during 2011.
* You MUST have already made a submission in the 2011 calendar year via either LoTW or via a traditional, paper application. If you have made an application already in 2011, then you may submit a paper ST0R QSL (no other cards, just the ST0R South Sudan card) following these rules:

* Enclose 5.00 USDs (check, money order, CC#, or cash at your risk) for USA amateurs;
* Enclose 6.00 USDs (check, money order, CC#, or cash at your risk) for non-USA amateurs;
* Enclose an SASE for the return of the ST0R card;
* This special submission is ONLY for the ST0R card;
* If ANY other card(s) are included this will be considered a full submission subject to full fees, even if you already submitted in 2011;
* These submission conditions apply ONLY if you have already made a submission in 2011; and
* This offer DOES NOT apply if you have not yet made your 2011 submission. All DXCC fees are in effect as you can include this card with your regular submission;

* This special offer expires on December 31, 2011, and is NOT extended into 2012."

EI8, IRELAND. Olivier, ON4EI, will be active as EI8GQB from Fethard between October 24-31st. Activity will be on 160-10 meters. He plans to be in the CQWW DX SSB Contest (October 29-30th) as a SO2R (Single-Op/2-Radio) entry, using 5 portable antennas (check out QRZ.com). QSL

via ON4EI by the Bureau.

EY, TAJIKISTAN (Update). Nodir, EY8MM, from Dushanbe, announced that he will also be active during the CQWW DX CW Contest (November 26-27th), as well as the CQWW DX SSB Contest (October 29-30th), as a Single-Op/ Single-Band (TBD) entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at: http://www.ey8mm.com

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013) during the CQWW DX SSB Contest (October 29-30th) as Multi-Single entry. QSL via LoTW, or direct to GJ3DVC.

IOTA NEWS.............
AS-191. Operators Abdul/7Z1CQ, Al/7Z1AQ, Suli/7Z1SJ, Ali/HZ1BT, Abdul/ HZ1BW, Abdul/HZ1DG, Daher/HZ1DS, Hani/HZ1HN, Mohamad/HZ1MD, Ali/HZ1TT, Nhaw/HZ1TL and HZ2TT will be active as 7Z7AA from Jabal Al Lith, Saudi Arabia, between November 17-25th. Details of activity were not provided, but watch the IOTA frequencies. This is a rare IOTA. QSL via 7Z1CQ.

EU-058. If you worked F/I2GPT this past Saturday, activity was from Sainte Marguerite Island for a one day operation. The operators were Vittorio/I2GPT, Roberto/IK2PGM, Antonello/IT9YVO, Paolo/ IW2HKW, Giorgio/IZ2BKP, Mauro/IZ2FLX and Marco/IZ2QCP. The group planned to have two stations on the air between 0700-1600z. QSL via I2GPT, direct or by the Bureau (request by E-mail to i2gpt.@iyahoo.com).

SA-040. Paco, EA7ATX, will be active as HK1/EA7ATX from Tierrabomba Island (WLOTA 0296, ARLHS COL-052), Colombia, between November 17-20th. Activity will be on 80-10 meters SSB only. Paco has a survey available (for band needs) on the following Web page at: http://sa040.blogspot.com
QSL via his home callsign. An online log will be available via his Web page or from <http://www.clublog.org/>.

SA-088. A team of operators are being organized by Fabio, PP5BZ, to activate Santana de Fora Island during early February 2012. Activity will be on 40-10 meters using CW, SSB and possibly RTTY. More details are forthcoming.

J2, DJIBOUTI. Freddy, F5IRO, who has been active as J28RO since July 2010, is planning to be active in the upcoming CQWW DX SSB Contest (October 29-30th) as a Single-Op entry. He is expected to stay here until July 2012. His normal activity will be on the HF bands using CW, SSB and the Digital modes. His QSL Manager is F8DFP. QSL direct (w/SAE + valid IRC • PLEASE NO MONEY AT ALL), or by the French REF-Union Bureau. The direct cards without the above mentioned will be answered by the Bureau. For updates and more info, visit his Blog at: http://j28ro.blogspot.com

LX, LUXEMBOURG. Philippe/LX2A will be active as LX7I during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

OH0, ALAND ISLAND. Operator Tomi, OH6EI, will once again be active as OH0Z during the CQWW DX CW Contest (November 26-27th) as a Single-Op/ All-Band/High-Power entry. QSL via W0MM.

PJ'S ACTIVE, LISTEN CAREFULLY. There are a few PJs stations that will be in the contest next weekend with callsign very similar (PJ2T, PJ4T and PJ6T). PLEASE LISTEN CAREFULLY WHEN LOGGING YOUR QSO.

PJ4, BONAIRE (Contest Station Available). Jeff, KU8E, member of the PJ4A Team, announced that there is a new Web site up and running for the "Radio House" on Bonaire (SA-006, WLOTA L 1279). There are many "prime" contest weekends open for the rest of this year and in 2012. Currently, there are 3 world records that have been set from this location. Check it out at: http://www.pj4g.com
Look for PJ4T in CQWW DX SSB Contest (October 29-30th), and in a couple of weeks later PJ4A in the CQWW DX CW Contest (November 26-27th).

PJ4, BONAIRE. Members of "Team Tango" will be active as PJ4T from Bonaire (SA-006, WLOTA L 1279) during the CQWW SSB DX Contest (October 29-30th). The team will be lead by Dale, N3BNA. The other Team Tango operators include Luc/LU1FAM, Roberto/LU2FA, Diego/LU8ADX, Katsuhiro/JH5GHM/1 and Noah/K2NG. Some of the operators will be active before and after the contest between October 24th and November 2nd. QSL PJ4T via KA2AEV direct only. QSL PJ4/N3BNA via KA2AEV. QSL via PJ4/LU1FAM via LU2FE. All others listen for QSL instructions.

PJ5, SABA AND ST. EUSTATIUS (Update). Operators Wlodek/SP6EQZ and Janusz/ SP6IXF will once again be active as PJ5/SP6EQZ (CW only) and PJ5/SP6IXF (SSB and RTTY); from St. Eustatius (NA-145) between October 20th and November 3rd. They will be active exactly from the same QTH (Grid Loc. FK87ML) as last time. Activity will be on all HF bands, 160-10 meters

using CW, SSB and RTTY, running two high power stations using wire antennas, verticals and a Spiderbeam. Also, look for Janusz to participate in the CQWW DX SSB Contest (October 29-30th) as PJ5/SO6X. QSL via their home callsigns, direct or by the Bureau. Logs will be uploaded to <http://www.clublog.org/> during the DXpedition. The DXpedition's Web site is now available at: http://pj5-2011.dxing.pl

PJ6, SABA ISLAND. Members of the Prairie DX Group will be active as PJ6T from Saba Island (NA-145) between October 26th and November 1st. Activity will be on 160-10 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. They will have 2 stations operating simultaneously. The group will also be an entry in the upcoming CQWW DX SSB Contest (October 29-30th). Operators mentioned are Greg/N9GL, Todd/W9YK, Rick/KF4ZZ, Kay/KB9QYM, Gehl/KB9DVC and Bruce/K5WBM. QSL via LoTW or N9PD direct.

PJ7, SINT MAARTEN (Update to OPDX.998/Reminder). Operators Jan/DJ8NK, Paul/F6EXV, Kan/JA1BK and Rich/K2WR will be active from Sint Maarten (NA-105) between October 26th and November 9th. Callsigns to be used are PJ7J, PJ7NK and PJ7X. Look for PJ7X to be active during the upcoming CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. Outside of the contest, look for PJ7J to be on 80/75 meters, PJ7NK on the Digital modes, and PJ7X on other bands and modes. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. Suggested frequencies are:
CW - 3512, 7015, 10105, 14028, 18073, 21028, 24895 and 28028 kHz
SSB - 3793, 7092, 14192, 18135, 21292, 24935 and 28492 kHz
PSK - 3588, 7038, 10138, 14078, 18098, 21078, 24918 and 28078 kHz
RTTY - 3582, 7042, 10142, 14088, 18102, 21088, 24922 and 28088 kHz

QSL PJ7J via JA1BK, PJ7NK via DJ8NK, PJ8X via F6EXV. For more details, check the following Web pages at: http://www.pj7-2011.org
http://www.f6exv.org

NOT THE QSL MANAGER FOR 3D2EG. Lilah, KE6EHD, has been receiving several direct QSL requests for a RTTY operation by 3D2EG during the contest on September 25, 2011. However, KE6EHD is NOT the QSL Manager for that or any other DX operation. The correct QSL route is via K3IRV, direct or by the Bureau. The operator was PY5EG, one of the members of the 3D2R team.

ST0R QSL AND LOTW STATUS. Antonio, EA5RM, informs OPDX: "As you may know, the distribution of ST0R QSL cards has begun. The Republic of South Sudan was recently added to the DXCC entities list, so each QSO confirmed by our manager will be the confirmation of a new one. Because of this, the DXCC Desk has expressed the concern that they may be overwhelmed by thousands of applications to credit the new entity. Consequently, we have decided to make an exception, and upload to the LOTW all the individual donor QSOs and OQRS ones, by 1st November. ST0R TEAM"

U.S. POSTAGE TO INCREASE. It was announced this past week that the price of the first-class stamp will go to 45 cents starting on January 22nd, 2012 (the first increase in more than two years). The cost to mail a postcard will go up three cents to 32 cents, letters to Canada or Mexico will increase five cents to 85 cents, and letters to other international locations will increase seven cents to 1.05 USDs. Reason given for the increase: "The Postal Service is facing a financial crisis because mail volumes have declined as more people use electronic mail or the services of private sector competitors such as FedEx and United Parcel Service. For more info, go to:

http://about.usps.com/news/national-releases/2011/pr11_factsht_pricechng_1018.pdf

VP9/N0JK QSL STATUS. Jon, N0JK, reports to OPDX, "I have just received new QSL card stock and have answered all QSL requests received for the July 2011 VP9/N0JK 6 meter activity. We moved several times during the summer and my permanent address for QSL requests now is: Jon Jones, 5212 Eisenhower Place, Lawrence, KS 66049.

QSL RECEIVED VIA LoTW: 5V7CC, 9H1SP, BD4CQ, BD4FM, BX5AA, EA1DR, EA5AR, EA9IE, FG5FR, HB9LCW, HI3A, J39BS, JN1GTG, JW5X, K7P, KH6MB, LN3Z, LU5FZ, MM0AMW, NL7G, OH1XT, OK6DJ, PJ4LS, PY1KN, R0/KE5JA, RA0FU, RA1QD, RD3BZ, RI1ANC, SM4OTI, SV9/GM3YOR, UA3AP, UT7UJ, VK6HD, VK7ZE, YN2GA, YO3JF, YO9HP and Z21BB

QSLS RECEIVED VIA MAIL: 8P9AA, 9H5BZ, 9A2N, A61ZX, C91KHN, CN8QY/p, CU2AF, DU1GM, HI8SAR, HL3ERJ, HS0ZCW, KL7RRC, MD0CCE, MD9Y, RI1ANC, ST0R, ST2AR, SV1CQN, VP2MNK, YL2BJ, ZK2A and ZK2AB

SILENT KEY. It has been reported that Dudley, Z22JE, became a Silent Key (SK) on October 10th. Dudley was Vice President of the Zimbabwe

Amateur Radio Society (ZARS). OPDX and its reader would like to send out our deepest sympathy to the family and friends of Z22JE.

T2, TUVALU (T2T Press Press). Bill, VK4FW, sent out the following press release on October 21st: "The Online QSL Request Service (OQRS) for the 3D2T and T2T is set up for people to use, BUT it is extremely important for everyone to refrain from using it before I return home on the 11th December 2011, so that the mailbox does not become full and E-mails start bouncing. The URL for the online OQRS is <www.vk4fw.com/oqrs.php>. The online log for T2T is also set up and ready to go. There will be no online log available at this stage for 3D2T."

T32, CHRISTMAS ISLAND. With only a few days to go, the Five Star DXers Association (FSDXA) group continues to be very active as T32C from Kiritimati (Christmas Island) until October 26th. As of 0712z, October 23rd, the T32C operation has made 203360/QSOs with 47422 Unique Callsigns (83670/SSB, 98479/CW, 686/PSK, 18805/RTTY and 1713/FM). Logs will be uploaded to ClubLog <www.clublog.org/charts/?c&#65533;2C&a&#65533;bed> on a daily basis, and any news posted will be on the T32C website. For more details/ updates, visit their Web page at: http://www.t32c.com
ADDED NOTES:
* LEADERBOARD SCORING AT T32C: Michael/G7VJR and Marios/5B4WN from the "Club Log" web page <http://www.clublog.org> report the following:
"During the T32C expedition, a large number of stations have succeeded in working the maximum number of slots possible, or share the same number of slots as a large number of other stations. Using the 'first past the post' scoring system, those who worked these slots first are ranked highest. Duplicates count negatively.
This scoring system has been manipulated by a small number of stations operating illegally. They have determined that by using someone else's callsign and working T32C, they can create duplicates and force that callsign down the leaderboard.
Ranking changes -- In response to this problem, the scoring system for the T32C is changing to a ranking that does not penalize duplicate QSOs. This removes the loophole that is being exploited. This change will be made live on 19th October, with the agreement of the T32C expedition team, to improve the fairness of the scoring."

* OCTOBER 21ST WEB PAGE RELEASE: "The QSO count is currently at 188.75k with 49% CW, 41% SSB and 9% RTTY. As you might guess we are working hard to exceed 200k.
During the day (local time) we are running a 6m beacon on 50.102 MHz. If you hear the beacon please put a note on the cluster and we will break the beacon and try for QSOs. So far we have had 99 six meter QSOs, mainly with the West Coast USA and Hawaii. The beacon has been heard in Japan and South America. We have also completed a number of 6m EME QSOs.
With just a few days to go to the end of the DXpedition, we are beginning to plan the station close down. There will be a phased shut down beginning at 1600z on Monday 24th October, with the last station closing by 0100z on Tuesday 25th. We will keep the 'high rate' stations running as long as possible.

If you look at the on line log and QSOs that were previously in there appear to be missing, don't despair, query the log a little later, they will be there." UPDATED NOTE: The T32C operation has surpassed the 200k QSOs mark as of press time making the Christmas Island, Eastern Kiribati, DXpedition the highest total for a DXpedition previously held by the VP6DX DXpedition.

T4, CUBA. Operators Luis/CO6LP, Orelvis/CO6LC, Yordany/CM6YAC, Jose/CO6EC, Carlos/CO6CAC and Edor/CO7PH will be active as T46A during the CQWW DX SSB Contest (October 29-30th) as a Multi-?e entry. QSL via CO6LC.

T6, AFGHANISTAN (Update). Les, WB8LES, who is active as T6LB from FOB (Forward Operation Base) Shank, Loghar Province, states that he monitors 14315 kHz every day from 1230-1430z. Les will be posting updates on QRZ.com. He is expected to be there until November 7th. QSL via WB8LES.

TK, CORSICA. Sal, IK8UND, will be active as TK5KP during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power/(possibly Assisted mode) entry. QSL via TK5EP. He states that he will be active prior to the contest on CW and RTTY.

TL, CENTRAL AFRICAN REPUBLIC. Remember to look for Rudi, DK7PE, to be active as TL0CW from Bangui, CAR, on a "one-man DXpedition" between October 26th and November 3rd. He states that CAR is not a real tourist place and the accommodations are very expensive (see details on QRZ.com). Activity will have an emphasis on 160/80 meters CW. QSL via DK7PE. For more details and updates, visit Rudi's Web page at: http://www.rooody.de

TN, CONGO. It has been announced that an operation from Camp Brazzaville in the Congo will take place sometime in 2012. No other details were provided at this time. Look for more details to be forthcoming soon.

TU, IVORY COAST. Just a reminder that an Italian team consisting of Alfeo/I1HJT, Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/ IK2DIA, Stefano/IK2HKT and Angelo/IK2RZP will be active as TU2T from the Ivory Coast this week between October 27th and November 11th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1823, 3505, 7005, 10106, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945 and 28495 kHz
RTTY - 10140, 14080, 18104, 21080, 24902 and 2808 kHz
6m - 50105 kHz - CW, SSB and Beacon
Pilot station will be Art, IK7JWY. QSL via I2YSB, direct (2 USDs Europe, 3 USDs outside Europe and SAE [NO IRCs and stamps) or via the OQRS. QSL via the Bureau to IK2CIO. For more details and an online log, visit the TU2T Web page at: http://www.i2ysb.com/joomla5
Also, join the TU2T forum at:
http://www.hamradioweb.org/forums/forumdisplay.php?fb

TX5, MARQUESAS ISLANDS (Update). The international team of operators are now active as TX7M from Hatiheu, Nuku Hiva (OC-027) until November 1st. They plan to be active on 160-10 meters (including 30/17/12m) using CW, SSB and RTTY, with 4 stations on at the same time on different bands

and modes. As of 0410z, October 23rd, the TX7M operation has made 28439/ QSOs with 10958 Unique Callsigns (13109/SSB and 15330/CW). For more details, visit the TX7M Web page at: http://www.tx7m.com

V2, ANTIGUA (NA-100). A team of operators will once again activate the V26B super station at Gunthroppes, during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. Activity will be on all bands. Please QSL V26B direct to KA2AEV or LoTW. Visit Team Antigua's Web page at: http://www.team-antigua.com

V5, NAMIBIA. Martin, DL1ZU, will be active as V5/DL1ZU between December 21st and January 13th (2012). During his trip through the Caprivi strip, Martun will use an IC-706 with a vertical antenna and dipoles. In Windhoek, he will use a 3 element beam. QSL is "OK" via his home callsign by the Bureau.

V6, MICRONESIA. John, KH6DLK, will be working on Ulithi Atoll (OC-078) and is expected to be active as V63JB during his free time. Length of stay was not provided or plans of operations. QSL via KH6DLK (see QRZ.com). Domestic QSL must be accompanied with a SASE and International QSL must be accompanied with SAE plus IRCs or Greenbacks. No e-mail QSL, No Twitter, and No facebook please.

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. Yuri informs OPDX that he will be there between October 25th and November 2nd. Activity before and after the contest will be on CW, SSB and RTTY, and the 30/17/12 meter bands. QSL via VE3DZ, direct or by the Bureau.

VK0M, MACQUARIE ISLAND. Kevin, VK0KEV, reports this week from Macquarie Island (AN-005): "I am approaching my last weeks on Macquarie Island. In this time I would like to give as many people as possible that 'new one'. Unfortunately, there are many operators who are unaware of how to behave in a pile up and behave so badly other amateurs lose the contact opportu- nity. If you call incessantly, or call when another station or callsign is being requested you will receive a zero by zero report. Hopefully, this improves the opportunity of a contact for the polite and sometimes less strong stations. Thanks to the many skilled and polite operators who have taken the effort and time to make contact." QSL via JE1LET direct only (see QRZ.com).

VP2, MONTSERRAT. Operators Ron/N0AT (VP2MTA), Bill/W0OR (VP2MOR), Vlad/ N0STL (VP2MTL) and Tom/K3WT (VP2MWT) will be active from Montserrat (NA-103, WLOTA 1475) during the end of November and early December for the contest season. Activity will include the CQWW DX CW Contest (November 26-27th) and the ARRL 160 Meter Contest (December 2-4th) using the callsign VP2MWG. QSL voa N0AT.

W3, UNITED STATES (Haunted LH Op!). Look for Dan, KD3CQ, to activate the special event station W3H (Whiskey 3 Haunted) on October 31st, from Maryland's Lighthouses -- Point Lookout (ARLHS USA-628), listed as one

of the USA haunted lighthouses, along with Point Lookout Light (ARLHS USA-1409), and possibly Solomon's Lump (ARLHS USA-767), if visible. Point Lookout was a "Union Prisoner of War Camp" set up to hold Confederate prisoners after the "1863 Battle of Gettysburg"; the lighthouse was used as the Infirmary. Activation will start at 1300z and end at 1345z, on 7270 kHZ +/-, then 14270 kHz +/- and possibly 18150 kHz +/-. Please QSL direct only (no eQSL) to KD3CQ (QRZ.com address) w/SASE (DX SAE w/1 USD or IRC).

WAP'S TOP TEN LIST. Gianni, I1HYW, informs OPDX that the Worldwide Antarctic Program (WAP) is pleased to announce their "Top Ten List" (updated as of Oct.16th) for the "WAP's 2011 TOP of the Honor Roll" (HR) for both the WADA and WACA Antarctic Awards:

WADA (Worked Antarctic Directory Award) -- K4MZU-178 Bases, GM3ITN-124 Bases, VE7IG-122 Bases, I1HYW-121 Bases, VE3XN-120 Bases, F6ELE-115 Bases, IK1GPG-113 Bases and I2YDX-101 Bases. Top HR is achievable when reaching 100 different Antarctic/Sub-Antarctic Settlements (Bases, Huts, Camps) referenced on WAP Directory. So far, 160 WAP-WADA Awards have been issued

WACA (Worked Antarctic Callsigns Award) -- VE7IG-302 Calls, VE3XN-266 Calls, I1HYW-244 Calls, IK1GPG-234 Calls, OM3JW-230 Calls, I2YDX-210 Calls and OE3SGA-202 Calls. So far, 142 WAP-WACA Awards have been issued.

The complete list of issued awards, can be seen at the WAP Web site. The WAP-WACA Awards scores at:
http://www.waponline.it/WapAwards/WAPWACAAwardScores/tabid/71/Default.aspx
WAP WADA Awards scores at:
http://www.waponline.it/WapAwards/WAPWADAAwardScores/tabid/93/Default.aspx

Just to remind the chasers that HRs and Top HRs consist of a personalized ceramic hand crafted plate, showing the Antarctic Continent. Those plates are made at the Ceramic School of the city of Mondov-Italy. Also, let's not
forget that the next "9th Antarctic Activity Week" (AAW) takes place between February 20-26th, 2012. Join them! More details are available on the WAP Web site at: http://www.waponline.it

XV, VIETNAM. Retu, OH4MDY (OX3RZ/XU7MDY/XV2MDY), will once again be active as XV2RZ from Southeast Vietnam between November 1st and December 12th. Activity will be on 80-6 meters using the "normal modes" (CW and SSB). QSL only direct via OH4MDY with a SASE and 2 USDs. His log will be available online at: http://www.clublog.org

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) will be active as Z37M during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. Operators mentioned are: Igor/Z32ID, Dimitar/Z33DGM, Gogo/Z35GL, Ozren/Z35T, Chris/Z35X, Tone/Z36N and Venco/Z36W. QSL via Z37M, by the Bureau or info on QRZ.com.

ZA, ALBANIA. Andrey, LZ2HM, will once again be active as ZA/LZ2HM from here between October 25th and November 1st. Activity will be on 160-2 meters using all modes. He will also be in the CQWW DX SSB Contest. QSL via his home callsign direct.

ZA, ALBANIA. Members of an Albanian contest team will be active as ZA3WW during the CQWW DX SSB Contest (October 29-30th). QSL via LZ2HM.

ZD8, ASCENSION ISLAND. Steve, G3ZVW/AF6SU, will once again be active as ZD8N from Ascension Island (AF-003) between November 21st and December 2nd. He has been off the island for almost three years. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He is also expected to participate in the CQWW DX CW Contest (November 26-27th). QSL via his home callsign, by the Bureau or direct.

ZD8, ASCENSION ISLAND. Operators Jorma/OH2KI (ZD8X) and Oliver/W6NV (ZD8W) will be active from Ascension Island (AF-003) during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry using the callsign ZD8W. They expect to be active on the low bands before the contest weekend. QSL via their home callsigns.

ZK2, NIUE (Update to OPDX.1002 & OPDX.1007). By the time you read this, operators Chris/GM3WOJ and Keith/GM4YXI will have arrived in Niue (as of midday Friday (U.S. time). Chris will be active as ZK2V, and Keith has obtained the callsign ZK2X. The operation will continue for 2 months through to December 20th. They plan to participate in (CQWW) contests as well. Activity on 160 meters will occur the first several weeks of the operation. They will also focus on 12/10 meters to EU, both paths. New for this trip will be an effort to provide "real time" logging on the Internet (Last minute update: However, latest reports indicate that poor WiFi signals are very weak in the shack, so they may not be able to use their new &#65533;real-time&#65533; logging system). More details are available at <http://www.zk2v.com>. LoTW will be updated frequently, and card requests are via N3SL.

ZONE 2 (Top-Band Op). Operators Toshi/JA8BMK and Keith/VE7MID plan to activate CQ Zone 2 on 160 and 80 meters. They have arranged (through Yuri VE3DZ/VE2IM) to use the VE2CSI clubhouse on Sept-Iles which is in Zone 2 (50 Deg 12.33 Min N 66 Deg 21.85 Min W). Keith will pick up Toshi in Montreal on October 30th, and drive him to Sept-Iles (1000km) on October 31st, so they can be operational between November 1-9th. They are planning on using a full size 80m vertical, 160m L (lots of radials!) and two beverages, using Toshi's 600w amp and a new K3 (Dual RX). The callsigns will be VE2/JA8BMK and VE7MID/VE2.

MORE LICENSE COURSES AT LOUGH ERNE AMATEUR RADIO CLUB

Lough Erne Amateur Radio Club is recruiting for a Foundation course and invites all interested to the next Club meeting in the SHARE centre at 7.00 pm on Tuesday 1 November. The course itself will be over two weekends, the last in November and first in December, with examination and results on Sunday afternoon 3 December.

Recent courses and examinations produced 39 successes, 26 Foundation, 9 Intermediate and 4 Full Licence holders - and only one fail. Recently licensed members have invigorated the Club. They include the new Chairman, Tommy Mi0RVH. He did his Foundation in 2010 then Intermediate and Full in June 2011.

Lough Erne ARC is also recruiting for another Intermediate course and an Advanced examination in December or January. As usual, the newly licensed will be presented with welcome certificates at the Lough Erne Rally on Sunday 1 April 2012.

Cashota

MM0DHQ will be transmitting from Kilwinning Abbey, in Scotland as part of CASHOTA (Castles and Stately Homes on the Air) on Tuesday 1st November 2011. All details can be found at www.cashota.co.uk.

Foyle and District Amateur Radio Rally

The Foyle and District Amateur Radio Club Rally takes place November 6th 2011 at the White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA. Doors open at 12 noon. The usual traders will be present and IRTS will have a stand also on display. Further details from www.mn0aku.co.uk .

Shannon Basin Radio Club

The Shannon Basin Radio Club will be having a meeting on Friday the 28th October in Hannons Hotel, Roscommon at 20:30. All members are asked to attend and non-members are welcome. Please see www.shannonbasinradioclub.com for details.

DX News

Five operators will be active from Bhutan from 25 October until 1 November. During the CQ WW SSB Contest next weekend (29-30 October) look for A52IR on 80m, A52PC on 40m, A52PP on 20m, A25AB on 15m and A51B on 10m. Outside the contest times they will work other bands and modes.

Bill N7OU is operating from the South Cook Islands until 7 November using the callsign E51NOU. He then travels to the North Cook Islands where he will stay until 22 November. As he will be using the same callsign from both DXCC entities be careful with your logbook entries.

A group of 7 Italian amateurs will sign TU2T from the Ivory Coast from 27 October to 11 November. There has not been much activity from TU in recent times so this is a good one to look out for. Direct QSLs go via I2YSB and bureau cards go via IK2CIO.

Chris GM3WOJ will be activating ZK2V from the island of Niue in the Pacific for the next few months. He will be joined by Keith GM4YXI until the end of October and the call ZK2X will be used in the CQ WW SSB Contest.

AubieSat-1 video

Auburn University's, USA, famous battle cry, 'War Eagle', will be heard from space October 27 when it is transmitted to Earth from a student-built amateur radio satellite known as AubieSat-1 After launch, when the satellite comes over Auburn, Alabama, the team will send up a command and if all is well AubieSat-1 will reply with 'War Eagle' in Morse code. AubieSat-1 is designed to transmit with a power of about 800 milliwatts on a frequency of 437.475 MHz, plus or minus Doppler correction [+/- 9 kHz]. The beacon signal, along with telemetry, will be sent using A1A continuous wave Morse code at 20 words per minute. Additional telemetry from the onboard science experiment will use CW transmissions up to 60 WPM.

AMSAT to celebrate 50 years in space at symposium

The AMSAT-NA 2011 Space Symposium will be held on Friday, November 4-6 in San Jose, California. This year's Symposium coincides with the celebration of the 50th anniversary of OSCAR 1, the first Amateur Radio satellite.

Radio Club Argentino - 90th anniversary

The Radio Club Argentino (RCA), will be active as L90AA starting October 21st through to the end of the month. Activity is to celebrate the 90th anniversary of the RCA founded in 1921. The RCA is one of the oldest amateur radio associations in the world, and was also one of the founders of the IARU in 1925. Look for operations to be on all bands using CW, SSB and the Digital modes. QSL via LU4AA, direct or by the Bureau.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1017. [RAC-Bulletin] SPECIAL EVENT STATION VA3AAR: 150th BIRTH ANNIVERSARY of DR. JAMES NAISMITH, ALMONTE NATIVE, INVENTOR of BASKETBALL

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-25 19:32:49 UTC
From: rac-bulletins@eton.ca
Message-ID: <4EA70D2B.5030604@rac.ca>
Source record: 4057
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.info

SPECIAL EVENT STATION VA3AAR: 150th BIRTH ANNIVERSARY of DR. JAMES NAISMITH, ALMONTE NATIVE, INVENTOR of BASKETBALL
Sponsored by the Almonte Amateur Radio Club Inc. with the Dr. James Naismith Basketball Foundation and the Mississippi Valley Conservation Authority

>Date: Sunday, November 6, 2011, 24 hour operation 0000-2359 UTC (8:00 p.m. Eastern November 5 to 8:00 p.m. Eastern November 6)

Place: Mill of Kintail, Almonte, Ontario, Canada, Latitude 45.244339 N, Longitude 76.258062 W, FN 15vf, ITU 4, CQ 4

Description: Special Event: VA3AAR celebrating the 150th anniversary of the birth of Dr. James Naismith, Almonte native, to honour the inventor of basketball at the Mill of Kintail near his birthplace. Frequencies: 20 m 14150 kHz +/- 5 kHz, 40 m 7250 kHz +/- 5 kHz, 80 m near 3755 kHz. (Frequencies subject to adjustment if already in use by other stations).

Special Commemorative QSL: For our public display in the new year, please QSL direct to VE3NCE, P.O. Box 1644, Almonte, Ontario, K0A 1A0, Canada.

For more information regarding VHF and D-STAR contact channels go to: AARC Inc. website <www.almontearclub.ca>. Email contact Rob Webb VE3UIX, AARC Inc. President, <ve3uix@almontearclub.ca>.

For more information about the event, read the article in Almonte's on-line newspaper The Millstone News:
http://www.millstonenews.com/2011/10/radio-had-not-yet-been-developed-when-james-naismith-almonte-native-invented-the-sport-of-basketball-in-1891-nobody-then-c.html#tp

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
17 - 23 October 2011

Solar activity was low to moderate. Early in the period, solar activity was at low levels with a majority of the C-class activity from Regions 1319 (N=10, L=051, class/area Eki/420 on 17 October) and 1324 (N11, L=305, class/area Ekc/360 on 20 October). Low level C-class activity was observed until early on 20 October when an M1 x-ray event occurred at 20/0325Z from an area on the west limb. This event most likely originated from Region 1318 (N20, L=096, class/area Dso/50 on 13 October). M-class activity continued during 21 and 22 October with an M1 x-ray event at 21/1300Z from Region 1319 and a M1/Sf long duration flare at 22/1110Z from Region 1314 (N25, L=058, class/area Cho/370 on 12 October). The 21 October M-flare had associated Type II (789 km/s) and Type IV radio sweeps, but no Earth-directed CME was detected. The 22 October M-flare had an associated CME with a mostly northward directed component with an approximate plane-of-sky speed of 600 km/s measured in STEREO A COR2. LASCO C2 and C3 imagery observed a partial halo CME with a maximum plane-of-sky speed of 1000 km/s in its northernmost edge. A large filament eruption was also observed in SDO/AIA imagery in the Northwest quadrant of the solar disk starting at 22/0058Z. An associated CME was observed with a slight Earth-directed component with an approximate speed of 500 km/s. Activity returned to low levels on the last day of the period.

The greater than 100 MeV proton flux at geosynchronous orbit remained below threshold levels the entire period. A greater than 10 MeV proton event began at 23/1500Z in response to the M1/Sf long-duration flare observed midday on 22 October. The event peaked at 13pfu at 23/1535Z and ended at 23/1605Z.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal levels the entire period.

The geomagnetic field was mostly quiet during the summary period. On the last day of the summary period, a weak shock passage was observed in the ACE solar wind data at 23/2320Z, but the geomagnetic field remained quiet. A glancing blow from a CME associated with an M1 x-ray event observed near the NW limb at 20/0325Z was the suspected source of the shock.

Forecast of Solar and Geomagnetic Activity
26 October - 21 November 2011

Solar activity is expected to be at predominantly low levels during the forecast period. There will be a slight chance for M-class activity during 26 October - 03 November. M-class activity increases from a slight chance to a chance during 04 - 17 November, with a slight chance for X-class activity from 04 - 17 November, due to the return of old active Regions 1314 (N29, L=056) and 1319 (N12, L=052).

No proton events are expected at geosynchronous orbit during the forecast period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during 26 - 29 October, with an increase to moderate to high levels during 30 October - 01 November. Mostly normal levels are expected during 02 - 21 November.

Quiet to active levels are forecast for 26 October as effects from the 22 October CME arrival subside. The field is expected to return to mostly quiet levels by 27 October. Quiet to unsettled levels are expected during 28 - 29 October as a coronal hole high-speed stream (CH HSS) disturbs the field. A return to mostly quiet levels is expected during 31 October - 02 November. From 03 - 05 November, quiet to unsettled levels are expected as another recurrent CH HSS affects the field. Mostly quiet levels are expected during 06 - 21 November.

1019. [RAC-Bulletin] Notice to All Amateur Radio Operators in Ontario

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-26 04:52:58 UTC
From: rac-bulletins@eton.ca
Message-ID: <4EA7919F.6010304@rac.ca>
Source record: 4059
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

ATTN: Notice to All Amateur Radio Operators in Ontario

Greetings All,

As many of you know RAC is presently undergoing new changes
within the organization and Field Services for Ontario is no
exception. As Section Manager for Ontario and your only elected
official for field services one of the major concerns that I brought
forward to the RAC executive is that for one person to act on behalf
of all of Ontario is not a proper voice on two levels. One is that due
to many factors like the sheer size of the province it is impossible
for all the amateurs in Ontario to see and have a personal contact
with the Section Manager. You need someone close to where you reside
that you can have personal contact with.

Since taking this position in October 2005 and being reelected
I have tried to do this job to the best of my ability. As many of you
know I have had some contact with you through personal telephone calls
and e-mails and maybe the odd club meeting or hamfest. However I don't
have the luxury or funds to visit all clubs or ARES groups in the
province. This is not fair to you and to me. You need personal contact
with someone that can take your concerns and comments good or bad to
the next level. If RAC is going to be our national voice you need to
know who your RAC rep is. Our present government has local MPP's that
represent your voice to government RAC needs a similar restructure.

RAC President Geoff Bawden VE4BAW through the direction of VPFS
Doug Mercer V01DTM has tasked Bill Unger VE3XT Ontario North Director
to over see a committee of experienced amateurs to come up with a
restructure of Field Services for Ontario. Attached you will find a
document and a new restructure chart with the proposal of having four
Section Managers representing you instead of one.

I ask you all to read the attached document carefully and send
your comments directly to the following address:
<https://webmail.confederationc.on.ca/owa/redir.aspx?C=b75de1edba1140ef8a992c7197d2d841&URL=mailto%3Arestructont%40gmail.com>restructont@gmail.com.

As your elected official for RAC I need and want your input about
this proposed restructure before we can move ahead and your voice is
very important to me and RAC. I ask your respond back to this address
<https://webmail.confederationc.on.ca/owa/redir.aspx?C=b75de1edba1140ef8a992c7197d2d841&URL=mailto%3Arestructont%40gmail.com>restructont@gmail.com.
by the 27th November 2011. Once all comments are collected a final
report will be drafted.

Again I thank each and everyone of you for your past and
continued support as your Section Manager. I can assure you RAC is
trying hard to get your opinions and ideas on how the organization can
continue to move forward to become our national voice representing all
amateur radio operators concerns.

Have a look and this is your chance to let your voice be heard.

73

Al

Allan Boyd
VE3AJB
Section Manager
Ontario
Radio Amateurs of Canada

****
The ARRL Contest Update

Published by the American Radio Relay League
****

October 26, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Phully Packed Phone - CQ World Wide SSB
- Completely Crammed CW - ARRL Sweepstakes
- CQ World Wide's Xtreme Category
- Road Home - A Ham Radio Read
- What Does A Contest Look Like?
- Sweepstakes Awards and Field Day Results
- Which Is The Right Power?
- Log Periodic CAD by WB0DGF
- Notes On CQ World Wide

NEW HF OPERATORS - THINGS TO DO

The contest bands (160, 80, 40, 20, 15, and 10 meters) will be packed with DX and domestic stations alike during the big CQ World Wide SSB <http://cqww.com/rules.php> contest. Check your CQ Zone on this terrific map from Icom America <http://www.icomamerica.com/en/support/kb/Article.aspx?ArticleNumber=668B54492A> (be sure to use CQ and not ITU zones) and jump right in - be prepared to enjoy higher bands that haven't presented sustained openings in a few years! Keep an eye on your transmit frequency to make sure that your carrier and sidebands are entirely within US operating privileges for your license class.

BULLETINS

Due to major flooding in Thailand and the recent large earthquake in Turkey, please avoid the following frequencies: 7.060-7.063 MHz (Thailand) and 7.092 MHz USB (Turkey). If asked to QSY to avoid interfering with emergency traffic, please do so immediately.

BUSTED QSOS

The weeknight date of the ARRL Frequency Measuring Test <http://www.arrl.org/frequency-measuring-test> is Wednesday, Nov 9th, not Tuesday as reported in the QST announcement. (Thanks, Connie K5CM)

In case there is any confusion about Technician privileges, Techs can operate CW from 28.0 to 28.5 MHz, SSB from 28.3 to 28.5 MHz, and RTTY/data from 28.0 to 28.3 MHz. (Thanks, Steve W3HF)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

October 29-30

- CQ World Wide SSB Contest
- SKCC Weekday Sprint (Oct 26)
- Fall VHF Sprints (Oct 29, 50 MHz)
- ARS Spartan Sprint--CW (Nov 1)
- SNS and NS Weekly Sprints--CW (Nov 4)

November 5-6

- ARRL November Sweepstakes--CW
- Collegiate ARC Championship-- CW
- Ukranian DX Contest
- Radio Club of America QSO Party--Phone
- DARC 10-Meter Digital "Corona"

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The CQ World Wide Contest's "Xtreme <http://cqww.com/rules/CQWW-Rules-Xtreme.pdf>" category allows operation using Internet technology to extend traditional station definitions. The only requirement to enter in this category is that you must pre-register with the contest sponsors at Xtreme@cqww.com with a description of your proposed operation, information on your station, call sign to be used, operator list, and technology to be used. (Thanks, CQWW Xtreme Category Manager, Doug K1DG)

College club stations considering a weekend of Sweepstakes <http://www.arrl.org/sweepstakes> competition should take a look at WM5R's Collegiate Championship <http://www.collegiatechampionship.org/> web site. Ken has compiled lists of category records and of winners by their NCAA conference participation - although there is a lot of rearranging going on these days. Take a look at your conference - wouldn't it be nice to post a winning score for your own? Don't forget, alumnii, you are allowed to operate with your alma mater's club as of last year!

Another Sweepstakes <http://www.arrl.org/sweepstakes>change - this year's participants will be able to select either Low Power or High Power categories in both the Multi-Op and Unlimited categories. The "M" or "U" in the exchange will stay the same, but results (and awards) will recognize participants in each power category. Here's your chance to be on the record leader boards (until next year, anyway)!

Take a look at this extensive article on CBS News commemorating today's 150th anniversary of completion of the transcontinental <http://www.cbsnews.com/8301-205_162-20124672/americas-original-wire-the-telegraph-at-150/

%20.>
telegraph, the precursor of future technological revolutions such as telephone, teletype, fax, and Internet. (Thanks, Dave K6VML)

A new web site for WRTC 2014 <http://www.wrtc2014.org> has been created through the hard work of Rudy N2WQ. It has been completely redesigned to look more professional and contain more information that will help competitors, visitors, and others as the preparations for WRTC 2014 continue. The WRTC 2014 web team is looking for help with graphic art design and article preparation. (Thanks, WRTC 2014 co-chair, Randy K5ZD)

Zac Manchester, a graduate student in Aerospace Engineering at Cornell University developed fingernail-sized satellites which may be deployed for Earth-orbit missions and could someday travel to Saturn. While fluttering down through the atmosphere, they will collect data about chemistry, radiation and particle impacts and transmit the information using a 10 mW radio on frequencies between 433 and 436 MHz. A group or club can sponsor a fleet of Sprites together as described on the Kicksat website <http://www.kicksat.org/>. (Thanks, AMSAT <http://amsat.org/> Bulletin ANS-289 and Julius N2WN)

Prasad VU2PTT reports that Indian amateurs can now use up to 400 W of transmitter final amplifier input power on all bands. This may help explain why the VU stations are so loud this weekend!

Are you an "Asker" or a "Guesser"? Take a few minutes to read this article from The Guardian <http://www.guardian.co.uk/lifeandstyle/2010/may/08/change-life-asker-guesser> and consider the difference. (Thanks, Mark N5OT)

A new release of the Super Check Partial <http://www.supercheckpartial.com/> database files is now available and be sure that your Country (CTY) files <http://www.country-files.com/> are up to date before this weekend's CQ WW contest. (Thanks, Bob WA1Z)

The Tesla Conference 2011 <http://www.teslasciencecenter.org/> is being organized by folks who work at Brookhaven National Laboratory with a goal of renovation of the Tesla's Wardenclyffe lab site as a museum/science center to further physics education and maintain the Tesla heritage. There will also be a special event station on Nov 5th using the call sign W3T <http://copaseticflow.blogspot.com/2011/10/teslas-wardenclyffe-lab-special-event.html>. (Thanks, Jeff K1NSS)

A new RTTY contest is coming to the bands on December 4th - check out the 10 Meter RTTY Contest <http://rttycontesting.com/the10meterrttycontest.html>, sponsored by Don AA5AU's rttycontesting.com and Ed W0YK's Muns Vineyard. It has the popular 24-hour format and with the bands so good lately, should attract a lot of participation on this first time out.

Web Site of the Week - I recently read an adventuresome novel for teens and young adults that features ham radio: "Road Home

<http://www.amazon.com/Road-Home-Andrew-Baze/dp/0983505306>" by Andrew Baze AB8L. The story revolves around post-earthquake action in the Pacific Northwest and how ham radio plays an integral part in both emergency preparedness and personal survival. Instead of trying to explain all of the technology in the story, the author uses a limited number of footnotes and references to explain the terminology. I thought this was a good compromise to allow the interested reader to dive a little deeper into the technology.

WORD TO THE WISE

Peer pressure - there is no stronger remedy to ethical challenges in radiosport than the magical potion of a friendly word of advice or caution. It strengthens our community and makes better contesters of us all.

==> SIGHTS AND SOUNDS

Geoff KA1IOR took a few public logs from last year's CQ WW contest and created some interesting visual analysis <http://www.cape-vision.com/wayg/ka1ior/yccc-cqww-study.html> by using PERL scripts. The charts illustrate some winning techniques and will help the reader learn what strategies are important.

What to do with surplus TVRO dishes? A group of four students at the University of Cincinnati set a world's record for point to point communications on 2.4 GHz at the Las Vegas WiFi Shootout <http://www.unwiredadventures.com/unwire/2005/12/defcon_wifi_sho.html> in 2005. I wonder if they could see the neighbor's network, too? (Thanks, Hank N8XX)

Dan K7SS suggests the air hockey documentary "Way Of the Puck <http://www.wayofthepuck.com/>" currently being seen on PBS stations as a parallel to ham radio contesting. As its devotees find, the bug bites hard and stays for life!

Everybody loves autonomous flying robots <http://www.youtube.com/watch?v=W18Z3UnnS_0>! There is lots of cool stuff going on with quadrotor platforms, such as this juggling video <http://www.youtube.com/watch?v=3CR5y8qZf0Y&feature=related>. Now, can we get them to haul the antenna rope over that super-tall tree? (Thanks, Bob N6TV)

If you missed seeing the aurora borealis this past Monday evening, you can get a sense of it from this NASA Earth Observatory <http://earthobservatory.nasa.gov/IOTD/view.php?id=76201&src=eoa-iotd> photo, story, and time-lapse video from late September.

Why is 73 the best number? The cast of "Big Bang Theory" explains in this video <http://www.youtube.com/watch?v=TIYMmbHik08>. (Thanks, Andy N2NT)

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X reports that the 2010 ARRL Sweepstakes plaques and Phone Sweepstakes certificates have all been mailed along with the 2010 160 Meter Contest certificates. Don't forget you can always check on ARRL contest awards processing online <http://www.arrl.org/plaques-and-certificates>. Speaking of online, that's where you can find the 2011 Field Day results <http://www.arrl.org/contest-results-articles>, too!

The final results of the CW part of the 2011 Scandinavian Activity Contest <http://www.sactest.net/> were delivered to the webmaster together with a brief write-up. You can also get your log-check results before all of them are on-line by emailing oh6kzp@sral.fi. Work is now proceeding on the more than 1050 SSB logs! (Thanks, SAC Committee Member, Kim OH6KZP)

Results for the 2011 UBA DX SSB Contest <http://uba.be/hf/contest-results> are now available. The database is being updated with older results, too - back to 2006. (Thanks, Franki ON5ZO)

The results for the first ever Summer Stew Perry Top Band Distance Challenge <http://web.jzap.com/k7rat/SummerStew2011.txt> have been posted. Congrats to Herb KV4FZ, who narrowly beat Ty NO3M for first place. (Thanks, Tree N6TR)

Barry W2UP reports that the latest High-Speed Morse Competition <http://www.hst2011.de/results> is now over. Barry snared a bronze medal in RUFZ and a gold in Morserunner. The US team placed tenth.

The 2011 CQ WPX Contest survey results have been published as Part 1 <http://www.cqwpx.com/blog/?p=91> and Part 2 <http://www.cqwpx.com/blog/?p=92>. Nearly 4950 respondents answered the survey questions about operating style, combining Single-Op and Single-Op, Assisted categories, and other topics. Contest Director, Randy K5ZD also notes that everyone who submitted a log for the WPX SSB Contest 2011 has been sent an email with a link to their log checking report. If you did not receive your report, please contact Randy <%20k5zd@cqwpx.com>.

OPERATING TIP

Voice maintenance - to keep your voice in good shape during a long contest, learn to speak clearly at a comfortable level without shouting. It helps to practice with a friend on the air in setting your mic gain and compression levels properly. If you use voice recordings, take steps to reduce the amount of background noise in them and try to match your normal speaking voice settings for clean transmitted signals. (And watch that VFO frequency when clicking on a spot - it's easy to not notice that the frequency is outside your operating privileges or too close to a band edge.)

==> TECHNICAL TOPICS AND INFORMATION

With power output an important part of complying with contest rules and national regulations, remember that net power flow in a transmission line is the difference between the power flowing in each direction. Net forward power is what most contest rules refer to as "output power". On most directional wattmeters such as the Bird 43 series, net forward power is computed by subtracting the value of reflected power headed towards the transmitter from the value of forward power (which includes both power supplied by the transmitter plus any reflected power that is re-reflected at the transmitter). The forward power reading in such a wattmeter thus varies with SWR. The two power readings are nearly independent with about -30 dB isolation between the two in a well-designed wattmeter. (A "smart" wattmeter may do that subtraction for you.)

To run the output of an amplifier into more than one antenna, you'll need a power splitter. Stack switches such as those made by Array Solutions <http://www.arraysolutions.com/> and Microham <http://www.microham.com/> can do the job using transmission line techniques.

F-type connectors are becoming more popular in amateur use for receive antennas and other jobs. While the most common style for equipment chassis mounting is a threaded, single-nut connector, a four-hole flange-style connect also exists - Mouser Electronics <http://mouser.com/> part number 161-9126. (Thanks, Mike W0BTU)

If you know what cables will be in a run of conduit, an alternative to pulling them through the finished run is to lay them out next to the trenches and slide the conduit sections into place over the cables. Then glue the sections together as you lay them into the trenches. You can include a pull rope in to the bundle for future use. Make sure the conduit joint surfaces are completely clean before gluing. This might not be practical for very long runs of conduit, though. (Thanks, Alan K9MBQ)

In you live in a windy area, static can build up on an antenna to disturbingly high voltages. An RF choke across the feed line will allow static to bleed off, but a high-value (10k or higher) non-inductive resistor with a 2 to 5-watt dissipation will do the job without self-resonances in the HF region. Metal-oxide resistors available from several vendors will work well Connect the resistor across the feed line by using a tee-connector (coax) or at the terminals (parallel-conductor).

A year ago Jim K1TN bought a new Weller soldering gun and couldn't figure out why a lot of the time it wouldn't put out enough heat. Recently, whilst soldering an antenna outdoors, he realized, in a blaze of neural activity, that the first detent of the trigger is HIGH and the second, all-the-way-in position is LOW. The natural tendency to squeeze harder for higher heat is defeated by this configuration!

Technical Web Site of the Week - Log-periodic designers can make good use of Roger WB0DGF's LPCAD calculator <http://wb0dgf.com/LPCAD.htm>.

Roger has recently released version 3.40 and it makes short work of creating a log-periodic dipole array design. Roger's site also offers numerous other useful antenna links and items. (Thanks, Jake K9WN)

==> CONVERSATION

Notes on CQ World Wide

The largest sporting event no-one outside ham radio has ever heard of, CQ World Wide SSB with its nearly 30,000 participants, is coming to a band near you this weekend. As you listen to the world turn, be sure to compete exhibiting the best ham spirit! Contest Director, Bob K3EST recently posted a few thoughts about operating:

"Many competitors enter a contest to compete for a top spot in their country, continent or the world. In is very important for all of us to promote fair play in contesting. Fair play is addressed with the Contester's Code of Ethics and the Contest University <http://contestuniversity.com/> lecture on ethics <http://pvrc.org/webinar/webinars.htm> by Doug K1DG:

- I will learn and obey the rules of any contest I enter, including the rules of my entry category

- I will not modify my log after the contest by using additional data sources to correct call sign or exchange errors.

Both points are of high importance to ensure a fair contest. The first point includes running the power allowed by your chosen category. An entrant may run the maximum power allowed by their chosen category:1500, 100 or 5 watts. All high power categories must not exceed 1500 watts total output power on any band at any time. You cannot run 1500 watts to each antenna on a band.

"Although the second point addresses what occurs after the contest, the CQ WW Contest Committee considers it unsportsmanlike to "clean" your log post-contest using data sources such as recordings, call sign databases, etc.

"If you enter any Single-Operator category, you are allowed only one signal on the air at any time. If you enter any multi-operator category, you are allowed only one signal on a band at any time. How do you prevent two signals on a band at the same time? Several "lockout" solutions have been provided to the CQ WW Contest Committee and are available under RESOURCES on the CQ WW contest website <http://cqww.com/>.

"When should you should claim to be in the Single-Op, Assisted category? Ask yourself the following question: Did you have help finding the call sign of any QSO in your log? If the answer is yes, you should enter as Single-Operator, Assisted. (This does NOT refer to receiving other types of physical assistance - Ed.) If you have any questions concerning when to claim assisted, please contact the CQ WW

Committee <questions@cqww.com>.

"Clubs worldwide can help promote FAIR PLAY in contesting. The CQ WW Contest Committee has endorsed the Contesters Code of Ethics <http://wwrof.org/contester-code-of-ethics/> created by the World Wide Radio Operators Foundation. Both of these sources can be used to create a club program concerning ethics/FAIR PLAY. If your club needs help developing a program, please contact the CQ WW Contest Committee <questions@cqww.com>. Let's try again to make it clear -- Have fun! Fun is what it is all about! Lots of activity and countries equals lots of fun!"

On a related topic, with conditions having improved so dramatically on the upper HF bands in recent weeks, there will be a lot of activity across the entire spectrum in this weekend's CQ World Wide SSB contest. What if you want to enjoy all of that action but submit your log in a single-band category? Don't remove any QSOs from the log - just be sure that your Cabrillo format header contains a line beginning with "CATEGORY-BAND:" followed by 160M, 80M, 40M, 20M, 15M, or 10M. (You can view and revise your log with any text editor but be sure to save it as plain text.) All of your QSOs will be used for log checking but only QSOs from your single-band submission will count for your score. If your logging software generates the older Cabrillo 2.0 format, make sure the header line for category looks like the following example for a 20 meter, single-band entry.

CATEGORY: SINGLE-OP 20M HIGH PHONE

If you want a separate all-band score to count for your club, add a note stating that in a SOAPBOX: line in the log header and be sure to spell your club name correctly as listed on the CQ WW Club Names web page <http://www.cqww.com/clubnames.htm>. While you're reviewing your log, make sure the header information is all correct and that each QSO contains the correct information for your exchange.

After you submit your log to the CQ WW contest robot at ssb@cqww.com, you will receive an emailed response - read it! Be sure the robot's message correctly reports the category, number of QSOs, and so forth. If any of these are incorrect or the robot reports a problem, edit your log and resubmit it until everything is accepted properly. There will be a submitted logs report <http://cqww.com/logs.php> published on the CQ WW website as logs come in - be sure yours is listed and in the right category. Don't wait until next fall to find out there was a problem!

73, Ward N0AX

==> CONTESTS

25 October through 8 November

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the

sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CQ World Wide SSB Contest--Phone, from Oct 29, 0000Z to Oct 30, 2359Z. Bands (MHz): 1.8-28. Exchange: RS and CQ zone. Logs due: Nov 21. Rules <http://cq-amateur-radio.com/>

ARRL November Sweepstakes--CW, from Nov 5, 2100Z to Nov 7, 0300Z. Bands (MHz): 1.8-28. Exchange: Serial, category, call, check, ARRL sec. Logs due: Nov 22. Rules <http://www.arrl.org/contests>

Collegiate ARC Championship--CW, from Nov 5, 2100Z to Nov 7, 0300Z. Bands (MHz): 1.8-28. Exchange: See ARRL Sweepstakes. Logs due: Nov 22. Rules <http://www.collegiatechampionship.org/>

SKCC Weekday Sprint--CW, from Oct 26, 0000Z to Oct 26, 0200Z. Bands (MHz): 1.8-28, 50. Monthly on the fourth Wednesday local time. Exchange: RST, S/P/C, name, SKCC number. Logs due: 2 days. Rules <http://www.skccgroup.com/>

ARS Spartan Sprint--CW, from Nov 1, 0200Z to Nov 1, 0400Z. Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

SNS and NS Weekly Sprints--CW, from Nov 4, 0200Z to Nov 4, 0300Z. Bands (MHz): 1.8-14. Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

Ukranian DX Contest--Phone,CW, from Nov 5, 1200Z to Nov 6, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or Ukraine oblast. Logs due: 30 days. Rules <http://www.ucc.zp.ua/>

Radio Club of America QSO Party--Phone, from Nov 5, 1700Z to Nov 6, 0500Z. Bands (MHz): 3.5-21. Exchange: RST, QTH, name, equipment. Rules <http://www.radioclubofamerica.org/>

DARC 10-Meter Digital "Corona"--Digital, from Nov 6, 1100Z to Nov 6, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Logs due: 2 weeks. Rules <http://www.darc.de/referate/ukw-funksport>

VHF+ CONTESTS

Fall VHF Sprints--Phone,CW,Digital, from Oct 29, 2300Z to Oct 30, 0300Z. Bands (MHz): 50. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/2011fallsprintrulesv1.pdf>

SKCC Weekday Sprint--CW, from Oct 26, 0000Z to Oct 26, 0200Z. Bands (MHz): 1.8-28, 50. Monthly on the fourth Wednesday local time. Exchange: RST, S/P/C, name, SKCC number. Logs due: 2 days. Rules <http://www.skccgroup.com/>

1021. [RAC-Bulletin] RAC Bulletin 2011-033E – Notice to All Amateur Radio Operators in Ontario

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-26 20:23:24 UTC
From: rac-bulletins@eton.ca
Message-ID: <4EA86BB1.1060506@rac.ca>

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2011-033E • Notice to All Amateur Radio Operators in Ontar
io
2011-10-26

Greetings All;

As many of you know RAC is presently undergoing new changes within the organization and Field Services for Ontario is no exception. As Section Manager for Ontario and your only elected official for field services one of the major concerns that I brought forward to the RAC executive is that for one person to act on behalf of all of Ontario is not a proper voice on two levels. One is that due to many factors like the sheer size of the province it is impossible for all the amateurs in Ontario to see and have a personal contact with the Section Manager. You need someone close to where you reside that you can have personal contact with.

Since taking this position in October 2005 and being reelected I have tried to do this job to the best of my ability. As many of you know I have had some contact with you through personal telephone calls and e-mails and maybe the odd club meeting or hamfest. However I don•t have the luxury or funds to visit all clubs or ARES groups in the province. This is not fair to you and to me. You need personal contact with someone that can take your concerns and comments good or bad to the next level. If RAC is going to be our national voice you need to know who your RAC rep is. Our present government has local MPP•s that represent your voice to government RAC needs a similar restructure.

RAC President Geoff Bawden VE4BAW through the direction of VPFS Doug Mercer V01DTM has tasked Bill Unger VE3XT Ontario North Director to over see a committee of experienced amateurs to come up with a restructure of Field Services for Ontario. Attached you will find a document and a new restructure chart with the proposal of having four Section Managers representing you instead of one.

I ask you all to read the following document carefully and send your comments directly to address below
<http://www.rac.ca/en/news/bulletins/2011/Field_Services_Review_v8_3.pdf>

As your elected official for RAC I need and want your input about this proposed restructure before we can move ahead and your voice is very important to me and RAC. I ask your respond back to this address:

Arestructont@gmail.com

by the 27th November 2011. Once all comments are collected a final
report will be drafted.

Have a look and this is your chance to let your voice be heard.

73,

Allan Boyd VE3AJB
Section Manager • Ontario
Radio Amateurs of Canada

Torture and Conversion
By RedRight

It was fucking awful. I hung in a pit, in a man-shaped rubber bag of shit. The sewage was up past my knees now.

Every hour or so one of the rubber clad skins would come in and repeat their little ritual. He'd always be carrying a bit of food, and it always smelled good. One time it'd be pizza, the next a cup of soup. He'd get down, right in my face and tell me the rule, "Allright fuckface, simple equation. You eat shit you get food. You don't eat shit, you don't get food." Then he'd sit on the rim seat over my head. I'd get a blast of strong poppers up the tubes in my nose and then he'd shit.

I could easily duck my head to the side, it was my choice. If I ducked the shit would hit me on the chest, or my back, or my shoulder. If the shit was dry it would just bounce off me, usually leaving a sticky smudge, and fall down into the bag, raising the level of the scum around me another fraction of an inch. If the shit was wet, I'd get sprayed and the wet slime would drool down me - slowly. With my hands bound to the sides of the bag, down in the pit there was little I could do. Sometimes they'd leave the fragrant food behind, always within sight. I could smell it too.

I didn't eat the shit. I didn't get the food. Hunger built. By itself, that wouldn't have been enough, but then came the show...

It was probably the third night of the ordeal. One of the skins came in and threw down a dirty wrestling mat. He came back and set several large candles around the room, lit them, and put out the lights. Moments after he left I heard two more of them coming down the hall. They were drunk, or high, or both. Rough-housing with each other, they stumbled into the room.

It was hard to tell these two apart. Both had shaved heads, muscles, and dark eyes. Both wore rubber chaps and tall rubber boots. One had a skull tattoo on his shoulder and the other had a flaming sword on the cheek of his ass.

Skull threw Sword against the wall and simultaneously kneed Sword in the balls and kissed him hard, really grinding their faces together. I could see Sword writhe from the blow to his balls, but he leaned into the kiss too. At the same time, his hands reached around and grabbled the cheeks of Skull's ass, squeezing hard, leaving marks.

Skull slowly worked his face down Sword's front side. He paused at the tits, gnawing on them until Sword tried to pull away. Skull shoved him back against the wall hard and continued down. By the time Skull got down as far as Sword's cock, he'd dropped to his knees. I could see he had Sword's cock deep down his throat and, at the same time, had a crushing grip on Sword's balls. Sword pressed himself back against the wall, lost in the pleasure and the pain. "Aw fuck... Aw fuck yeah..." he quietly chanted to himself.

"Fuckit," Skull said, and grabbed Sword by the waistband of his chaps. Roughly, he threw Sword to the mat, straddled him, and got his face back between Sword's legs. Skull's butt was pointed at Sword's face and slowly, as he sucked, Skull sat up. Just as Sword's dick slid out of his mouth Sword sat up and dropped his ass on Sword's face.

"Suck it, bastard," Skull said. Sword went at it. He reached up and grabbed Skull's waist and pulled the ass to him like a starving man.

Somewhere along here, my dick got hard. The shit was just sloshing up to the bottom of my balls now. If I thrashed around a bit I could get some of the slime up onto my cock for lube and barely rub my cock against the side of the bag. It was scant stimulation. Just enough to tease. Somewhere about here too, the poppers started to flow again. Before they'd just come with the shit, but now they flowed freely.

Skull lifted his ass off Sword's face. The narrow gap between the round cheeks of the ass and the sharp profile of the face was illuminated by the light of a candle against the opposite wall.

"You wanna eat, fucker?" Skull asked. Sword squirmed and whimpered softly.

"Come on fuck, you wanna eat?" Skull coaxed again.

"Feed me..." came a soft cry from Sword.

"Can't hear you dickwad!" shouted Skull.

"Feed me," Sword repeated.

"Tell me what you want, bastard!" Skull screamed in Sword's face.

"Feed me you bastard! Feed me your fucking shit!" Sword screamed back, matching his volume.

"Good boy," Skull cooed softly, stroking Sword's face and body.

Again, Sword sucked Skull's ass. He sucked for just a half a minute and then laid back, mouth open. I watched the gap intently, my dick just as hard and at attention as those of the men I watched. Some part of my head loved what I was seeing.

The shit started to flow. There was no mistaking it. Chunks of shit were falling out of Skull's ass and into Sword's waiting mouth. I watched, transfixed and hard-dicked as Sword first let the shit pile up in his mouth and then visibly chewed and swallowed. It didn't go down without a fight - several times I saw Sword's flat abs clench as he retched. Nothing came back up though. What he swallowed, he swallowed for good.

I could smell the rank odor and I could hear the mushy sound of Sword chewing it down. Softly, Sword moaned as he chewed. Mouthful after mouthful went down his hungry throat. As he ate his back arched and his hips thrust his stiff prick up into the air reflexively. He needed relief. Smiling, Skull reached out and grabbed Sword's dick in one hand and balls in the other. Sword's moans increased tenfold. Skull was gently stroking Sword's dick and roughly mauling his balls. With the pain and pleasure kept in the right balance I knew Sword would stay hard but never reach the release of cumming.

Soft farts from Skull's ass signaled the end of his dump. I heard loud burps from Sword as he kept trying to swallow the thick coating of shit lining his mouth and throat. As I watched I tried to imagine the heavy thick paste going down my own throat.

Finished shitting his load into Sword's mouth, Skull dove on Sword's dick, once again deepthroating it. Sword's body locked into an arc as if hit by a high voltage shock. Every muscle on his lean body stood out in relief. His screams of pleasure were near deafening in the small room. His hips slammed up hard into Skull's face and Skull kept sucking his hard dick.

I was dizzy with poppers, lust, and need. When the two of them collapsed, spent, I nearly cried. They were just a few feet away, but I could get no release.

They laid there panting. Slowly their breathing evened out and they seemed to sleep. I think I may have dozed as well. Later, I started awake. I don't know what woke me, but I realized that Sword was awake and looking at me. He squirmed away from Skull and started to half crawl, half slither over to me. My dick stirred.

With my face just at floor level he crawled to me until his face was just inches from mine. He stared into my eyes, drilling me. I could smell the heavy scent of shit on his breath. Each time he exhaled it was like the wind of a long warm fart blowing into my face. Same smell, same warmth.

He smiled at me. He came to within an inch of my face, and his long tongue snaked out and gave me a lick across my nose. My dick jumped with the contact. I could see that the inside of his mouth was more brown than pink. I could feel the smear of drool his tongue left behind and smell the shitstink from the bit of it that was under my nostrils.

I craved the contact and something more. I stared back into his eyes and opened my mouth. He smiled again and reached out one hand, holding the back of my head. He moved his face to mine again and this time we locked lips. The rich taste of shit, Skull's shit, I realized, flooded my mouth. I sucked at his tongue hungrily. What was this? What was I doing.

He broke the contact and pulled back. He smiled at me again and let out a low growl of, "Yeahhh, fucker. Yeah, you got the hunger now, don't you?" There was a crazy spark in his eyes to match the smile.

He reached down into the pit and released the bindings that held my hands. Then he stood up quickly and moved to the side of my pit. He swung the toilet seat away from over my head and started hauling on the ropes that suspended me. The pulley overhead squeaked loudly in the quiet room as I was raised. Skull stirred, but slept on.

I was a dripping, shit-slimed mess. Caked clods of shit slid down my body and fell back into the pit. Slime dripped off the tip of my dangling dick. Sword tied off the hoist ropes and then hooked an arm behind me, bringing my feet to solid ground. Seeming to sense that my legs were wobbly he kept the arm behind me for support while he unhooked the ropes from my harness.

Now I was free. It occurred to me, in passing, that I could run. But no. That was no longer what I wanted. Sword guided me over to the mat, the opposite corner from the inert Skull, and whispered for me to lie down.

It felt good just to lie there and let my eyes close. I heard Sword get up, walk away, and return. Soon I felt hands spreading the slime coat from below my waist up all over my naked body. The stink increased. I moaned appreciatively at the touch and my dick stirred once again to life. His hand cupped my balls and I felt his warm mouth envelope my cock. He sucked my rod, gently at first then harder. Every couple of minutes he'd pull his mouth off and slather more of the shitslime from the reserve around my balls up onto my dick and then go back to sucking. My cock rose and hardened under his attentions.

After I was fully, almost achingly hard, his active mouth started working its way up my belly, around my navel, up the crack between my

pecs, and to my nipples. His mouth started milking me on the right while a hand worked the tit on the left. I reached up and grabbed his head. He responded by starting to really chew and gnaw on my nip.

I looked down and saw that my hands were leaving brown smears on his shaved head. I pulled, urging his face up to mine. He laid his body across mine and complied. He grabbed my head with his wet hands and soon our mouths were once again locked together, sharing his mouthful of shit-drool.

He wasn't satisfied with that for long. "Feed me," he whispered urgently in my ear. "Gimme some shit."

He rolled off me and lay on the mat. I stood and he grabbed my ass and guided it down to his face. As soon as my cheeks were in range he thrust his face up into my crack and started licking at it wildly. I stood slightly and he got up on his knees for better access. He pulled my ass back and probed for my asshole with his tongue. God that felt good! Slowly he worked his tongue deeper and deeper, first into my crack and then penetrating my hole. The harder his tongue probed the more I felt my assring relax.

"Oh yeah," he moaned, "good shit."

I stood there, enjoying the sensation of a hungry mouth working my hole. He reached around with one hand and started playing with my dick and balls. I was in heaven.

"Common man, feed me some," he urged me.

Carefully, I concentrated, bearing down gently with my gut. Piss spurted from my dick, wetting his hand and running down, dripping from my balls. He growled and buried his face deeper into my crack. "Yeah, give it to me," he urged.

Slowly, I felt my shit-load start to slide down my chute. I knew it had come within range of his hungry tongue when be broke off from my ass, sucked a lungful of air, let out a loud "Yeah Fucker!" and dove his face back into my ass-crack. I felt a small, hard turd slide from my hole and into his attached mouth. He growled his appreciation like a rutting animal.

He pushed my ass away, spun me around by the hips, and pulled me down to kneel, facing him. My shitlog stuck half out of his mouth like a short fat cigar, dark brown and glossy. We locked eyes and he put his hands on my head, pulling me in. Hypnotized, I opened my mouth wide and met him lip to lip. My mouth was open, surrounding the turd cigar but not touching it Even so, each time I took a breath I could smell and taste the shit.

Sword tightened his grip on my head, making it clear that I was stuck in this position until I took the next step. Slowly I relaxed my lips, feeling them make contact with the warm log of shit that was sticking

into my mouth. Once my lips made contact I felt Sword start to push the log out, sending it deeper into my mouth. Reflexively, my tongue came up to support the load that was entering my mouth. The taste of my own shit blossomed in my mouth, rich and bitter. Crossing that line, my heart pounded and my mind raced.

Sword released my head and leaned back. "Good boy!" he said. "Feel that shit in your mouth, boy. Get off on it." With that he leaned in again. He wrapped his lips around the turd log again and started giving it a blow job like it was a dick. I gripped the brown log with my teeth now and nearly went cross-eyed watching as Sword moved in and out, slicking up the log with his spit.

"I'm hungry, boy. Are you hungry?" Sword said. He looked at the turd in my mouth again and then he leaned in, gave it another quick lick with his brown tongue and bit off a piece. He let me see the shit he held in his lips then he tossed it back, mouth open, and worked it around with his tongue. I watched, fascinated and horrified as he proceeded to close his mouth, chew it up, and visibly swallow it down. After taking the big gulp he again opened his shit-hole mouth, proving it was really gone. I could see dark bits of shit highlighted against the white of his teeth.

"Your turn, boy. Do it up. Bite it off, throw it back, and swallow it down. You don't even have to chew. Come on, boy, do it!" He leaned in and locked his mouth onto the part of the turd that was hanging out of my face. Gently, I pushed it a little further out and I felt him take it from me. I leaned back, my mouth free of the brown cargo for the moment.

Damn, could I do this? I couldn't deny that it was all turning me on more than I ever imagined it could. My dick was up, hard and aching. A hard dick doesn't lie! Sword put a hand on my shoulder and started pulling me in. I let him guide me and took it at his speed. As soon as the turd was in range I gingerly gripped the first inch or so with my teeth. It was harder than I imagined it would be. My teeth sunk in and I bit it off. Just like Sword said, I threw it back in my mouth and threw it down.

I felt every inch of it's slide as that hard little nugget went down my throat leaving a brown smear all the way. I did it! Triumphant, I opened my mouth so Sword could see. Sword smiled around the log in his face. Something snapped, I felt released. More! I wanted more! Again I leaned in and this time bit off a bigger piece a couple of inches long. There was no way this one was gong down without chewing it first -- it was just too big. I closed my mouth around the hard lump of shit, squeezed it with my tongue, feeling the clay-like mass start to ooze around. Now I could really taste it. Hard and gritty, I started to chew. I felt it disintegrate and turn to mush. Saliva started to flow and trickles of slime ran down my throat. I chewed, swallowed, and chewed some more. Sword watched with a beatific look on his face. I swallowed some more trying to clear the sludge out of my mouth.

Sword took the turd in his hand and bit off another piece. My mouth was empty and, incredibly, I realized I wanted more. I looked down at the shit in Sword's hand and then up at his face. He smiled while chewing, I opened my mouth, and he fed me the rest of the log. We sat there, both chewing open-mouthed, brown drool running down our chins. The feeling of intimacy and brotherhood was intense.

"Fuck yeah," he said. "Fuck yeah," I repeated, grabbing him for a kiss. As I shoved my tongue into his mouth I felt and tasted the remainder of the brown mud we'd just shared. When we broke the shitty kiss we just sat there panting, somewhere beyond words. There was just one thought on my mind, but it took a few seconds for it to bubble up out of my shit congested brain. One thought, one word, "More."

Sword sprung and tackled me to the mat. "Now I'm gonna feed you straight from the source, fucker. You're gonna love it," he said. He got up and squatted over my face. What a view! His tight white ass framed by the black rubber chaps was coming down on my face and I wanted it bad! I reached up and grabbed his hips, guiding him down. I raised my head, tongue out. Contact! I felt the soft hairs in his ass crack tickle the bridge of my nose as I sunk my face into his crack. I licked and dug with my tongue until I felt the rosebud of his ass.

I wrapped my lips around the hole and started to suck. I dug with my tongue and massaged it with my lips. I felt his ass tense and then he blew a little fart. The smell was amazing, it flooded my senses. At this close range it was ten times more intense than any fart I'd ever smelt before. I worked his hole even harder and was rewarded with a trickle of thick wet butt-slime. I swallowed it down.

Now I'd forced my tongue as deep into his hole as I could reach and I felt the beginning of his load. It slid down his chute with excruciating slowness. When I knew it had reached the lips I pulled my face back so I could watch it emerge.

His ass-lips flexed and quivered and then started to spread. First all I could see was the brown dot of the tip of the turd surrounded by his pink lips. Slowly, the turd emerged and the ass-lips spread. I could see that it was lighter in color than mine had been and the smell was sweeter too. It was just a shade darker than peanut butter. Once it reached a couple of inches out of his hole I could see that it was at full width of just a little more than an inch. I moved in and grabbed it with my mouth and tongue. Right away I found out his shit was even more different from mine than it looked. It was a soft paste in my mouth, smooth and creamy. The taste was indescribable. Bitter yet sweet. Decaying but fresh. Above all, strong and rich.

Slowly I felt his shit-paste ooze into my mouth. I sucked at his hole and the thick mush glued itself to my tongue and cheeks. I worked the thick goo around in my mouth and tried to swallow some of it down. I gagged and my gut clenched. Just short of panic I squeezed his hips in a vise-like grip and concentrated on getting control. He stopped the flow. My mouth watered hard and some of the shit oozed back out of my

face, smearing into his crack. Swallowing hard and fast the paste started to go down. It was so thick I felt it clogging my throat. Determined, I kept swallowing it down. Sword rose and flipped around, hanging his dick in my face. Gratefully I took his hose in my mouth and accepted his gift of piss. He fed me a warm, sweet stream that cleared my throat in a few swallows.

I fell back, panting. He got down over me and smothered my face with an open-mouthed kiss. I felt his tongue digging deep into my mouth, hunting for the clods of shit that remained and greedily sucking them back out.

"Arrgh!" I growled when he broke the kiss.

"Ready for more, man?" he asked, sitting back on his haunches and smacking his lips.

"Yeah," I said, "Gimme that ass again fucker." I was over the line now and I was going all the way.

He turned and presented his ass to me again. It was a radically different picture this time, his smooth white cheeks were streaked with dark brown from my hands and lighter smears of his earlier shit. The crack was obscured, plastered over with the mess from my earlier feeding. I took a few slow, deep breaths, enjoying the view, relishing the smell, and taking stock of the situation. I moved in on the crack and dug a furrow with my tongue. I sucked down that mouthful and went in for another. Feverishly I excavated his crack until I could once again see his puckered pink lips. I sat back and sucked my mouth clear -- the thick paste still didn't go down easily and I could feel the trail of it clear down my throat to my stomach. Once my mouth was clear I chilled out for a few seconds, breathing deep.

"I gotta go man! Get in there!" Sword said, forcing the issue by reaching back, grabbing my head, and slamming my face back into his ass. Willingly, I met his hole open mouthed and started sucking. Once again, the thick paste oozed out of his dirty hole and into my mouth. Better prepared this time, I just kept on sucking. Sword's crap started a sensuous continuous flow across my tongue, down my throat, and into my sewer-pit stomach. The thick sludge kept flowing and I kept swallowing. I felt the weight of it gathering in my belly. I was nearly stuffed with my first shitmeal.

"This is the last of it man, keep it in your mouth so we can both share it," Sword said.

I closed my throat and the flow kept coming strong. I felt the shit fill my mouth and start to ooze out and fill my cheeks. By the time he stopped my cheeks were bulging out and I had a massive load of thick pasty crap in my mouth.

I laid back and Sword sat on my belly facing me. I opened my mouth wide and felt trickles of drool overflow the brown pit of my mouth and

run down my chin. "Awww, fuck man, that's beautiful," Sword said. He leaned down and licked the drool away and then scooped a gob of shit out of my open mouth. He smacked his lips and opened his mouth, showing the thick strings of shit paste sticking his tongue to the roof of his mouth.

Suddenly, my gut lurched again as my gag reflex kicked back in. In a flash, Sword glued his mouth to mine. I couldn't hold back any longer and with the next spasm the giant load of crap in my mouth exploded into his. We were face to face and I could see his eyes widen with the force of the flow. I kept my bellyful but gave him just about everything that was in my mouth. Slime ran freely from our lips and across both our faces. He closed his lips, sat up, and threw his head back, now fighting his own battle to hold onto the load he'd taken. I watched his washboard abs flex and his throat tighten. Just watching him fight it was so damn hot!

Just as I caught my breath he came back down to me, cheeks still bulging out with the load, and locked onto my lips. I opened my mouth and he squeezed the load of mush back into my mouth.

Suddenly, I saw Sword's eyes go wide and, at the same time, felt a hot, wet stream start washing down my back.

"What the FUCK are you two pigs doing?" Skull's voice rang out.

I spun around, surprised, and saw Skull towering over me, his dick still spraying a stream of hot piss. I coughed the load of shit out of my mouth in shock. The shit exploded out of my mouth and caught Skull at crotch level. I heard Sword start laughing behind me.

"Son of a BITCH," Skull screamed. He stepped forward, grabbed my head, and slammed his now filthy dick down my throat. "Clean that up, bastard," he commanded me. "Clean it up good."

It was a big fucking dick and filthy with the load of shit I'd blown all over his crotch. Each time he pulled my face down on his prick my nose was smashed into his shit-caked pubes. He was merciless in ramming his cock deep down my throat. Several times I started to gag, but it didn't really matter - he just kept fucking my face relentlessly.

Sword was still laughing his ass off behind me, and I heard him come closer to Skull and I. He stood behind me and leaned over, kissing Skull hard on the lips. Skull eased up a little on his ramming my face with that and I almost had a chance to catch my breath. I swallowed a few times to clear my throat, feeling the slime slide on down to my sewer pit of a stomach. Sword must have been doing a pretty good job of distracting Skull, because now Skull all but stopped slamming his dick down my throat. With the easing I started to really enjoy my labors. I'd cleaned nearly all the shit of Skull's dick so I pulled my mouth off the rod and started slurping the rest of the shit off his crotch. I combed his pubes with my teeth and then started to lick down

the insides of his thighs. Skull's growls and moans told me he was enjoying the hell out of the attention that Sword and I were giving him. Nothing like a couple of hot mouths to sooth the savage beast.

I let loose a big belch and was nearly smothered by the fumes that came up. It was a reprise of the stench and acrid flavor of every bit of shit that had gone down my throat. I gasped for air until I recovered and then went right back to cleaning Skull's crotch. The hunger was on me and I wanted more of that shit.

Sword gave a little shove and pushed Skull off balance. All three of us tumbled to the mat in a pig pile with Skull on the bottom. Immediately, Skull started cussing again, "Bastard! Get off me, fucker!" He struggled and fought until the three of us lay untangled on the mat. Sword threw himself over Skull and pinned him to the mat. Skull struggled but was held.

"Feed him," Sword encouraged me, "Shit on his pretty fucking face. Smother him if he won't swallow."

"No! Fuck, No! Slimy Bastards! Don't you fucking dare!" Skull ranted at the suggestion.

Sword laughed and said, "Do it! I've got him."

I hesitated, but saw that Skull's face showed more humor than anger and moved in to squat over his face. I reached down and grabbed his face, holding him still. He fought half-heartedly, still cursing loudly. I started to bear down and push a load of shit out onto his face. I could hear the shit squeeze out of my ass, even over the other men's heavy breathing and between Skull's outbursts.

"Fuck!" Skull shouted. "Fuck!" He tried to twist his head to the side, but I held him fast, getting a little revenge for the abuse he'd given me earlier.

My shit fell with a splat onto his face and that shut him up for a moment. Slowly, I lowered my ass. I felt the warm ooze of the shit as my crack hit the pile I'd just dropped on Skull's face. I pushed down more and really ground the shit into his face. He continued to make angry noises but they were pretty well muffled by my ass and the load of shit plastering his face.

"Yeah, fucker, take it!" Sword called out to Skull. Skull struggled at first but then he quieted and I felt his mouth open and his tongue start to work my hole. It felt damn good. I reached around and gently laid my hand over his throat. I felt his adam's apple bobbing as he swallowed my shit. He was doing it! The tough skin bastard was eating my shit!

Skull and Sword were squirming against each other urgently. There was still enough left of the shit I'd sprayed over Skull's crotch to work as a lube and I realized they were both working to come. I reached

down and scooped a handful of my shit out of the pile on Skull's cheek and started to use it as a lube to jack my own hard cock.

I watched as Skull spat a juicy mouthful of shit spit into Sword's face. "Aw, you fucker!" Sword screamed at him. I laughed as Sword grabbed a mouthful of my shit off Skull's cheek and spat it back right into Skull's face. "Fucker! Skull screamed. They were squirming as they both locked faces and started to kiss hard. I knew they were probably tounge wrestling my shit back and forth and I could tell they were both close to coming.

I felt my shit caked balls pull up and tighten as I got close to shooting my own load. "Fuck, fuck, fuck," I screamed. "Cummon fuckers! Cummon!"

"Yeaahhrg," was all Sword could manage as he came. His body twiched and spasmed.

"Shitty Fuckers!" Skull yelled as he too shot his load all over Sword's belly.

"Oh fuck yeah," I yelled as I came. "Fuck yeah!" My whole body jerked tight and I fell to my knees. My cum flew across the two joined skins on the mat as I gave my cock a few final hard jerks.

There were a few minutes of near silence. We were all three panting like we'd just run a race. Sword recovered first and sat up next to me. Absentmindedly he stroked his hand up and down my body, smearing through the accumulated filth and cum. "Well, mate, I think we did it..."

"Yeah, how's that?" Skull came back.

"I think we've converted this one," Sword replied.

"Aww, fuck, I don't know mate," Skull replied, "I think we'll have to test him a few more times to be sure."

We laughed and all came together in a three-way shity embrace on the mat. We laid there for a time and, before long, we all slept.

1023. ** MMMonVHF Newsletter / No.1 - WEEK 43/2011 **

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-27 16:42:29 UTC
From: MMMonVHF News Mailer <noreply@mmmonvhf.de>

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-10-27
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** MMMonVHF VHF-DATABASE Issue 4.00 **

Dear VHF-DATABASE-friends,

a year is over again and we will be able to spread around a new
issue of the VHF-DATABASE. From now on we decide to spread it to
every User of MMMonVHF in the download area, free of any fee!
(of course if you wants to support MMMonVHF you are welcome - in
this case please do contact Guido, DL8EBW... thank you in advance)

All necessary details you be able to find at our MMMonVHF FORUM at:
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=3

So you are welcome to implement the Base into standard spreadsheet
programs as well as into the VQLog (EA6VQ Logbook program), UCX-Log
(written by DL7UCX) and the contest programs OHTest (written by
OH6HFX) and TUCNAK (written by OK1ZIA).

Please login at your account at MMMonVHF and goto "Downloads" :
http://www.mmmonvhf.de/download.php If you are log in, here you be
able to find all "free of charge" downloads and from today on, as
well the "big MMMonVHF VHF-DATABASE" - enjoy it
The VHF-DATABASE of MMMonVHF and as well all the three different
MS-DATABASES are DAILY(!) available and refreshed from now on!

We stop distributing the DATABASE for the DXClusterï¿½s because
we have had only low requests in the past years! Sorry for that!

SOURCE: Guido, DL8EBW, on behalf of the MMMonVHF Team

** MMMonVHF NEWSLETTER and REPLIES **

Please remember, NOT to reply to our newsletter email address.
This email address is not used for normal receiptions and postings
will be handled as bounced emails and automatically be deleted.
For any replies please do use our contact form...

** H40, TEMOTU PROVINCE in 2012 **

German operators Peter/DG1FK and Sigi/DK9FN will once again return
to Temotu Province for a third time and be active as H40FK (PSK/
RTTY) and H40FN (CW), respectively. Activity will again be from
Lata Motel on Nendo Island (OC-100) between February 7-20th, 2012.
Operations will probably be on 160-6 meters depending on the band
conditions. QSL H40FN via HA8DD, and H40FK via DG1FK.
Source: Ohio/Penn DX Bulletin #1032

** PA6Z qrv from Guernsey **

Members of the Dutch DX-pedition & contestgroup PA6Z are planning
a DXpedition from 23 till 30 October 2011 to the isle of Guernsey
(IOTA EU-114, WLOTA 0013), using the callsign MU/PA9M. They will
be active from 160-6 metre CW and SSB. The team will stay at Les
Maingys the Headquarters of the Bailiwick of Guernsey Scout
Association (WW Loc. IN89RL). The DXpedition will operate 24 hours
a day from a maximum 7 individual stations, as band conditions
permit. During the operation, the CQWW DX SSB Contest takes place

(29-30 October). The team will participate in the contest on all bands, as a Multi-Multi entry. Operators include Marcel PA9M, Frank PA4N, Jelmer PA5R, Dervin PD9DX, Arbo PH0AS, Arend PA2AWU and Dick PA4VHF. QSL via PA9M, direct or bureau. No e-QSL! Further info on their website at: www.pa6z.nl/guernsey2011/ [NG3K]
SOURCE: ICPO Bulletin (21-28 October 2011)

** 3XY, GUINEA **

The 3XY1D team is now active until November 1st. Activity will be on 160-6 meters using CW, SSB and the Digital modes. As of 0738z, October 23rd, the 3XY1D operation has made 16984/QSOs (3316/SSB, 13443/CW, 77/PSK and 148/RTTY). Online logs are available at: http://www.dl7df.com/3xy1d/index.html QSL via DL7DF, direct or by the Bureau. SOURCE: Ohio/Penn DX Bulletin #1033

** VK, AUSTRALIA, Special Event **

The Scout Member Amateur Radio Team (SMART) will use the special call VI6CHOGM from the "Commonwealth Heads of Government Meeting" (CHOGM) in Perth from Oct 28-30. Listen for them in SSB, PSK31, SSTV and maybe also some CW on the usual "World Scout" QRGs on 80m-6m. QSL via bureau (see QRZ.com). Internet: http://www.vi6chogm.com SOURCE: [DXNL] DXNL 1751 (Oct 26, 2011)

** XV, VIETNAM, on HF and 50 MHz **

Retu, OH4MDY (OX3RZ/XU7MDY/XV2MDY), will once again be active as XV2RZ from Southeast Vietnam between November 1st and December 12th. Activity will be on 80-6 meters using the "normal modes" (CW and SSB). QSL only direct via OH4MDY with a SASE and 2 USDs. His log will be available online at: http://www.clublog.org
SOURCE: [GOLIST] Ohio/Penn DX Bulletin #1033

** 8Q, MALDIVES, on HF and 50 MHz **

Members of the Russian "Ural Contest Group" (UCG) will be active as 8Q7DV during both the CQWW DX Contests (CW and SSB) as follows: Operator Vadim, R9DX, will operate the CQWW DX SSB Contest (October 29-30th) as a Single-Op entry. Activity outside of the contest will be on 160-6 meters using a Elecraft K3, Acom 2000 and vertical antennas. * Operators Vadim/R9DX, Igor/UA9CDC, Vitaly/RN4WA, Igor/RA9CMO and Sergei/UA9CGA will operate during the CQWW DX CW Contest (November 26-27th) as a Multi-Op entry. Activity outside of both contests will be mainly on 160/80 meters. However, they also plan to be active on 30/17/12/6 meters bands. QSL both

operations via R9DX (ex-UA9CLB). Take a look at their previous
operations at: http://radio-8q7dv.narod.ru
SOURCE: [GOLIST] Ohio/Penn DX Bulletin #1033

** Castle Havre (WCA ON-00102, BCA HT-041) in the Air **

The group ON5HY will be active on the 29th of October 2011 from
the Castle Havre (WCA ON-00102, BCA HT-041). They plan to work on
40 and 20 metre CW/SSB and 2 metres (local stations). QSL via
bureau or direct (SASE) to ON5HY. [ON4KEP]

==> + BPL: FCC TIGHTENS BPL INTERFERENCE RULES -- BUT NOT BY ENOUGH

On October 24, 2011, the FCC released the Second Report and Order in
its proceeding -- now in its 9th year -- to adopt rules for Access
Broadband over Power Line (BPL) systems. The Second Report and Order is
the final step in the Commission's effort to comply with the directives
of the United States Court of Appeals for the District of Columbia
Circuit, which in April 2008 ordered the FCC to correct errors it had
committed in the course of adopting rules in 2004. The Court acted in
response to a Petition for Review filed by the ARRL.

In July 2009, the FCC issued a Request for Further Comment and
Further Notice of Proposed Rule Making in which it proposed slight
modification of measurement standards for determining whether a BPL
```

system is in compliance with the maximum allowable levels of radiated emissions. In response, the ARRL argued that coupled with a scientifically valid extrapolation factor for determining those levels, mandatory notching of the amateur bands to a level 35 dB below the general emission limit would reduce the likelihood of harmful interference to amateur stations to a level that would permit any remaining harmful interference to be remedied on a case-by-case basis. The ARRL noted that its request for mandatory notching simply reflected the best practices of the BPL industry.

In the Second Report and Order, the Commission decided not to adopt its own proposal and also declined to adopt the ARRL's request for mandatory notching. Instead, the Commission has increased the requirement for BPL systems to be able to notch frequency bands to at least 25 dB, an increase of 5 dB from the existing requirement of 20 dB. The Commission also made technical adjustments to its rules for determining the distance between a power line and a measurement antenna and for determining site-specific extrapolation factors. Read more here <http://www.arrl.org/news/fcc-tightens-bpl-interference-rules-but-not-by-enough>.

==> + ON THE AIR: 2011 ARRL CW SWEEPSTAKES -- ARE YOU READY?

Steeped in tradition and still as exciting as ever, the 78th Annual ARRL Sweepstakes offers US and Canadian operators a fun-filled contest opportunity again this fall. First up is CW Sweepstakes during the weekend of November 5-7. "Last year's CW Sweepstakes provided some great activity with a number of new regional and divisional records," said ARRL Sweepstakes Contest Manager Larry Hammel, K5OT. "But you don't have to have a huge station with large antennas to have fun in Sweepstakes. Maybe you have 100 W and a backyard dipole or vertical. Or perhaps the challenge of a 5 W QRP effort hits your hot button this year. You will be amazed at the number of stations you can work as you trade exchanges all over the continent." ICOM is the Principal Awards Sponsor for the ARRL November Sweepstakes. Read more here <http://www.arrl.org/news/2011-arrl-cw-sweepstakes-are-you-ready>.

==> + ARDF UPDATE: NEW MEXICO HOSTS SUCCESSFUL FOXHUNTING CHAMPIONSHIPS

Results of the USA's 11th national championships of Amateur Radio Direction Finding (ARDF) are in the record books. Members of Albuquerque Amateur Radio Club went all out to provide a top-notch experience for fans of on-foot transmitter hunting, also called radio-orienteering and foxtailing. They came from 10 states and four other nations to see who would win medals by finding transmitters in the forests of central and northern New Mexico. From September 14-18, competitors took to the woods with directional antennas and receivers. They navigated not with GPS sets, but with maps and compasses. Their goal was to find all of their required transmitters and to get to the finish line in the shortest elapsed time. For fairness, the organizers didn't disclose the exact sites of the competition in advance. That kept anyone from doing advance reconnaissance in person or via Google

Earth. Competitors boarded buses on Saturday and Sunday mornings, not knowing where there were going. Read more here <http://www.arrl.org/news/ardf-update-new-mexico-hosts-successful-foxhunting-championships>.

==> + DXCC DESK OFFERS SPECIAL "PAPER APPLICATION OFFER" FOR ST0R QSLS

DXers around the world are now receiving QSL cards for the 2011 ST0R operation from the new DXCC entity of South Sudan. With next year's publishing deadline for 2011 results fast approaching on December 31, 2011, the ARRL DXCC Desk is offering a special reduced price option for those DXCC participants who have already made at least one application during 2011.

To take advantage of this offer, you must have already made a submission in the 2011 calendar year via either Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>) or via a traditional paper application. If you have already made an application in 2011, you may then submit a paper ST0R QSL (no other cards -- just the ST0R South Sudan card) following these rules:

- Enclose $5 (check, money order, credit card number or cash at your risk) for amateurs in the US.
- Enclose $6 (check, money order, credit card number or cash at your risk) for amateurs who reside outside the US.
- Enclose a self-addressed, stamped envelope for the return of the ST0R card.
- This special submission is only for the ST0R card.
- If any other card(s) are included, this will be considered a full submission subject to full fees, even if you already submitted in 2011.
- These submission conditions apply only if you have already made a submission in 2011 and this offer does not apply if you have not yet made your 2011 submission. All DXCC fees are in effect, as you can include this card with your regular submission.

This special offer expires on December 31, 2011 and will not be extended into 2012. If you have any questions concerning these procedures, please contact ARRL Awards Branch Manager Bill Moore, NC1L, via e-mail <nc1l@arrl.org>.

==> + ARRL WEBINAR SCHEDULED FOR NOVEMBER 3: HAMS, EMERGENCIES AND THE NEWS

ARES® and emergency groups have had their hands full in the past months. Time and time again, Amateur Radio has been called upon to provide emergency communications. In some places, the hams made the news and were highly praised, while in other places, the community never knew they were there because no one worked with the news media. On November 3, The ARRL's national Public Relations Committee will present a 90 minute webinar -- Hams, Emergencies and the News. Read more here <http://www.arrl.org/news/special-arrl-webinar-scheduled-for-november-3-em-ha

ms-emergencies-and-the-news-em>.

==> ARES®/NTS STUDY: ECAC SUBMITS INTERIM REPORT

ARES® and the National Traffic System (NTS) exist as the League's implementation of the basic principle stated in Part 97.1(a): "Recognition and enhancement of the value of the Amateur Service to the public as a voluntary non-commercial communication service, particularly with respect to providing emergency communications.' The ARRL Board of Directors' Programs and Services Committee (PSC) tasked the League's Emergency Communications Advisory Committee (ECAC) to recommend improvements to ARES® and NTS so that the Amateur Service can better serve the public in providing emergency communications. Assigned study topics include, but are not limited to, ARES® and NTS objectives and organizational structures, integration between ARES® and NTS, training, certification, and credentialing, and relationships with served agencies. Read more here <http://www.arrl.org/news/ares-nts-study-ecac-submits-interim-report>.

==> NOW YOU KNOW: THE NATIONAL TRAFFIC SYSTEM

The American Radio Relay League was founded in 1914 because Hiram Percy Maxim could not get a message via wireless from Hartford, Connecticut to Springfield, Massachusetts -- a distance of only about 30 miles. He had to rely on another wireless operator in Agawam, Massachusetts to relay his message to its intended recipient. This was the very beginning of what is now the National Traffic System (NTS). But what is the NTS?

The Public Service Communications Manual <http://www.arrl.org/public-service-communications-manual> defines the NTS as "a structure that allows for rapid movement of message traffic from origin to destination and training amateur operators to handle written traffic and participate in directed nets. These two objectives are the underlying foundations of the NTS. It's a system that operates daily, even continuously, with advanced digital links."

The NTS consists of operators who usually participate for one or two periods a week, and some who are active daily. The National Traffic System is an organized effort to handle traffic in accordance with a plan that is easily understood, and employs modern methods of network traffic handling. The NTS is not intended as a deterrent or competition for the many independently organized traffic networks. When necessitated by overload or lack of outlet for traffic, the facilities of such networks can function as alternate traffic routings where this is indicated in the best interest of efficient message relay and/or delivery.

One of the most important features of NTS is the system concept. No NTS net is an independent entity that can conduct its activities without concern for or consideration of other NTS nets. Each net performs its function and only its function in the overall organization. If nets

fail to perform their functions or perform functions intended for other nets, the overall system may be adversely affected. Nets may sometimes find it necessary to adopt temporary measures to ensure the movement of traffic.

According to ARES® E-Letter <http://www.arrl.org/ares-el> Editor Rick Palm, K1CE, the best way to get to know the National Traffic System is to hook up with a local NTS traffic net in your area where messages (Radiograms) are entered and others are accepted for delivery by mail or phone. Local clubs, repeater groups and ARES operators are all good sources for local info on NTS activity.

==> + FCC, FEMA, NOAA TO CONDUCT FIRST NATIONWIDE TEST OF EMERGENCY ALERT SYSTEM

The FCC, in coordination with the Federal Emergency Management Agency and the National Oceanic and Atmospheric Administration, will conduct the first nationwide test of the Emergency Alert System (EAS) at 2 PM EST (1900 UTC) Wednesday, November 9. According to FEMA, EAS participants -- broadcasters, satellite and digital radio and television providers, and cable and wireline video providers -- "provide a critical public service to the nation as the resilient backbone of alert and warning when all other means of communication are unavailable." Read more here <http://www.arrl.org/news/fcc-fema-noaa-to-conduct-first-nationwide-test-of-emergency-alert-system>.

==> SOLAR UPDATE

Tad "There has to be an invisible Sun <http://www.youtube.com/watch?v=6OSIrJbkrPQ>" Cook, K7RA, reports: On Friday, October 21, the daily sunspot number broke another record for Solar Cycle 24 when it rose to 207. You have to look back to November 26, 2003 when it was two points higher - 209 -- to find a number at least as high. Last Thursday, the daily sunspot number was 195, another record until the following day. The average daily sunspot number for the week was off by two points to 156.6, while the average daily solar flux rose nearly 8 points to 151.8. Propagation on HF is quite exciting right now, with 10 meters opening up worldwide daily. The predicted solar flux is 130 on October 27-29, 125 on October 30-November 3, 120 on November 4-5, and then 125 and 130 for November 6-7 and 135 on November 8-10. Flux values for the near term are expected to peak at 165 on November 17-18. The predicted planetary A index is 5, 7, 8 and 10 on October 27-30 and 5 on October 31-November 3, 8 on November 4-5 and 5 on November 6-10. Geophysical Institute Prague predicts quiet to unsettled conditions October 28, unsettled October 29, quiet to unsettled October 30 and quiet October 31 through November 3. Look for more information on the ARRL website on Friday, October 28. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Police's Invisible Sun

<http://en.wikipedia.org/wiki/Invisible_Sun>.

==> + SILENT KEY: FORMER ARRL MIDWEST DIVISION VICE DIRECTOR C. RICHARD DYAS, W0JCP

Former Midwest Division Vice Director C. Richard Dyas, W0JCP, of Oxford, Nebraska, passed away October 17. He was 90. Dyas -- a Charter ARRL Life Member -- was first elected Vice Director in 1975 and began his term on January 1, 1976. He resigned in 1985 to take care of his wife. In 1987, when then-ARRL Midwest Division Vice Director Richard Ridenour, KB0ZL, resigned, then-ARRL President Larry Price, W4RA, appointed Dyas to serve Ridenour's unexpired term. Dyas was laid to rest on October 21 with military honors by Oxford American Legion Post 219 in conjunction with the US Army National Guard Military Honors Team.

==> THIS WEEK ON THE RADIO

This week:

- October 29-30 -- CQ Worldwide DX Contest (SSB); 50 MHz Fall Sprint

Next week:

- November 5-6 -- Ukrainian DX Contest
- November 5-7 -- ARRL Sweepstakes Contest (CW)
<http://www.arrl.org/news/2011-arrl-cw-sweepstakes-are-you-ready>
- November 6 -- High Speed Club CW Contest; DARC 10 Meter Digital Contest
- November 9-10 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Amateur Radio Newsline(tm) Report 1785 - October 28 2011

Amateur Radio Newsline report number 1785 with a release date of
Friday, October 28th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams respond following a killer earthquake
in Turkey; the FCC again approves Access BPL without much protection to
any High Frequency operations including ham radio; the FCC, FEMA and
NOAA to hold the first ever national E-A-S test on November 9th and
Dayton announces the theme for Hamvention 2012. Find out what it is on
Amateur Radio Newsline(tm) report number 1785 coming your way right
now.

RESCUE RADIO: HAM RADIO RESPONDS TO EARTHQUAKE IN TURKEY

Amateur radio operators again became communications first responders on
October 23rd. This after a magnitude 7.2 earthquake struck the Van
region of Eastern Turkey. Amateur Radio Newsline's Norm Seeley, KI7UP,
has whats known so far:

--

News reports indicate that Ercis, a city of 75,000 in the mountainous
province close to the Iranian border was hardest hit. As this report
is being prepared the death toll stands at more than 450. Tens of
thousands have been left homeless and even more have lost all means of
communications.

To assist with the latter, hams associated with the Turkish national
amateur radio society TRAC are responding to assist with communications
in the quake devastated area. There are several frequencies in use on
the High Frequency bands being used to link with Turkish government
relief resources with some of the frequencies in use located outside
the amateur bandplan. This will be the standard until more equipment
gets to the region. When that happens, more traffic should move to the
normal Emergency Communications Centre of Activity frequencies.

In the meantime, hams world-wide are asked to avoid the emergency
traffic happening on 7.092 MHz on 40 meters. Also note that upper
sideband is being used to allow communications with government
stations.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As we go to air, close to 500 aftershocks have been recorded in the area since the earthquake. More amateur radio emergency communications information will be posted on the Turkish Wireless and Radio Amateur Society web pages when it is made available. These are in cyberspace at tinyurl.com/TRACwebsite (IARU Region 1)

**

RADIO RULES: FCC TURNS IT BACK TO HAM RADIO CONCERNS IN APPROVING MODIFIED BPL RULES

The Federal Communications Commission has affirmed its rules for Broadband over Power Lines or Access BPL with only minor modifications that do little to protect the Amateur Radio service and other High Frequency users from severe to intolerable interference.

According to the Second Report and Order issued by the FCC on October 25th, the rules it has created to govern Access BPL provide what it calls an appropriate balance between the dual objectives of providing for Access BPL technology that has potential applications for broadband and Smart Grid while protecting incumbent radio services against harmful interference.

Those incumbent radio services primarily comprise amateur radio operators and other users of the High Frequency spectrum. Hams started arguing against Access BPL when the commission first adopted rules for it in 2004, saying that in geographic areas where it was in trial that it severely interfered with their operations.

The American Radio and Relay League filed a lawsuit against the FCC in federal court, seeking full access to unredacted versions of staff technical studies upon which the rules were predicated. The ARRL was victorious. The FCC was ordered to supply the studies, allow public comment, and explain its method for measuring radiated emissions from Access BPL systems.

Now in its Second Report and Order, the commission said the resulting cycle of comments did not warrant any changes to the emissions standards but said that they were making several refinements none-the-less. And minor they are.

The Second Report & Order modifies the rules to increase the required notch filtering capability for systems operating below 30 MHz from 20 to 25 dB. It also establishes a new alternative procedure for determining site specific extrapolation factors and adopts a definition for the slant range distance used in the BPL measurement guidelines to further clarify its application. Slant-range refers to the diagonal distance of a measurement device to an Access BPL transmitter mounted at the top of a power pole.

Access BPL is said to support data rates of more than 500 Mbps and first and last mile ranges of up to 1,500 meters. The commission said that while it endeavored to minimize interference to ham radio operations that it remains a possibility.

In the end the Commission concluded that some cases of harmful interference may be possible from Access BPL emissions at levels at or below the Part 15 limits. However the regulatory agency feels that the potential benefits of Access BPL service warrant acceptance of what they call a negligible risk of harmful interference that can be managed and corrected as needed on a case-by-case basis.

The commission noted that Access BPL provides yet another way to get broadband to the masses. This is one of the key objectives of the Obama Administration, and more recently, the International Telecommunications Union.

The big question now is what action the ARRL might take to stop the poorer forms of Access BPL technology from being deployed. We will all likely learn that in coming weeks. (FCC, RW, Others)

**

RESCUE RADIO: FCC-FEMA-NOAA TO HOLD NATIONAL EAS TEST NOVEMBER 9

The first ever national test of the Emergency Activation System, or EAS, will soon take place. This as the FCC, in cooperation with the Federal Emergency Management Agency and the National Oceanic and Atmospheric Administration announce that they will conduct a nationwide activation of the system at 2 p.m. Eastern, 11 a.m. Pacific time on Wednesday, November 9th.

According to FEMA, all EAS participants are required to take part. This includes over the air radio and television broadcasters, other television providers, satellite and digital radio along with cable and wire-line video providers.

During the approximate three minute test, radio listeners will hear a message indicating that "This is a test." Although the EAS test may resemble the Routine Monthly EAS Tests or R-M-T's that most of us are already familiar with, there will be some differences in what viewers will see and hear.

While the audio message will be the same for all EAS participants, the video may differ. This is because of certain limitations within the Emergency Activation System itself. As a result, the video test message scroll may not be the same or indicate that "This is a test." According to FEMA's website, this is due to the use of the live E.A.N. code which is the same cipher that would be used in an actual emergency callout.

Although local and state aspects of the Emergency Activation System holds routine weekly and monthly basis, there has never been an end-to-end nationwide test of the system. That will change on November

9th.

The FCC says that it chose that date order to minimize disruption and confusion during the test. This is because it is near the end of hurricane season and before the severe winter weather season begins. Also the 2 p.m. Eastern time broadcast will minimize disruption during rush hours while ensuring that the test occurs during working hours across the nation.

And while personal radio emergency communications groups like ARES, RACES, REACT and the like are not required to take part in this first ever national EAS test, there is the off chance that some may activate as part of local or regional training exercises in resonse to a national EAS alert. (FEMA, FCC, others)

**

RADIO LAW: LOADS OF INTRUDERS ON 10 METERS

Meantime, pirate operations are showing up on 10 meters seemingly en mass. Following the improvement in propagation on 10 meters in recent weeks, it appears that there are many illegal users of this band. Most seem to be using low power FM chanalized radios to operate taxi services. Signals mainly seem to come from the western part of Russia.

Information regarding these intrusions is being gathered by RSGB Intruder Watch program. It will be used to support a complaint to the Russian authorities in an attempt to clear this nuisance from what should be an exclusive amateur band.

But all of the intruders may not be Russians. Others are obvious unlicensed operators using A-M and SSB here in North America. These are likely illegal 11 meter export type CB sets sold by unscrupulous dealers here in the United States and elsewhere that only require a tweek or a cut wire to put them onto the 10 meter band. If you hear these operators and have a way to record them, do so and then send the audio file or cassette tape to the FCC Enforcement people with a cover letter stating what you heard and when you heard it. Be as specific as you can. The more information that you can provide to the regulatory agency, the better. (GB2RS, ARNewsline(tm), others)

RADIO HISTORY: NATIONAL CAPITAL RADIO & TV MUSEUM IN EXHIBIT SPACE CRUNCH

A suburban Washington D.C. broadcast museum is literally facing a tight future. This due to less and less floor space for its ever increasing supply of exhibit material.

According to The Gazette, the National Capital Radio & Television Museum located in Bowie, Maryland has reached out to Bowie's leaders at a recent City Council meeting. Museum Executive Director Brian Belanger, KB3PRS, asked the members for help in .

Beyond space concerns, Belanger said the facility has other issues. These include a location is not easily reached by bus; a second floor that is not handicap accessible and it lacks climate control.

The private, nonprofit museum is located in the Harmel House, one of Bowie's historic landmark properties. Displays include an early wireless telegraph from Guglielmo Marconi, early crystal sets from the 1920s, Depression-era cathedral radios and more.

Belanger says the museum receives 2,000 visitors per year, and their spending boosts Bowie's economy. In reply to the museum's request, Bowie Mayor G. Frederick Robinson asked for a list of specific needs of the museum. Mayor Robinson added that the council will try to put Belanger together with the right people.

More about the museum and the history it shares with rthe nation and the world is on-line at http://radiohistory.org. The complete story of the museums needs is at tinyurl.com/museum-space. (RW, ARNewsline(tm))

**

RADIO LAW: ODESSA TEXAS TO CONSIDER NO TEXTING LAW

Odessa Texas City Council members will consider an ordinance regulating texting while driving during their upcoming meeting 6 p.m.. The ordinance would prohibit drivers from viewing, reading, sending or composing electronic messages or use any other application software such as Internet, games or pictures while driving.

Drivers would be exempt from the prohibition while their vehicle is stopped, if they are dialing for a phone call or ending a phone call, using the cell phone's global navigation system and if the device is on voice-activated or hands-free mode.

The ordinance would also not apply to drivers trying to communicate with an emergency response operator, a fire department, a law enforcement agency, a hospital, a physician's office or a health clinic. (City of Odessa, WV6H)

**

ENFORCEMENT: ANOTHER FLORIDA UNLICENSED STATION PROPOSED FINE

The FCC has issued a $15,000 Notice of Apparent Liability for Forfeiture, also known as a proposed fine, to John E. Criteser, Jr.. this for apparently willfully and repeatedly operating an unlicensed radio transmitter on the frequency 95.1 MHz in Lake Park, Florida.

On December 13th, 2010, and this past July 8th, agents from the Enforcement Bureau's Miami Office located the source of radio frequency transmissions on the frequency 95.1 MHz to Criteser's residence. Also, on July 8, 2011, agents from the Miami Office knocked on the door of Mr. Criteser's residence and requested to inspect the radio station located on the premises. The individual who answered the door called for "John" and shut the door. Soon afterward the agents observed that the radio station on 95.1 MHz ceased operation. Approximately 15 minutes later and after repeated knocks, Criteser opened the door, identified himself, and admitted to agents that he was operating a radio station on 95.1 MHz.

Now the FCC is having its say and it says that because Criteser operated this station consciously on more than one day, it finds that the apparent violations were not only willful, but also repeated. And based on the evidence before it, the regulatory agency finds that Criteser is eligible for the base fine of $10,000 for the illegal operation and an additional $5000 because the act was repeated.

Criteser was given the usual 30 days from the October 21st date the order was released to pay or to file an appeal. (FCC)

**

ENFORCEMENT: $10000 FINE IN SAN FRANCISCO FOR UNLICENSED OPERATION

Meantime, a similar situation out West where Daniel K. Roberts has been ordered to pay a monetary forfeiture in the amount of $10,000. This for allegedly operating an unlicensed radio broadcast station on 87.9 MHz in San Francisco, California. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

--

The FCC alleges that Daniel K. Roberts was the operator of Pirate Cat Radio which operated a radio broadcast station without a license issued by that agency. According to the FCC, back in 2008 Roberts began operating Pirate Cat Radio from a radio studio located at the Pirate Cat Caf&#65533; and Studio. At the time the NAL was issued, the Pirate Cat Radio website prominently featured Roberts, and described the radio station as an unlicensed low powered community radio operation located at the same address as the Pirate Cat Caf&#65533; and Studio.

The Enforcement Bureau's San Francisco Office issued numerous warnings and Notices of Unlicensed Operation to Roberts and Pirate Cat Radio concerning the unlicensed operations. These detailed the potential penalties for operating an unlicensed radio station and for further

On August 31, 2009, the San Francisco Office issued a Notice of Apparent Liability to Monetary Forfeiture in the amount of $10,000 to Roberts. This after finding that he apparently willfully and repeatedly violated section 301 of the Communications Act by operating an unlicensed broadcast station. After the issuance of the NAL, the broadcasts on 87.9 MHz in San Francisco ceased.

Roberts filed a response to the proposed fine on October 23, 2009, after receiving an extension of time from the San Francisco Office. In his reply, Roberts acknowledged his involvement with Pirate Cat Radio, but argued that he is not associated with the transmissions of the station. Roberts alleged that the shows were an internet streamed program service and that Pirate Cat Radio was being downloaded and broadcast by third parties. He also claimed that he was financially unable to pay the forfeiture amount, but failed to produce any documentation to support this claim.

But in finding against him, the FCC said that despite some alterations to the Pirate Cat Radio website, Roberts, as the operator of Pirate Cat Radio held himself out as the station manager and held Pirate Cat Radio out as a broadcast station, not just as a source of internet programming. The regulatory agency noted that Roberts solicited funds on the Pirate Cat Radio website stating that donations go towards monthly station cost of running the FM transmitter and help Pirate Cat Radio buy new radio station equipment.

Thev FCC also notes that in August 2009, Roberts accepted a certificate from the San Francisco Board of Supervisors. One which recognized Pirate Cat Radio - and we quote - "for its trailblazing efforts toward freeing the airwaves from corporate control, providing the community with training in radio broadcast skills, empowering voices ignored by traditional media outlets, and contributing to the advancement of the city's coffee culture."

After examining the response the FCC concluded that Roberts willfully and repeatedly violated section 301 of the Communications Act. It added that after considering the entire record in this matter, it found that neither a reduction nor cancellation of the proposed $10,000 forfeiture is warranted.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

The FCC has formally ordered Roberts to pay the $10,000 fine within 30 days or take his appeal to the next level. (FCC)

**

ON THE AIR: NEW 10 METER ALL DIGITAL NET ANNOUNCED

A new digital mode net to encourage use of these modes on 10 meters will be held every Saturday and Sunday at 1800 UTC. This according to Andrew O'Brien, K3UK, who says via the Digital Radio Yahoo that he is

creating such a weekly gathering after noting that the band is open to distant communications more and more these days.

The net will gather on 28.125 MHz Upper Sideband, plus or minus for QRM, at 1800 UTC. R S ID and Call ID will be used to help people pick out the net and modes used. The Olivia 500/8 mode will be used to call up the net but the it may switch modes as needed.

K3UK says that the gathering will usually run 30 minutes and will try to include some brief announcements relative to digital modes on HF. It will also use the K3UK sked page at www.obriensweb.com/sked for on-line coordination during each session. (K3UK)

HAM HAPPENINGS: VA3AAR TO CELEBRATE THE 150th BIRTH OF THE INVENTOR oOF BASKETBALL

Special event station VA3AAR, sponsored by Canada's Almonte Amateur Radio Club, will be taking to the air on Sunday, November 6th beginning at 00:00 UTC for a 24 hour operation. This to celebrate the 150th anniversary of the birth of Dr. James Naismith.

Dr. Naismith who was born in 1861 was a Canadian-American sports coach and innovator. He invented the sport of basketball in 1891 and is often credited with introducing the first football helmet. He also wrote the original basketball rulebook, founded the University of Kansas basketball program, and lived to see basketball adopted as an Olympic demonstration sport in 1904 and as an official event at the 1936 Summer Olympics in Berlin.

To honor the Almonte native's accomplishments the Almonte Amateur Radio Club will be operational on 75, 40 and 20 meters from the Mill of Kintail near Dr. Naismith's birthplace. If you contact VA3AAR during this event please QSL direct to VE3NCE, P.O. Box 1644, Almonte, Ontario, K0A 1A0, Canada. More information is at the club website at www.almontearclub.ca. (Almonte ARC)

CHANGING OF THE GUARD: FORMER ARRL MIDWEST VICE DIRECTOR W0JCP - S.K.

The changing of the guard in amateur radio continues. This with word of the passing of former ARRL Midwest Division Vice Director C. Richard Dyas, W0JCP, of Oxford, Nebraska on October 17th.

Dyas who was a Charter ARRL Life Member was first elected Vice Director in 1975 and began his term on January 1, 1976. He resigned in 1985 to take care of his wife. In 1987, when then-ARRL Midwest Division Vice Director Richard Ridenour, KB0ZL, resigned, ARRL President Larry Price, W4RA, appointed Dyas to serve Ridenour's unexpired term.

Dyas passed away at age 90. He was laid to rest on October 21st with military honors by Oxford American Legion Post 219 in conjunction with the US Army National Guard Military Honors Team. (ARRL)

RADIO TO SPACE: NASA SEEKING NEW MEMBERS FOR THE ASTRONAUT CORPS

NASA says that it will seek applicants for its next class of astronaut candidates in early November. This, in the face of a National Research Council report that warned the corps was getting too small due to attrition and other factors.

The space agency will not be seeking hundreds of new astronauts. Rather there will be room for between 8 to 12 new members of the Corps. Also, this next class of astronauts won't necessarily be training as pilots. Rather the focus will instead be on long-duration missions aboard the International Space Station.

The class will also include a broad look at such topics as geology and geophysics, Ross said. The quest for astronauts comes on the heels of a September report from the National Research Council, which argued that the United States must maintain a strong astronaut corps, even though human space flight has been temporarily stalled for NASA and many astronauts have retired or quit this year.

Janet Kavandi is the Director of Flight Crew Operations at the Johnson Space Center in Houston, Texas. She says that for scientists, engineers and other professionals who have always dreamed of experiencing spaceflight, this is an exciting time to join the Astronaut Corps.

To learn more or to apply to become an Astronaut please visit astronauts.nasa.gov on the World-Wide-Web. Also remember that with the

30 year history of the SAREX and ARISS programs that holding a valid Amateur Radio license and being an active ham could be a plus for anyone hoping to make it into this elite group of voyagers into the unknown. (NASA)

RADIO FROM SPACE: ROSAT DE-ORBITS INTO THE BAY OF BENGAL

A follow-up on our story of the imminent return to Earth of a defunct German research satellite. According to news reports, the ROSAT de-orbited on Sunday, October 23rd and crashed into the Bay of Bengal off the coast of India.

Most parts of the minivan sized research satellite were expected to burn up as they hit the atmosphere. However up to 30 fragments weighing a total of 1.87 tons could have crashed onto the planets surface. Luckily that surface turned out to be a watery grave.

ROSAT was an acronym for the R"ntgen Satellite. It was an Xray observatory developed through a cooperative program between Germany, the United States, and the United Kingdom. The satellite was proposed by the Max Planck Institute. It was designed, built and operated in Germany but was launched by the United States on June 1, 1990. The satellites mission actually ended after almost nine years, on February 12, 1999. More about this now fallen bird is on-line at tinyurl.com/rosat-deorbits (NASA)

**

HAM RADIO IN SPACE: RECORDINGS SOUGHT ON PROSPERO SATELLITE

The team working on reactivating the ageing Prospero satellite would appreciate any recording that can be made of the 137.560 MHz downlink. If you hear and can record transmissions heard on that frequency, please send it by email to rjad (at) mssl (dot) ucl (dot) ac (dot) uk. More on Prospero is available at tinyurl.com/prospero-comeback. (ANS)

**

ON THE AIR: COLORADO 6 METER BEACON BACK ON THE AIR

The Colorado 6 Meter Beacon is back on the air. This is the beacon that originally maintained by Glenn and Karen Schultz and sported the calls W0IJR and KA0CDN. With the passing of W0IJR, the KA0CDN call will be the sole ID for this machine.

The new beacon was built from the ground up by N0YE, W0BA, N0POH and W6OAL. The operating frequency is 50.065 Mhz. Further information on it can be found on-line at www.rmvhf.org. KA0CDN adds that she would appreciate QSN report's of its reception. (W6OAL)

**

DX

In DX, JK1KSB will be on the air as 8Q7SO from Mirihi Island Resort in the Maldives between October 28th and November 3rd. Activity will be holiday style on 80 to 10m using CW, RTTY, SSB and PSK31. QSL via JK1KSB, either via the bureau or to the address on QRZ.com.

I0WDX will be on the air as 8Q7CC from the Maldives between November 2nd to the 12th. A web page for this operation is on-line at dxcoffee.com/8q7cc. QSL via his home callsign, direct only.

DK7PE will be active as TL0CW from the Central African Republic through November 3rd. No information on what modes or frequencies will be used for this one. If you work him, QSL via his home call.

G3RWF will be active as 5X1NH from Uganda for three weeks, starting on November 23rd. He will concentrate on the low bands. QSL via his home callsign.

OS1T will be active as PJ4J on Bonaire Island through November 9th. His focus will be on RTTY, SSB and the WARC bands, but other bands may also be used depending on the propagation. QSL as directed on the air.

GM3WOJ will be activating ZK2V from the island of Niue in the Pacific for the next few months. He will be joined by GM4YXI until the end of October and the call ZK2X will be used in the CQ World Wide SSB Contest. QSL as directed by the respective operators

Lastly, LA9DL and LA6VM will be active from Bhutan using the callsigns A52DL and A52VM, respectively, between November 3rd to the 13th. Operations will be on 80 through 10 meters using IC-7000s and amps. Listen for A52DL to be mainly on PSK and SSB, while A52VM will be mostly on CW. QSL via their home callsigns.

(Above from various DX news sources)

THAT FINAL ITEM: INTERNATIONALLY CONNECTED ANNOUNCED AS THEME OF HAMVENTIONr 2012

And finally this week word that "Internationally Connected" will be the theme of the 2012 Dayton Hamvention. This according to General Chairman Michael Kalter, W8CI, who says that this premise emphasizes how amateur radio continues to build connections among amateur radio operators from all over the world.

Kalter, who is returning for another year as general chairman, noted that many international attendees return each year to meet other hams that they have talked to on the radio. He says that in 2012 the Hamvention is acknowledging the important role that ham radio plays in promoting this very special international goodwill.

To accomplish this, Kalter says that he has added a new committee whose task will be to make visiting Hamvention even more enjoyable for international guests. Assistant general chairman Joshua Long, KD8BVB, noted that almost all the committee chairman are returning and that

many other volunteers have already committed to making 2012 an even better Hamvention than in years past.

The 2012 Dayton Hamvention 2012 is scheduled for May 18th to the 20th at its longtime of of the Hara Arena in suburban Dayton, Ohio. It is the world's largest amateur radio gathering and brings together some 20,000 people to the greater Dayton area each year. More information is already on line at www.Hamvention.org or by e-mail to media (at) Hamvention (dot) org. And less we forget, Amateur Radio Newsline will be there as well. (Dayton Hamventionr)

GB2RS NEWS

Sunday 30 October 2011

The news headlines:

* Amateurs help Turkish earthquake relief

* T32C sets new QSO record

* K4LCD gets special LF permit

On 23 October an earthquake struck the Van region of Eastern Turkey. Radio Amateurs from the Turkish national society, TRAC, are responding to assist with communications in the area. Please avoid causing QRM to emergency traffic on 7.092MHz USB. USB is being used to allow communications with a government station.

The Five Star DXers Association T32C DXpedition to Christmas Island has now finished. Despite initial difficulties with their container of equipment not reaching the island, the team finished with over 213,000 contacts and this is the first time an expedition has exceeded 200,000 QSOs, congratulations to all involved. Of that total, it looks like there were 48,914 individual callsigns worked. The total number of QSOs into Europe was 59,692. As the team start making their way back home more details will become available.

The FCC has issued an Experimental License grant to K4LCD to operate on 130kHz and 500kHz with the callsign WF2XXQ. The permit is valid until 1 October 2016 and is tied to the ongoing Very Low Frequency Amateur Radio Experiment. More information is available online at tinyurl.com/4235u7s.

A well known low cost airline has added Manchester to their routes flying to Memmingen in Germany. This may be of interest to those thinking of travelling to the HamTronic amateur radio exhibition, because Friedrichshafen is about an hour's drive from Memmingen. It is also possible to make the journey by train. The show will take place in Friedrichshafen from 22 to 24 June 2012.

Due to an administrative mistake, last week's GB2RS Rallies and Events and Local News contained incorrect information. The editorial team apologise unreservedly for the inconvenience this caused. The procedure for preparing Local News has now been revised and the chance of a re-occurrence has been significantly reduced.

And now for the details of rallies and events for the coming week

Today, 30 October, is the second day of the North Wales Rally is at John Bright School, Llandudno LL30 1LF. Opening at 10am, there will be trade stands, a Bring and Buy, catering and disabled facilities. Details from Liz Cabban, GW0ETU on 07760 190 355 or lizcabban@yahoo.co.uk.

Today, 30 October, sees the Holsworthy Amateur Rally at Holsworthy Community College, Victoria Hill, Holsworthy EX22 6JD. Details from Roger Williams, on 07773 983 691.

The Foyle & District ARC Rally will take place on 6 November at the Best Western White Horse Hotel, 68 Clooney Road, Derry BT47 3PA. Doors open at 12 noon and there will be trade stands, the RSGB QSL bureau and IRTS in attendance. The West London Radio & Electronics Show, otherwise known at the Kempton Rally, will take place on 6 November at Kempton Park racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. Doors open at 10am and there will be trade stands, RSGB bookstall and lectures. More information from Paul, M0CJX, on 08451 650 351.

Now for the news of special events

Caddington Scout and Cub group is holding a communication week starting on 14 November to be held at Scout HQ, Dunstable Road, Caddington, Bedfordshire. They will be using the callsign GB1CSC. The station will be run by Mark, G1AYH and he asks that if you hear the Scouts and Cubs, please give them a call.

MM0DHQ will be transmitting from Kilwinning Abbey, in Scotland as part of Castles and Stately Homes on the Air on 1 November. All details can be found at www.cashota.co.uk.

Almonte Amateur Radio Club in Canada will be running a 24 hour special event station, VA3AAR, on 6 November to celebrate the 150th anniversary of James Naismith, the inventor of basketball. A commemorative QSL card will be available.

And now the HF DX news compiled from 425 DX News and other sources

3XY1D will be on the air from Guinea until 1 November. Operation will be on 6 through to 160 metres using CW, SSB and digital modes. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or via the bureau.

LA5UF will be on the air from Easter Island as CE0Y/LA5UF between 3 and 11 November. Activity will be on CW and PSK31. QSL only via his home callsign.

A number of WD2XSH 500kHz experimental stations will be on the air on 3 November to mark the 105th anniversary of the Berlin International Radiotelegraphic Convention. According to the ARRL, stations on the 495-510kHz band will call CQ on 500kHz and then QSY to complete the QSO. Stations operating from 461- 478kHz will call CQ on 474.5kHz and then QSY. Special beacons may also be operating from 476-478kHz and 508-510kHz. For a complete list of stations participating in the WD2XSH

experiment, as well as information on how to send your reports, please see the WD2XSH website at www.500kc.com.

Bill, N7OU is operating from the South Cook Islands until 7 November using the callsign E51NOU. He will then travels to the North Cook Islands where he will stay until 22 November. He will be using the same callsign from both DXCC entities so recommends that operators are careful with logbook entries.

TU2T will be on the air from the Ivory Coast until 11 November. Direct QSLs go via I2YSB and bureau cards go via IK2CIO.

VK7ZX will be on the air from King Island off the Tasmania coast from 3 to 7 November, mainly on 20m and 40m. You can find out more at www.kingislandlight150.com. QSL via VK7ZE, either direct or via the bureau.

Now the contest news

Today, 30 October, is the second day of the CQWW DX SSB contest, finishing at 2359UTC. Use SSB on all contest bands from 3.5-28MHz and exchange RST plus Zone, which is 14 for the UK. 1 November sees the 144MHz UK Activity Contest taking place from 2000 to 2230UTC using all modes. The exchange is signal report, serial number and locator.

Next weekend, the Marconi CW Contest runs for 24 hours from 1400UTC on the 5th on the 144MHz band. There are 6- and 24-hour sections for single operator fixed stations and all others, so it need not constitute a huge commitment. Incidentally, this contest runs concurrently with an IARU co-ordinated contest. You can submit a single set of logs for entry to both events, because entries will be submitted to the IARU event unless you specifically request otherwise. The exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 17th to the 23rd of October, compiled by Neil Clarke, G0CAS on the 24th of October

Numerous sunspot groups were visible every day with up to 11 groups on the 17th and the 21st. Most were small and quiet but a couple of groups were large enough and magnetically complex to produce M class solar flares. Solar activity increased to moderate when M class flares took place on the 20th, 21st and the 22nd. On the 22nd a filament erupted producing a coronal mass ejection and hours later another spectacular coronal mass ejection took place with the M class solar flare. Both the STEREO and SOHO spacecraft took some amazing images of both events. Solar flux levels increased from 153 units on the 17th to a new high for this cycle at 168 units by the 21st. The average was 156. The 90 day solar flux average on the 23rd was 122 units, that's four units up on last week. X-ray flux units varied little day to day and the average was B8.8 units. Geomagnetic activity was quiet every day and the average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 450 kilometres per second on the 17th to a slow 270 kilometres per second by the 23rd. Particle densities were

low with levels no higher than 5 particles per cubic centimetre during the period. As one would expect, Bz showed little variation every day and only fluctuated between minus and plus 6 nanoTeslas. With the main factors influencing HF propagation even more favourable than in earlier weeks, MUFs at times verged on 40MHz and all continents were again workable up to 28MHz.

Over recent days some strange propagation as taken place on 28MHz with stations heard and worked at good signal strengths with distances between 60 and 200 miles apart within the UK. Also, stations with a distance of between 250 and 300 miles away are much stronger than normal. It would appear not to be Sporadic-E, tropo or backscatter propagation. Many experienced operators have commented that they have never heard anything like this before over many decades.

And now the solar forecast. Looking at the last few solar rotations, this would suggest that the quiet side of the Sun will be looking our way. Solar activity should be mostly low, with only C class solar flares taking place, but an M class flare cannot be totally ruled out. Solar flux levels should be around the 120s for most of the week. Geomagnetic activity should be quiet at first but during the second half of the week activity could increase due to a small coronal hole. A warning, though unlikely, that if solar activity increased to high then a coronal mass ejection could increase activity for several days. MUFs during daylight hours at equal latitudes should be around 30MHz. Darkness hour lows should be around 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 36MHz. The optimum working frequency with a 90 per cent success rate will be about 30MHz. With the path going over the equator into the southern hemisphere it should not be affected by any weak to moderate levels of geomagnetic activity.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 30 October Midland Amateur Radio Society is visiting the North Wales Rally at Llandudno. Details from Norman, G8BHE, on 07808 078 003.

On Sunday 30 October South Birmingham Radio Society is visiting the North Wales Rally at Llandudno. Contact Don, on 01214 581 603.

On Monday 31 October Gloucester Amateur Radio & Electronics Society is having an informal evening and is on the air on HF. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 31 October South Birmingham Radio Society is holding its AGM preview and planning for field days and events. Contact Don, on 01214 581 603.

On Tuesday 1 November Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 1 November Friskney and East Lincolnshire Communications Club is having a talk on the weak signal propagation reporter network by Charles. Contact Chris, M0MFP, on 01507 442 240.

On Tuesday 1 November Loughborough & District Amateur Radio Club is visiting Ulverscroft model railway from 7.30pm. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 1 November Wythall Radio Club starts its beginners Morse class and is having a demo of club merchandise. Details from Colin, M0GJM, on 07598 540 507.

On Wednesday 2 November Midland Amateur Radio Society is on the air and holding training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 2 November South Birmingham Radio Society is holding its AGM. Contact Don, on 01214 581 603.

On Wednesday 2 November South Kesteven Amateur Radio Society is having a talk on baluns by Nigel Booth, M0CVO. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 2 November Telford & District Amateur Radio Society is on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 3 November South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603. On Friday 4 November Coventry Amateur Radio Society is having a bangers & mash night. Contact John, G8SEQ, on 07958 777 363.

On Friday 4 November South Birmingham Radio Society is holding a construction evening. Contact Don on 01214 581 603.

On Sunday 6 November South Birmingham Radio Society is visiting the West London Radio and Electronics show at Kempton Park. Contact Don, on 01214 581 603.

NEWS FOR THE NORTH OF ENGLAND On Monday 31 October Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 31 October Sheffield Amateur Radio Club is having a quiz or video evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 31 October South Manchester Radio and Computer Club is holding a technical forum. Details from Ron, G3SVW, on 01619 693 999.

On Monday 31 October Thornton Cleveleys Amateur Radio Society is visiting the communications museum at RAF Henlow with Ted, G3WBB. Details on the web at www.tcars.org.uk.

On Tuesday 1 November Chester & District Amateur Radio Society is checking progress on the L/C meter project. Details from Barbara Green on 07957 870 770.

On Tuesday 1 November Stockport Radio Society is having a presentation on contest DXpeditions by Carsten Steinh&#65533;fel, G0SYP/DL1EFD. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 2 November Denby Dale Radio Club is having a visit by RSGB Regional Manager Harold Scrivens, G0UGE, plus a talk by Andy, M0GGR on his visit to Asiatic Russia. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 2 November Hornsea Amateur Radio Club is having a club night. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 3 November Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 3 November South Manchester Radio and Computer Club is celebrating the 50 years of membership of Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

NEWS FOR NORTHERN IRELAND We start with advance notice that Mid Ulster Amateur Radio Club will be holding a Foundation course and exam over Friday 25 and Saturday 26 November 2011. Anyone wishing get on the first step of amateur radio should register for the course by Monday 7 November 2011. To register, complete the form at to www.muarc.com/courseapplicationform.htm. More information can be gained by contacting the exam secretary Martin, MI0YMF, on 02838 852 712.

On Thursday 3 November Bangor & District Amateur Radio Club is holding its annual surplus sale. Contact Mike, GI4XSF, on 02842 772 383.

NEWS FOR SCOTLAND On Tuesday 1 November Borders Amateur Radio Society is having a club contest. Contact MM0YLG on 07944 912 751.

On Tuesday 1 November Livingston & District Amateur Radio Society is holding its AGM. Details from Norman, on 07740 946 192.

On Thursday 3 November Aberdeen Amateur Radio Society is holding a junk sale. More information from Lewis, GM4AJR, on 01224 575 663.

On Thursday 3 November Moray Firth Amateur Radio Society is having its President's Address by Bill Cecil, GM3KHH. Contact Barry, GM4TOE, by email to gm4toe@btconnect.com.

On Friday 4 November Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Colchester Radio Amateurs will be holding an Advanced Licence Exam on Monday 5 December 2011. The exam will take place at 7pm in Room 1 at St Helena School, Sheepen Road, Colchester CO3 3LE. Please be aware this is an exam only and not a course, there are no tutorial sessions. The exam fee is £37.50 plus a contribution of £10 per candidate for the room hire. The closing date for applications is Monday 7 November. For more information please contact Ed, M0HDK, on 01473 682 280 or email ederbes@globalnet.co.uk.

On Tuesday 1 November Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 1 November Chelmsford Amateur Radio Society is having a talk on IOTA by Martin Atherton, G3ZAY. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 2 November Norfolk Amateur Radio Club is holding a table top sale. Details from Chris Danby, G0DWV, on 01603 898 678. On Wednesday 2 November Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Wednesday 2 November Worthing & District Amateur Radio Club is having a talk on the Shoreham Fort Project by Gary Baines. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 3 November Cray Valley Radio Society is holding its annual surplus sale. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 3 November Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 3 November Horsham Amateur Radio Club is having a talk by John Narborough. Details are on the web at www.harc.org.uk.

On Thursday 3 November Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 3 November Verulam Amateur Radio Club is having a social evening with the GB3VH repeater group at the Queens Head, Sandridge. Details from Tony, 2EOWAP, on 01727 853 087.

On Friday 4 November Crystal Palace Radio and Electronics Club is having an evening of short talks featuring wood, knots and the history of electricity. Contact Bob, G3OOU, on 01737 552 170.

On Friday 4 November Loughton & Epping Forest Amateur Radio Society is having a talk on Logbook of the World, eQSL and the QSL Bureau by Dave Cutts, M0TAZ & Marc Litchman, G0TOC. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday 4 November Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239 371.

On Friday 4 November Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 5 November Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Sunday 6 November Worthing & District Amateur Radio Club is having a breakfast meeting at the Goring Cafe. Contact Phil, G4UDU, on 01903 816 684.

NEWS FOR THE SOUTH WEST On Monday 31 October Bristol RSGB Group is having a talk on forensic science and the mobile phone by Nick, G8YJM . Details from Robin, G3TKF, on 01225 420 442.

On Tuesday 1 November West Devon Radio Club is holding a general meeting and natter night. Further information from Jules Cuddy, M1AGY, on 01752 291 588.

On Wednesday 2 November Thornbury & South Gloucestershire Amateur Radio Club is having part 2 of the talk on juke box restoration by Mike, M1DPB. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 2 November Trowbridge & District Amateur Radio Club is judging entries for the G2BQY & G4UNU Constructor's Cup. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 3 November South Bristol Amateur Radio Club is holding a committee meeting. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 3 November Swindon & District Amateur Radio Club is having a talk on electrical thermography by Stuart, 2E0SUL. Contact Den, M0ACM, on 07810 317 750.

On Thursday 3 November Yeovil Amateur Radio Club is having a talk on eQSL by M6AIG. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 4 November North Bristol Amateur Radio Club is holding a committee meeting. More information from Dick on 01454 218 362.

On Friday 4 November Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Tuesday 1 November Wrexham Amateur Radio Society is having a talk by a guest speaker. More information from Patrick, 2W0HUU, on 07947 701 927.

On Friday 4 November Chepstow & District Amateur Radio Society is having a talk on early radar development. More information from Paul, on 01594 842 580.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1034
BID: $OPDX.1034
October 31, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W4/VP9KF, K6VNX, KH6BZF, N7UN, K8GI, K8YSE, W8GEX (60m News), N0AT, 9M6DXX, AT International, DK8JB & The DX News Letter, DL1SBF, DL6KVA, DxCoffee.com, DX-World.Net, EA5RM, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3ZVW, HA1AG, HA5PP, I1HYW, I1JQJ/IK1ADH & 425 DX News, OH2BN, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PY7XC, RSGB IOTA Web Site, SM3CVM, TA1HZ, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

*** EDITOR'S SPECIAL NOTES (by Tedd, KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 21st-October, through Friday, 28th-October there were 252 countries active. Countries available: 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/m, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9C, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. Operator Hrane/YT1AD, Dragan/YT3W, Dimitri/RA9USU, Carlos/EA1IR and members from the 3V8BB Club (Loutfi and Alea) will be active as 3V8BB or 3V0A during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single or Multi-2 entry. QSL via YT1AD.

3V, TUNISIA. Look for 3V8ST, the club station at the headquarters of the Tunisian Scouts in Tunis, to be active for the first time during the CQWW DX SSB Contest (October 29-30th). QSL via the Bureau or direct to: Amateur Radio Club Station Tunis, P.O. Box 339, Tunis El-Mahraj�ne 1082, Tunisia.

3XY, GUINEA. The 3XY1D team is now active until November 1st. Activity will be on 160-6 meters using CW, SSB and the Digital modes. As of 0638z, October 27th, the 3XY1D operation has made 35601/QSOs (9113/SSB, 25833/CW, 89/PSK and 566/RTTY). Online logs are available at:
http://www.dl7df.com/3xy1d/index.html
QSL via DL7DF, direct or by the Bureau.

4O, MONTENEGRO. Tonno, ES5TV, will be active as 4O3A during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. Activity will be from Ranko, 4O3A, superstation. QSL via 4O3A, direct or by the LoTW .

4W6A FINAL PRESS RELEASE (dated October 24th). "The 4W6A DXpedition is now history. The team of Stuie, VK8NSB (team leader); Oliver, VK8DX; Bernd, VK2IA; Ant, MW0JZE; Tim, M0URX (also QSL manager); John, 9M6XRO; and Steve, 9M6DXX; plus pilot Col, MM0NDX, and assistant QSL manager Kev, M0TNX, would like to take this opportunity to thank all the DXers who made a QSO with 4W6A for their patience during the big pile-ups.
Copies of the licence and other validation material have been sent to both the DXCC desk and the RSGB IOTA Manager and 4W6A has been accepted for DXCC and as OC-232 for IOTA. Logs were uploaded to Logbook of The World a few days after the end of the DXpedition. QSL cards have been ordered and we are awaiting the final proof of the QSL design from the printer. As of 23 October, QSLs for over 11,000 QSOs • 27% of the total log • have already been requested either direct or by OQRS. And this less than a month after the end of the DXpedition! These requests have already been processed and the direct QSLs will be sent as soon as the cards are received from the printers. Bureau cards requested by OQRS will be sent out soon afterwards, with direct mailings to the major QSL bureaus of the world.
A report on the DXpedition with a few photos and videos can be found at <www.m0urx.com> while 150 more photographs have been uploaded to:
http://www.4w6a.com/about-timor-leste/gallery.html
More videos taken by VK8DX and MW0JZE can be found on YouTube - search '4W6A' and look for the videos uploaded by 'mw0jze'.
Finally, we would once again like to publicly thank all the DX groups, companies and individuals that so generously sponsored this DXpedition. All are listed on the 4W6A website at: http://www.4w6a.com/sponsors
We look forward to seeing you from the next location • wherever that may

be..... 73,Steve, 9M6DXX, 4W6A Team Member"

5R, MADAGASCAR. Eiki, JH8JWF, will be active as 5R8A from Antananarivo during the CQWW DX SSB Contest (October 29-30th). QSL via his home callsign.

5Z, KENYA (Update/Date Change). Sigi, DL7DF, will be on holiday with his XYL Sabine in Kenya between November 23rd and December 6th. He plans to be active as 5Z4HW and operate on all bands, 160-10 meters using CW, SBB, RTTY, PSK31 and SSTV as often as possible. The location is the Diani Beach at the coastline of Kenyanear Mombasa. QSL via his home callsign, direct or by the DARC Bureau. For more details and updates, visit: http://www.dl7df.com/5z/index.html

7Q, MALAWI (Update). Operators Rob/GM3YTS and Gav/GM0GAV will be active as 7Q7GM between October 31st and November 13th. Activity will be CW only with a focus on the low bands, especially 160/80m. They are hoping to have an online log available. Look for all QSOs to be uploaded to LoTW as soon as they return home. QSL via GM4FDM. They now have a Blog page for this operation with news and updates at: http://7q7gm.blogspot.com

7U, ALGERIA (Special Event). Members of the Algerian Radio Amateurs (ARA - 7X2ARA) will activate 7U1MA during the month of November. Activity is to celebrate the opening of Algiers new subway (Metro Algeria - suffix of the callsign). Operations will be on HF bands (modes not provided). QSL via the Bureau or direct to: Amateurs Radio Alg&#65533;riens, PO Box 1, ALGER RP 16000, Algeria. No eQSL and LoTW. Visit the ARA Web page at: http://www.ara-dz.org

9H, MALTA. Zoltan, HA5PP, will be active as 9H3PP during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. He will be there between November 24-29th. Activity outside of the contest will be on 80-10 meters mainly on CW (possibly some SSB) while testing out the antennas for the contest. QSL via HA5PP.

9TH AAW ACTIVITY. Frank, IZ7AUH/AK1CQ, announced that he will be active in the 2012 9th Antarctic Activity Week (AAW), which will take place February 20-26th, once again using both of his special callsigns II7ANT (WAP-12) and IR7ANT (WAP-74). QSL via IZ7AUH, either direct, by the Bureau or via OQRS at: http://www.iz7auh.com
He reports, "After a long busy time, I'm now answering the QSL received during my past AAWs activities. Everybody who did send me a card for my past activities will get the QSL via Bureau, while for those who have not still made a request can do it directly through my OQRS system."

AH0, MARIANA ISLANDS. Kazuo, JH8PHT, will be active as AH0KT from Saipan on Northern Mariana Island (OC-086) between November 24-28th. QSL via his home callsign. PLEASE do not QSL to Saipan.

BX5, TAIWAN (AS-020). Jimmy, BX5AA, from Changhua City, Taiwan (WLOTA 0022), will be active during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (10m)/High-Power entry. Jimmy states that BX5

is a rare prefix for Taiwan (CQ 24). QSL via BX5AA, direct (see QRZ.com).
Visit his Web page at: http://blog.yam.com/bx5aa

CY0, SABLE ISLAND (Update). Operators Ron/AA4VK, Jeff/N1SNB and Murray/
WA4DAN are scheduled to be active as homecall/CY0 between December 29th
and January 6th. It is confirmed that the Aircraft has been chartered.
For more details and updates, watch the Web page at:
http://www.cy0dxpedition.com
ADDED NOTE: Since this operation is going to take place, the planned
July 2012 operation is no longer on the calendar.

DP0, ANTARCTICA (AN-016). Operators Felix/DL5XL and Las/DL1LLL will be
at Neumayer III Station (WAP DEU-08) in December. They will be using the
club station's callsign DP0GVN. A new amplifier (Acom 2000A) has been
shipped to Neumayer Station, so they hope to have a good signal on the
bands. DL5XL will return back to Germany at the end of February 2012,
while DL1LLL will remain over the winter at the Neumayer III Base until
February 2013. Felix was asked about a possibility to activate some
special spots such as Palaoa Observatory or Neumayer/SANAE Emergency base
(both "New One WAP"), while down there. Felix said, "I will not promise
any portable activities, but I am aware of the WAP chasers' interest in
these new locations and will try to do my best if there is free time."
TNX DL5XL @ WAP website <www.waponline.it>

E5, SOUTH COOK ISLANDS. Oliver, W6NV, is now active as E51NNV from the
Island of Rarotonga (OC-013, WFF E5FF-002); his length of stay is unknown.
Activity has been on 10 meters CW/SSB. QSL via his home callsign. Reports
indicate that Oliver is part of a Multi-Op team which will be active during
the CQWW DX SSB Contest (October 29-30th) as E51Z. Operators mentioned
are Bill/WB6BFG (E51BFG), Oliver/W6NV (E51NNV) and Dick/N6AA. QSL E51Z
via K6VNX, direct or by the Bureau. QSL also via LoTW.

EA6, BALEARIC ISLANDS. Juan, EA5BM, will bw active as EA6FO from Ibiza
Island (EU-004) during the CQWW DX CW Contest (November 26-27th); the
category TBA (not yet decided). QSL via QRZ.com's instructions.

ED9, CEUTA & MELILLA. Operators Paul/DF4SA, Jorge/EA9LZ, Axel/DL6KVA,
Zoli/HA1AG, Laszlo/HA3NU and Robert/N5KO will be active as ED9M from
Ceuta during the CQWW DX CW Contest (November 26-27th) as a Multi-Single
entry. The team will use Spiderbeams and vertical antennas. QSL will be
via HA1AG. Log will be automatically uploaded to LoTW "AFTER" the CQWW
log submission deadline.

ER4, MOLDOVA. Serge, UT5UDX, will be active as ER4A during both the CQWW
DX SSB Contest (October 29-30th) and CQWW DX CW Contest (November 26-27th)
as a Single-Op/All-Band entry. QSL via RA4LW direct only.

FM, MARTINIQUE. Gil, FM5FJ, will be active in the CQWW DX SSB Contest
(October 29-30th) as a Single-Op/Single-Band (20m)/Low-Power entry.
QSL via KU9C.

IOTA NEWS.............
AS-191. (Update to OPDX.1033) The 7Z7AA activity from Jabal Al Lith,

Saudi Arabia, between November 17-25th, now has Web page
available at: http://www.dxcoffee.com/7z7aa
This is a rare IOTA. QSL via 7Z1CQ.

SA-046. A group of Brazilian operators will be active as PX7C from
Itamaraca Island, Brazil, during the CQWW DX SSB Contest
(October 29-30th) as a Multi-Single entry. Operators mentioned
are Cristovao/PY7GK, Antonio/PY7OO, Benedito/PY7VI, Cicero/
PY7ZY, Jemesson/PY7XC and Andre/PY0FF. QSL via PY7CRA.

J6, ST. LUCIA. The "Buddies in the Caribbean" DXpedition group which
specializes in 100 watt or less low power radios and the Buddipole
portable antenna systems will be back again to St. Lucia between December
4-12th. They state that the north shore Villa location was magnificent
on their first visit in February 2010, and they want to demonstrate
"ultralite" DXpeditioning into magnificent "vista" locations, operating
a field portable battery-only radio with backpackable, lightweight
antennas and most of all "having fun" with a new group of operators
who have never experienced the "other side of a pileup!" The eight
operators mentioned are: Budd/W3FF, Guy/N7UN, David/WD9CMD, Joe/N7BF,
Steve/WF2S, Tom/K9CJM, Bill/AA4OC, and Barclay/WU1B. There will be 3
villa stations in operation on 160-10 meters using CW, SSB, and RTTY
or PSK. At the same time, several teams will be battery-only, field
portable either from St. Lucia beaches or scenic mountain tops. The
group will participate in the ARRL 10m Contest (callsign: J68UN) between
December 10-11th. QSL via LoTW, eQSL, or mail to the operator's home
callsign (SASE required). For more details, see the following Web site
at: http://suitcasedxpeditions.com

NP4, PUERTO RICO. Felipe, NP4Z/KP3Z, will be active during the CQ WW
DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power
entry. QSL via N4AO.

PJ4, BONAIRE. Peter, PA8A, will once again be active as PJ4B from Bonaire
(SA-006) between Janaury 8-22nd, 2012. Activity will be holiday style
on the HF bands. QSL via PA8A direct only (w/2 USDS and SAE).

QSL INFO AND NEWS.....
9N1AA QSL STATUS. Carl, N4AA, Editor of "QRZ DX", reports: "I am pleased to report that Satish is back on the air after a very long time of inactivity. I have agreed to resume acting as his QSL Manager. I now have his logs for the first few days of his operation in mid-October 2011. *PLEASE*.... I do not have ALL of his old logs. Many of those were lost when his computer was confiscated and are no longer available. If you want me to check for any OLD contacts, E-mail me the data and I'll look, but it is doubtful that I can confirm many, if ANY, of those old contacts. *SAE with adequate postage is required for direct response."

QSL RECEIVED VIA LoTW: 6Y5/W1UE, AM5M, E72U, EA6AZ, GI5K, HA3LI, HA5AWT, HR1RTF, II5ITA, J37BO, JA2IVK, JH0IMP, LA5VSA, MI0LLL, MU0FAL, OE3GCU, OG0I, OH0X, OH8KTN, OM3TWN, OM4EX, ON4IQ, PX2T, RL9F, RN4ABD, S55O, SK3W, ST0R, SV0XCC/9, SV1EBV, UA9CGL, UN9LU, VE7AX, VK0TH, YV6BFE and ZK2V

QSLS RECEIVED VIA MAIL: 4L1UN, 4S7KM, EK6GB, HI3K, MH0Z, NH0J, RI1FJA, S79DO, ST0R, TI2MEF, TK5MH, UN7PBY, V63DX, VK9HR, W6HGF/KH0 and YB0NFL

QSLS RECEIVED VIA THE BUREAU: 5H3AP/3, 6W1SJ, 9M6XRO/P, B7P, BA6IV, BH3AGU, DL9GMM/MM, DU9/DL5SDF, EX/W0AIH, FY5FY, J28AA and T88ME

RADIO ARCALA TEAM POISED TO STRIKE HARD IN CQWW DX SSB CONTEST. A press release sent out by Jarmo, OH2BN, from Helsinki, dated October 25th, states:
"It is that great time of the year when the Northern folks typically head South but now increasingly also allow their own hardware to speak for Nordic supremacy.

MARKET REEF, OJ0X -- Challenging the soon-to-be freezing sea, they try to activate Market Reef for the first time as a CQWW SSB Contest multiplier. If lucky on this week's Thursday landing, OJ0X will be aired by Timo/OG9X, Olli/OH0XX, Martti/OH2BH, Harri/OH6VM and Teemu/SM0W in the Multi-2 category. You can follow their adventure at: http://www.qrz.com/db/OJ0X

AZORES ISLANDS, CR2X -- Early Tuesday morning, Toni, OH2UA heads to Radio Arcala's Atlantic outpost to see how improved 10M propagation can push his score to new heights. The Azores station is now furnished with a new dual FTdx5000 setup, with OM Power auto amps at all Radio Arcala stations.

ALAND ISLANDS, OH0X -- The world renowned OH0W site in Brando, Aland Islands, is now integrated into the Radio Arcala station network as OH0X, and an old warhorse Pertti, OH2PM, will be shooting for Northern Europe SOAB honors. Here the old wisdom is to face the challenge of young energy. OH0X cut the finish line first in the recent Polar Battle (CW) - the Scandinavian Activity Contest - with Toni, OH2UA, at the helm.

NORTHERN FINLAND, OH8X -- The Radio Arcala mother-ship on the Arctic Circle is to be manned by Kim, OH6KZP, amid good prospects for openings

with polar propagation on all three higher bands. The station recently won the SSB Polar Battle (SAC) with Tonno, ES5TV at the controls.

SOUTHERN FINLAND, OH2BH -- With a slightly different propagation out-look to North and West, Pasi, OH6UM, will try to maneuver somewhere in between, aiming to show up as a dark horse in this battle and ride the Northern Lights to another mathematical marvel while Martti is seaboard at OJ0X, now in his 50th consecutive CQWW.

You have five runners from the Polar Region to look for and nail down. Following the CQWW, these serious stations will present their 'clean sheets' - their success of staying up for 48 hours, without touching their bed sheets! All four are true all-band single-ops committed to following the newly promoted Contesting Code of Conduct due to be released after the race in the upcoming Contest Club Finland's PileUP! magazine, themed 'The Last Blast'.

All CQWW QSOs, SSB and CW, by Radio Arcala stations will be confirmed on a single X-rated QSL card and via LoTW. It is contesting time again at Radio Arcala."

SI9, SWEDEN (Special Event). Special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active once again between October 27th and November 2nd. Operators will be Marcel/ON6UQ and Jef/ON4ACA.. They plan to be an entry in the CQWW DX SSB Contest (October 29-30th). Outside of the contest, activity will be on 160-10 meters using CW and SSB.
Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
QSL via SM3CVM, direct or by the Bureau. For more information, visit the SI9AM Web page at: http://www.si9am.se

S0, WESTERN SAHARA (WFWL). Operator Mahfoud, S01MZ, has been active this past week on 20/15 meters usually between 1230-1800z. No other details are known about this station, so "Work First Worry Later". He states to QSL via EA1BT.

T32, CHRISTMAS ISLAND. The Five Star DXers Association (FSDXA) group is now QRT as T32C from Kiritimati. The T32C operation has made 213169/QSOs with 48914 Unique Callsigns (88416/SSB, 102216/CW, 13/PSK31, 1506/PSK63, 19225/RTTY and 1765/FM). They believe there are at least 10 new world records in the totals, plus there is the possibility that some of the 6m QSOs were 'firsts'. Logs are available on ClubLog at:
http://www.clublog.org/charts/?c&#65533;2C&a&#65533;bed
For more details, visit their Web page at: http://www.t32c.com

T32, CHRISTMAS ISLAND. QSL Manager Stan, KH6CG, reports on October 24th: "I just spoke to Nobby (G0VJG) one of the ops at T32C, he informed me that the Team left Tov, T32TV, four vertical antennas ands tons of coax, and a NEW Yaesu FT450D transceiver!!!!! They said Tov was so very grateful. I am so happy for him. I really appreciated the generosity of the T32C

team, and Yaesu to do this for my good friend Tov, T32TV. Now that's what Ham Radio is all about!!! :-) "

T7, SAN MARINO. Operators Manfred/DK2OY, Helmut/DK6WL and Sandy/DL1QQ will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via T70A, by the Bureau. All QSOs will be confirmed via Bureau. No cards needed. Also via LoTW .

TC3, TURKEY. Operators Can/TA3GO and XYL Elif/TA3YE will be active as TC3EC during the CQWW DX SSB Contest (October 29-30th) as a Multi-Op/ All-Band entry. QSL via TA3GO direct only.

TC88, TURKEY (Special Event). Look for members of the Giresun Radio Amateurs and Nature Sports Club (GITRAD) and Special Wireless Activity Team (TCSWAT) who are now active as TC88TC until October 30th. Activity is to celebrate 88th anniversary of the "Foundation of Republic of Turkey". Operations will be from Istanbul, Edirne and Giresun. Look for activity on the HF bands and on CW, SSB, PSK31 and SSTV. A special QSL card will be sent out. A list of operators will be updated in QRZ.com. QSL via TA1HZ.

TO5, FRENCH GUIANA (CW Op Needed For IOTA Op!). Operators Tonio/F4ACR, Christophe/F4CRE, Denis/F4DNU, Jean-Paul/F5OQK, Jean-Pierre/F6AIM and Jean-Pascal/FY5LH will be active as TO5G from Royale Island, Salut Islands (SA-020), between January 2-7th, 2012. QSL via F5KDR, direct or by the Bureau. The team is looking for a CW operator very quickly, as the DX-pedition team will leave from Paris on December 26th. For practical reasons, they looking for an operator that is able to speak a little French. An updated Yellow Fever vaccine is mandatory. The final personal budget is about 1200 Euros. If interested, write immediately to Jean Paul Jolly, 6 Chemin des Chaign&#65533;es, F85200 FONTENAY LE COMTE, FRANCE or send an E-mail to <f5oqk@orange.fr>.

TT8, CHAD. Phil, F4EGS, will once again be active as TT8PK from N&#65533;djamena, as of October 23rd and will be there until December 23rd. Activity will be limited due to his work schedule and spare time. Operations last time were on 40-10 meters using CW, SSB and some RTTY. QSL via F4EGS, by the Bureau or direct (see QRZ.com for details).
